INTRODUCTION

This book contains mundane, alchemical, and magic items for your DUNGEONS & DRAGONS® game. We have carefully scrutinized them for game balance and obedience to the rules. Nevertheless, we urge DMs and players to discuss these items before their first appearance, because each D&D campaign is unique. An adventure set in an extremely cold region might go awry if characters have access to new items that do fire damage, because many opponents are vulnerable to fire, for example.

INCORPORATING ITEMS INTO YOUR CAMPAIGN

The simplest way to add the new equipment in this book to your game is to just do it: add the items without explaining where they came from and why characters are just learning about them. Everyone around the table agrees to simply adopt the fiction that the items have always been available. Maybe mundane and alchemical items were always for sale in shops and bazaars the player characters never happened to visit. One day the PCs meet a new merchant in the marketplace and gain access to new items.

If that stretches credulity too far, DMs may instead encourage player characters to develop or design new items as they need them. For instance, the first time characters need a flexible, collapsible ladder, they can design and build the spider poles described in Chapter 2: Adventuring Gear.

DMs may gradually introduce new equipment as NPCs discover, design, and build the new items.

Player characters may discover new items when they travel to new regions. For example, if they travel to an oasis on the edge of the desert, they'll probably encounter merchants selling the desert outfits described in Chapter 2: Adventuring Gear.

Finally, DMs can take a long-term approach, adding the equipment from this book gradually and sparingly. To start, plant rumors and legends about strange magic items. As the characters gain levels and venture into more dangerous places, they uncover fragments of lost tales, including information about the magic items in this book. When the PCs finally find new magic items in a dragon hoard or similar treasure trove, they'll already know them by reputation.

WHAT'S IN THIS BOOK

The *Arms and Equipment Guide*, as you might expect, is devoted mainly to descriptions of new weapons, armor, and gear that characters and creatures can pos-

sess. However, this book is much more than a catalog of new items. Chapter by chapter, here's a summary of what you'll find inside.

Chapter 1: Weapons and Armor introduces dozens of new nonmagical weapons and types of armor. Here you'll also find discussions of which weapons and armor types should be available during certain technological eras, if the technology in your campaign is more primitive than in the historical medieval era.

Chapter 2: Adventuring Gear greatly expands the equipment and accoutrements available to characters and creatures, including adventuring gear, clothing, jewelry, edible items, alchemical items, superior items, and commodities. This chapter also features a long list of new poisons and their game statistics.

Chapter 3: Vehicles opens with a general discussion of the characteristics of vehicles and how to handle vehicles in play, particularly during combat and in the event of a collision. The chapter has a section on vehicle augmentations—magical and mundane accessories that characters can purchase to customize their vehicles or expand their capabilities. The last part of the chapter contains game statistics and other information about more than two dozen vehicles—including special modes of transport such as the dwarven tunneler and the shadow carriage.

Chapter 4: Hirelings and Creatures provides rules for finding hirelings and determining how much they charge to perform the work they're good at, including costs for hiring someone to cast a spell on your behalf. Those who want to assemble a fighting force will make use of this chapter's rules for hiring mercenaries and the advice on which kinds of monsters make the best exotic troops.

This chapter continues with a discussion of creatures that can serve as companions, pets, mounts, and guard creatures. New creatures described in this chapter include the climbdog, thudhunter, axebeak, hippocampus, equine golem, zaratan, soarwhale, giant dragonfly, and giant firefly.

Chapter 5: Magic Items takes up more than one fourth of this book. Following the format of Chapter 8 in the *DUNGEON MASTER's Guide*, this chapter provides new special abilities for magic armors, shields, and weapons; several new types of magic armor and shields; more than 150 new specific magic weapons; and separate sections for new potions, rings, rods, staffs, and wondrous items.

Chapter 6: Special Magic Items presents new material on intelligent items, cursed magic items, and artifacts, also in the format of Chapter 8 in the *DUNGEON MASTER's Guide*.

Appendix: Treasure Tables is a compilation of tables that can be used to randomly generate items of treasure from among those presented in this book.

CHAPTER 1: WEAPONS AND ARMOR

The two most important pieces of equipment many D&D characters will ever own are their primary weapon and the armor that protects them. The new weapons and armor described here, which supplement the gear available in Chapter 7 of the *Player's Handbook*, are designed for Medium-size creatures.

LARGER AND SMALLER WEAPONS

Some creatures, such as giants and pixies, wield weapons with different sizes than those presented in the *Player's Handbook*. These unusually sized weapons have different characteristics, including damage, weight, cost, range increment, and reach.

Size and Damage: If you design a version of a particular weapon that is larger or smaller than the standard presented in the *Player's Handbook*, you'll need to recalculate how much damage it deals. To determine the damage a larger or smaller weapon deals, first determine how many size categories it varies from the standard. A longsword (normally Medium-size and commonly used by Medium-size beings) suited for a

Huge cloud giant is two size categories bigger. Consult Table 1-1: Damage for Larger Weapons or Table 1-2: Damage for Smaller Weapons, finding the weapon's original damage in the left column and reading across to the right to find its new damage. For example, the cloud giant's longsword is increased twice from its base damage of 1d8, so it deals 3d6 points of damage.

Light and Heavy Crossbows: These weapons use the rules above. They follow the same cost and weight changes as other weapons, but are called out on Table 1-3: Damage for Larger and Smaller Crossbows.

Size, Weight, and Price: If you're designing a weapon larger than the standard, its weight increases by 50% for each size category increase. Its cost increases at the same rate. So if you design a Large version of a throwing axe (ordinarily a Small weapon weighing 4 pounds) it will weigh 9 pounds: A Medium-size version weighs 6 pounds, and a Large version increases the weight by a further 50%. Its cost increases by the same amount, so a Large throwing axe would cost 18 gp.

Weights decrease by 25% per size category decrease if you're designing a smaller version of a weapon. A throwing axe weighs only 3 pounds if you make a Tiny version of it. Costs also decrease by 25% per size category decrease, so a Tiny throwing axe would cost only 6 gp.

Size and Range: Larger and smaller versions of ranged weapons have correspondingly longer or shorter range increments. Each time you increase a

TABLE 1-1: DAMAGE FOR LARGER WEAPONS

Original Damage	First Increase	Second Increase	Third Increase	Fourth Increase	Fifth Increase	Sixth Increase
1	1d2	1d3	1d4	1d6	1d8	2d6
1d2	1d3	1d4	1d6	1d8	2d6	3d6

1d12	1d10	1d8	1d6	1d4	1d3	1d2

TABLE 1-3: DAMAGE FOR LARGER AND SMALLER CROSSBOWS

Crossbow Type	Weapon Size								
	Fine	Diminutive	Tiny	Small	Medium-Size	Large	Huge	Gargantuan	Colossal
Light	1d2	1d3	1d4	1d6	1d8	2d6	3d6	4d6	6d6
Heavy	1d3	1d4	1d6	1d8	1d10	2d8	3d8	4d8	6d8

weapon's size, lengthen its range increment by 25%. For example, Huge longbows, such as those wielded by ogre mages, have a range increment of 125 feet.

Each time you decrease a weapon's size, shorten its range increment by 25%. A Medium-size longbow in the hands of a halfling has a range increment of 75 feet.

Size and Reach: Most weapons keep the same effective reach no matter what their size (although the reach of their potential wielders certainly changes). However, weapons that normally have a reach of greater than 5 feet have different reaches when you design them at different sizes. If you're designing a larger version of such a weapon, increase its reach by 5 feet for each size category it increases. A Huge guisarme has a reach of 15 feet, for example, while a Gargantuan guisarme has a reach of 20 feet.

Designing smaller versions of reach weapons quickly makes reach irrelevant. A reach of 5 feet is normal for Medium-size and Small creatures. The important difference is that Tiny creatures using Small reach weapons can fight in melee as if they had 5 feet of reach, meaning they do not have to enter an opponent's space to attack.

NEW WEAPONS

The following weapons—mostly exotic weapons and new ammunition for ranged weapons—are suitable for a broad variety of D&D campaigns. Many are of Asian origin in the real world, but in your game, they can come from anywhere.

Monk Weapon List: Add the following weapons to the monk's weapon list: butterfly sword, sai, tiger claw, tonfa, three-section staff, and war fan. All except the three-section staff can be used with the monk's unarmed base attack bonus, including her more favorable number of attacks per round (see Table 3–10 in Chapter 3 of the *Player's Handbook*). Her damage, however, is standard for the weapon, not her unarmed damage. The weapon must be light, so a Small monk must use Tiny versions of these weapons in order to use the more favorable base attack bonus (see Larger and Smaller Weapons above).

A monk can also use her more favorable unarmed base attack bonus and number of attacks per round with the three-section staff, provided she takes the Exotic Weapon Proficiency feat for the weapon (due to its Large size). Small monks must use a Medium-size version of the three-section staff.

Ammunition and Weapon Proficiencies: Ammunition for ranged weapons requires no particular proficiency to use, although the weapons that propel the ammunition (usually bows) do. The Exotic Weapon Proficiency feat isn't required to use any item in the Ammunition category on Table 1–4: Weapons and the descriptive text below.

Weapon Descriptions

The weapons found on Table 1–4: Weapons are described below.

Arrow, Alchemist's: Each of these projectiles carries a deadly load of alchemist's fire in its hollow shaft. When it strikes a target, the arrow's shaft shatters, releasing the alchemist's fire directly onto the target. One round after impact, the alchemist's fire ignites, dealing 1d4 points of damage. The target can use a full-round action to attempt to extinguish the flames before taking this damage. It takes a successful Reflex saving throw (DC 15) to extinguish the flames. Rolling on the ground earns the target a +2 bonus on the save. Submerging (such as by leaping into a lake) or magically extinguishing the flames automatically kills the flames.

Arrow, Blunt: These arrows have wooden tips specially crafted to deal subdual damage instead of normal damage.

Arrow, Flight: The light shaft and special design of this masterwork arrow increases a bow's range increment by 25 feet.

Arrow, Signal: This arrow is specially designed to emulate a bird's call when fired. Elven fletchers craft the arrows to make calls that will be recognized as signals by the elves of the community. For example, a hawk's cry might signal an attack, and an owl's screech might signal a stealthy advance. A successful Wilderness Lore check (DC 20) determines whether the sound comes from a bird or another source. The intricate carving on the arrow shafts makes them clumsy in flight, imposing a –2 circumstance penalty on attack rolls.

Arrow, Thunder: Thunder arrows are tipped with thunderstones (see Chapter 7 of the *Player's Handbook*). A hit from a thunder arrow deals no damage but triggers the thunderstone's sonic attack. Thunder arrows that miss should be treated as attacks with a grenadelike weapon (see Chapter 8 of the *Player's Handbook*).

Battlepick, Gnome: A gnome battlepick is crafted and weighted to be used by creatures of Small size. A Small character can use a gnome battlepick two-handed as a martial weapon.

Bladed Gauntlet: Unlike with a standard gauntlet, an attack with a bladed gauntlet is not considered an unarmed attack. The bladed gauntlet has two blades that extend from the back of the wrist following the line of the forearm. The cost and weight are for a single gauntlet.

Bolas, Two-Ball: A set of two-ball bolas consists of two heavy wooden spheres connected by lengths of cord. It is a ranged weapon used to trip an opponent. When you throw a set of bolas, you make a ranged touch attack against your opponent. If you hit, your opponent must succeed on a Dexterity or Strength check opposed by your Strength check or be tripped.

TABLE 1-4: WEAPONS

MARTIAL WEAPONS—MELEE

Item	Cost	Damage	Crit	Range Increment	Weight	Type ²

War fan ¹	30 gp	1d6	×3	—	3 lb.	Slashing
Medium-size						
Chain-and-dagger ¹	4 gp	1d4	19–20/×2	—	4 lb.	Piercing
Khopesh ¹	20 gp	1d8	19–20/×2	—	12 lb.	Slashing
Longsword, mercurial ¹	400 gp	1d8	×4	—	6 lb.	Slashing
Large						
Duom ³	20 gp	1d8	×3	—	8 lb.	Piercing
Greatsword, mercurial ¹	600 gp	2d6	×4	—	17 lb.	Slashing
Gyrspike ^{1 4}	90 gp	1d8/1d8	19–20/×2	—	20 lb.	Bludgeoning, slashing
Mace, double ⁴	125 gp	1d8/1d8	×2	—	25 lb.	Bludgeoning
Manti ¹	15 gp	1d8	×3	—	9 lb.	Piercing
Scimitar, double ⁴	125 gp	1d6/1d6	18–20/×2	—	15 lb.	Slashing
Three-section staff	4 gp	1d8	×3	—	8 lb.	Bludgeoning
Huge						
Fullblade ¹	100 gp	2d8	19–20/×2	—	23 lb.	Slashing

Bolas can only trip Medium-size or smaller targets. Your opponent cannot trip you when you make a trip attack with a set of two-ball bolas.

Bolt, Tumbling: A tumbling bolt resembles a standard crossbow bolt except for a few minuscule holes and vents along the shaft. A channel allows air to pass through the bolt, which causes the bolt to tumble when fired. The bolt deals +2 damage but only has one-half its normal range increment due to the way the projectile moves through the air.

Calculus, Gnome: This oversized sling is made to fire flasks filled with liquid. Common ammunition includes acid, alchemist's fire, and other alchemical substances. Alchemical ammunition deals damage according to its properties, but it gains the range increment of the gnome calculus.

Chain-and-Dagger: When wielding the chain-and-dagger, you gain a +2 bonus on your opposed attack roll when attempting to disarm an opponent (including the roll to keep from being disarmed yourself, if you fail to disarm your foe). You can also use this weapon to make trip attacks, gaining a +2 bonus on

your trip attempt. If you are tripped during your own trip attempt, you can opt to drop the chain-and-dagger instead of being tripped.

Chakram: The chakram is a throwing disk or quoit about 1 foot in diameter, with a sharpened outer rim.

Claw Bracer: A claw bracer is a metal armband with three steel claws projecting from the top, extending about 4 inches beyond the tip of the wearer's extended fingers. The wearer can cast spells normally while wearing the bracer and cannot be disarmed. Many claw bracers are enhanced as magic weapons.

Crossbow, Great: A great crossbow requires two hands to use effectively, regardless of the user's size. You draw a great crossbow back by turning a winch. Loading a great crossbow is a full-round action that provokes an attack of opportunity.

A Medium-size character cannot shoot or load a great crossbow with one hand at all. With training, a Large creature can shoot, but not load, a great crossbow with one hand at a –4 penalty. If a Large creature attempts to fire a separate great crossbow in each

TABLE 1-4: WEAPONS (CONT.)

¹ See the description of this weapon for special rules.

² When two types are given, the weapon is both types.

³ Reach weapon.

⁴ Double weapon.

⁵ The weapon deals subdual damage rather than normal damage.

hand simultaneously, the standard penalties for two-weapon fighting apply.

Double Bow, Elven: This double-stringed longbow can be used as a normal longbow by anyone proficient in that weapon. Characters with Exotic Weapon Proficiency (elven double bow) can use the bow to fire two arrows at once. Nocking an arrow on the second string requires a move-equivalent action. Once the wielder has taken an action to load the second string, his next attack is a double shot that launches both arrows simultaneously at the same target. The wielder makes one attack roll at a –2 penalty to determine whether or not both arrows strike the target. If the attack is successful, both arrows deal normal damage. If the attack is a critical hit, only one arrow deals extra damage, and extra sneak attack damage is applied only once.

Duom: The duom is a long spear with a standard spearhead, as well as two blades curved so that they point backward along the shaft. The weapon has reach, allowing you to strike opponents 10 feet away with it. Those proficient with the duom can also attack adjacent foes with the reversed heads using a practiced “reverse thrust.” Apply a –2 penalty on the attack roll if you use the duom to attack a second, adjacent opponent in the same round you attacked the first opponent.

Fukimi-Bari (Mouth Darts): These slim, almost needle-like metal darts are concealed in the mouth, then spit at the target. Their effective range is extremely short, and they deal little damage, but they are highly useful when taking an opponent by surprise. You can fire up to three fukimi-bari per attack (all at the same target).

Do not apply your Strength modifier to damage with fukimi-bari. They are too small to carry the extra force that a strong character usually imparts to a thrown weapon. The cost and weight are for a single fukimi-bari.

Fullblade: A fullblade is 18 inches longer than a greatsword and is too large for a Medium-size creature to use with two hands without special training; thus, it is an exotic weapon. (Medium-size creatures cannot use a fullblade one-handed at all.)

A Large creature could use the fullblade with one hand, but it would be assessed the standard –4 non-proficiency penalty on its attack rolls; Large creatures can use the fullblade in two hands as a martial weapon. A Large creature with the Exotic Weapon Proficiency (fullblade) feat can use the fullblade in one hand, but a Medium-size creature must use both hands even if it has the relevant feat. A fullblade is also called an ogre's greatsword.

Gauntlet, Spring-Loaded: This gauntlet possesses a broad ridge of metal that extends along the bottom of the forearm to the edge of the wrist articulation, where a circular orifice is visible. This ridge of metal hides a spring-loaded mechanism that can expel a bolt with great force, akin to a miniscule crossbow. You load the gauntlet by inserting a bolt in the hole and pulling back a hidden lever. Loading the spring-loaded gauntlet is a move-equivalent action that provokes an attack of opportunity. You fire the spring-loaded gauntlet by sighting down your arm, then flip your hand back so that your palm faces your opponent—this motion fires the gauntlet. The cost and weight are for a single gauntlet.

A character who attempts to fire two spring-loaded gauntlets at once incurs the standard penalty for two-weapon fighting. The Ambidexterity feat lets someone avoid the -4 off-hand penalty.

Greatsword, Mercurial: This huge blade hides a secret reservoir of quicksilver (also called mercury by alchemists) that runs along the interior of the blade in a slender channel. When the blade is vertical, the mercury swiftly fills an interior bulb in the haft, but when swung, the heavy liquid flows out into the blade, making it heavier. In nonproficient hands, this shifting mass penalizes the wielder by an additional -3 penalty on attack rolls, beyond the normal -4 nonproficiency penalty for using an exotic weapon untrained.

Gyrspike: A gyrspike is a double weapon. A stout shaft holds a flail on one end and a longsword on the other. You can fight with it as if fighting with two weapons, but if you do, you incur all the normal attack penalties for two-weapon fighting, as if you were using a one-handed weapon and a light weapon.

You get a $+2$ bonus on your opposed attack roll when attempting to disarm an enemy when you wield a gyrspike (including the opposed attack roll to avoid being disarmed yourself if you fail to disarm your enemy).

You can also use this weapon to make trip attacks. If you are tripped during your own trip attempt, you can drop the gyrspike to avoid being tripped.

Harpoon: The harpoon is a broad-bladed spear forged with barbs. The shaft of the harpoon has a trailing rope attached to control harpooned opponents. Though designed for hunting whales and other large sea creatures, the harpoon can be used on dry land. Even with the Exotic Weapon Proficiency (harpoon) feat, creatures smaller than Medium-size take a -2 penalty on their attack rolls due to the harpoon's weight and bulk.

If it deals damage, the harpoon lodges in an opponent who fails a Reflex saving throw against a DC equal to $10 +$ the damage dealt. The harpooned creature moves at only half speed and cannot charge or run. If you control the trailing rope by succeeding at

an opposed Strength check while holding it, the harpooned creature can move only within the limits that the rope allows (the trailing rope is 30 feet long). If the harpooned creature attempts to cast a spell, it must succeed on a Concentration check (DC 15) or fail, losing the spell.

The harpooned creature can pull the harpoon from its wound if it has two free hands and it takes a full-round action to do so, but it deals damage to itself equal to the initial damage the harpoon dealt. For example, if you hit with a harpoon and deal 8 points of damage, the target takes another 8 points of damage when it removes the harpoon. A character who succeeds on a Heal check (DC 15) can remove a harpoon without further damage.

Javelin, Spinning: This light, flexible spear intended for ranged attacks resembles a standard javelin except for the spiral grooves that run down its length. You can loop a throwing string around the shaft (the other end is tied to your finger). The string imparts spin to the javelin upon release, improving the weapon's accuracy, range, and penetrating power by permitting a harder cast. Looping a string around the javelin is a move-equivalent action that provokes an attack of opportunity. Tying a casting string around your finger is a full-round action that provokes an attack of opportunity, but the same string is reused for multiple javelins. The javelin can be thrown without spinning it, in which case its damage, range, and threat range are those of a standard javelin. If used in melee, treat the spinning javelin as a standard javelin.

Khopesh: You can use a khopesh to make trip attacks with its hooklike blade. If you are tripped during your own trip attempt, you can drop the khopesh to avoid being tripped.

Longsword, Mercurial: As the mercurial greatsword, except that in nonproficient hands, the shifting mass and feel of the blade penalizes the wielder by an additional -2 penalty on attack rolls, beyond the normal -4 nonproficiency penalty for using an exotic weapon untrained.

Lucerne Hammer: This polearm resembles a pick on a pole and is designed to puncture heavy armor.

Mace, Double: A stout shaft with a spiked, cylindrical head at each end, this is a double weapon. You can fight with it as if fighting with two weapons, but if you do, you incur all the normal attack penalties associated with fighting with two weapons as if you are using a one-handed weapon and a light weapon (see *Attacking with Two Weapons* in Chapter 8 of the *Player's Handbook*). A creature wielding a double weapon in one hand can't use it as a double weapon.

Manti: A manti is a shortspear with four additional spear heads that project vertically from the

shaft, creating a star pattern of five blade heads instead of just a single forward-pointing blade. The advantage of the unusual blade arrangement is that you can make one additional attack of opportunity during the round.

Maul: The maul is simply a two-handed warhammer of enormous size. Dwarves favor it.

Panther Claw: The panther claw looks much like a punch dagger with two extra blades. The weapon retains the punch dagger's deadly force, and the extra blades are useful for disarming opponents. Wielders proficient with the panther claw gain a +4 circumstance bonus when making disarm attempts with it.

Sai: A sai's pronglike extrusions are designed to help catch and disarm opponents' weapons. If you attempt to disarm your opponent using a sai, you gain a +4 bonus on the opposed attack roll. (You don't gain any bonus if someone tries to disarm you of your sai.)

A monk using a sai can strike with her unarmed base attack bonus, including her more favorable attacks per round, along with other applicable modifiers.

Sapara: This ancient sword is a smaller version of the khopesh. You can use a sapara to make trip attacks with its hooklike blade. If you are tripped during your own trip attempt, you can drop the sapara to avoid being tripped.

Scimitar, Double: The curved blades of the double scimitar are used most effectively when spinning and twirling with the weapon. Despite its size, the weapon benefits more from quick, precise movement than from brute force. The double scimitar is a double weapon. You can fight with it as if fighting with two weapons, but if you do, you incur all the normal attack penalties associated with fighting with two weapons as if you are using a one-handed weapon and a light weapon (see *Attacking with Two Weapons* in Chapter 8 of the *Player's Handbook*). A creature using a double weapon in one hand can't use it as a double weapon.

Shotput, Orc: Special training turns a grapefruit-sized sphere of crude iron into a deadly projectile. Even with the Exotic Weapon Proficiency (orc shotput) feat, a wielder must be Medium-size or larger to use the weapon effectively (or take an additional -3 penalty on attack rolls in addition to the standard -4 nonproficiency penalty).

Skiprock, Halfling: These polished, perfectly weighted stones are prized by halflings, for if thrown well enough, they ricochet off one target to strike a second. If the skiprock hits its target, it ricochets toward another target of the thrower's choice adjacent to the original target (within 5 feet). The thrower immediately makes a second attack roll for the skiprock against the new target, with an attack bonus equal to the first roll -2.

Skiprocks could be used as sling bullets, but using a skiprock's ricochet ability in conjunction with a sling requires taking the Exotic Weapon Proficiency feat specifically for that purpose.

Stump Knife: A stump knife is akin to a punching dagger, except that it can be securely attached to the stump of a missing forelimb. For someone proficient in its use, the stump knife becomes an extension of his body. Against foes to whom you have dealt damage during a continuous melee, the stump knife's threat range is doubled (17–20). Your opponent cannot disarm you of a stump knife.

Sword, Butterfly: A monk using a butterfly sword fights with her unarmed base attack bonus, including her more favorable number of attacks per round, along with other applicable modifiers.

Three-Section Staff: Originally a farm implement for threshing grain, this weapon is composed of three sections of wood of equal length, joined at the ends by chain, leather, or rope.

A monk using a three-section staff (for which she must take an Exotic Weapon Proficiency feat) fights with her unarmed base attack bonus and her more favorable number of attacks per round, along with other applicable attack modifiers. The three-section staff requires two hands to use.

Throwing Iron: These weapons have complex blades with two or more edged or pointed protrusions. Unlike most hurled weapons, throwing irons are as often thrown along a horizontal plane as along a vertical one.

Tiger Claws: Also known as “bagh nakh,” this is a strap or glove fitted with spikes in the palm and wielded like brass knuckles. Your opponent cannot use a disarm action to disarm you of tiger claws. An attack with tiger claws is considered an armed attack. A monk using tiger claws can strike with her unarmed base attack bonus, including her more favorable number of attacks per round, along with other applicable modifiers. The cost and weight are for a single tiger claw.

A slightly different version, the nekode, is both a weapon and a climbing tool. Using a pair of nekodes while climbing grants a +1 circumstance bonus on Climb checks. This bonus does not stack with the +2

bonus from using a climber's kit, because they're essentially the same circumstance.

Tonfa: A monk using a tonfa can strike with her unarmed base attack bonus, including her more favorable number of attacks per round, along with other applicable modifiers.

Triple Dagger: This weapon is used in the off hand as a means to disarm an opponent—you hold it as you would a shield, not another weapon, and so do not take penalties for fighting with two weapons. When using a triple dagger, you get a +3 circumstance bonus on your opposed attack roll when attempting to disarm an opponent (including the roll to keep from being disarmed if you fail to disarm your opponent). The triple dagger could also be used as a normal dagger, if desired, but if used in the off hand, all normal penalties for fighting with two weapons apply.

War Fan: This weapon appears to the untrained eye as nothing more than a beautifully crafted lady's fan. In fact, the vanes of the fan are crafted from steel, and the tips are needle-sharp. When first entering melee using a war fan, you may attempt a Bluff check against an opponent's Sense Motive check. If you win the contest, you gain a +4 bonus on attacks made against that foe during the first round of combat.

Ward Cestus: This is a stout leather gauntlet with a well-forged metal weight sewn into it over the knuckles. A strike with a ward cestus is considered an unarmed attack. If you take a Total Defense action, you gain an additional +1 bonus to your Armor Class, representing blows you block with the back of your protected hand. Your opponent cannot disarm you of a ward cestus. The cost and weight are for a single ward cestus.

Whip, Mighty: A character who takes the Exotic Weapon Proficiency (whip) feat is also proficient in the mighty whip. A mighty whip is made with especially heavy material that allows a strong wielder to take advantage of an above-average Strength score. The mighty whip allows you to add your Strength bonus to its subdual damage, up to the maximum bonus indicated.

Whip-Dagger and Whip-Dagger, Mighty: A character who takes the Exotic Weapon Proficiency

TABLE 1–5: MIGHTY WHIPS AND WHIP-DAGGERS

Item	Cost	Damage	Crit	Range	Weight	Type
Whip, mighty ¹						
+1 Str bonus	200 gp	1d2 ²	×2	15 ft. ¹	3 lb.	Slashing
+2 Str bonus	300 gp	1d2 ²	×2	15 ft. ¹	4 lb.	Slashing
+3 Str bonus	400 gp	1d2 ²	×2	15 ft. ¹	5 lb.	Slashing
+4 Str bonus	500 gp	1d2 ²	×2	15 ft. ¹	6 lb.	Slashing
Whip-dagger, mighty						
+1 Str bonus	225 gp	1d6	×2	15 ft. ¹	4 lb.	Slashing
+2 Str bonus	325 gp	1d6	×2	15 ft. ¹	5 lb.	Slashing
+3 Str bonus	425 gp	1d6	×2	15 ft. ¹	6 lb.	Slashing
+4 Str bonus	525 gp	1d6	×2	15 ft. ¹	7 lb.	Slashing

¹ See weapon entry for special rules.

² Weapon deals subdual damage.

(whip) feat is also proficient in the whip-dagger. Unlike standard whips, the whip-dagger's ability to deal damage is unhindered by armor bonuses and natural armor bonuses. Although you keep it in hand, the whip-dagger is treated as a ranged weapon with a maximum range of 15 feet and no range penalties.

Because the whip-dagger can wrap around an enemy's leg or other limb, you can make trip attacks with it. If you are tripped during your own trip attempt, you can drop the whip dagger to avoid being tripped.

You get a +2 bonus on your opposed attack roll when attempting to disarm an opponent (including the roll to keep from being disarmed yourself if you fail to disarm your opponent).

A mighty whip-dagger is made with especially heavy material that allows a strong user to take advantage of an above-average Strength score. The mighty whip-dagger allows you to add your Strength bonus to damage, up to the maximum bonus indicated.

WEAPONS AND TECHNOLOGY

In the historical real world, armor and weapons developed in parallel—an arms race with advances in defensive technology matched and often exceeded by advances in offensive technology. If you set your campaign in an earlier cultural period than the default assumption for the D&D game, you might want to limit access to certain weapons. Certain cultures in your campaign world may be limited to earlier technology than the mainstream, with stone-age jungle dwellers being only the most obvious example. Perhaps the barbarians of the frigid wastelands are limited to Dark Ages technology, while a ten-thousand-year-old empire is stuck with the Bronze Age technology handed down to it by its deity-rulers.

Table 1–6: Weapons, Technology, and Culture shows what weapons are common during four pre-medieval historical eras. Stone Age cultures include the stereotypical jungle “savages,” as well as, for example, plains-dwelling tribes or Aztec-like empires. Bronze Age societies resemble the kingdoms and empires of the classical era, and may be particularly useful for describing cultures that worship the Olympian or Pharaonic pantheons presented in *Deities and Demigods*. These cultures have little or no access to iron and remain at a marked disadvantage in warfare against iron-equipped enemies. Dark Ages cultures include most barbarian or backwater cultures in a traditional D&D campaign, marked by the invention of the stirrup, light armor, and relatively simple weapons. The Crusades era represents the last period of technological development before the standard D&D framework, with

the first flowering of the mounted knight, the introduction of the crossbow, and the appearance of plate armor.

If a weapon isn't listed in Table 1–6, either it doesn't have a real-world history (such as the orc double axe), or it wasn't prevalent during any of the premedieval historical eras (such as the rapier).

Weapon Equivalents

A claymore is a zweihander is a no-dachi—a greatsword by any other name would cut as deep, deal 2d6 points of slashing damage (threat range 19–20), weigh 15 pounds, and function as a Large martial melee weapon. We could have filled this book with individual statistics for all of the historical weapons whose names appear in Table 1–6: the gladius, the tulwar, the cutlass, the jambiya, and so on. The simple fact of the matter is, however, that the D&D game doesn't really need more simple and martial weapons than it already has.

The simple and martial weapons presented in the *Player's Handbook* cover all the necessary bases: Small, Medium-size, and Large weapons that present the most common weapons found in both fantasy and historical sources, represent a balance of damage values with criticals and special features, and deal bludgeoning, piercing, and slashing damage.

Adding more martial weapons, such as a gladius distinct from the short sword, creates a number of problems. First, what niche would the gladius fill? It could be the 1d6/×3 weapon, but we've already got the handaxe. It could deal 1d4 damage and threaten on 18–20, but that niche is filled by the kukri, an exotic weapon (exotic because it's Tiny and unusually good for a weapon that size). In short, the bases are covered as far as Small martial weapons go, and a fighter with proficiency in all of them doesn't really need more options.

Even if you're designing an entire campaign around a culture different from the generic European flavor of the *Player's Handbook*, you probably don't need new martial weapons; you can use the weapon equivalencies instead. *Oriental Adventures*, for example, has only three new martial weapons. The wakizashi is simply a masterwork short sword like the drusus, the nagamaki is statistically close to the guisarme, but lighter, less expensive, and lacking both reach and trip capability, and the naginata is almost identical to the glaive.

Where D&D has much more room for innovation is in exotic weapons. Remember that “exotic weapons” in D&D doesn't mean “originating in a foreign culture,” it means weapons that require special training to use. Characters who use exotic weapons are spending a feat to learn how to wield them effectively, so exotic weapons generally offer some additional bang in exchange for that feat “buck.”

TABLE 1–6: WEAPONS, TECHNOLOGY, AND CULTURE

Weapon Name	Stone Age	Bronze Age	Dark Ages	Crusades	Other Names (Culture)
Axe, throwing	—	C	C	C	Francisca (Celts)
Battleaxe	—	C	C	C	Ch'iang, ch'i fu, chi, chien, fu, i huang, liu (China); tungi (India); masakari, ono (Japan); dao (Nepal)

Lance, light	—	C	C	C	
Longbow	—	C	C	C	
Longbow, composite	—	—	—	C	Dai-kyu (Japan)

WEAPON MATERIALS

Table 1–6 shows the dagger as a common weapon in Stone Age cultures. Does this mean that jungle tribes are frequently encountered wielding fine steel daggers? Of course not. Stone Age weapons are generally made of bone and stone, while Bronze Age weapons are usually made of bronze. The *DUNGEON MASTER'S Guide* gives some guidelines for such inferior weapons; at the DM's option, these more comprehensive rules can supplement those presented there. Hit points for various weapon types are shown on Table 1–7: Low-Tech Weapon Hit Points.

Stone Age: As stated in the *DUNGEON MASTER'S Guide*, weapons made of bone or stone have a –2 attack and damage penalty (with a minimum damage of 1). Bone has a hardness of 6 and 10 hit points per inch of thickness. Stone has a hardness of 8 and 15 hit points per inch of thickness.

Bronze Age: Weapons of bronze, while clearly inferior to steel items, are not nearly as bad as stone or bone weapons. Their attack and damage penalty is only –1 rather than –2. Bronze has a hardness of 9 and 20 hit points per inch of thickness.

Hafted weapons (that is, weapons with wooden shafts, such as axes and spears) use the values shown on Table 8–13: Common Weapon and Shield Hardness and Hit Points in the *Player's Handbook*.

Special Weapon Materials

The various planes of existence are exotic, otherworldly landscapes where even the fundamental elements of the universe may be drastically different than on the Material Plane. Extraplanar weaponsmiths use certain minerals from these planes, particularly the Outer Planes, to make weapons with special qualities, and these weapons sometimes find

TABLE 1–6: WEAPONS, TECHNOLOGY, AND CULTURE (CONT.)

Weapon Name	Stone Age	Bronze Age	Dark Ages	Crusades	Other Names (Culture)
Longspear	—	C	C	C	Craisech (Celts); mao, qiang (China); ahlspiess (German and Swiss); sarissa (Greece); lembing (Malaysia)
Longsword	—	C	C	C	Jian, tau-kien (China); gum (Korea); spatha (Rome)
Lucerne hammer	—	—	—	U	Bec de corbin (France)

Scimitar	—	—	C	C	Saif (Arabia); dha (Burma); kastane (Ceylon); dao, da huan dao (nine-ring sword) (China); adya katti, tulwar (India); parang (Indonesia); kora (Nepal); shamshir (Persia); bolo (Philippines); kilij, yataghan (Turkey); cutlass, saber (early modern Europe)
Scythe	—	—	C	C	
Shortbow	C	C	C	C	
Shortbow, composite	—	C	C	C	Gong jian (China); yumi (Japan)
Shortspear	C	C	C	C	Yari (Japan); hasta (Rome)
Siangham	—	—	U	U	
Sickle	—	C	C	C	
Sling	C	—	—	—	
Sword, bastard	—	—	—	U	Wo dao (China); khandar (India); katana ¹ , tachi (Japan); ram dao (Nepal)
Sword, short	—	C	C	C	Duan jian (China); katzbalger (Germany); choora, zafar takieh (India); kris, pedang (Indonesia); cinquedeas (Italy); dan sang gum (Korea); barong (Philippines); drusus ¹ , gladius (Rome)
Trident	—	C	—	—	San cha, tiger lance (China); magari yari (Japan); fuxina (Rome)
Warhammer	—	C	C	C	Chui (China); dai tsuchi (Japan)
Whip	U	C	C	C	Pi bian (China)

C: Common in this time period.

U: Uncommon in this time period.

—: Not usually found in this time period.

¹ The katana is a masterwork bastard sword. The drusus is a masterwork gladius (short sword).

their way to the Material Plane. Like adamantine, mithral, and darkwood, these materials bestow special properties on the items forged from them, with the particular benefit that these properties are not magical in nature (and thus do not go away in an *antimagic field*, for example).

Baatorian Green Steel: Deep in the mines of the Nine Hells of Baator, veins of green-flecked iron run through the rock. This rare metal, when alloyed

into steel, can be used to create weapons of amazing sharpness. Any slashing or piercing weapon created with Baatorian green steel has a natural enhancement bonus of +1 to damage. This bonus does not stack with any other enhancement bonus. Thus, a green steel (+1 to damage) longsword with a +4 enhancement bonus effectively has a +4 enhancement bonus on both attacks and damage. In an area where magic does not function, it still retains its natural +1

TABLE 1–7: LOW-TECH WEAPON HIT POINTS

Weapon	Example	Bone hp (hardness 6)	Stone hp (hardness 8)	Bronze hp (hardness 9)
Tiny blade	Dagger	1	1	1
Small blade	Short sword	1	1	1
Medium-size blade	Longsword	2	3	4
Large blade	Greatsword	3	5	7
Small metal-hafted weapon	Light mace	—	—	7
Medium-size metal-hafted weapon	Heavy mace	—	—	16

enhancement bonus on damage. A masterwork green steel slashing or piercing weapon would have a +1 bonus on both attack and damage rolls (from a combination of masterwork and the green steel). Though green steel is a common component of *keen weapons* produced in the Lower Planes, it grants no other special ability to such weapons. The market price modifier for such a weapon is +2,000 gp.

Baatorian green steel has a hardness of 12 and 30 hit points per inch of thickness.

Gehennan Morghuth-Iron: This volcanic mineral is unique to the steep mountains of the Bleak Eternity of Gehenna, where it is occasionally mined by neutral evil fiends called yugoloths and other creatures on that forbidding plane. It forges poorly, making weapons that appear pocked and pitted and have a -1 attack and damage penalty. However, morghuth-iron is extremely toxic, rapidly poisoning the blood. A slashing or piercing weapon made of Gehennan morghuth-iron is naturally poisonous. The weapon delivers its poison (Fortitude save DC 12) with each successful attack. The initial damage is 1 point of temporary Dexterity; the secondary damage is 1d4 points of temporary Dexterity. The market price modifier for a weapon made of morghuth-iron is +4,000 gp.

Gehennan morghuth-iron has a hardness of 9 and 20 hit points per inch of thickness.

Solanian Truesteel: Mined on the fourth layer of the Seven Mounting Heavens of Celestia, this fine iron needs no alloy and shines with a silvery gleam. When forged into a weapon, it gives the wielder a +1 bonus on the confirmation roll for a critical hit. The market price modifier for such a weapon is +1,000 gp.

Solanian truesteel has a hardness of 11 and 25 hit points per inch of thickness.

armorsmiths tend to work with whatever they have at hand. Elves and druids locked deep in primeval forests, for example, find refined metal a rare commodity. Surrounded by plants and magic, however, some elven smiths craft wonders out of their everyday environment.

Armor Descriptions

Bark: This armor is carefully crafted from the tough bark of ancient trees and is treated to prevent it from becoming brittle over time. Strips of bark are layered together over a quilted layer of felt or hide. Bark armor is more flexible than wooden armor but does not provide as much protection. Druids can wear bark armor without losing access to their spells and class features. Bark armor includes arm, leg, chest, and back protection, but it does not include gauntlets.

Bondleaf Wrap: Bondleaf wraps are each crafted from a single enormous leaf

found on magical trees. A bondleaf wrap is inactive until worn for 24 hours.

During this time, it grows into the skin, drawing water and nutrients from its host. Afterward, as a standard action, you can command it to wrap around your body.

Bone: Bone armor is a cloth or leather coat reinforced with strips of bone, often cut from animals used for food. The armor covers the torso but leaves the limbs free for better mobility.

Brigandine: Brigandine armor consists of a coat of leather plates, each plate consisting of leather with a strip of steel inside it. It is essentially a light form of splint mail.

Buckler, Beetle: This buckler is actually a Tiny scarab beetle that latches onto the forearm. You must wear the beetle for a full day before the beetle buckler confers any bonus to Armor Class. Once it's attuned to its wearer, the beetle buckler is effectively a masterwork buckler with a nonmagical +1 enhancement bonus to Armor Class.

With a command word, you can detach the beetle. Then the beetle takes wing, darting around your body and blocking ranged attacks (as the Deflect Arrows feat, but using the beetle's Reflex save bonus, not your own). The beetle cannot be ordered to attack, but it defends itself if attacked.

NEW ARMOR TYPES

The new varieties of armor described below supplement those described in Chapter 7 of the *Player's Handbook*. Many use unusual raw materials, because

TABLE 1–8: NEW ARMOR

Armor	Cost	Armor Bonus	Max Dex Bonus	Armor Check Penalty	Arcane Spell Failure	Speed 30 ft./20 ft.	Weight
Light armor							
Bark	5 gp	+2	+5	–2	15%	30 ft./20 ft.	15 lb.
Bondleaf wrap	1,000 gp	+1	—	—	—	30 ft./20 ft.	2 lb.
Bone	20 gp	+3	+4	–3	15%	30 ft./20 ft.	20 lb.
Cord	15 gp	+2	+5	–1	5%	30 ft./20 ft.	15 lb.
Leather scale	35 gp	+3	+6	–2	15%	30 ft./20 ft.	20 lb.
Moon-ivy	16,000 gp	+4	+6	+0	10%	30 ft./20 ft.	5 lb.
Wicker	1 gp	+1	+5	+0	10%	30 ft./20 ft.	5 lb.
Wood	15 gp	+3	+4	–3	15%	30 ft./20 ft.	15 lb.
Medium armor							
Brigandine	30 gp	+4	+2	–5	30%	20 ft./15 ft.	40 lb.
Lamellar	150 gp	+5	+3	–4	30%	20 ft./15 ft.	35 lb.
Ring	75 gp	+4	+4	–3	30%	20 ft./15 ft.	35 lb.
Shell	25 gp	+3	+3	–2	20%	20 ft./15 ft.	20 lb.
Heavy armor							
Coral	225 gp	+6	+1	–7	30%	20 ft./15 ft.	40 lb.
Dendritic	2,000 gp	+9	+0	–8	40%	20 ft./15 ft. ¹	60 lb.
Stone, dwarven	1,750 gp	+9	+0	–7	40%	20 ft./15 ft.	80 lb.
Shields							
Buckler, beetle	6,600 gp	+2	—	–1	5%	—	5 lb.
Dastana	25 gp	+1	—	–1	5%	—	5 lb.
Shield, stiletto	30 gp	+1	—	–1	5%	—	10 lb.
Extras							
Quick-escape	+300 gp	—	—	—	—	—	+2 lb.

¹ See the description of this armor for special rules.

Beetle Buckler: CR 1/2; Tiny vermin; HD 1d8; hp 4; Init +6; Spd 10 ft., fly 40 ft. (good); AC 24 (touch 18, flat-footed 18); Atk –3 melee (1d3–5, bite); Face/Reach 2 1/2 ft. by 2 1/2 ft./0 ft.; SQ Deflect arrows, vermin traits; AL N; SV Fort +2, Ref +6, Will +0; Str 1, Dex 23, Con 10, Int —, Wis 10, Cha 2.

Skills and Feats: Hide +14, Listen +4, Move Silently +10, Spot +4.

Deflect Arrows (Ex): When detached from its shield position, a beetle buckler darts about in its owner's space, blocking one ranged attack per round as the Deflect Arrows feat.

Vermin Traits: Immune to all mind-influencing effects; darkvision 60 ft.

Coral: Commonly worn by warriors of seafaring races, such as merfolk and tritons, coral armor is not so much created as grown. Exotic and rare corals are shaped over time to create armor for a specific person. Someone wearing coral armor that was not grown for them takes an additional –1 armor check penalty. Coral armor covers only the top half of the wearer—breastplate and bracers. Swim speed is reduced by 10 feet when wearing coral armor. However, because of its design, coral armor effectively weighs 10 pounds less in water.

Growing coral armor requires the Craft (coralshaping) skill.

Cord: Fibers of hemp or other natural material woven and knotted into a thick, tough fabric are the basis for cord armor. The armor forms a complete

suit, hampering movement but offering decent protection without the use of metal or leather. Cord armor is particularly popular among wild elves, who often avoid curing animal hide.

Dastana: This pair of metal bracers can be worn in addition to some other types of armor to provide an additional armor bonus that stacks with both the foundation armor and any shield worn. You can wear dastana with padded, leather, or chain shirt armor. You need the Armor Proficiency (light) feat to wear dastana without penalty.

Dendritic: Dwarf armorsmiths grow dendritic armor from seed crystals deep underground; dendritic armor never reaches the smith's fire. Each suit of dendritic armor is tailored for a specific wearer. This superb armor is socketed rather than riveted together, leaving almost no gaps or chinks. It protects better than full plate armor, but is also heavier and more cumbersome.

Dendritic armor constantly grinds crystal flecks off, and regrows itself to its original shape. Anyone tracking a person wearing dendritic armor gains a +2 circumstance bonus on skill checks from the fine trail of crystals left behind. To remove dendritic armor, you must break your way out by succeeding at a Strength check (DC 25). As long as you leave at least 5 pounds of dendritic armor somewhere on your body, the armor grows back in 8 hours.

Lamellar: Similar to splint and brigandine armor, lamellar lies between the two in protective value. It consists of small, overlapping plates of metal sewn together or stitched to a backing of leather or cloth.

Leather Scale: Leather scale armor is just like the scale mail described in Chapter 7 of the *Player's Handbook*, except that the scales are made of cured leather instead of metal.

Moon-Ivy: Moon-ivy armor is a close-fitting bodysuit that grows every night and dies at the end of every day. You put on a wreathlike choker before going to sleep. Overnight, a tight but flexible bodysuit of ivy grows over your body. When you awaken, you are wearing a tough, fibrous light armor. Removing the choker causes the moon-ivy armor to wither in 5 rounds.

For an additional 500 gp, one of the following types of ivy can be grafted into the armor.

Poison Ivy: The ivy exudes a poisonous resin. Once per day, if you succeed on a grapple check, your foe must make a Fortitude save (DC 14). If the defender fails, he takes initial and secondary damage of 1d3 points of temporary Constitution. This poison never affects the wearer.

Explosive Spores: The ivy is laced with noxious, explosive spores. Each day, the ivy grows 1d3 spore pods, to a maximum of ten pods. Whenever you are struck in combat with a bludgeoning attack, one of the spores explodes into the space from which the attack came. Anyone in that 5-foot square must succeed on a Fortitude save (DC 14) or be nauseated for 1d6 rounds. Once all of a day's spores are exhausted,

the effect is inert until the next day. This nausea never affects the wearer.

Pheromones: Once per day, the ivy exudes pheromones that make you seem more attractive. The pheromones grant a +3 bonus on all Charisma-based checks for 3 hours. The bonus doubles to +6 if you attempt to influence a creature with scent, but moon-ivy pheromones do not affect constructs or undead.

Quick-Escape: Ingeniously crafted, this armor uses special buckles, straps, and releases so it can be removed in mere moments. It is a favorite of wealthy sailors and adventurers who anticipate going near bodies of water.

As a standard action, the wearer pulls and twists on a special lock, located on the shield-side hip, which causes the armor to fall away. Each lock is unique in operation, making it difficult for anyone other than the owner to undo, especially in the middle of battle. A Disable Device check (DC 30) is required for someone other than the wearer to release the armor in combat. If the Disable Device attempt is made while the wearer is not in combat (a rogue sneaking up on a sleeping guard, for example), then the DC is reduced to 15.

The quick-escape extra must be included during the creation of the armor, which must be of masterwork quality. It takes twice as long as normal to put on quick-escape armor.

*Bark
Armor*

*Shell
Armor*

*Ring
Armor*

*Stiletto
Shield*

*Coral
Armor*

*Dwarven
Stone
Armor*

Ring: Ring armor is composed of tough leather, heavily reinforced with hundreds of small metal rings. Ring armor is the precursor to chainmail and is commonly found in cultures that haven't discovered how to create that type of armor. It is a cheap and effective protection, popular among town guards.

Shell: This armor is created out of specially treated tortoise shells and more exotic sea life. The armormaking process softens the shells, making them far more pliable and likely to bend instead of shatter when struck. Shell armor includes a breastplate, shoulder guards, and even gauntlets created from smaller and smaller shells. Druids can wear shell armor without losing access to their spells or class features.

Shield, Stiletto: This small wooden shield has a special switch located on the inside grip. When triggered, four blades pop out from the edges of the shield, and one larger blade springs out from the middle. Triggering and retracting the blades is a free action. When the blades are activated, the stiletto shield counts as a spiked shield in all respects.

Stone, Dwarven: Found almost exclusively among dwarven kingdoms, this extremely rare armor is created from thin sheets of a specially treated stone resembling marble. Dwarven stone armor is very heavy and more ornamental than practical; consequently it is the dress uniform for many dwarven defenders. It provides impressive protection, as long as the person wearing it does not plan on moving very fast. Dwarven stone armor includes greaves and helmet, but not gauntlets.

Wicker: Wicker armor is the poor soldier's last resort. Tightly woven reeds cover the entire body, offering slightly more protection than normal clothes, although the wicker is bulky and loud. The main advantage of wicker armor is its low cost and light weight. Clever armorsmiths sometimes weave thorns into the wicker, effectively creating spiked armor.

Wood: Similar to bone armor, wood armor is cloth or leather reinforced with strips of wood.

TABLE 1–9: DONNING ARMOR

Armor Type	Don	Don Hastily	Remove ¹
Bone, cord, wood, leather scale, ring, or wicker	1 minute	5 rounds	1 minute
Brigandine or lamellar	4 minutes ¹	1 minute	1 minute
Bark, shell, or coral	4 minutes	1 minute	1 minute
Stone, dwarven	4 minutes ²	4 minutes ¹	1d4+1 minutes
Dendritic or moon-ivy	8 hours	—	5 rounds
Bondleaf wrap	24 hours	—	1 round
Quick-escape	×2 ³	×2 ³	1 action

¹ If you have some help, cut this time in half. A single character doing nothing else can help one or two adjacent characters. Two characters can't help each other don armor at the same time.

² You must have help to don this armor. Without help, you can only don it hastily.

³ It takes twice as long to don quick-escape armor as it does normal armor of the same type.

ARMOR AND TECHNOLOGY

As with weapons, different forms of armor in your campaign might be restricted to certain cultures, depending on the level of technology available to those cultures.

Champions of an ancient empire serving the Pharaonic pantheon and wielding bronze khopeshes shouldn't be decked out in steel full plate or even chainmail—they're more likely to wear bronze breastplates, at best.

Table 1–10: Armor, Technology, and Culture uses the same technological eras as Table 1–6: Weapons, Technology, and Culture to show what forms of armor might be common in such cultures. If armor isn't listed in Table 1–10, it either doesn't have a real-world history (such as dwarven stone armor), or it wasn't prevalent during any of the premedieval historical eras (such as full plate).

While weapons tend to have a common form and vary only in their material over the course of technological advancement (bone or stone dagger yields to bronze dagger, which yields to iron or steel dagger), different forms of armor are technological advancements in themselves. Stone-age cultures don't make bone or stone chainmail—they use leather, padded, wood, or bone

Bronze
Breastplate

Getting into and out of Armor

The time required to don armor depends on its type (see the table below).

TABLE 1–10: ARMOR, TECHNOLOGY, AND CULTURE

Armor Type	Stone Age	Bronze Age	Dark Ages	Crusades
Banded mail	—	—	U	U
Bark	C	—	—	—
Bone	C	—	—	—
Breastplate	—	U	U	U
Brigandine	—	—	—	U

Ring mail	—	—	C	C
Scale mail	—	U	C	U
Splint mail	—	—	—	U
Studded leather	—	C	C	C
Wicker	C	—	—	—
Wood	C	—	—	—

C: Common in this time period

U: Uncommon in this time period

—: Not usually found in this time period

armor. Historically, only a few exceptions to this rule exist, and they are all made of bronze.

Bronze Shields: Bronze shields have the same protective value as steel shields, and their cost and weight are the same. The hardness of a bronze shield is 9 (compared to iron's 10), however. A small bronze shield has 7 hit points, and a large bronze shield has 14 hit points.

Bronze Breastplate: While the relative softness of bronze diminishes its usefulness in weapons, it allows elaborate sculpting of bronze breastplates, which makes this armor a favorite of some military commanders. It is also popular parade dress. A bronze breastplate's armor bonus is 1 worse than a steel breastplate's (+4), but its maximum Dexterity bonus is 1 better (also +4).

Armor Equivalents

For whatever reason, historical armor generally seems easier to categorize than weapons, and armor isn't subject to the same abundance of nomenclature that exists to describe weapons. There is therefore no need to provide equivalents for most forms of armor—there is a general understanding of what full plate or chainmail armor is, and you aren't likely to run across hundreds of variant names for these armors.

As always, there are exceptions—in this case, primarily the armor of the ancient Romans. Early Roman armor was called *lorica*—a hard leather cuirass similar to leather armor in D&D. The term expanded to include the three most common kinds of Roman metal armor: *lorica segmentata* (banded mail), *lorica hamata* (a chain shirt), and *lorica squamata* (scale mail).

NEW ARMOR MATERIALS

Just as mithral, adamantine, and darkwood can make fantastic armor and shields, so too can the materials described below do wonders in the hands of a competent armorsmith.

When a material improves the armor check penalty (that is, reduces it), it is shown on Table 1–11: New Armor Materials as a positive adjustment (+). If it increases the armor check penalty, it is shown as a negative adjustment (–).

Astral Driftmetal: This extraordinarily rare mineral is mined only on islands of matter floating on the Astral Plane. It is very similar to iron but has a single extraordinary feature: It has a 25% chance of being effective against an incorporeal attack, as if it were made of force. It is not malleable enough to be worked into chainmail or scale mail; only a breastplate, shield, or any form of heavy armor can be made from Astral driftmetal. A suit of driftmetal armor weighs 5 pounds more than the same armor made of steel, but the other statistics of the armor (maximum Dexterity bonus, armor check penalty, spell failure chance) are unchanged.

Astral driftmetal has a hardness of 12 and 30 hit points per inch of thickness. Its market price modifier is +1,000 gp.

Blended Quartz: This rare, naturally occurring blend of iron and quartz is cumbersome and difficult to work. Armor and shields made from blended quartz weigh twice as much as normal and incur the normal armor check penalty. The DC of relevant Craft checks involving blended quartz increases by 5. But blended quartz is a surprisingly good conduit of magical energy. Spell failure chances for blended quartz armor and shields are reduced by 20%. Weapons made from blended quartz weigh twice as much as normal but gain no additional benefits.

Blended quartz has a hardness of 8 and 15 hit points per inch of thickness.

Item	Market Price Modifier
Light armor	+2,000 gp
Medium armor	+5,000 gp
Heavy armor	+10,000 gp
Shield	+2,000 gp/lb.

Bronzewood: This exceptionally hard wood is useful for making both armor and weapons. Unlike most woods, bronzewood can be used instead of metal to fashion heavy armor and weapons. Although dense and weighty compared to other woods, it is still lighter than most metal: Items weigh 10% less when made from bronzewood rather than metal. Armor made of bronzewood is also less obtrusive than similar armor made of metal. The armor check penalty from bronzewood armor and shields does not affect Hide checks made in woodland environments.

The following armors can be made from bronzewood: breastplate, banded mail, splint mail, half-plate,

TABLE 1–11: NEW ARMOR MATERIALS

Armor Material	Cost	Max Dex Bonus Adj.	Armor Check Penalty Adj.	Arcane Spell Failure	Speed 30 ft./20 ft.	Weight

Urdrugar	+250 gp/lb.	Same	Same	×2	Same	Same

and full plate. Although bronzewood can replace metal in most weapons, chain weapons such as the spiked chain cannot be made from it.

Bronzewood has a hardness of 10 and 20 hit points per inch of thickness.

Item	Market Price Modifier
Light armor	+1,000 gp
Medium armor	+4,000 gp
Heavy armor	+9,000 gp
Other items	500 gp/lb.

Chitin: Difficult to work and dangerous to obtain, the exoskeletons of massive insects are still used to construct weapons and armor, especially in areas where metal is scarce. Weapons and armor made from chitin weigh half as much as similar metal items. Although chitin can replace metal in most items, chain weapons such as the spiked chain cannot be made from chitin, nor can chainmail armor or chain shirts.

Giant insects and similar creatures are the only sources of chitin plates big enough for crafting armor. To provide workable chitin, the creature must have a +5 natural armor bonus or better. Much as

they can work choice bits of dragonhide into armor, armorsmiths can make one suit of banded mail for a creature up to two sizes smaller than the source creature, one suit of half-plate for a creature three sizes smaller, or one breastplate or suit of full plate for a creature four sizes smaller. In each case, there is enough material left over to create a large or small shield, one Large or Medium-size weapon, two Small weapons, or 50 arrow or bolt heads, provided that the source creature is Large or bigger.

Chitin has a hardness of 5 and 10 hit points per inch of thickness.

Item	Market Price Modifier
Heavy armor	+10,000 gp
Shield	+2,000 gp

Darkleaf, Elven: Similar to elven leafweave armor (see below), elven darkleaf armor is made of carefully cured and beautifully carved pieces of darkwood (see Chapter 8 of the *DUNGEON MASTER's Guide*), supplemented by alchemically treated leaves.

Making armor out of darkleaf reduces its spell failure chance by 5% because the armor is so flexible. The maximum Dexterity bonus of darkleaf armor is

increased by +1, and armor check penalties are reduced by 2. Most darkleaf armors are one category lighter than normal for purposes of movement and other limitations (for example, whether a barbarian can use his fast movement ability). If made of elven darkleaf, heavy armor is treated as medium, medium armor is treated as light, but light armor is still treated as light. Only armors generally made of metal can be constructed from elven darkleaf.

Creating elven darkleaf armor requires a successful Alchemy check (DC 25) in addition to the normal Craft (armorsmithing) checks required to make armor.

Elukian Clay: Although barely malleable in its natural state, this rough, gray stone can be shaped into weapons and armor in a process similar to sculpting. Also known as sea-stone, elukian clay is formed in part by seepage from the Elemental Plane of Water. It has a strong affinity to water, so those traveling in or over large bodies of water value it greatly. Items made from elukian clay do not count against the wearer's weight total when calculating armor check penalties on Swim checks.

Although it can be shaped into a point, elukian clay does not hold an edge very well. Only piercing and bludgeoning weapons can be made from elukian clay. Armor and shields made from elukian clay have their armor check penalty increased by 1.

Once formed, an item made from elukian clay takes three days to harden. Items used before the hardening is complete are easily ruined; such items have 0 hardness and only one-tenth their normal hit points. Once dried, elukian clay items have a hardness of 10 and 30 hit points per inch of thickness.

Shaping elukian clay into armor requires the Craft (sculpture) skill.

Item	Market Price Modifier
Light armor	+1,000 gp
Medium armor	+2,000 gp
Heavy armor	+4,000 gp
Other items	+200 gp/lb.

Entropium: Githzerai armorsmiths in the Ever-Changing Chaos of Limbo have found a way to alloy ordinary iron with some of the shifting chaos-stuff of their native plane. The resulting metal, called entropium, is heavier than iron but can be used to make effective armor. A suit of entropium armor actually shifts as its wearer moves, allowing incredible flexibility at the cost of increased weight. Light entropium armor is considered medium and weighs 2 pounds more than normal, medium armor is heavy and weighs 5 pounds more than normal, and heavy armor is simply more so, weighing 10 pounds more than normal. Shields also weigh 2 pounds more than their steel counterparts. The armor check penalty of the armor increases by 2 for Strength-related skills (Climb and Jump) and decreases by 2 for Dexterity-related skills (Balance, Escape Artist, Hide, Move Silently, Pick

Pockets, and Tumble). The arcane spell failure chance decreases by 10% (to a minimum of 5%), and the maximum Dexterity bonus increases by +2. Naturally, entropium improves only armors made primarily of metal, including chain shirts, all medium armors except hide, all heavy armors, and steel shields.

Entropium has a hardness of 15 and 40 hit points per inch of thickness.

Item	Market Price Modifier
Light armor	+750 gp
Medium armor	+2,000 gp
Heavy armor	+8,000 gp
Shield	+750 gp

Leafweave, Elven: Elven artisans weave suits of armor from forest leaves, which are then treated by a special alchemical process that makes them as tough and flexible as leather, with considerably less weight and encumbrance. Such suits are made in both "springtime" and "autumn" styles: Springtime leafweave armor is vivid green, while the autumn style is made up of red, orange, and yellow leaves.

The spell failure chance for elven leafweave armor is reduced by 5% due to its increased flexibility, the maximum Dexterity bonus is increased by +1, and armor check penalties are reduced by 2. Armors that are generally constructed of metal cannot be duplicated with elven leafweave.

Creating elven leafweave armor requires a successful Alchemy check (DC 25) in addition to the normal Craft (armorsmithing) checks.

Urdrugar: Urdrugar, often referred to as "mind steel," is a dark metal found only in the deepest recesses of the Underdark. Naturally resistant to divination magic, items made from urdrugar are greatly prized by those who do not wish to be found. Every 5 pounds of urdrugar that a character wears or carries increases the DC for all attempts to scry on that character by +2.

Armor and shields made from urdrugar have double the normal arcane spell failure chance. Urdrugar is heavier and harder to work with than most other metals: Armor made from it tends to be somewhat clumsier, making gestures more difficult.

Urdrugar has a hardness of 15 and 30 hit points per inch of thickness. Metal items made from urdrugar cost an additional 500 gp per pound.

Ysgardian Heartwire: This incredibly fine, flexible metal is found only in the deep mines of Nidavellir in the Heroic Domains of Ysgard. It is not suitable for making an entire suit of armor, but small sections of heartwire mail can be incorporated into chain shirts, chainmail, or heavy armor to reinforce vital areas. This reinforcement has the effect of increasing the wearer's AC by +2 solely for purposes of the roll to confirm a critical hit. The heartwire is so fine and light that it does not increase the armor's weight. The market price modifier for such a suit of armor is +1,500 gp.

CHAPTER 2: ADVENTURING GEAR

Here are additional items that adventurers might find useful. Weights for all the items in Table 2–1: Adventuring Gear are for their filled weights (except where otherwise designated). For the hardness and hit points of items, see Attack an Object in Chapter 8 of the *Player's Handbook*.

NEW EQUIPMENT

Animal Call: Crafted out of bone, metal, or wood, these special whistles are designed to mimic a specific animal voice—usually game animals and birds. An animal call provides a +1 circumstance bonus on Wilderness Lore checks when hunting for food. Calls exist only for creatures that are type “animal.”

Armor Maintenance Kit: Composed of polishes, rags, replacement fasteners, wire brushes, and leather strips, this kit is indispensable in keeping armor in top form. An armor maintenance kit grants a +2 circumstance bonus on Craft (armorsmithing) checks to repair armor.

Ascender/Slider: This cleverly designed ratchet wraps around ropes and assists climbing and descending. By clicking a small switch, the ratchet prevents movement either up or down the rope. This grants a +1 circumstance bonus on Climb checks using a single rope. You can also slide down a rope with this device, which allows rapid movement—basically a controlled fall. It requires a successful Strength Check (DC 15) to hold on when performing this maneuver. A failure means you fall.

Banner/Standard: A banner is a large cloth emblazoned with a heraldic device. It is used to display a personal, family, or royal crest, or as identification on the battlefield. The price given is for a simple banner made from cotton and cheaper materials—the fancier the banner, the higher the cost.

A banner grants a +2 circumstance bonus on Spot checks to be seen from a distance.

Barbed Wire: This is a roll of barbed steel wire designed to keep things in or out. A creature trying to cross barbed wire must make a successful Reflex save (DC 10) or take 1d3 points of damage and be tripped. A pair of thick gloves is necessary to set up barbed wire. A handler who does not have gloves needs to succeed on a Dexterity check (DC 5) each round or take 1d2 points of damage. Building a barbed wire obstacle takes 1d4+6 hours, including anchor posts.

Bolt Cutters: This cutting tool can cut through chains, thin metal, and iron bars. When used against

objects (usually metal) that are no thicker than 1 inch in diameter, bolt cutters deal 15 points of damage to that item, including any modifier for Strength. Bolt cutters cannot be used effectively as a weapon (other than as a clumsy club).

Book, False: This is a large, well-made tome with a hollowed-out middle section. It comes with a clasp and very simple lock (Open Lock check DC 20). The false book forms a very tight seal when closed, making the interior space waterproof and allowing it to float.

Brewmaker, Dwarven: Treasured among dwarven warriors in the field, the brewmaker is a pressurized container that vaguely resembles a percolator. When water, hops, and other ingredients are added, it creates a thin beer in only a week. The taste is dreadful, but thirsty soldiers take what they can get. The Fortitude save to resist intoxication from this beer has a DC of 10 (see Alcohol and Intoxication, later in this chapter).

Cage: A typical cage consists of a solid metal or wooden top and bottom, solid metal bars equally spaced around the sides, and a door. It has a latch, but any lock must be purchased separately. The table below shows how many creatures can fit in each size of cage.

Cage Size	Number of Creatures					Hardness	HP
	Large	Med.	Small	Tiny	Dim.		
Large	1	2	4	8 ¹	16 ¹	10	30
Medium	0	1	2	4 ¹	8 ¹	10	30
Small	0	0	1	2	4	10	30
Tiny	0	0	0	1	2	10	15
Diminutive	0	0	0	0	1	10	10

¹ Creatures this size can move through the bars with no difficulty, unless the cage is designed with narrower bars.

Candelabra: Candelabras are designed to hold four, eight, or sixteen candles in an aesthetically pleasing arrangement. Four candles illuminate a 10-foot radius, eight candles illuminate a 15-foot radius, while sixteen candles illuminate a 20-foot radius.

Candle Mold: There are several different versions of these large wooden molds. A single mold can form eight tapers, two pillar candles, or twelve votive candles. The mold does not come with wax. It requires Craft (candlemaking) to use properly.

Candle, Insectbane: This heavily scented candle smells pleasant to humans and humanoids but is repellent to insects. Nonmonstrous vermin will not approach within a 5-foot radius of a burning candle. It burns for 1 hour.

Crane, Portable: This small crane can be broken down into several parts for easy transportation. It must be assembled and bolted into place to be used effectively. There are different “strengths” available to purchase—the equivalent of a person with Str 22 (lift/drag 1,040 lb.), 24 (lift/drag 1,400 lb.), or 28 (lift/drag 2,400 lb.).

Behind the Curtain: Items with Circumstance Bonuses

Items in this chapter that grant circumstance bonuses are parts of kits found in the *Player's Handbook*. For instance, the ascender/slider is part of the climber's kit.

TABLE 2-1: ADVENTURING GEAR

Item	Cost	Weight	Item	Cost	Weight	Item	Cost	Weight
Animal call	20 gp	—	Hammock	5 gp	1 lb.	Teepee	60 gp	100 lb.
Armor maintenance kit	1 gp	1 lb.	Heat mat	45 gp	—	Tent, one-person	5 gp	10 lb.
Ascender/slider	20 gp	1 lb.	Holy text	10+ gp	3 lb.+	Tent, four-person	20 gp	40 lb.
Banner/standard	30 gp+	10 lb.	Housebreaker harness	20 gp	2 lb.	Tent, pavilion	100 gp	300 lb.
Barbed wire (50 ft.)	75 gp	35 lb.	Ice axe	10 gp	5 lb.	Thieving helmet	10 gp	1 lb.
Bolt cutters	6 gp	5 lb.	Insect netting	200 gp	5 lb.	Tools, farming		
Book, false	30 gp	2 lb.	Jeweler's loupe	20 gp	—	Hoe	3 gp	2 lb.
Brewmaker, dwarven	40 gp	5 lb.	Keg			Billhook	5 gp	2 lb.

			Table case, folding	5 gp	5 lb.			
			Tarp	5 gp	30 lb.			

Class Tools and Skill Kits

Item	Cost	Weight
Animal trainer's kit	50 gp	5 lb.
Forger's kit	25 gp	2 lb.
Jester's kit	10 gp	5 lb.
Navigator's kit	250 gp	8 lb.
Scrier's kit	40 gp	2 lb.
Swimmer's kit	15 gp	5 lb.

Outfits

Item	Cost	Weight
Animal training outfit	10 gp	20 lb.
Beekeeper's outfit	9 gp	4 lb.
Desert outfit	6 gp	3 lb.
Heatsuit outfit	20 gp	15 lb.
Spelunker's outfit	5 gp	9 lb.

—: No weight worth noting.

Earplugs: Made from solid sponge or cork, earplugs grant a +1 circumstance bonus on saves against sonic attacks, but they also impose a -4 penalty on Listen checks when worn.

Finger Blades: These are very short razor-sharp blades that fit over the fingers. They are used to cut through purse strings or garments and grant a +1 circumstance bonus on Pick Pocket checks. They are too short to be used as effective weapons, causing only scratches at most.

Fishing Tackle: More than a mere fishhook, this set includes birch poles, silk line, sinkers, hooks, lures, and tackle box. It grants a +1 circumstance bonus on Wilderness Lore checks when gathering food around bodies of water that contain fish.

Flotation Bags: These are inflatable animal bladders

sewn to lightweight leather for strength. Flotation bags grant a +2 circumstance bonus on Swim checks to remain on the surface. The bags impose a -2 circumstance penalty on checks when underwater, as the swimmer has to fight the bags' tendency to float. It takes a full round to inflate flotation bags and a standard action to deflate them.

Fowler's Snare: This is a specially designed snare, used for capturing birds and other small flying game. It grants a +1 circumstance bonus on Wilderness Lore checks when attempting to trap these sorts of creatures.

Game Board, Portable: This is a small foldable wooden board and pieces for games such as chess, checkers, backgammon, go, and the like. Higher prices indicate better quality for all the pieces.

Glass Cutter: This special device lets you cut through glass panes without cracking or shattering them in the process. The glass cutter makes a circular hole anywhere from 3 inches to 16 inches in diameter. To use it quietly, make a Dexterity check (DC 15). If the check fails, the glass shatters with a loud crash (+2 circumstance bonus on Listen checks to hear it). You can make an Open Lock check instead if you are trained in that skill.

Grappling Hook, Collapsible: This small grappling hook has flat, retractable tines that fold out to create a working hook. It functions exactly like a normal grappling hook, except that it increases the DC by +4 for Search checks to find it when folded up and hidden among a person's garments.

Grappling Ladder: This is a premade rope ladder with two small grappling hooks on one end. The given price and weight is per 10 feet of ladder. Once the grappling ladder is in place, it reduces the DC for any Climb check above 10 to 10.

Hacksaw: This blade is designed to cut through thin metal. It ignores the hardness of any normal metal objects (excluding exotic metals like mithral or adamantine) that it is cutting, but deals only 1 point of damage per 2 rounds of sawing. A common blade lasts for 20 rounds, while a superior blade lasts for 40 rounds.

Hammock: This portable sling is a favorite of

sailors and rangers. It is hung up between two posts or trees to create a comfortable bed that is off the ground.

Heat Mat: This 1-foot-by-1-foot square mat is made of heat-absorbing materials. It can withstand temperatures of up to 1,200 degrees Fahrenheit, even when a hot item is placed directly on it, and will not catch fire. The mat does get uncomfortably hot and is not suitable as a protective layer of clothing. It is mostly found in alchemists' and wizards' laboratories.

Holy Text: This is a nonmagical religious text, containing scripture, stories, and teachings of a particular faith. The price given is for a very simple copy, with few, if any, illuminations. Fancier versions increase drastically in price.

Housebreaker Harness: Designed exclusively for second-story breaking and entering, this harness is made of pliable black leather and reduces the amount of noise made from loose metal items clanging together. It grants a +1 circumstance bonus on Climb and Move Silently checks while worn but imposes a -2 penalty on Balance, Escape Artist, Hide, Jump, Pick Pocket, and Tumble checks.

Ice Axe: More tool than weapon, the ice axe has a sharp metal head that is perpendicular to the shaft and has a spiked handle. It grants a +1 circumstance bonus on Climb checks in mountainous and/or icy terrain. If used as a weapon, treat as a hand axe with a -2 penalty on attack rolls.

Insect Netting: This is a 10-foot-by-20-foot rectangle of very light woven fabric designed to keep small insects from getting through. If properly set up, it keeps away mosquitoes, bees, and other ordinary vermin. It does not prevent monstrous vermin from getting through. See the beekeeper's outfit under Class Tools and Skill Kits for more information.

Jeweler's Loupe: This magnifying eyepiece grants a +1 circumstance bonus on Appraise checks when inspecting things very closely, such as gems, jewelry, or artwork.

Keg: A container for liquids, especially wine and ale. One person can easily carry the hand keg, while a cask usually requires two when full.

Lantern, Fog-Cutter: This bullseye lantern has a special amber lens that allows light to reach farther through mist, fog, and smoke than that from regular lanterns. It illuminates a cone 40 feet long and 10 feet wide at the end, regardless of fog or mist, and it burns for 6 hours on a pint of oil. You can carry a lantern in one hand.

Leash and Muzzle: Made to fit creatures of various sizes, this is necessary equipment for training animals. Masterwork versions are also available that grant a +1 circumstance bonus on Handle Animal checks, increasing the price by 20 gp (regardless of size). For more information on training animals, see page 67.

Magnet, Small: This small magnet can be used to attract loose metal items or stick to ferrous objects. It is only powerful enough to attract metal that weighs 3 ounces or less.

Marbles: About two dozen assorted glass, flawed rock crystal, or clay spheres in a leather pouch. They are commonly used as toys but are also useful for checking the slope in a dungeon corridor (just set one down and see which way it rolls), or as a non-damaging alternative to caltrops. One bag covers an area 5 feet square. Creatures moving through or fighting in the area must make Balance checks (DC 15). A creature that fails is unable to move for 1 round (or may fall; see the Balance skill description in the *Player's Handbook*).

The DM judges the effectiveness of marbles against unusual opponents. Creatures that are Huge or larger tend to crush the marbles into dust, while those with multiple legs, like carrion crawlers, can scramble along without falling.

Mess Kit: This lightweight metal kit contains a bowl, plate, fork, spoon, and cup.

Mill, Hand: This small handheld device grinds up grains, beans, and spices.

Money Belt: This cloth pouch is designed to be worn under clothing and can hold up to 50 coins. The Pick Pocket check DC to take something from a money belt is +5 higher than normal.

Music Box: A tiny box with a small handle that, when turned, produces delicate music (a single song).

The precise skill to create one usually means that it is made from the finest metals and covered with gems.

Net, Butterfly: This is a slender rod with a metal hoop on one end, covered by a sack made from insect netting (see that entry, above). It's used to capture ordinary flying insects, vermin, and small birds without harming them. It requires no proficiency to use a butterfly net, which grants a +2 circumstance bonus on attack rolls to capture creatures that are Tiny or smaller. Treat this as a net (see Weapons in Chapter 7 of the *Player's Handbook*) in all respects, except that it is not thrown.

Percolator: Considered the most important part of a mess kit, a percolator boils water to make coffee and other, more exotic hot drinks. If used in desperation as a weapon, the contents of a full boiling percolator deal 1d3 points of heat damage (max range 5 feet).

Periscope: This is a small handheld periscope, about a foot long, that allows you to look over obstacles or around corners without exposing yourself to danger.

Pestle and Mortar: A stone bowl and crusher used to grind material down to powder. It is vital for using the Alchemy skill and for creating potions.

Pulley: A sturdy wooden pulley with a metal hook-and-eye for hanging. The eye can withstand a load of up to 750 pounds before breaking.

Quiver Scabbard: Cleverly designed, this quiver (for either arrows or bolts) has a hidden scabbard that can hold a relatively flat weapon of size Small or smaller, such as a shortsword, handaxe, or dagger. It increases the Search check DC by +6 to locate a weapon hidden within.

Rope, Elven: Elven rope is finer than silk. It has 4 hit points and can be burst with a successful Strength check (DC 25). It is so supple that it grants a +3 circumstance bonus on Use Rope checks. Coils of elven rope are sold in 20-foot lengths and are extremely rare outside of elven settlements.

Saw, Folding: This camp saw breaks down into one slender package for easy carrying. It cuts through 4 inches of soft wood or 2 inches of hard wood per round. A folding saw is ineffective as a weapon.

Shoes, Silent: These are soft, padded shoes that absorb sound effectively. Despite the padding, the soles are made from tough, stretchy leather that holds up to abuse. They grant a +1 circumstance bonus on Move Silently checks.

Shriek Rock: Created by halfling artisans, these flat stones have carefully drilled holes that cause a loud, high-pitched "shriek" when thrown hard. This sound is as loud as a human screaming in a shrill voice. Listen checks to hear shriek rocks in flight are at DC -5, modified as normal by distance and intervening obstacles. A shriek rock has a 50% chance to be destroyed or lost when thrown.

Skis and Poles: Skis allow full movement across snow and icy surfaces but cannot be used at all on any

other terrain. Downhill speed can be as a run ($\times 4$) on slight grades or as run ($\times 5$) on severe grades. It takes a full-round action to don and to remove skis.

Slate Board: This is a 1-foot-square piece of slate, used for writing on with chalk.

Snorkel: A 1-foot-long slender tube that allows you to breathe while submerged. You can remain underwater indefinitely as long as you stay just under the surface (this is part of the swimming kit, described below in Class Tools and Skill Kits).

Snow Goggles: These wooden goggles have a thin horizontal slit in the middle. They grant a +2 circumstance bonus on saves to resist blinding effects, including snow blindness, extremely bright light, or spells that target vision indirectly (such as *sunburst* but not *blindness*). While wearing snow goggles, you incur a -4 circumstance penalty on Spot and Search checks.

Snowshoes: These allow the wearer to move at $2/3$ normal speed across snow and ice. Snowshoes take 1 minute to don and a full-round action to remove.

Sparker: This consists of flint and steel set in a wire hinge. Lighting a torch with a sparker takes a standard action. A sparker can be used ten times before it needs replacing.

Spider Poles: This assortment of metal poles can be collapsed into a small, lightweight bundle. Each pole is hollow, 1 foot long and $3/4$ inch thick. When unfolded, the poles snap into a variety of positions,

forming a semirigid ladder 10 feet high or an articulated frame 5 feet square. The poles can withstand up to 200 pounds of weight before the structure collapses and is ruined.

Using spider poles as a ladder grants a +1 circumstance bonus on Climb checks. They may also grant a bonus in other situations if assembled in an appropriate manner (DM's discretion).

Sprayer: This is a small storage drum attached to a large handle and pump. The drum is filled with liquid, usually water, although oil and holy water are commonly used as well (acid is a poor choice, as it eats away the container in a few rounds). When pumped (a standard action) the sprayer creates a dense cloud of vapor 10 feet long. Because the particles are so fine, the cloud lasts for only a moment and does not drift to adjacent squares. The drum contains enough liquid to last for three pumps before needing to be refilled.

Springwall: This gnome-crafted device consists of a very thin wire mesh that is tightly wrapped up into a ball roughly the size of a fist. When the ball is thrown and strikes a hard surface, it springs open, creating a flexible metal mesh wall 10 feet high and 10 feet wide (hardness 0, 5 hp). The extremely thin mesh is difficult to see (Spot check DC 20). A creature who walks or runs into the mesh must make a Reflex save (DC 15) to avoid being entangled as if by a net (see Chapter 7 of the *Player's Handbook*). Once the

springwall has been used in this manner, it cannot be used again.

Stilts: These wooden stilts strap to your legs, increasing your height by 2 feet. They require a successful Balance check (DC 5) to use effectively. You can also buy taller stilts: For each additional foot in height, increase the Balance check DC by 5 and add 10 gp to the cost. Base speed while using stilts is 20 feet (Small characters actually benefit from the longer strides). You cannot run on stilts.

Table Case, Folding: A 2-foot-by-2-foot suitcase that doubles as a folding table, this is commonly used by street performers, fences, and con artists.

Tarp: This is a 10-foot-square piece of sturdy canvas with metal eyelets in the corners and edges.

Teepee: Used primarily by nomads, a teepee provides excellent shelter against the elements. It takes 1 hour to set up and half an hour to take down. A typical teepee provides enough room to comfortably fit eight Medium-size humanoids. It requires a horse, donkey, or mule (or wagon) to transport effectively.

Tent, One-Person: A tent designed to shelter one Medium-size humanoid.

Tent, Four-Person: A Large tent that can comfortably fit four Medium-size humanoids.

Tent, Pavilion: A Huge open-air canopy, plus stakes, poles, and ropes. It can comfortably fit twenty Medium-size humanoids underneath.

Thieving Helmet: This specially designed helmet has metal funnels around the ears, which grant a +1 circumstance bonus on Listen checks.

Tongs, Metal: These are 1-foot-long metal tongs used to pick up objects without touching them directly.

Tools, Farming: Typical farming and gardening tools often found in the hands of commoners. They have wooden shafts or handles and iron heads (typically hardness 5, 5 hp). If used as weapons, they impose a -4 nonproficiency penalty on attack rolls.

Tree Stand: This portable platform gives hunters a stable surface above the ground. In dense leaves, the tree stand provides a +2 circumstance bonus on Hide checks against anyone on the ground and doubles the range of vision.

Tree Tent, Elven: A cleverly designed and very comfortable one-person tent that suspends itself in the branches of trees. Due to its coloration and shape, it grants a +1 circumstance bonus on Hide checks against being spotted from the ground.

Twine, Roll: A roll of sturdy twine. It has 0 hardness and 1 hp. When tightly wrapped around an object, it has the same strength as hemp rope (0 hardness, 2 hp per inch).

Water, Lawful/Chaotic: Groups that worship deities dedicated to the concepts of Law and Chaos also create water that mimics the effect of holy or unholy

water. Lawful water is identified by its utter stillness, while chaotic water constantly bubbles and froths.

Lawful water damages chaotic outsiders almost as if it were acid. Typically, a flask of lawful water deals 2d4 points of damage to a chaotic outsider on a direct hit or 1 point of damage if it splashes such a creature. In addition, lawful water is considered blessed, which means it has special effects against certain creatures. A flash of lawful water can be thrown as a grenadelike weapon (see Grenadelike Weapon Attacks in Chapter 8 of the *Player's Handbook*). A flask breaks if thrown against the body of a corporeal creature, but against an incorporeal creature, the flask must be opened and the lawful water poured onto it. Thus, you can douse an incorporeal creature with lawful water only if you are adjacent to it. Doing so is a ranged touch attack that does not provoke attacks of opportunity.

Chaotic water is identical to lawful water, except that it affects lawful outsiders.

Wick, Candle: This is treated wick for creating candles. In addition, it can be used as a timing device or fuse. One inch of wick burns in 30 seconds. The flame is as strong as that of a candle, so it is easily snuffed out by wind, rain, and the like.

Winch: This is a hand-cranked winch, plus 50 feet of hemp rope (or wire) and a small hook. To be effective, the winch must be bolted or nailed down to a secure surface. There are different “strengths” that one can purchase—the equivalent of a person with Str 18 (lift/drag 600 pounds), 20 (lift/drag 800 pounds), or 22 (lift/drag 1,040 pounds).

Adventuring in Low- or No-Magic Campaigns

There are times when Dungeon Masters and players want to attempt a more “real” campaign, where flashy magic is extremely rare or nonexistent. This opens up all sorts of interesting and challenging situations, where the PCs must survive by their skills, wits, and of course equipment, alone.

Magic is powerful . . . or trivial. Obviously, magic holds no threat or benefit in a campaign where none exists. In a low-magic campaign, however, magic can happen in one of two ways.

In the first situation, magic is notable when it happens. Characters should be awed, frightened, or at the very least respectful when witnessing it in action. Magic is considered the work of gods and powerful wizards, and the effects it produces are enormous. Major spells usually involve numerous casters to pull off, take an extraordinary amount of time to cast, and often include a magical device to act as a power source.

In the second situation, magic is extremely subtle and rarely witnessed visibly—if at all. Spells of this nature probably fall under the Divination, Enchantment, or Illusion school. A good example of “low

impact” magic can be found in the witch, a variant spellcasting class in Chapter 2 of the *DUNGEON MASTER'S Guide*. Spellcasters would advance very slowly, although they would probably be sought after as wise men or women.

Magic items would be the source of many legends, quests, and adventures, even though their power pales when compared to normal campaigns.

Choose your equipment wisely. Without spells to aid characters in everything from locating objects to blasting monsters, what you carry on your person is extremely important. Torches and lanterns are necessary without the benefit of *light* spells. Lacking *fly* or *levitate* spells, ropes and ladders would be the only way to scale walls. A flaming bottle of oil (or alchemist's fire in a low-magic campaign) could be a great equalizer in combat, when *fireballs* are unavailable.

In keeping with the tone of a “real” campaign, weight and encumbrance come more heavily into play. In short—if you can't carry it, you can't have it. This does increase the paperwork, but it also adds a gritty realism that some DMs and players enjoy.

Combat, wounds, and healing. With the complete lack of, or limited, healing magic, combat is *deadly*. Adventurers should choose their battles wisely and be ready to run if things turn against them. Damage from exotic sources like fire, acid, or cold can have far-reaching effects that are unimportant when healing magic is readily available.

The Heal skill is vital in a no-magic campaign. Without the benefit of *cure*, *resurrection*, or *regeneration* spells, wounded adventurers can expect to spend a great deal of time healing up between major confrontations and are dependent on trained physicians to assist them. Possessing a healer's kit would be crucial to anyone with the skill.

Remember also that the Challenge Rating of a monster assumes that PCs have ready access to healing magic. In a low-magic campaign, where healing magic is extremely limited, DMs must assign ad hoc XP awards to represent the increase in encounter difficulties (see Assigning Ad Hoc XP Awards in Chapter 7 of the *DUNGEON MASTER'S Guide*).

Weapons. In a world with little or no magic, the best weapons to be found are masterwork quality. The price for creating or buying one would increase dramatically: Without wizards and sorcerers capable of creating magical weapons, highly skilled blacksmiths would be in great demand—and they would not come cheap. In a low-magic campaign, possessing even a *+1 weapon* would be a major boon . . . and a curse. A magic weapon would instantly draw the attention of anyone who saw it for what it was, including the character's enemies and other people who want to own it themselves. Entire kingdoms could be toppled in the name of finding (or repossessing) these relatively low-powered magic items.

DMs should provide an alternate method of dealing damage to monsters with damage reduction. It can greatly add to the excitement of an adventure, however, when the characters have to fight something that cannot be harmed with mundane weapons. Nothing is scarier than watching your sword bounce harmlessly off the hide of a hideous creature!

Alchemy. In a low-magic campaign, magical effects are most often found in alchemical items, which can mimic certain low-level spells. The Alchemy skill could be a great benefit to a party, although creating items might take up more time than actual adventuring. Individuals who would be considered wizards or sorcerers in a regular campaign are more likely to be thought of as alchemists (experts or adepts). Alchemy is probably the only form of “magic” that characters ever see, and prices reflect that accordingly. Adventurers can expect to pay at least twice the indicated amount, if not more.

Class Tools and Skill Kits

This equipment is particularly useful if you have certain skills or are of a certain class.

Animal Trainer's Kit: This kit consists of harnesses, prods, light whips, treats, and other items that are helpful for training animals. There are different kits for different types of animals. It grants a +2 circumstance bonus on Handle Animal checks. If training

vicious animals, the animal training outfit is highly recommended (see Outfits, below).

Forger's Kit: This is a special collection of different pens, seals, guides, waxes, inks, magnifying glasses, books of writing styles, parchment, and other instruments. It grants a +2 circumstance bonus on Forgery checks and lasts for ten uses before having to be replaced.

Jester's Kit: A fine collection of gaudy clothing, face paint, toys, puppets, juggling balls, and other colorful items. It grants a +1 circumstance bonus on any Perform (comedy), Perform (buffoonery), or Disguise checks to avoid recognition.

Navigator's Kit: This expensive set of instruments includes a sextant, astrolabe, compass, and measuring tools. It has no benefit on land but grants a +2 circumstance bonus on Intuit Direction and Wilderness Lore (directional only) checks while at sea, and on Profession (cartographer) checks to make maps.

Scryer's Kit: This is a variety of focusing crystals, incense, mirrors, and other tools to help a scryer concentrate. It grants a +2 circumstance bonus on Scry checks. The user must still have the ability to cast the *scrying* spell or have a crystal ball.

Swimmer's Kit: This consists of a snorkel (see the snorkel entry above—the bonus is already factored in), crude goggles, flippers, and occasionally a skintight suit. It grants a +2 circumstance bonus on

Forger's Kit

Navigator's Kit

Swimmer's Kit

Jester's Kit

Scryer's Kit

Swim checks and cannot be worn with other clothing or armor.

Outfits

Animal Training Outfit: Essentially beefed-up padded armor, this suit covers a person from head to toe in thick quilted padding, especially around the limbs. It is used as protection by those who specialize in training attack animals, such as dogs. It is very difficult to move in this outfit, so it does not make for good armor. Used as armor, it has the following statistics: armor bonus +2, maximum Dex bonus +1, armor check penalty -7, arcane spell failure 40%, speed 20 ft. (30 ft.)/15 ft. (20 ft.).

Beekeeper's Outfit: Prevents damage from ordinary vermin of all kinds: bees, ants, centipedes, and so on. The outfit consists of a sealed leather suit and large helmet encased in fine netting (see the insect netting entry, above). The outfit grants a +6 armor bonus to AC against attacks from stinging and biting

creatures that are size Fine. It provides no protection against larger creatures.

Desert Outfit: This outfit consists of loose, billowy clothing designed to keep the wearer cool and protected from the sun while out in dry, hot, desert terrain. It includes a caftan, turban, scarf, loose pantaloons, and either high boots or low sandals. Wearing the outfit eliminates the -4 penalty on Fortitude saves for wearing heavy clothes in hot or extreme heat (see Heat Dangers in Chapter 3 of the *DUNGEON MASTER'S Guide*). This does not apply if the character wears any armor.

Heatsuit Outfit: Clothing designed to protect the wearer against abysmal heat, such as temperatures found around forges and volcanoes. It consists of heavy pants and coat, a specially treated leather apron, very thick mittens, a thick hood, and goggles. The heatsuit outfit prevents 3 points of normal heat damage per round (not subdual) and eliminates the -4 penalty on Fortitude saves for wearing heavy clothes

TABLE 2-2: CLOTHING

Item	Cost	Weight	Item	Cost	Weight	Item	Cost	Weight
Apron, leather	3 sp	2 lb.	Cloak			Robe

Removable sleeves	+5 sp	—	Nightshirt, silk	6 gp	—			

—: No weight worth noting.

¹ Described in the Clothing section.

(see Heat Dangers in Chapter 3 of the *DUNGEON MASTER'S Guide*). A heatsuit outfit should be worn only for brief periods of time.

Spelunker's Outfit: This outfit is for adventurers planning to travel underground. It consists of water-resistant wool breeches, low sturdy boots, wool shirt, leather coat, belt, plain buckle, bandoleer (for attaching equipment), kneepads, elbow pads, and miner's cap. The outfit does not include climbing gear, which must be purchased separately.

Specific Clothing

The prices in Table 2–2: Clothing are average costs for specific items of clothing. In some cases, the prices and weights for outfits in the *Player's Handbook* might be different when each item is priced out. This section describes only unusual clothing.

Bodysuit, Black: This very tight-fitting garment is made of black silk. It is used by rogues and infiltrators when sneaking around at night. Wearing the suit grants a +2 circumstance bonus on Hide checks in conditions dark enough to grant one-half concealment or better. However, the bodysuit provides no benefit if you wear other clothing or armor, other than belts, pouches, or bandoleers, on top of it.

Boots, Smuggler's: These otherwise normal high boots have hinged heels that swing open to reveal small storage spaces. Each can hold one or two Fine objects, such as a vial of poison. In addition, the inside lining of the boot can be removed to hide thin, flat objects like a map or slender dagger. It requires a successful Search check (DC 30) to locate items hidden in the boots.

Fullcloth, Winter: This is a heavily quilted undergarment that is worn underneath regular clothing to protect the wearer against cold.

Winter fullcloth is considered part of the cold weather outfit described in the *Player's Handbook*. If worn by itself, it grants a +1 circumstance bonus on Fortitude saving throws against exposure to cold weather (see Cold Dangers in Chapter 3 of the *DUNGEON MASTER'S Guide*).

Helmet, Miner's: This metal pot helm has a small enclosure on the front, similar to a bullseye lantern. It can hold one candle, which illuminates a cone 10 feet long. The candle is commonly imbued with a *light* or *continual flame* spell.

Vest, Knife: This specially designed vest is worn over other clothing and can comfortably hold up to ten daggers across the chest. It is particularly handy for knife-throwers with the Quick Draw feat.

Jewelry and Accessories

The prices on Table 2–3 are for plain and basic jewelry with no gemstones. Prices for fancier items are considerably higher, depending on the level of detail and skill of the crafter.

TABLE 2–3: JEWELRY AND ACCESSORIES

Item	Copper	Silver	Gold	Platinum
Broad belt	—	6 sp+	6 gp+	60 gp+
Armband	15 cp+	15 sp+	15 gp+	150 gp+
Bracelet	1 sp+	2 gp+	20 gp+	200 gp+
Brooch	45 cp+	45 sp+	45 gp+	450 gp+
Earrings	2 sp+	2 gp+	20 gp+	200 gp+
Fillet	6 sp+	6 gp+	60 gp+	600 gp+
Headband	4 sp+	4 gp+	40 gp+	400 gp+
Locket	25 cp+	25 sp+	25 gp+	250 gp+
Necklace	5 sp+	5 gp+	50 gp+	500 gp+
Pendant	45 cp+	45 sp+	45 gp+	450 gp+
Ring	3 cp+	3 gp+	30 gp+	300 gp+
Torc	5 sp+	5 gp+	50 gp+	500 gp+

Food and Drink

The prices on Table 2–4 are the average for food items found in temperate farmlands. Prices can vary wildly, depending on the climate and season.

Many of these items can also be considered trade goods (see below).

Unique Alcoholic Beverages

Table 7–7: Goods and Services of the *Player's Handbook* gives prices for generic ales and wines. For something a bit more exotic, try these different kinds of alcohol.

Aleecian Wine, Elven: The grapes for this astounding wine are picked from wild vines located deep in the forest. It takes several months to find enough grapes to create even one batch. (Fortitude save DC 11.)

Dragonbite Bitter: The recipe for this exceptional dark beer is centuries old, and only the Dragonbite Brewery has been able to reproduce it. The Fortitude save to resist intoxication is DC 12.

Dwarfhead Stout: Found almost exclusively in dwarven communities, this powerful brew is a “day-to-day” beer favored by warriors. (Fortitude save DC 13.)

Frenzywater: An extremely potent clear alcohol. Rumors of bottles spontaneously catching fire when exposed to sunlight have never been proven. Anyone with the rage class ability must make a Will save (DC 15) to resist flying into a rage after drinking a tankard of this liquor. If you have already expended all your rages for the day, then frenzywater has no additional effect other than making you irritable and surly. (Fortitude save DC 15.)

Frostwine: This delicate white wine is created from an exotic blend of grapes that grow only in extreme northerly climes. Frost worms in particular are drawn to the scent of frostwine grapes in bloom, making it dangerous to harvest. (Fortitude save DC 13.)

Garnet Wine, Dwarven: Made from grapes found high in the mountains, this fine, if bold, wine includes at least 10 gp worth of ground of garnet “for flavor.” (Fortitude save DC 13.)

Golden Light, Gnome: A fine, lightweight beer with flowery accents, this is a favorite trade item with humans and halflings. (Fortitude save DC 11.)

TABLE 2-4: EDIBLE ITEMS

SPICES AND SEASONINGS

Item	Cost per Ounce
Angelica	5 cp
Anise	3 cp
Basil	1 sp
Bergamot	3 cp
Borage	2 cp
Caraway	2 cp
Cardamon	1 gp
Chives	2 cp
Cinnamon	1 gp
Clary	8 cp
Cloves	20 gp
Coriander	1 sp
Costmary	3 cp
Cubeb	15 gp
Cumin	3 cp
Dillweed	3 cp
Fennel seed	1 sp
Fenugreek	3 sp
Garlic	1 cp
Ginger	10 gp
Horehound	4 cp
Horseradish	1 cp
Hyssop	5 cp
Juniper	3 sp
Laurel	4 gp
Lemon balm	2 sp
Liquorice root	4 sp
Lovage	1 sp
Mace	25 gp
Marjoram	5 cp
Mint	3 cp
Mustard seed	5 cp
Nutmeg	30 gp
Oregano	2 sp
Parsley	4 cp
Pepper	30 gp
Poppy seed	8 gp
Rose hips	5 gp
Rosemary	5 sp
Saffron	65 gp
Sage	1 sp
Salt	1 cp
Sweet cicely	1 sp
Tarragon	1 gp
Thyme	1 sp
Turmeric	25 gp
Woodruff	1 sp

CORNS

Item	Cost per Pound
Barley	1 gp

Chick peas	3 gp
Lentils	2 gp
Millet	7 sp
Oats	7 sp
Rice	5 gp
Rye	7 sp
Wheat	1 cp

FLOURS

Item	Cost per Pound
Barley	2 gp
Buckwheat	1 gp
Rye	15 sp
Wheat	3 gp

DRIED FRUITS

AND VEGETABLES

Item	Cost
Apples	1 gp/lb.
Apricots	15 gp/lb.
Carrots	1 gp/oz.
Cherries	5 sp/oz.
Currants	1 sp/oz.
Dates	5 gp/oz.
Elderberries	1 sp/oz.
Fig	7 gp/oz.
Green beans	2 sp/oz.
Green peas	2 sp/lb.
Mushrooms	1 gp/lb.
Onion	5 sp/oz.
Peaches	15 gp/lb.
Pears	5 gp/lb.
Prunes	3 gp/lb.
Raisins	1 gp/lb.
Tomatoes	1 gp/lb.

NUTS

Item	Cost per Pound
Almonds	3 gp
Cashews	20 gp
Chestnuts	1 gp
Hazelnuts	5 sp
Pine nuts	10 gp
Pistachios	15 gp
Walnuts	3 sp

OILS

Item	Cost per Gallon
Olive oil	5 gp
Almond oil	10 gp
Walnut oil	2 gp
Hazelnut oil	3 gp
Sesame oil	10 gp
Sunflower oil	3 sp
Safflower oil	2 sp
Rapeseed oil	1 sp

SWEETENERS

Item	Cost
Honey	1 sp/pt.
Marzipan	20 gp/oz.
Molasses	5 sp/pt.
Sorghum	3 sp/pt.
Sugar	1 gp/lb.

MEAT AND FISH

Item	Cost per Pound
Beef	
Corned	3 gp
Dried	5 gp
Jerked	7 gp
Sausage	2 gp
Smoked	4 gp

Sardines	4 gp

EXOTIC ITEMS

Item	Cost
Chilies	25 gp/lb.
Coffee	50 gp/lb.
Coconut	50 gp/lb.
Hickory nuts	200 gp/lb.
Lotus	100 gp/oz.
Maple sugar	75 gp/gal.
Paprika	30 gp/oz.
Pimento	40 gp/oz.
Pineapple	150 gp/lb.
Sarsaparilla	10 gp/oz.
Tobacco	5 sp/lb.
Vanilla	75 gp/oz.
Walnuts, black	100 gp/lb.

UNIQUE BEER, ALE, AND MEAD

Item	Cost per Gallon
Dragonbite bitter	15 gp
Dwarhead stout	30 gp
Mead, elven	60 gp
Golden light, gnome	10 gp
Thudrud, goblin	2 gp
Pulsch brown ale	8 gp

UNIQUE WINES

Item	Cost per Bottle
Frostwine	40 gp
Aleeian wine, elven	100 gp
Garnet wine, dwarven	90 gp
Mushroom wine	20–135 gp
Spiderblood, drow	150 gp

UNIQUE SPIRITS

Item	Cost per Bottle
Frenzywater	15 gp
Moondrop, elven	220 gp
Kragg, orc	30 gp

Kragg, Orc: This spirit is popular among orcs and goblins. It is extremely powerful and tastes dreadful to the nongoblinoid palate. Drinking a tankard of this foul brew nauseates anyone who is not an orc, half-orc, goblin, or hobgoblin. (Fortitude save DC 14.)

Mead, Elven: Although not normally famed for brewing, elves find exotic honey in their forest homes to create this delightful mead. Even dwarves find its taste appealing—though they are loath to admit it. (Fortitude save DC 12.)

Moondrop, Elven: Exquisite beyond compare, this beverage can be produced only by someone with the Alchemy skill (DC 30). It is made through a

bizarre process involving fresh dew and moonlight. (Fortitude save DC 13.)

Mushroom Wine: Created by several different species that live below ground, there are many types of this wine. Prices range widely. (Fortitude save DC 11–12.)

Pulsch Brown Ale: A halfling creation, found among the few permanent halfling settlements that have acquired the taste of ale. It has a pleasant, nutty flavor. (Fortitude save DC 11.)

Spiderblood, Drow: A slight misnomer, this mushroom wine crafted by the drow includes a substantial dose of venom from poisonous spiders. Its taste is

remarkable and unlike anything encountered on the surface world. Anyone not used to drinking this wine (usually a nondrow), must make a successful Fortitude save (DC 11) or be poisoned (primary and secondary damage 1d2 Con), in addition to making the Fortitude save against intoxication (DC 11). Those wishing to overcome this poisonous effect must drink one glass over several hours, every day for three months.

Thudrud, Goblin: Almost universally avoided by nongoblinoid races, thudrud has been described as having the taste and smell of “a rotting cow that caught fire.” It is favored by some barbarians as the drink of choice. (Fortitude save DC 12.)

Alcohol and Intoxication

More than a few adventurers enjoy hoisting a drink or two in celebration of their latest conquest. Sometimes characters drink more than they can handle. This optional rule can help the DM determine just how drunk a PC is after pounding down the ale.

Alcohol is a depressant that reduces judgment and coordination. Every time a character consumes an entire alcoholic beverage (a glass of wine, a tankard of beer, or a jigger of any spirit) they make a Fortitude save at no penalty, with the DC determined by the type of alcohol (see the table below for examples of different alcohol types; unique liquors have the DC given in their descriptions). This assumes that the character is trying to *avoid* getting intoxicated.

The first drink in an hour imposes no penalty on the Fortitude save. The second drink consumed within the same hour imposes a -1 penalty, the third -2, the fourth -4, and so on. Obviously, a person can space the time between drinks to reduce the chance of getting drunk.

A character who fails a save takes 1d2 points of temporary ability damage to both Wisdom and Dexterity. A character who reaches 0 Wisdom passes out unconscious. A character who reaches 0 Dexterity collapses into a drunken wreck but remains in a blurry state of consciousness.

If *both* ability scores reach 0, the character could possibly suffer the effects of alcohol poisoning. This requires a Fortitude save with the DC for that type of alcohol (if different types were drunk, use the highest DC). On a failure, the character takes 1 point of temporary Constitution damage every 10 minutes until death occurs, unless the stomach is purged.

Alcohol Type	DC
Wine, common	11
Wine, fortified	12
Ale, weak	10
Ale, common	11
Ale, stout	12
Ale, dwarven	13
Typical spirits (whiskey, rum, gin, etc.)	11
Very strong spirits	13
Dangerously strong spirits	15

The character regains 1 point of Dexterity and Wisdom for each full hour after consuming the last alcoholic beverage, usually feeling terrible in the process. *Neutralize poison* negates the damaging effects of alcohol (but not the hangover).

SPECIAL AND SUPERIOR ITEMS

Every adventurer needs the basics: backpack, rope, a light source, and so forth. But various applications of alchemy, superior artisanship, and poisonmaking can make the adventurer’s job much easier.

TABLE 2-5: ALCHEMICAL ITEMS

Item	Amount	DC to Create	Cost	Weight
Bladefire	Flask	20	20 gp	1 lb.
Bullet, acid	Sling bullet	15	10 gp	10 oz.
Bullet, flame	Sling bullet	20	20 gp	10 oz.
Bullet, priest’s	Sling bullet	—	25 gp	10 oz.
Candle, focusing	Candle	25	100 gp	1 lb.
Candle, restful	Candle	25	100 gp	1 lb.
Clearbreath	Vial	25	50 gp	—
Darkvision powder	Vial	20	10 gp	1 oz.
Defoliator	Flask	20	20 gp	1 lb.
Dehydrated food	Daily meals	15	2 gp	4 oz.
Dwarfblind	Stone	25	50 gp	1 lb.
Farflame oil	Flask	15	2 gp	1 lb.
Fleetfoot	Vial	25	50 gp	—
Ghostoil	Flask	25	50 gp	1 lb.
Gravebane	Flask	25	50 gp	1 lb.
Hawk’s ointment	Vial	25	50 gp	—
Instant rope	Flask	15	25 gp	1 lb.
Longbreath	Vial	25	50 gp	—
Motelight	Flask	20	20 gp	1 lb.
Nature’s draught	Vial	25	50 gp	—
Polar skin	Flask	25	25 gp	1 lb.
Signal torch	Torch	15	1 gp	1 lb.
Sparkstone	Stone	25	50 gp	1 lb.
Stonebreaker acid	Flask	20	20 gp	1 lb.
Verminbane	Flask	20	20 gp	1 lb.
Vicious bleeder	Flask	25	50 gp	1 lb.

Grenadelike Weapons	Cost	Direct Hit	Splash Hit	Range Incr.
Defoliator	20 gp	2d4 ¹	1 ¹	10 ft.
Gravebane	50 gp	Repels undead	—	10 ft.
Motelight	20 gp	Distracts	—	10 ft.
Sparkstone	50 gp	1d6	Half ²	10 ft.
Stonebreaker acid	20 gp	3d10 ³	3 ³	10 ft.
Verminbane	20 gp	Repels vermin	—	10 ft.

¹ To plants only.

² Deals half damage to one target within 5 feet only. Roll randomly if there is more than one possible target.

³ To stone objects only.

Alchemical Items

The Alchemy skill allows characters to make many marvelous substances. The items below expand the list of alchemical items available.

Bladefire: Similar to alchemist's fire but less volatile, this thick, adhesive liquid ignites when exposed to air. Bladefire is typically poured along the length of a bladed weapon, causing the weapon to burn for a short period of time. A weapon treated with bladefire burns for 1d6 rounds. While burning, the weapon sheds light as a torch. A weapon treated with bladefire deals 1 additional point of fire damage with each successful hit. Applying bladefire to a weapon is a full-round action that provokes an attack of opportunity. Bladefire is thick enough that once applied, it does not flow down the weapon, preventing it from harming the user. Each round that bladefire burns, it also deals 1 point of fire damage to the weapon that it coats, but most weapons have sufficient hardness to ignore this damage. Wooden weapons coated with bladefire ignite, however, taking 1d6 points of fire damage each round until extinguished. Setting flammable items alight requires more contact than just an attack. To light a flammable item requires a full-round action if the item is unattended or a successful grapple check against the opponent wearing or using the item. If your opponent breaks the grapple before your next action, no items catch fire. If you don't release the grapple on your next action, any flammable item you wear or carry also catches fire.

Bullet, Acid: These hollow glass sling bullets are filled with acid. When they strike a target, they immediately shatter, dealing 1d4 points of acid damage in addition to the normal damage from the sling bullet. To hold sufficient acid, these bullets must be larger than normal. The increased size makes the bullets awkward and unwieldy to launch, imposing a -2 penalty on the attack roll.

Bullet, Flame: These hollow glass sling bullets are filled with alchemist's fire. When they strike a target, they immediately shatter and the alchemist's fire ignites, dealing 1d4 points of fire damage in addition to the normal damage from the sling bullet. To hold sufficient alchemist's fire, these bullets must be larger than normal, imposing a -2 penalty on the attack roll. See *Catching on Fire* in Chapter 3 of the *DUNGEON MASTER'S Guide* for information on targets wearing or carrying flammable material catching fire.

Bullet, Priest's: These hollow glass bullets are filled with holy water. When they strike a target, they immediately shatter, dousing the target with holy water. Undead and evil outsiders take 1d4 points of damage from the holy water in addition to the normal damage from the sling bullet. To hold sufficient holy water, these bullets must be larger than normal, imposing a -2 penalty on the attack roll.

Candle, Focusing: This large, green taper candle burns quickly, lasting only an hour despite its size. While burning, the focusing candle fills the air with a fresh, crisp odor. The candle is a great boon to

those engaged in strenuous mental activity, sharpening most cognitive processes. Characters within 20 feet of a burning candle of focus gain a +1 circumstance bonus on the following skill checks: Alchemy, Appraise, Decipher Script, Forgery, Scry, and Search. When making a skill check that takes more than one action to complete (such as attempting to identify a potion with Alchemy or using the Scry skill with the *scrying* spell), characters only gain the bonus from a focusing candle if they spend the entire duration of the skill check within range of the burning candle.

Candle, Restful: This thick blue candle burns slowly, filling the air with a sweet, relaxing scent for 8 hours. These candles, although slow to function, have tremendous restorative abilities. Characters that spend a night of rest sleeping within 20 feet of a lit candle heal at twice the rate they normally would. After a day of light activity, characters who rest under the influence of the candle heal double their level in hit points and 2 points of ability damage. After a day of complete rest, characters who sleep under the influence of the candle heal three times their level in hit points and 2 points of ability damage. The benefits of a restful candle stack with those provided by someone providing long-term care with the Heal skill.

Clearbreath: This vial of gray smoke temporarily dulls the sense of smell when someone inhales the contents through the nose. Clearbreath provides a +4 alchemical bonus on Fortitude saves made to resist unpleasant odors (such as a troglodyte's stench). The effects of clearbreath last for 1 hour.

Darkvision Powder: This plain gray powder is unassuming; it can't be seen with normal vision from more than 10 feet away. When viewed with darkvision, however, it glows brightly. Creatures that have darkvision commonly use this powder to write messages that other creatures cannot read. Each vial contains enough powder for a reasonably lengthy sentence.

Defoliator: This vile liquid has a muddy brown hue and smells of rotten plant life. You can throw a flask of defoliator as a grenadelike weapon. On a direct hit, it deals 2d4 points of damage to plant creatures and kills normal plants of Medium-size or smaller. The splash damage from defoliator deals 1 point of damage to plant creatures and kills normal plants that are smaller than Medium-size. The damage is not limited to living plants: wooden objects such as doors and wooden weapons also take damage from defoliator, though their hardness applies.

Dehydrated Food: Explorers and adventurers of all sorts benefit from alchemically dried food. Although expensive, dehydrated food weighs only half as much as an equivalent supply of trail rations, making it ideal for long journeys where water is plentiful and food is scarce. Characters eating dehydrated food must consume twice as much water per day as

they normally require or suffer the effects of going without water (see *Starvation and Thirst Dangers* in Chapter 3 of the *DUNGEON MASTER'S Guide*).

Dwarfblind: Dwarfblind stones are small stones treated with alchemical substances, giving them a faint purple sheen. You can throw a dwarfblind stone as a grenadelike weapon. When it strikes a hard surface, it releases a burst of violet light. The light illuminates a 20-foot-wide area for an instant and temporarily interferes with the darkvision of those caught in its effects. Creatures within a 10-foot radius of the stone's impact point must succeed on a Reflex save (DC 15) or lose their darkvision ability for 10 minutes. Dwarfblind has no effect on normal and low-light vision.

Farflame Oil: This thin, light blue oil burns with a blue flame and illuminates a wide area. When used in a lantern, farflame oil sheds light in a 40-foot radius. In a bullseye lantern, it illuminates a cone 80 feet long and 25 feet wide. A pint of farflame oil fuels a lantern for 3 hours. A pint of farflame oil covers a 5-foot square area if poured on the ground. If lit, farflame oil burns for 1 round and deals 1d4 points of damage to each creature in the area.

Fleetfoot: This thin blue liquid temporarily loosens the imbiber's muscles and joints, allowing her to run faster and jump farther. When running, a character under the effect of fleetfoot moves at five times her speed. The effect lasts for 10 rounds + 1 round per point of Constitution modifier. The effects of fleetfoot stack with the Run feat, allowing a character to run at six times her speed and jump half again as far as normal with a running jump. Fleetfoot does not grant a character the ability to exceed her maximum jump distance.

Ghostoil: This clear oil has a slight tint of gray, and strange, wispy forms seem to swirl through it. When applied to a weapon, ghostoil allows it to affect incorporeal creatures normally for the next 2 rounds. One flask of ghostoil contains enough liquid to coat one weapon of Large size or smaller. Applying ghostoil to a weapon of any size is a full-round action.

Gravebane: This thick white liquid evaporates almost instantly upon contact with air, creating a thin, nearly invisible smoke. The smoke is nearly odorless, and it has no effect on most creatures. Undead, however, are repulsed by the smoke and can only pass through it with an effort of will. When opened (usually by throwing it on the ground), a flask of gravebane fills a 5-foot-square area with smoke. Undead cannot enter an area filled with gravebane smoke unless they succeed on a Will save (DC 10). Undead can attack into a gravebane-filled area normally as long as they don't enter the area to do so. Gravebane ordinarily lasts for 1 minute, although strong winds may decrease this duration.

Hawk's Ointment: This thick, acidic gel temporarily sharpens the user's vision. Once its beneficial

effects wear off, however, the gel burns and stings the eyes for a few minutes. After spreading the gel over her eyes, a character gains a +1 bonus on Search and Spot checks for 2 minutes. After the duration expires, she takes a -2 penalty on Search and Spot checks for 10 minutes. Characters who spend a round washing out their eyes with clean water halve the duration of the penalty. Applying hawk's ointment is a full-round action that provokes an attack of opportunity.

Instant Rope: When poured from a flask, this viscous gray liquid forms into a long cord usable as a temporary rope. Upon being exposed to air, the liquid rapidly increases in both volume and viscosity, swelling to the diameter of a typical hemp rope, then quickly drying. A flask of instant rope forms a 30-foot-long cord; it takes 2 rounds for it to solidify and dry enough to be used. The instant rope can be moved during this period without damaging it, but it cannot support more than 10 pounds of weight without breaking. Once completely dry, instant rope can support as much weight as normal hemp rope. After an hour, instant rope becomes too brittle to support any weight and quickly crumbles into dust.

Longbreath: This thick, brown-tinted smoke is a great boon to anyone who needs to go without air for more than a few rounds. After inhaling longbreath, a character can hold his breath for 3 rounds per point of Constitution, rather than 2 rounds per point. Longbreath can be used after the character begins holding his breath, but it provides less of a benefit. If a character inhales longbreath after beginning to hold his breath, simply multiply the number of rounds that the character could continue holding his breath by 1.5. Once a character begins making Constitution checks to continue holding his breath, longbreath provides no benefit.

Motelight: This flask contains a clear liquid filled with faintly glowing sparks of light. You can throw a flask of motelight as a grenadelike weapon. When it strikes a hard surface, a flask of motelight creates a small area filled with rapidly moving sparks. The sparks are distracting, but they cause no damage. Creatures within a 5-foot radius attempting to cast a spell must succeed on a Concentration check (DC 5 + spell level) or lose the spell. If the caster must make a Concentration check for another reason, the motelight applies no additional penalty.

Nature's Draught: This tiny vial contains a murky, pungent liquid. When consumed, nature's draught causes subtle changes in the user's scent. Animals respond well to a character who has consumed nature's draught, finding her less threatening and easier to trust. Drinking a vial of nature's draught provides a +1 circumstance bonus on Handle Animal and Animal Empathy checks made during the next day.

Polar Skin: This dull white cream provides limited protection against cold-based damage. Polar skin becomes ineffective once it has absorbed 5 points of cold damage. Regardless of whether it absorbs any damage, polar skin loses its effectiveness 1 hour after application. Polar skin does not stack with magical protection from cold. Magical effects such as the *resist elements* spell supersede the protection provided by polar skin. Applying polar skin takes 1 minute.

Signal Torch: These simple items are normal torches treated with a variety of alchemical substances to color the flames. Signal torches each burn with a differently colored flame. They are available in a variety of colors, the most common being green, blue, and yellow.

Sparkstone: These alchemical devices actually resemble fist-sized lumps of hard, gray clay. You can throw a sparkstone as a grenadelike weapon. When a sparkstone hits a target, it releases a short, violent arc of electricity. A direct hit by a sparkstone deals 1d6 points of electricity damage. If there is another creature within 5 feet of the target, the electricity arcs to that creature, dealing half of the initial damage. The sparkstone only creates one secondary arc, so if more than one creature is within 5 feet of the target, roll randomly to see which creature is affected. If no creatures are within 5 feet of the target, the sparkstone causes no secondary effect.

Stonebreaker Acid: This special form of acid affects only stone. You can throw stonebreaker acid as a grenadelike weapon. Acid ordinarily deals half damage to objects (see *Attack an Object* in Chapter 8 of the *Player's Handbook*). A direct hit on a stone surface ignores hardness and deals 3d10 points of damage. On the round after a direct hit, stonebreaker acid deals a further 2d10 points of damage.

Verminbane: This tightly sealed flask contains a pale green smoke. When released into the air, the smoke fills a 5-foot-square area. Most creatures are unaffected by the smoke, although humanoids generally find the smell unpleasant. Vermin, however, find the smoke almost intolerable. To pass through an area filled with verminbane, vermin must succeed on a Fortitude save (DC 15). Verminbane lasts for 1 minute, although strong winds may decrease this duration.

Vicious Bleeder: This thick blue gel is a powerful anticoagulant. A wound caused by a weapon coated with vicious bleeder continues to bleed for 2 rounds, dealing 1 additional point of damage on each of those rounds. Applying vicious bleeder to a weapon (of any size) is a full-round action that provokes an attack of opportunity. Once applied to a weapon, vicious bleeder lasts for 1 minute before it evaporates. One flask of vicious bleeder contains enough to coat one weapon of size Large or smaller. Vicious bleeder does not affect constructs, elementals, oozes, outsiders, or undead.

Alchemy or Magic?

Several skills and feats blur the line between the fantastic powers of magic and what exists in the real world. The Alchemy skill exists on this border between the mundane and the magical. Alchemical items must provide a wide variety of quasi-magical effects without duplicating or weakening the effects of magical abilities.

Here are some guidelines to use when creating new alchemical items:

- Alchemical items can induce a temporary state such as shaken or dazed in a single creature, but it takes a magical effect to force such a state on many creatures or induce a state permanently.
- Alchemical items can deal a small amount of damage to a single target. The amount of damage can be increased slightly if the substance affects only a small subset of creatures.
- Alchemical items can impart a temporary property to a mundane item.
- Alchemical items can temporarily mitigate the effects of an existing condition (such as fatigue) or help resist an impending one (such as antitoxin).
- Most importantly, alchemical items shouldn't duplicate a spell effect, affect a large area, or impart a permanent benefit. Nor should they mimic the effect of an existing magic item. Prices for alchemical items should always be balanced against the damage potential and protective benefits of similar magic items.

Superior Items

The items on Table 2–6 are entirely mundane but exhibit fine craftsmanship or an unusual purpose. They have correspondingly high prices.

TABLE 2–6: SUPERIOR ITEMS

Item	Cost	Weight
Animal training pole	10 gp	3 lb.
Cloak, forester's	20 gp	3 lb.
Crossbow sight, gnome	150 gp	1 lb.
Listening cone	20 gp	1 lb.
Pack, framed	50 gp	2 lb.
Robes, desert	20 gp	2 lb.
Sheath, boot	30 gp	—
Sheath, wrist	20 gp	—

—: No weight worth noting.

Animal Training Pole: This hollow pole has a strong, thin cord threaded through it and twisted into a loop at the end. When looped around an animal's neck, it provides an easy way to direct the animal while preventing the animal from moving any closer than the pole's length. An animal training pole provides a +2 circumstance bonus on attempts to teach an animal a task.

Cloak, Forester's: Woven from several pieces of green and brown canvas, these large ponchos aid anyone trying to hide in a forest environment. The

carefully chosen colors blend in with the vegetation, and the poncho's loose shape obscures the humanoid form. Forester's cloaks provide a +1 circumstance bonus on Hide checks made in a forest.

Crossbow Sight, Gnome: This device comes in two parts: an eyepiece that attaches to the stock of a crossbow and a sight that is affixed to the end of the weapon. When calibrated properly, the sights allow the user to focus more carefully on a target. The user treats targets as if they were two range increments closer. It has no effect on targets within the first two range increments.

Listening Cone: This device is made for listening through doors and other solid surfaces. It grants a +2 circumstance bonus on Listen checks made through a door or other relatively thin, solid obstacle.

Pack, Framed: This pack distributes weight better than normal packs, allowing creatures to carry slightly more than they otherwise could. However, it is harder to reach into a framed pack while wearing it. When calculating encumbrance for a character with a framed pack, treat the pack and everything inside it as weighing 10% less than normal. Retrieving anything from a framed pack is a full-round action that provokes an attack of opportunity.

Robes, Desert: These loose, light-colored robes offer some protection against the effects of heat. They provide a +2 circumstance bonus on Fortitude saving throws against exposure to high temperatures. Desert robes offer no protection against either mundane or magical fire.

Sheath, Boot: A boot sheath is easily concealed, making it useful for those who want to appear unarmed. Boot sheaths can hold only Small or Tiny bladed weapons. Characters attempting to conceal an item in a boot sheath gain a +4 bonus on their Pick Pocket check (opposed by either Spot or Search, depending on the situation). If the character using the boot sheath does not have ranks in Pick Pocket, noticing the boot sheath requires a successful Spot or Search check (DC 10).

Sheath, Wrist: This sheath fits along the inside of the forearm, allowing weapons stored inside it to be drawn quickly. A wrist sheath can hold one Tiny weapon, such as a dagger, or one wand. Weapons of unusual shape, like a bladed gauntlet, do not fit into a wrist sheath regardless of their size. Drawing or replacing the contents of a wrist sheath is a move-equivalent action.

Poisons

A surreptitious dose of poison can bring an enemy down without the risk of a prolonged battle. Assassins routinely make use of poisonous concoctions, and even some rogues and bards are willing to accept the risks involved in using such substances. But poisons are not always readily available. Even where

TABLE 2-7: POISONS

Poison	Type	Initial Damage	Secondary Damage	Craft DC	Price	Trap CR Modifier
Alforna	Injury DC 11	1d2 Str	Fatigue	15	75 gp	+1
Banelar essence	Injury DC 11	2d4 Con	Unconscious	15	300 gp	+2
Black adder venom	Injury DC 12	0	1d6 Str	15	120 gp	+1
Bloodroot	Injury DC 12	0	1d4 Con + 1d3 Wis	15	100 gp	+1

they are legal, purchase often brings unwelcome scrutiny. Thus, it behooves those who make frequent use of poisons to brew their own.

Refining raw materials into effective poisons requires both patience and care. A subcategory of the Craft skill, Craft (poisonmaking), provides the necessary expertise. DCs to create usable poisons from the substances described in Chapter 3 of the *DUNGEON MASTER'S Guide* are given in Table 2–7: Poisons, below. Making poisons with the Craft (poisonmaking) skill follows the rules in the *Player's Handbook* for making items with the Craft skill, with the following exceptions.

1. The cost of raw materials varies widely depending on whether the character has access to the active ingredient—that is, the venom or plant that actually provides the poison. If a supply is readily available, the raw materials cost one-sixth of the market price, not one-third. Otherwise, the raw materials cost at least three-quarters of the market price—assuming that the substance in question is for sale at all.

2. Each week's work is the check result \times the DC to create it in gold pieces, not silver pieces. A rogue making purple worm poison, for example, would complete 400 gp worth of the substance in a week's time with a check result of 20, because the DC to create it is also 20.

The following table combines thirty new poisons for use in your campaign with those presented in the *DUNGEON MASTER'S Guide*. See Poison in Chapter 3 of the *DUNGEON MASTER'S GUIDE* for more information on how poisons work.

Type: The poison's method of delivery—ingested, inhaled, via an injury, or contact—and the DC needed to save.

Initial Damage: The damage the character takes immediately upon failing his saving throw against this type of poison. Ability score damage is temporary unless marked with an asterisk (*), in which case the loss is a permanent drain instead of temporary damage. Paralysis lasts for 2d6 minutes unless otherwise noted. Temporary ability score increases last 1d10 minutes.

Secondary Damage: The amount of damage the character takes 1 minute after exposure as a result of the poisoning, if he fails a second saving throw. Special conditions caused by specific poisons are described below. Loss marked with an asterisk is permanent drain instead of temporary damage. Unconsciousness lasts for 1d3 hours.

Craft DC: The DC for the Craft (poisonmaking) check to create the poison.

Price: The cost of one dose (one vial) of the poison. It is not possible to use or apply poison in any quantity smaller than one dose. The purchase and possession of poison is always illegal, and even in big cities

it can only be obtained from specialized, less than reputable sources.

Trap CR Modifier: If you're designing a trap yourself, modify its Challenge Rating by this amount to account for the poison. Only injury, contact, and inhaled poisons are suitable for traps.

New Poisons

Some poisons described in Table 2–7: Poisons have special effects, described below.

Aboleth Oil: Transformation takes 1d4+1 minutes. A transformed creature must remain moistened with cool, fresh water or take 1d12 points of damage every 10 minutes. See the Aboleth entry in the *Monster Manual* for more information about the transformation.

Alforna: Fatigue caused by the secondary effects of alforna is treated normally.

Gray Whinnis: Paralysis caused by the secondary effect of gray whinnis lasts for 1d6 \times 10 minutes.

Lockjaw: Characters affected by lockjaw can't speak or use spells with somatic components.

Scorcher Fumes: Creatures affected by scorcher fumes lose the scent ability, if they had it, for 1d6 \times 10 minutes.

Thever Fumes: The blindness caused by thever fumes is permanent unless removed by *cure blindness* or similar magic.

Thever Paste: The blindness caused by thever paste is permanent unless removed by *cure blindness* or similar magic. If thever paste is heated, thever fumes are the result—the two poisons are derived from the same base compound.

TRADE GOODS

On a peaceful day, the adventurers spot a distant merchant caravan on the road ahead of them. They see just another piece of setting, a detail that adds realism to the campaign world, but one that doesn't impact the heroes or their mission. Another time, the adventurers spot a caravan on the same road, this time engaged in a running battle with a pair of manticores. When the combatants crash through the caravan, the DM needs to know what's in the wagons, what it's worth, and what kind of guards are protecting the trade goods.

The value of a merchant caravan or a shop's inventory becomes even more important should the PCs actually come to possess it. Valuable goods must have powerful guards, and if the party comes into conflict over the contents of a caravan or shop, the value of the goods acquired should correspond to the difficulty of the encounter.

This simple principle might be the only detail needed in most campaigns. Merchants exist, but their activities remain undefined; it's assumed that the

general populace of the campaign world goes about its business and keeps prices at the level described in the *Player's Handbook* and *DUNGEON MASTER's Guide*. Some campaigns however, benefit from a more detailed approach to economic systems.

Economic Systems

Designing a consistent campaign requires at least a nod to economics, even if that nod includes nothing but a decision to follow the pricing structure of the core books with no variation. The Economics section in Chapter 6 of the *DUNGEON MASTER's Guide* provides some basic precepts to keep in mind when designing a world, but DMs seeking to answer more detailed questions must create specific pricing structures for their campaign settings.

Fleshing out a campaign's economic system need not be a complex or even time-consuming task. There are three possible approaches to designing an economic system: Leave it totally undefined; define the different portions of the economy only as the characters interact with them; or define everything in detail in advance. Leaving economic conditions undefined within a campaign world allows the DM to change conditions rapidly should the campaign warrant it, but it sacrifices the verisimilitude of a more defined pricing structure. By far the most common approach is defining only the portions of the economic situation that the PCs are likely to encounter. This requires some work from the Dungeon Master, but not the heavy up-front load of defining an entire economic system. Detailing the entire system of economic conditions within the campaign world provides the greatest sense of consistency, but it also requires the most effort.

Detailing a complex economy is beyond the scope of most campaigns, but simulating one is not. By applying and recording a small set of economic conditions, the DM can easily keep track of large economic forces. Trade patterns from areas of oversupply to areas of high demand emerge with just a little preparation. For each region, simply set and track a price modifier for each type of good. Price adjustments and their meanings are as follows.

Commodity Demand	Availability	Cost Adjustment
Oversupplied	Always	-20%
Surplus	Always	-10%
Normal	Normal	+0%–10%
Undersupplied	Almost always	+10%
Sought	Almost always	+20%
Popular	Sometimes	+30%–40%
Needed	Sometimes	+50%
Desperate	Black market	+100%+

Oversupplied: The area produces this commodity year-round or very cheaply, and likely exports it to other areas.

Surplus: The area produces this commodity seasonally or is near a major source of production. Merchants often buy the commodity here and transport it to higher-demand areas.

Normal: Prices are as given in this book and in the *Player's Handbook*. The commodity is likely produced and consumed in the area.

Undersupplied: The area produces the commodity but cannot meet its own needs. Merchants transport the commodity from nearby areas to sell here.

Sought: The commodity is either not produced locally or an unusual need exists. Merchants rush to bring the commodity to the area.

Popular: The commodity is currently needed or very fashionable. Merchants with large supplies of the commodity become very rich.

Needed: The commodity is in great demand, and even the rich might not have enough. Large cities experience this condition most often when short of food due to environmental hazards. Merchants travel great distances to bring the commodity to the area.

Desperate: Food in times of famine, medicine in times of plague, weapons in times of war. There is great need and no supply—those with access to even small quantities of the commodity name their own price, provided they can protect their supply from those trying to steal or capture it. This condition arises most often when a government seizes all of one type of commodity. In order for this condition

to arise, typical merchants must be unable to bring the commodity to the area. Traffic in the commodity is the province of smugglers or individuals with powerful magical aid.

Since most commodities fall under the normal category, the DM need only note areas of great surplus and great demand. The trade patterns and economic conditions that emerge from these simple labels make a great backdrop to a campaign, especially when the adventurers' actions begin to affect the conditions of large areas.

Merchant Wealth Levels

Apart from a campaign's overall economic conditions, the resources of individual merchants occasionally become important to an adventure. While the vast majority of the player characters' interaction with merchants need not take much time or attention, there will be times when more details about a merchant's resources are important.

In addition to their individual resources, merchants must work with the goods they have on hand.

Goods versus Commodities

The key difference between goods and commodities is their selling price. A commodity, in this sense, is a valuable good that can be easily exchanged almost as if it were cash itself. Wheat, flour, cloth, and precious metals are commodities, and merchants often trade in them directly without using currency (see Table 7-3: Trade Goods in Chapter 7 of the *Player's Handbook*). Obviously, merchants can sell these goods for slightly more than they pay for them, but the difference is small enough that you don't have to worry about it.

TABLE 2-8: COMMUNITIES

Community Size	Population	GP Limit	Merchant Wealth	Traveling Wealth	EL	Traveling Encounter
Thorp	20–80	40	100	100	1	War1 (x2)
Hamlet	81–400	100	200	200	1	War1 (x2)
Village	401–900	200	400	400	1	War1 (x2)
Small town	901–2,000	800	1,600	1,000	4	Ftr3, War1 (x3)
Large town	2,001–5,000	3,000	6,000	3,000	8	Ftr4, War2, War1 (x9)
Small city	5,001–12,000	15,000	30,000	10,000	12	Ftr6 (x2), War4 (x7), War2 (x12)
Large city	12,001–25,000	40,000	80,000	20,000	15	Ftr8, Ftr6 (x2), Adp6 (x2) War4 (x10), War2 (x12)
Metropolis	25,000+	100,000	200,000	50,000	18	Ftr8, Ftr6 (x4), Adp6 (x4) War4 (x14), War2 (x24)

In the *DUNGEONS & DRAGONS* game, this means that their purchases and goods for sale are limited by the size of the communities in which they operate. Simply put, the value of a traveling merchant's caravan or a stationary merchant's inventory cannot exceed twice the gp limit of the community. Gold piece limits as defined by the *DUNGEON MASTER'S Guide* represent the maximum value of any one item for sale in the community. Since these gauge the relative wealth of a community, not its total resources, doubling the gp limit makes an easy and simple measure of an individual merchant's resources. Some merchants have the most valuable items in the community for sale, but such goods represent a significant portion of that merchant's resources. Likewise, the value of goods that a merchant can sell in any one community cannot be greater than that community's gp limit. Gold piece limits based on community size can be found in Table 4-40: Random Town Generation in Chapter 4 of the *DUNGEON MASTER'S Guide*.

When designing the contents of a caravan or merchant's shop, the Dungeon Master must also consider the wealth limits placed on NPCs according to their level. Table 2-44: NPC Gear Value in Chapter 2 of the *DUNGEON MASTER'S Guide* gives NPC gear value by level. Table 2-8: Communities, below, is an easy reference comparing a community's population to the value of a merchant's goods, the Encounter Level of treasure represented by the merchant's goods, and a standard array of guards that protect the goods. Traveling merchants must for the most part arrange to protect their own goods, but stationary businesses and merchants traveling in well-defended areas will have little protection of their own. In these situations, the DM must ensure that the local peacekeepers are a defensive force equal to the EL of standard dungeon encounters.

Merchant Wealth: The maximum net worth of a merchant's inventory. In a community, this represents the contents of one shop. For traveling merchants, this represents the total value of transported trade goods and holdings in the home community. Traveling merchants use the value of their community of origin.

Traveling Wealth: The maximum value of trade goods transported by one merchant out of a specific

community. Few merchants transport the maximum value of goods.

EL: The Encounter Level commensurate with the value of the transported goods.

Traveling Encounter: A typical contingent of guards in an uncivilized area. This is often reduced in safe areas.

TABLE 2-9: COMMODITIES

Commodity	Unit Size	Unit Cost
Alchemical materials, unusual	1 oz.	1 sp–1 gp
Alchemical materials, rare	1 oz.	2 gp–10 gp
Alchemical materials, exotic	1 oz.	11 gp–25+ gp
Arcane material, rare	3 lb.	1 gp–5 gp
Arcane material, exotic	1 oz.	6 gp–25 gp
Arcane material, unique	1 oz.	25 gp–100+ gp
Cosmetics, common	1 oz.	1 cp–1 sp
Cosmetics, unusual	1 oz.	2 sp–1 gp
Cosmetics, rare	1 oz.	2 gp–10 gp

Fabric, fine	50 lb.	2 gp–10 gp
Fabric, unusual	50 lb.	11 gp–25 gp
Fabric, exotic	50 lb.	26 gp–50+ gp
Furniture, plain	20 lb.	1 gp–5 gp
Furniture, fine	20 lb.	6 gp–15 gp
Furniture, exotic	20 lb.	15 gp–25+ gp
Furs and hides, common	20 lb.	1 gp–5 gp
Furs and hides, unusual	20 lb.	6 gp–10 gp
Furs and hides, rare	20 lb.	11 gp–20 gp
Furs and hides, exotic	20 lb.	21 gp–50 gp
Furs and hides, monstrous	20 lb.	51 gp–200+ gp
Lumber, local	50 lb.	1 gp–10 gp
Lumber, unusual	50 lb.	11 gp–25 gp
Lumber, exotic	50 lb.	26 gp–50+ gp
Paints and dyes, common	1 lb.	1 sp–1 gp
Paints and dyes, unusual	1 lb.	2 gp–10 gp
Paints and dyes, rare	1 lb.	11 gp–25 gp
Paints and dyes, exotic	1 lb.	26 gp–50+ gp
Perfume, common	1 oz.	1 sp–1 gp
Perfume, unusual	1 oz.	2 gp–10 gp
Perfume, rare	1 oz.	11 gp–25 gp
Perfume, exotic	1 oz.	26 gp–50+ gp
Rugs and tapestries, common	5–15 lb.	1 gp–5 gp
Rugs and tapestries, unusual	5–15 lb.	6 gp–10 gp
Rugs and tapestries, rare	5–15 lb.	11 gp–50 gp
Rugs and tapestries, exotic	5–15 lb.	51 gp–200+ gp

CHAPTER 3: VEHICLES

Vehicles are used in D&D games in one of three ways, each of which is described below.

Quick “Off-Camera” Transportation: If you want to get the characters from one adventure site to another, it’s easy to simply say, “You board a sailing ship named the *Drunken Triton* and arrive in Rel Astra two weeks later.” The speeds and cargo capacities given in the vehicle statistics later in this chapter should give you an idea of how long voyages take, and you can simply charge the transportation costs given in Chapter 5 of the *DUNGEON MASTER’S Guide* (1 sp per mile for ocean travel and 3 cp per mile for overland travel). If you’re in a hurry to get onto the next adventure, you can skip random encounters along the way.

Props in Unusual Set-Piece Battles: Variety is the spice of lively battles, and your players may appreciate the change of pace if they get to drive chariots around the emperor’s arena or repel pirate boarders on the decks of a merchant galley. Characters can borrow or commandeer the vehicles they need for a battle or chase. Each of the vehicles described in this chapter has its speed, maneuverability and protective qualities detailed. And since crashes and collisions are inevitable for some characters, rules for those eventualities are provided as well.

The Organizing Principle of the Campaign: Maybe the characters in your adventure are the officers of a privateer, hunting the seas for the queen’s foes and bringing rich prize ships back to the docks. Your players can enjoy the hunt on the high seas, engage in naval battles, and enjoy land-based adventures in every port of call. New characters can join the group simply by being hired on as crew members (probably as officers unless your players are comfortable issuing orders to one another). If you center your campaign around a single large vehicle, you give the characters a very good reason to stick together and pool their resources. It’s also fun to watch the vehicle develop a reputation to rival the famous ships of legend.

If the PCs acquire a vehicle and are interested in customizing it, allow them to purchase augmentations as their time and budget allows. They can also “trade up” through purchase or outright conquest.

A QUICK TOUR OF YOUR VEHICLE

Each vehicle described later in this chapter is depicted in a diagram that shows how it fits on a 5-foot-square grid (both aligned with the grid and diagonally). The diagrams are approximations and don’t

necessarily represent the “real” size of the vehicle any more than a D&D character “really” occupies a 5-foot square. They are just useful abstractions that answer questions such as “How many people can stand on the deck of the ship?” or “How far behind the horse is my chariot?”

Rotation Point: Each vehicle diagram shows a rotation point; for sailing ships, it’s usually the primary mast. Whenever the vehicle turns, keep the rotation point stationary and pivot the vehicle around that point to make the turn.

Driver Position: Whether it’s a ship’s helm, a mass of levers and dials, or just a convenient place to grab the reins, there’s one spot where the driver of the vehicle stands or sits. That’s the “driver” position shown on the diagram. If the driver leaves this position, the vehicle is out of control (see Out of Control Vehicles, later in this chapter).

Ten-Foot Sections: Vehicles with a longest dimension (length or height) of 20 feet or more have their exteriors divided into 10-foot-square sections to handle combat damage. Each section has its own Armor Class, hit points, and hardness. The destruction of a 10-foot section doesn’t necessarily mean the demise of the vehicle, but it’s rarely good news for the crew.

Sailing ships also have rigging, which is treated as its own section separate from the 10-foot sections that make up the hull. Attackers can target the rigging separately, using the statistics provided with each vehicle.

Interior Features: Much like a dungeon, particularly large vehicles have interior walls, hallways, doors, and other architectural features. Space is generally at a premium on a vehicle, so such features tend to be smaller and more cramped than their stationary counterparts. But in a world with magic, almost anything is possible, and eventually the line between massive vehicle and mobile building becomes indistinguishable.

Driver: Throughout this chapter, the term “driver” denotes the person who is directly responsible for a vehicle’s actions. This person might be a wagon driver, a galley’s coxswain, or a zeppelin’s pilot.

A driver might use different skills depending on the vehicle: A dogsled musher uses Handle Animal on all her maneuver checks, while a zeppelin pilot uses Profession (pilot) on his. Proper skill names are used where appropriate, but “Profession” appears as a generic term to avoid clumsy redundancy. Anywhere “Profession” stands alone, without a specific profession skill referenced, use Handle Animal or a Profession skill appropriate to the vehicle being discussed.

Behind the Scenes: Physics and Vehicles

This book is not, and cannot be, a physics textbook, a pilot’s manual, or a set of sea captain’s charts. This is our best simulation of vehicle movement, and combat, within the D&D rules. Don’t be surprised if sailing vessels don’t work exactly the way they do in the real world, or if hang gliders don’t take drag into account and minimize the effects of gravity.

MANEUVERABILITY

Much like flying characters and creatures, all vehicles—not just air vehicles—have maneuverability attributes. For land- and water-based vehicles, the only characteristics affected by maneuverability are turn, turn in place, and maximum turn. Lane and water vehicles can't climb or dive, and they don't have minimum forward speeds. Water vehicles use new nautical maneuverability categories. See Table 3–1 for a summary of all characteristics affected by maneuverability. Those characteristics are explained and defined below.

Minimum Forward Speed: If an air vehicle fails to maintain its minimum forward speed, it must land at the end of its current move. If it is too high above the ground to land, it falls straight down, descending 150 feet in the first round of falling. If this brings it to the ground, it takes falling damage. If the fall doesn't bring it to the ground, the vehicle must spend its next turn recovering from the stall. It must succeed on a Reflex saving throw (DC 20) to recover. Otherwise it falls another 300 feet. If it hits the ground, it takes falling damage. If not, it has another chance to recover on its next turn.

Hover: The ability of an air vehicle to stay in one place while airborne.

Fly Backward: The ability of an air vehicle to fly backward.

Reverse: A vehicle with good maneuverability uses up 5 feet of its speed to start moving backward. No matter what their maneuverability is, wind-powered vehicles can't go in reverse. Dray creatures move backward at a speed of 10 feet or their normal speed, whichever is less. Oar-powered vehicles move backward at half speed.

Turn: How much the vehicle can turn after covering the stated distance.

Turn in Place: A vehicle with good or average maneuverability can "spend" some of its speed to turn in place.

Maximum Turn: How much the vehicle can turn in any one space.

Up Angle: The maximum angle at which an air vehicle can climb.

Up Speed: How fast an air vehicle can climb.

Down Angle: The maximum angle at which an air vehicle can descend.

Down Speed: An air vehicle can fly down at twice its normal flying speed.

Between Down and Up: An air vehicle with average, poor, or clumsy maneuverability must fly level for a minimum distance after descending and before climbing. Any air vehicle can begin descending after a climb without an intervening distance.

For simplicity's sake, vehicles turn in 45-degree increments. When a vehicle turns, simply pivot it around its rotation point. If a turn puts the vehicle on top of other creatures, what happens depends on the relative size of the vehicle and the creatures. Treat the vehicle as a creature of its size; if it's three or more size categories larger than the creatures in its way, it can turn right through their squares. (It comes up much more rarely, but a vehicle three or more size categories smaller than a creature can also turn through the creature's area.) If the creatures aren't three size categories smaller, then the vehicle can't make a turn through their areas. If you're trying to collide with someone on purpose, you need to move, not turn, into its space (see Collisions, below).

Driving a vehicle is generally a move-equivalent action. The vehicle takes a single or double move on the driver's initiative count, turning as the driver wishes. The driver is free to attack, cast a spell, or perform another standard action in addition to driving.

Most vehicles have a maximum speed. This is the greatest distance it can cover in a single move; an undamaged vehicle can make a double move as easily as a single move.

PROPULSION

Vehicles have two basic types of propulsion. A vehicle is powered either by creatures, such as a horse-drawn cart or a human-powered longship, or by an inanimate force, such as wind, gravity, or mechanical power.

Some vehicles, such as ships, have a choice of either type of propulsion, using oars or sails.

TABLE 3–1: VEHICLE MANEUVERABILITY

	Perfect	Good	Average	Poor	Clumsy	Nautical Good	Nautical Average	Nautical Poor	Dirigible
Minimum forward speed	None	None	Half	Half	Half	None	None	None	None
Hover	Yes	Yes	No	No	No	—	—	—	Yes
Fly backward	Yes	Yes	No	No	No	—	—	—	Yes
Reverse	Free	–5 ft.	—	—	—	—	—	—	—

Turn in place	Any	+90°/–5 ft.	+45°/–5 ft.	No	No	Special	Special	Special	—
Maximum turn	Any	Any	90°	45°	45°	45°	45°	45°	—
Up angle	Any	Any	60°	45°	45°	—	—	—	—
Up speed	Full	Half	Half	Half	Half	—	—	—	—
Down angle	Any	Any	Any	45°	45°	—	—	—	—
Down speed	Double	Double	Double	Double	Double	—	—	—	Normal
Between down and up	0 ft.	0 ft.	5 ft.	10 ft.	20 ft.	—	—	—	—

Wind-Powered Vehicles

Vehicles with sails depend on the wind to power their movement. To determine how a wind-powered vehicle moves, first figure out wind speed and direction on the tables below.

TABLE 3–2: RANDOM WIND SPEED

d%	Wind Condition	Speed Multiplier
01–05	Calm (0 mph)	Can't move
06–70	Light (1–10 mph)	×1
71–80	Moderate (11–20 mph)	×2
81–90	Heavy (21–30 mph)	×3
91–99	Severe (31–50 mph)	Can't sail
100	Windstorm (51–74 mph) or hurricane (75–150 mph)	Can't sail

TABLE 3–3: RANDOM WIND DIRECTION

d8	Wind Direction (Originating Direction)
1	South
2	Southwest
3	West
4	Northwest
5	North
6	Northeast
7	East
8	Southeast

As long as the vehicle is pointed within 90 degrees of downwind, its maximum speed is equal to the speed given in the vehicle's statistics block multiplied by the speed multiplier from Table 3–2 above. For example, if a moderate wind is coming from the south, a galley with a speed of 20 feet heading west, northwest, north, northeast, or east has a speed of 40 feet (20 feet × 2).

If a wind-powered vehicle turns so that its bow points within 45 degrees of the direction the wind is coming from, its speed is reduced by half as long as it's heading in that direction. For example, if the wind is coming from the south, a galley heading southeast or southwest moves at half speed.

If a wind-powered vehicle turns into the wind (its bow points in the direction the wind is coming from), it comes to a halt and ends its movement that round. The vehicle can spend one of its move actions to rotate 45 degrees in either direction, which will get it moving again (at half speed, until it turns to more favorable winds). This is what the "special" entry on Table 3–1 refers to.

Oar-Powered Vehicles

Vehicles with rowers move more consistently. As long as enough rowers are present, oar-powered vehicles move at their given speed in any direction. Furthermore, they tend to be more maneuverable in close quarters than vehicles that rely on sails.

If the indicated number of rowers isn't available, reduce the vehicle's speed by the same percentage as the reduced crew. For example, a galley that ordinarily has a speed of 20 feet with 160 rowers has a speed of 10 feet if only 80 rowers are aboard. Ships generally need

at least one-quarter of the indicated number of rowers to make any progress at all.

Ships with Oars and Sails: Some vehicles, such as the galley and the warship, have both oars and sails. Two maneuverability ratings and two speeds are given. The driver of the vehicle decides whether it is using rowers or sails for locomotion. The method of locomotion can be changed in as little as 1 round.

Drawn Vehicles

The speed of a drawn vehicle such as a wagon or chariot depends on what's pulling it (the dray creature). Horses are the most common dray creatures, but the world of the D&D game also features carriages pulled by dire wolves, sea-sleds propelled by orcas, and vast siege towers drawn by teams of war elephants.

Two factors determine the speed of a drawn vehicle: the weight of the vehicle and the Strength score of the dray creatures. First, figure out the total weight of the vehicle, including driver, passengers, and cargo. Then divide the weight by 4 if it's a wheeled vehicle or by 3 if it's an ice sled or water vehicle. The result is the pull weight of the vehicle.

Next, compare the pull weight of the vehicle to the Strength score of the dray creatures on Table 9–1: Carrying Capacity in the *Player's Handbook* to find out how fast the vehicle can travel. If there are several dray creatures, simply divide the weight among them.

For example, Lidda has commandeered a treasure-laden wagon pulled by two heavy horses. The wagon weighs 400 pounds, it holds 3,750 pounds of treasure, and Lidda weighs 50 pounds (including her gear). That means the wagon's total weight is 4,200 pounds and its pull weight is 1,050 pounds. The two heavy horses therefore carry 525 pounds each. Heavy horses have Strength 15, and as Large quadrupeds they carry three times the weight given in Table 9–1. This means they are under a heavy load, so the vehicle moves at a speed of 35 feet and the horses can't run.

Once you know the pull weight of the vehicle, it's easy to figure out how the death of one dray creature affects the vehicle. The other dray creatures in a team might be strong enough to pick up the slack once the dead creature is released from the harness, but they also might be unable to move the vehicle at all.

Controlling Drawn Vehicles in Combat: Warhorses, warponies, and other creatures trained for battle serve readily as dray creatures in a fight. Other creatures tend to be frightened by combat. If the vehicle does anything other than remain still, the driver must make a Handle Animal check (DC 20) each round as a move-equivalent action. If the driver succeeds on the check, the vehicle functions normally. A driver who fails must spend the rest of the round trying to calm the dray creatures and can't take any other actions.

Drivers who need both hands to fight can try to control a drawn vehicle with verbal commands, by

wrapping the reins around an arm, or by using some other makeshift technique. But it's difficult; a Handle Animal check (DC 25) is required at the beginning of the round you try this. If you fail, you can either pick up the reins (dropping something in one hand) or choose to let the vehicle be out of control this round (see Out of Control Vehicles, below).

CONTROLLING VEHICLES

Driving a vehicle under good weather conditions with sufficient crew requires no skill check. If it's a land-based vehicle, you don't have to make a skill check just to drive along the road. But if the weather is foul, the terrain treacherous, or your vehicle short-handed, you must make skill checks every round to keep your vehicle under control.

Table 3-4: Vehicle Control DCs identifies some common situations requiring vehicle control checks.

TABLE 3-4: VEHICLE CONTROL DCs

Task	DC
Drive in precipitation	10
Drive during storm	20
Drive during powerful storm	30
Drive on $\times 3/4$ terrain (mountain highway, jungle road, swamp road, hill road, trackless scrub)	10
Drive on $\times 1/2$ terrain (mountain road, trackless forest, swamp, hills, or desert)	20
Drive on $\times 1/4$ terrain (trackless jungle, mountains)	30
Sail in light seas	5
Sail in moderate seas	15
Sail in heavy seas	25
Less than full crew	10
Less than half crew	20
Less than one-quarter crew	30

Each vehicle statistics block gives the relevant skill, almost always Handle Animal for land-based vehicles or Profession (sailor) for waterborne vehicles. If the driver doesn't have the relevant skill, the vehicle remains stationary (if it didn't move the previous round) or is out of control (if it did move); see Out of Control Vehicles, below.

If conditions require a control check, the driver makes checks every round on the tactical movement scale, every minute on the local scale, and every hour on the overland scale. If a driver fails a vehicle control check, what happens depends on the current movement scale.

Overland Movement: A land vehicle is reduced to half speed for 1 hour if the driver fails a control check by 1–4 points. Failure by 5 points or more means that no progress is made in the next hour. Minor breakdowns, stuck wheels, and uncooperative dray creatures account for many of these delays.

The consequences of failure are the same for waterborne and airborne vehicles, with one additional consideration: If the control check fails by 10 or more, the vehicle is sent off course in a random direction. Use

Table 3-3 to determine direction; the vehicle moves in that direction for 1 hour at its maximum speed.

Local Movement: All vehicles move at half speed for 1 minute if the control check fails by 1–4 points. They make no progress at all for 1 minute if the check fails by 5 points or more.

Tactical Movement: If conditions require a control check, the driver makes one immediately when it's his turn. If the check fails, roll on one of the following two tables, depending on the degree of failure.

TABLE 3-5: FAILED CONTROL CHECK (1-4 POINTS)

d6	Result
1	Vehicle can't move this round
2-4	Vehicle moves at half speed this round
5-6	Vehicle is considered one maneuverability rating worse this round

TABLE 3-6: FAILED CONTROL CHECK (5+ POINTS)

d6	Result
1	Vehicle can't move until repairs are made
2	Vehicle turns as often as it can, in a random direction each time, at last round's speed
3	Vehicle must turn left as soon as possible; thereafter functions normally
4	Vehicle must turn right as soon as possible; thereafter functions normally
5	Vehicle drives straight ahead at maximum speed
6	Vehicle can't move this round

Out of Control Vehicles

Sometimes a driver is incapacitated or leaves the wheel (voluntarily or otherwise). If that happens, the vehicle is out of control. On the driver's initiative count, roll on Table 3-6 above to determine how the vehicle moves. Unless the result indicates a turn, the vehicle continues straight ahead. An out of control vehicle continues to roll on Table 3-6 every round until it comes to a stop from a result on the table or a collision (see Collisions, below).

VEHICLE COMBAT

Vehicle combat uses the normal rules described in Chapter 8 of the *Player's Handbook*. Vehicles have maneuverability, just as flying characters and creatures do, and have limitations on how quickly they can turn. They generally provide at least a measure of cover for their occupants, as described in the individual vehicle descriptions.

Driving a vehicle is a move-equivalent action, so a driver can generally make a single attack while driving. Passengers on a vehicle can make attacks normally, but it's sometimes hard to fight aboard a moving, vibrating vehicle. It's also possible to run into a foe with your vehicle. Such collisions represent an unusual attack type; see Collisions, below, for more information.)

Melee Attacks: If the vehicle moves more than 5 feet in a round, the driver and passengers can each

only make a single melee attack. Essentially, you have to wait until your vehicle gets to the enemy before attacking, so you can't make a full attack. If you attack a Medium-size or smaller creature who's standing on the ground, you get a +1 bonus on the attack roll for being on higher ground.

Ranged Attacks: Normal ranged attacks and siege engine attacks made from a water vehicle incur a -2 penalty during inclement weather, a -4 penalty during a storm, and a -8 penalty during a powerful storm because the waves cause the ship's deck to pitch, making such attacks difficult. These penalties stack with any penalties from high winds; see Table 3-17: Wind Effects in the *DUNGEON MASTER'S Guide*.

As with mounted combat, you are assumed to make your attack rolls when the vehicle is at the midpoint of its movement for that round.

Casting a Spell: Spellcasters aboard a moving vehicle must succeed on Concentration checks to cast spells. The check DC is 10 + spell level for all land vehicles and for air or water vehicles in inclement weather. The check DC is 15 + spell level aboard an air or water vehicle in a storm, and 25 + spell level in a powerful storm. Aboard a big air or water vehicle, a spellcaster can reduce the check DC by 5 by going belowdecks.

Fighting Drivers: A driver can voluntarily relinquish control of a vehicle to make a full attack or take another full-round action. Such a vehicle is out of control (see above) until the driver spends a move-equivalent action to bring the vehicle under control again.

COLLISIONS

If you hit something with your vehicle (whether intentionally or by accident) at full speed, the collision deals the ram damage given in the vehicle's statistics block. Your vehicle (or the 10-foot section including the ram, if it's a big vehicle) takes an equal amount of damage, up to a maximum of your target's remaining hit points (or hit points -10 if it's a creature). For example, if you try to run down a pedestrian who has 17 hit points, your double chariot can't take more than 7 points of damage no matter how fast you're going.

Some vehicles have extra braces and heavy striking surfaces that make them better at ramming. Vehicles with rams take only half damage from collisions they initiate.

The given damage is for a vehicle traveling at maximum speed. If a vehicle can't reach its maximum speed due to terrain, damage, or other factors, adjust the damage dealt by the same proportion as the speed. For example, a double chariot that could ordinarily deal 4d6 points of damage in a ram deals only 2d6 points of damage on a mountain road because it's limited to half speed there. Vehicles don't need to actually move a distance equal to their speed to make

a full-damage ram attack; they need only move 10 feet in a straight line.

The given ram damage assumes that the vehicle is hitting a more or less stationary target. But it's the relative speed between the ramming vehicle and the target that matters most, not the ramming vehicle's actual speed. If a sailing ship with a wind-aided speed of 60 feet rams the stern of a longship being rowed at a speed of 15 feet, the ram deals only 9d6 points of damage, not 12d6, because the sailing ship is effectively moving at a speed of 45 feet relative to the longship, or 3/4 of its maximum speed. But if the longship and the sailing ship have a head-on collision, the sailing ship deals 15d6 points of damage, because it's effectively moving at 75 feet, 1 1/4 times its maximum speed relative to the longship.

Oblique Angles: If your vehicle collides with another vehicle at an angle that is neither head-on, perpendicular, nor the same, treat the collision as if the angle were the nearest 90-degree angle. In other words, a collision counts as head-on (adding the speeds together) even if one vehicle is moving north and the other vehicle is a bearing a few degrees off south. If it's exactly a 45-degree angle (one vehicle is going east and the other is going northeast, for instance), use the most damaging category. Thus, if a vehicle going east rams one going northeast, use the ramming speed of the eastbound vehicle to figure ramming damage. If a vehicle going east rams one going southwest, add their speeds together to figure out the ramming damage.

Creatures and stationary objects (such as walls, shoals, and fruit carts) take damage as normal, accounting for hardness or damage reduction first. To apply damage to vehicles, see *Attacking a Vehicle*, below.

If the collision destroyed whatever you hit, you may continue moving at half speed. If it's still there, your vehicle stops for the rest of the round.

Collisions and Passengers: The driver, crew, and passengers in smaller vehicles are vulnerable to damage in a collision. All aboard a vehicle that comes to a stop after a collision take 1d6 points of damage per 10 feet of relative speed in the collision. A successful Reflex save (DC 20) halves the damage. If the vehicle is Huge or larger, those aboard take damage only if the collision destroys the vehicle.

Leaving a Moving Vehicle: Whether you jump or get pushed, sometimes you leave a vehicle while it's moving. Hitting the ground deals 1d6 points of damage per 10 feet of speed (Reflex half DC 20). Regardless of the save result, such a character is prone unless she succeeds on a Tumble check (DC 15 + 1 per 10 feet of speed).

Drawn Vehicles and Collisions: An inattentive captain can easily sail a ship into a dock, but even the worst charioteer can't drive a team of horses into a brick wall. When confronted with an inanimate object, the dray creatures simply stop.

Running over Opponents: Drawn vehicles with war-trained dray creatures can attempt to run over foes. Treat such attacks as overrun attempts (see Chapter 8 of the *Player's Handbook*). Accordingly, the defender chooses to either avoid or block the dray creatures. If the defender chooses to avoid them or is tripped by them during the blocking attempt, the vehicle deals the indicated ram damage as it drives over the defender, and the defender is prone after the ram if she wasn't beforehand. If the defender chooses to block and succeeds, the vehicle comes to a halt with the dray creatures adjacent to the defender, just as in a normal overrun. Depending on the result of the trip attempt, the dray creatures may or may not be prone themselves.

If two or more dray creatures are harnessed abreast of each other, each creature making the overrun attempt gains a +2 circumstance bonus on trip attempts for each other creature harnessed in the line, because the harness gives the dray creatures more stability. For example, if Tordek tries to run over an orc with a double chariot drawn by two heavy warhorses, only one of the warhorses makes an overrun attempt because only that one will actually run over the orc. But if the orc chooses to block, the heavy war horse receives a total bonus on the trip attempt of

+14 (+4 for being Large, +4 for 18 Strength, +4 for being a quadruped, and +2 for the other horse).

Note that just as with a normal overrun attempt, dray creatures can only run over opponents who are one size larger, the same size, or smaller.

Trampling Dray Creatures: If your vehicle's dray creatures have the trample special ability, they make trample attacks rather than overrun attempts.

ATTACKING A VEHICLE

Just as a single catapult shot or *disintegrate* spell won't destroy an entire castle, so too will a weapon or spell damage only part of a big vehicle like a ship. A Huge or larger vehicle is usually divided up into 10-foot-by-10-foot sections, and attacks (whether from weapons or spells) target the sections, not the vehicle as a whole. An attacker can target any visible section, and smart foes concentrate their fire on specific parts of the vehicle to disable it as quickly as possible.

Smaller vehicles, such as a cart or chariot, simply have an Armor Class and hit points. Essentially, they are vehicles with a single section; in other respects they follow all the rules below.

Because they're inanimate objects, vehicles generally have very low Armor Classes. They're protected by their hardness and the fact that objects are harder to damage than creatures.

Like all inanimate objects, vehicles are immune to critical hits, subdual damage, and sneak attacks.

They take half damage from all ranged weapons smaller than siege engines, as well as from acid, fire, and lightning.

Cold attacks deal one-quarter damage. Divide the damage by 2 or 4 before subtracting the object's hardness. Sonic attacks deal full damage.

Even if they're occupied, vehicles count as unattended objects, so they never make saving throws. Magical augmentations on a vehicle (see below) can make saving throws, however; their Fortitude, Reflex, and (rarely used) Will save bonuses are equal to $2 + 1/2$ their caster level.

Targeting a Vehicle Section: The statistics block for each multiple-section vehicle gives the Armor Class, hit points, and hardness (if any) per section.

For sailing ships, the sails and rigging are accounted for as a separate section, with its own Armor Class and hit points. This section is otherwise just like any other vehicle section, except that it handles damage somewhat differently (see below).

Effects of Damage: Once a vehicle section has taken 10% of its hit points in damage, the scars and gouges are noticeable. When the section has lost 50% of its hit points, cracks appear. After losing 75% of its hit points, the section has holes and cracks large enough that those inside and outside the vehicle can attack one another directly, though the section still provides nine-tenths cover. The section collapses when its hit points are exhausted.

If a vehicle section has taken 50% of its hit points in damage, the vehicle's speed is reduced by 5 feet until the damage is repaired. This reduction doesn't stack, so multiple damaged sections still make the vehicle only 5 feet slower. If a section is destroyed, the vehicle's speed is cut in half. If a second section is destroyed, the vehicle can't move.

If you're attacking a multilayered section (such as one with armor plating; see Vehicle Augmentations, below), you must overcome each layer in turn. Damage left over from a single attack that destroyed the previous layer must overcome the hardness of the new layer (if it is a different material) before damaging it.

Collateral Damage: If you destroy a section, you weaken the sections adjacent to it. Any section adjacent to a section that is destroyed automatically takes damage equal to 50% of its full normal hit points (after accounting account for hardness as usual) in the following round. Collateral damage can spread across a vehicle from round to round and section to section, destroying sections in succession if each was already sufficiently damaged.

Damage to a wind-powered ship's rigging doesn't weaken anything else aboard the vehicle.

Sinking Ships: Water vehicles that take damage risk a one-way trip to the ocean floor. If a ship has a section of hull destroyed, it starts to take on water. Unless the ship can be repaired—probably magically—it will sink in a matter of minutes. A ship sinks in a number of minutes equal to 30 divided by the number of destroyed 10-foot sections (not including rigging). Ships in

inclement weather (as defined in Table 3–19: Random Weather in the *DUNGEON MASTER'S Guide*) sink twice as fast, and ships in storms sink four times as fast. Any ship unfortunate to have a section destroyed during a powerful storm sinks in 1 minute.

Sections that are merely damaged let some water in, but not enough to put the ship in immediate danger. Ship officers typically assign some crew members to bail the water out until carpenters can plug the leaks.

Damaged Rigging: If the rigging on a wind-powered ship takes 50% of its full normal hit points in damage, treat the wind as one category lighter because the remaining sails aren't able to capture it as effectively. Thus, ships with damaged rigging move twice their speed in heavy winds, move their speed in moderate winds, and are unable to move in light winds. If a ship's rigging is destroyed, it can't move at all under wind power.

Repairing and Building a Vehicle

Sometimes fixing a vehicle is a simple matter of carpentry. But if the damage is severe and the situation is dire, only magic can rebuild a vehicle fast enough. Likewise, building a vehicle can be a task hired out to a wainwright or shipyard, or a project for a powerful spellcaster.

Vehicle Repairs

If a vehicle has taken damage, a group of carpenters, engineers, or other crew members can repair it without the use of magic. The number of members in the repair crew must equal the hardness of the material being fixed. For example, repairing damage to a 10-foot vehicle section made of wood requires a five-person repair crew, because wood has a hardness of 5. Only one member of the repair crew need have the relevant Craft skill (carpentry for wood, armorsmithing for metal, or sailmaking for rigging); the others can be unskilled. Depending on the situation, tools or raw materials may be necessary. If the skilled member of the repair crew succeeds on a Craft check (DC 10) at the end of 1 minute's uninterrupted work, repairs were successful, at least to a degree. For every point by which the Craft check result exceeds 9, 1 hit point is restored to the damaged section.

Once a vehicle section is destroyed, it takes days to fix without the aid of magic (and most magic is only a temporary solution; see Magical Repair Techniques, below). If a vehicle with destroyed sections can be transported to a dock or other repair facility, determine the extent of the vehicle's damage as a value in gold pieces: number of destroyed sections divided by vehicle's total number of sections $\times 1/2$ vehicle's cost. This number represents the cost of raw materials needed to rebuild the destroyed sections and dictates how long the repairs will take.

A repair crew (as defined above) can repair 125 gp worth of damage per day, given proper tools and raw

materials. A typical dock, wheelwright's shop, or other well-equipped facility can generally repair 250 gp worth of damage per day. A drydock (where a waterborne vehicle is hoisted out of the water) or a particularly large vehicle repair facility can repair 500 gp worth of damage per day.

Example: The hull of a longship (70 feet by 20 feet) has fourteen sections. Three of the sections were destroyed in a sea battle, but the wizards aboard kept the ship afloat with magic until it could reach port. Since the cost of a longship is 10,000 gp, the repairs will cost a number of gold pieces equal to $3 / 14 \times 5,000$, or about 1,070 gp. A repair crew with proper tools and raw materials can fix the destroyed sections in nine days; at a drydock facility the work could be done in a little more than two days.

Repairing Rigging: Damaged rigging can be repaired as described above. Destroyed rigging must be repurchased at a cost of 20 gp per hit point of the undamaged rigging.

Magical Repair Techniques: A number of spells can speed the repair process or provide makeshift battle repairs. *Mending* instantly repairs 1d8 points of damage, and *make whole* completely repairs a single 10-foot section as long as the damage was not the result of warping, burning, or disintegration.

If a section has been destroyed, it requires *minor creation* and an appropriate Craft check (DC 25) to fix the gap in the vehicle's structure. The material to fill a 10-foot-square section to a thickness of 1 inch is roughly 8 cubic feet in volume, so a single spellcaster of 8th level or higher can fix one section (multiple applications may be necessary for sturdy repairs). *Major creation* can repair iron vehicles for a number of hours, and even more exotic material for a few minutes or rounds. Because neither *minor creation* nor *major creation* is permanent, such repairs are only a stopgap measure.

Building Vehicles

Building a new vehicle (or adding augmentations to an existing vehicle) follows the same rules as repairing a vehicle. A work crew can build 125 gp worth per day, a dock or shop can build 250 gp per day, and a major facility can build 500 gp per day.

Masterwork Vehicles

High-quality vehicles are rare, but craft workers are a devoted lot. Several must work together to build larger vehicles, giving the master builder assistance and other benefits. A masterwork vehicle travels faster and is sturdier than its normal counterparts. Its speed is 5 feet faster than that of a normal vehicle, and it has 5 more hit points per inch of thickness.

The cost and DC to create a masterwork vehicle depends on its size, as shown in Table 3-7: Masterwork Vehicle Creation Costs.

TABLE 3-7: MASTERWORK VEHICLE CREATION COSTS

Crew and Passengers	Cost	DC
1-6	5,000 gp	20
7-20	10,000 gp	23
21-80	20,000 gp	25
81-150	30,000 gp	28
150+	50,000 gp	30

VEHICLE AUGMENTATIONS

Characters tend to tinker with and customize their vehicles. Here are some mundane and magical options for characters who want to give their vehicles a little something extra.

Mundane Augmentations

These improvements on basic vehicle design require no magic, just the relevant Craft skill and appropriate raw materials (or enough cash)

Armor Plating: You can increase the hit points and hardness of any vehicle by adding armor to any 10-foot section (other than rigging). All statistics below are per inch of thickness. You can layer the same material to get thicker armor or combine different materials if you like. Each layer takes damage separately. Damage left over after an outer layer is destroyed is dealt to the next layer inward; hardness is applied a second time if the new layer is a different material.

TABLE 3-8: ARMOR MATERIALS

Material	HP	Hardness	Cost per Section	Weight per Section
Adamantine	40	20	5,000 gp	5,000 lb.
Darkwood	10	5	3,000 gp	500 lb.
Iron	30	10	1,000 gp	5,000 lb.
Mithral	30	15	3,500 gp	3,000 lb.
Wood	10	5	200 gp	1,000 lb.

Ballista: Any vehicle with a 5-foot-by-10-foot section of flat deck or roof can have a ballista mounted on it. Ballistas function as described under Siege Engines in Chapter 5 of the *DUNGEON MASTER'S Guide*. Choose a direction for the ballista when you mount it on your vehicle; it can fire at any target in a 180-degree arc centered on the mounted weapon.

Weight: 1,500 lb.; *Cost:* 500 gp.

Catapult, Heavy: You can add a heavy catapult to any vehicle with at least a 10-foot-by-10-foot section of flat deck or roof. It functions as described under Siege Engines in Chapter 5 of the *DUNGEON MASTER'S Guide*. It can launch ammunition at any target in a 90-degree arc centered on the mounted weapon.

Weight: 4,000 lb.; *Cost:* 800 gp.

Catapult, Light: A light catapult occupies a 5-foot-by-10-foot section of deck. It otherwise follows the rules for a heavy catapult (see above).

Weight: 2,000 lb.; *Cost:* 550 gp.

Firing Castle: A bunker attached to the deck of a vehicle, the firing castle provides protection for defenders and serves as a platform for siege engines. Four Medium-size defenders benefit from nine-tenths cover (arrow slits) in the firing castle itself, which is 10 feet by 10 feet, and another four get one-half cover behind the crenellations on its roof. The firing castle's walls are 1-foot-thick masonry (hp 90, hardness 8). A firing castle can be installed anywhere a heavy catapult would fit, and a heavy catapult or two light catapults or ballistas can subsequently be mounted atop it.

Weight: 4 tons; *Cost:* 1,000 gp.

Masterwork Controls: Whether it's a finely tuned wheel that allows delicate adjustments to the rudder, or a complex harness system that directs the dray creatures with just a flick of the wrist, it's possible to get more performance out of a vehicle by improving its control system. Masterwork controls provide a +2 circumstance bonus on Handle Animal or Profession checks made by the driver. The cost depends on the vehicle's size (its weight does not change).

Cost: 300 gp (Medium-size), 600 gp (Large), 1,200 gp (Huge), 2,400 gp (Gargantuan), 4,800 gp (Colossal).

Passenger Spaces: Available cargo space can be converted for passenger use; one ton (2,000 pounds) of cargo space can accommodate two Medium-size or smaller passengers comfortably. Twice as many can squeeze into passenger space for short periods of time, but they are too cramped to fight effectively and are considered fatigued after an hour's travel.

Cost: 200 gp per ton.

Passenger Spaces, Fancy: As above, but the passenger quarters are cushioned and decorated. Each ton of cargo space can accommodate one passenger at this level of comfort.

Cost: 600 gp per ton.

Passenger Spaces, Luxury: As above, but the passenger quarters are the very definition of opulence. Each luxury passenger space takes up two tons of cargo space.

Cost: 1,500 gp per ton.

Ramming Prow/Plate: Vehicles equipped with a ramming prow take half damage from ramming attacks they initiate. (Normally, rams deal equal damage to both the target and the ramming vehicle.) The warship comes with this augmentation for free. The weight and cost depend on the vehicle's size.

Weight: 500 lb. (Large), 1,000 lb. (Huge), 2,000 lb. (Gargantuan), 4,000 lb. (Colossal); *Cost:* 500 gp (Large), 1,000 gp (Huge), 3,000 gp (Gargantuan), 5,000 gp (Colossal).

Rotating Platform: This low platform mounted on rollers doubles the fire arc of a siege engine (so catapults have 180-degree fire arcs, and ballistas can fire in any direction). A rotating platform doubles the crew required to operate the siege engine.

Weight: 1,000 lb.; *Cost:* 500 gp.

Magical Augmentations

These additions to vehicles are constructed like any other magic item, employing the Craft Wondrous Item feat.

Bridle of Burden-Bearing: This bit-and-bridle set increases the Strength score of the harnessed dray creature, enabling it to pull heavier loads.

Caster Level: 8th; *Prerequisites:* Craft Wondrous Item, bull's strength; *Market Price:* 4,000 gp (+2), 16,000 gp (+4), 36,000 gp (+6); *Weight:* —.

Captain's Table: This broad wooden table, usually kept in the officers' mess, duplicates the effects of *heroes' feast* for up to twelve crew members. Those who spend an hour partaking of the magical fare created by the *captain's table* are cured of disease, become immune to poison and magical *fear* and *hopelessness*, heal 1d4+4 points of damage, and receive the benefits of a *bless* spell. The effects last for 12 hours. The *captain's table* serves one such meal a day.

Caster Level: 12th; *Prerequisites:* Craft Wondrous Item, *heroes' feast*; *Market Price:* 72,000 gp; *Weight:* 16 lb.

Catapult Stone of Becalming: This catapult stone eliminates even the trace of a breeze within a 400-foot radius of whatever it strikes. Prevailing winds don't return for 10 minutes.

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, *control winds*; *Market Price:* 2,500 gp; *Weight:* 16 lb.

Charts of Certainty: This blank sheet of parchment is every captain's boon. If unrolled and directly exposed to the sun while aboard a vehicle, it instantly displays a map (as detailed as a commercially available one) of everything within 24 hours' travel at the vehicle's current maximum speed. If the bearer then specifies a destination, it draws the most direct physical route to that destination. Like the *find the path* spell, the *charts of certainty* work only with respect to locales, not objects or creatures. If the parchment is rolled up, the map it was displaying disappears.

Caster Level: 11th; *Prerequisites:* Craft Wondrous Item, *find the path*; *Market Price:* 47,520 gp; *Weight:* 1 lb.

Cloud Keel: An invention of djinn on the Elemental Plane of Air, the *cloud keel* gives its vessel the ability to fly at a speed of 40 feet (clumsy). If the vessel is wind-powered, it can still use its sails if they provide faster movement than the keel itself.

Caster Level: 17th; *Prerequisites:* Craft Wondrous Item, *fly, wish*; *Market Price:* 200,000 gp; *Weight:* 1,000 lb.

Earth Keel: This item, often forged on the Elemental Plane of Earth, enables a water vehicle to move across land as if it were on water. The vessel's speed is unaffected, but rough terrain slows the vehicle just as it would a land vehicle.

Caster Level: 17th; *Prerequisites:* Craft Wondrous Item, *transmute rock to mud, wish*; *Market Price:* 150,000 gp; *Weight:* 1,000 lb.

Eldritch Exhaust: Once per day at the command of the driver, a vehicle equipped with this device expels a

billowing mass of vapors from its rear. The three types of vapor available are a fog that obscures the vehicle from pursuers as the *fog cloud* spell, a cloud of acid as the *acid fog* spell, or deadly poison as the *cloudkill* spell. The 20-foot-high cloud has a 30-foot radius.

Caster Level: 3rd (*fog cloud*), 9th (*cloudkill*), 11th (*acid fog*); **Prerequisites:** Craft Wondrous Item, relevant spell; **Market Price:** 2,160 gp (*fog cloud*), 16,200 gp (*cloudkill*), 23,760 gp (*acid fog*); **Weight:** 10 lb.

Fharlanghn's Lines: These bowlines and other ropes are magically animated to make sailing a ship easier. The ropes snake forward of their own volition, and pull and release by voice command, enabling sails to be set and changed without breaking the backs of the crew. Each set of *Fharlanghn's lines* aboard a wind-powered ship reduces the required crew by five, to a minimum of two for Colossal wind-powered ships and one for Gargantuan or smaller ships. *Fharlanghn's lines* respond only to nautical commands, so they can't be used to entangle foes or tie up captives.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *animate rope*, *telekinesis*; **Market Price:** 8,100 gp; **Weight:** 5 lb.

Lightning Turbine: Often used in conjunction with magic that controls weather, the *lightning turbine* is a series of antennae connected to a clockwork gearbox that gives the vehicle greater speed during a storm. Lightning strikes the antennae, providing power to double the vehicle's speed or give it a speed of 90 feet, whichever is greater. The vehicle ignores any weather-related penalties to speed.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *call lightning*, *expeditious retreat*; **Market Price:** 90,000 gp; **Weight:** 300 lb.

Nondimensional Trunk: Much like a *bag of holding*, a *nondimensional trunk* is a cargo box that holds more than it looks capable of. Anything with dimensions of less than 10 feet in all directions will fit inside. Up to two tons of cargo can fit in the *nondimensional trunk*, which weighs no more than 200 pounds, even if the weight of its contents is much heavier than that.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *Leomund's secret chest*; **Market Price:** 30,000 gp; **Weight:** 200 lb. (maximum).

Planar Sails: These rainbow-hued sails enable a vehicle to sail to places beyond the Material Plane. It takes 5 minutes and a successful Knowledge (the

planes) check (DC 20) to set the sails for a particular plane. While the *planar sails* provide a means to reach worlds beyond, they don't grant the ability to move or survive on the destination plane.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *plane shift*; **Market Price:** 72,000 gp; **Weight:** 600 lb.

Self-Propelled Vehicle: By animating the wheels, steering mechanism, and other moving parts on a vehicle, it's possible to build a vehicle that doesn't require dray creatures. Any land vehicle of Large size or smaller can become self-propelled, gaining a speed of 60 feet. It still moves under the direction of the driver and retains its usual maneuverability. Unlike with a normal casting of the *animate objects* spell, the vehicle does not become a construct and does not gain the ability to fight on its own.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *animate objects*; **Market Price:** 132,000 gp; **Weight:** —

Skyrider's Platform: This base plate for a single or double chariot enables it to be pulled by flying creatures just as if it were on the ground being pulled by horses. The chariot ascends or descends according to the dray creatures' maneuverability but turns according to the chariot's maneuverability. Note that the dray creatures cannot fly if they're burdened with more than a light load, so chariots equipped with this feature sometimes require more dray creatures than their landbound counterparts.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *air walk*; **Market Price:** 56,000 gp; **Weight:** 20 lb.

Smuggler's Hold:

As the *nondimensional Wind-Favored Sails* trunk above, but the lid and latch of the trunk are magically hidden until a command word reveals them for 1 round. Spellcasters trying to find the *smuggler's hold* with divination magic must succeed on a caster level check against DC 20.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *Leomund's secret chest*, *major image*, *nondetection*; **Market Price:** 90,000 gp; **Weight:** 200 lb.

Speedy Wheels: This pair of wooden wheels fits most wheeled vehicles, increasing the speed of one so equipped by 10 feet. The wheels must be placed on the same axle to be effective. Regardless of how many *speedy wheels* a vehicle bears, its speed increases by only 10 feet.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *expeditious retreat*; **Market Price:** 100 gp; **Weight:** 20 lb. each.

Summoner's Bridle: This harness conjures its own dray creature, which serves the bridle's owner for 12 hours. Most *summoner's bridles* summon light horses, although some rare versions create a *phantom steed* (as the spell) with 19 hp, speed 240 feet, carrying capacity 250 pounds, and the ability to gallop across a chasm as if it were firm land for 1 round. Because the summoner's bridle is usable only once per day, it takes more than one such item to provide enough dray creatures to pull most land vehicles.

Caster Level: 10th; **Prerequisites:** Craft Wondrous Item, *mount* or *phantom steed* (depending on version); **Market Price:** 2,160 gp (light horse), 12,960 gp (*phantom steed*); **Weight:** —.

Veil of Obscurity: This augmentation disguises a vehicle from curious eyes, making the vehicle appear to be part of the surrounding terrain. The glamor includes audible, visual, tactile, and olfactory elements, though it can't disguise, conceal, or add creatures.

Caster Level: 10th; **Prerequisites:** Craft Wondrous Item, *mirage arcana*; **Market Price:** 25,000 gp; **Weight:** —.

Wind-Favored Sails: This set of sails comes in two varieties. Raising a set of *lesser wind-favored sails* ensures that the wind speed is always heavy (21–30 mph, speed multiplier $\times 3$), no matter what the prevailing weather conditions. A set of *greater wind-favored sails* also lets the driver set the wind direction within 600 feet of the vehicle with a command word.

Caster Level: 9th (lesser), 15th (greater); **Prerequisites:** Craft Wondrous Item, *control winds*; **Market Price:** 40,500 gp (lesser), 67,500 gp (greater); **Weight:** 600 lb.

THE VEHICLE STATISTICS BLOCK

Each vehicle is accompanied by a standard statistics block. Following is an explanation of its components.

Size: The size of the vehicle, using the same size categories as for creatures.

Skill: Which skill governs control checks, followed by a circumstance bonus or penalty based on the overall quality of the vehicle.

Spd: The vehicle's maximum speed in a single move. For wind-powered vehicles such as sailing ships, maximum speed takes into account the velocity of the wind; apply the appropriate speed multiplier from Table 3–2: Random Wind Speed to the vehicle's given speed figure. For example, the speed of a keelboat is given as "wind $\times 10$ ft." In a moderate wind (speed multiplier $\times 2$), a keelboat's speed is 20 feet; in a heavy wind (speed multiplier $\times 3$), its speed is 30 feet.

Vehicles generally take a double move. They can also move at any slower speed unless noted otherwise. The vehicle's maneuverability is noted in parentheses. If the vehicle has multiple methods of propulsion (such as sails and oars), they are separated by commas. The speed of a drawn vehicle depends on its dray creatures,

so only a maneuverability rating is given. Descriptions of many of the land vehicles include information about what sorts of dray creatures the vehicle commonly uses and the maximum speed of the vehicle when it is pulled by those creatures.

Overall hp: How many hit points the vehicle has, usually for Large or smaller vehicles. Most vehicles also have hardness, noted in parentheses. If the vehicle has armor plating, the overall hp and hardness of the armor are given first, followed by a slash, followed by the overall hp and hardness of the vehicle itself. Bigger vehicles such as sailing ships have their hit points split up across different sections, so they lack an overall hp statistic.

Overall AC: The Armor Class of the vehicle as a whole. For bigger vehicles, this number is rarely used because attacks target specific sections of the vehicle exterior.

Section hp: How many hit points each 10-foot-by-10-foot section has. Most sections also have hardness, noted in parentheses. If the vehicle has armor plating, the section hp and hardness of the armor are given first, followed by a slash, followed by the section hp and hardness of the vehicle itself. Large or smaller vehicles do not have sections and lack a section hp statistic.

Section AC: The Armor Class of each 10-foot-by-10-foot section of the vehicle's exterior. Large or smaller vehicles do not have sections and lack a section AC statistic.

Rigging: The hp, hardness, and AC of the vehicle's sails, masts, and control lines. If a vehicle lacks rigging, this statistic is omitted. For dirigibles, the rigging statistic represents the durability of the balloon.

Ram: The damage dealt by the vehicle if it rams another object at maximum speed (see Collisions, above).

Face: The size of the vehicle, given as length by width.

Height: The vehicle's height, not including rigging, measured from the ground to the roof (for a land or air vehicle) or the waterline to the deck (for a water vehicle). Sailing ships also have a draft depth given in parentheses, which represents the minimum depth of water they need to avoid running aground.

SA: Any special attacks, such as a ramming prow.

SQ: Any special qualities, such as resistances.

Crew: How many people are required to operate the vehicle safely. Unless noted otherwise, one must be a skilled driver, but the others can be unskilled.

Weight: The vehicle's empty weight. This is most important for drawn vehicles, so it's omitted for many other kinds of vehicles.

Cargo: The capacity of the vehicle's hold, in tons (one ton = 2,000 pounds). If the weight of cargo affects the vehicle's speed, the change in speed is noted in parentheses.

Cost: The vehicle's cost, in gold pieces.

WATER VEHICLES

Water vehicles are built for many different, specific functions, few of which are very interesting to an adventuring group. Most adventuring takes place on (or under) land, so even though dozens of different styles and classifications of ships exist—from one-person dugout canoes to enormous triple-masted war galleons—only a few are useful in most campaigns.

Ships presented here are split into three types, based on their applicability to the adventuring party: those on which the PCs are the main crew, those on which PCs are part of the crew, and those on which PCs can be passengers.

Unless otherwise noted, those standing on the deck of a water vehicle receive one-half cover from most foes and three-quarters cover from attackers in the water.

Smaller Vessels

On a vessel of up to 60 feet in length, either the PCs are the entire crew, or they comprise most of the crew with a little help from experienced sailors who can be cohorts or hirelings. Unless the PCs hire a captain, they are in charge of the ship and usually take care of the major functions such as rowing, navigating, and minding the rudder. These types of ships usually stay on lakes and inland waterways. If they go out to sea, they rarely leave sight of land.

☞Keelboat: Gargantuan vehicle; Profession (sailor) +0; Spd wind × 10 ft. (nautical good), oars 10 ft. (nautical good); Overall AC 1; Section hp 40 (hardness 5); Section AC 3; Rigging 30 hp (hardness 0), AC 3; Ram 8d6; Face 60 ft. by 20 ft.; Height 10 ft. (draft 5 ft.); Crew 15; Cargo 50 tons (Spd wind × 5 ft., oars 5 ft. if 25 tons or more); Cost 3,000 gp.

A keelboat can have a single light catapult or ballista mounted on deck.

☞Launch: Huge vehicle; Profession (sailor) +2; Spd oars 15 ft. (nautical good); Overall AC 3; Section hp 30 (hardness 5); Section AC 3; Ram 4d6; Face 20 ft. by 10 ft.; Height 5 ft. (draft 2 1/2 ft.); Crew 4 (plus 4 passengers); Cargo 5 tons (Spd oars 10 ft. if 2 tons or more); Cost 500 gp.

A large-oared vessel, the launch is often used as a lifeboat or ship-to-shore boat for a larger ship. Crew and passengers are exposed to the elements, and those aboard have one-quarter cover from most foes and one-half cover from attackers in the water. A launch converted strictly for passenger use can hold 18 passengers, or double that under cramped conditions; such a conversion increases the launch's cost to 1,500 gp.

☞Catamaran: Gargantuan vehicle; Profession (sailor) +2; Spd wind × 20 ft. (nautical poor); Overall AC 1; Section hp 50 (hardness 5); Section AC 3; Rigging 30 hp (hardness 0), AC 3; Ram 12d6; Face 60 ft. by 20 ft.; Height 5 ft. (draft 5 ft.); Crew 15; Cargo 5 tons; Cost 2,000 gp.

This ship, designed for ocean voyages, is common to ancient seafaring cultures (such as the real-world Polynesians). Its twin hulls slip through the water efficiently, but a wooden paddle-keel and simple sail prevent quick maneuvers. It has no belowdecks; those on board have one-quarter cover from most foes and one-half cover from attackers in the water. Only a tarp provides shelter from the elements, so it's a poor choice for rough weather (or paying passengers in any event).

Medium Vessels

On a vessel between 70 and 90 feet in length, PCs are part of the crew; there's no space for passengers who don't help keep the ship in shape. The PCs might not be masters of the ship, and they don't necessarily have control over who their shipmates are or how they behave. PCs still have assigned work, but it may be less critical to the ship's operation, such as carpentry or cooking. Sometimes these ships are oceangoing, but typically they do not have the stability or cargo capacity to sustain their crew for a long voyage on open waters. They generally travel along coasts or established routes.

☞Sailing Ship: Colossal vehicle; Profession (sailor) +4; Spd wind × 20 ft. (nautical average); Overall AC -3; Section hp 50 (hardness 5); Section AC 3; Rigging 80 hp (hardness 0), AC 1; Ram 12d6; Face 80 ft. by 20 ft.; Height 10 ft. (draft 10 ft.); Crew 20; Cargo 150 tons (Spd wind × 15 ft. if 75 tons or more); Cost 10,000 gp.

A sailing ship has enough room on deck for two light catapults or ballistas. It usually uses a launch as a lifeboat (not included in the price).

☞Longship: Colossal vehicle; Profession (sailor) +0; Spd wind × 10 ft. (nautical poor), oars 15 ft. (nautical average); Overall AC -3; Section hp 90 (hardness 5); Section AC 3; Rigging 40 hp (hardness 0), AC 1; Ram 8d6; Face 70 ft. by 20 ft.; Height 10 ft. (draft 5 ft.); Crew 50 (40 rowers); Cargo 50 tons (Spd wind × 5 ft. or oars 10 ft. if 25 tons or more); Cost 10,000 gp.

The longship has enough room on deck for two light catapults or ballistas. Its shallow draft means that it can go without a launch if need be.

☞Yacht: Colossal vehicle; Profession (sailor) +2; Spd wind 15 ft. (nautical average); Overall AC -3; Section hp 40 (hardness 5); Section AC 3; Ram 8d6; Face 90 ft. by 30 ft.; Height 10 ft. (draft 10 ft.); Crew 20; Cargo 30 tons; Cost 30,000 gp.

This vessel is a pleasure ship for royalty and extremely rich merchants. Much of the belowdecks area is given over to opulent staterooms, and the decks and castles are left as clear as possible for the owner to stroll about at leisure. Everything about the ship is the finest quality, from mast to belaying pins.

☞Ironclad: Colossal vehicle; Profession (sailor) +0; Spd oars 10 ft. (nautical average); Overall AC -3; Section hp 30/60 (hardness 10/5); Section AC 3; Ram 20d6; Face 80 ft. by 30 ft.; Height 15 ft. (draft 20 ft.); Crew 80 (60 rowers); Cargo 2,000 lb.; Cost 30,000 gp.

Catamaran

Gnome Submersible

One Square Equals 5 Feet

Dwarves who go to war at sea feel unprotected by “flimsy” wooden hulls. Therefore, dwarf shipwrights developed the ironclad, an iron-plated warship that sits low in the water and brims with ballista bolts.

Ironclads are rightly feared by naval commanders. The ballista crews can fire their bolts from behind protective iron shutters, breaching an ordinary ship's hull without fear of retaliation. Rowing dwarves work in teams, turning giant cranks to propel the ship.

The ironclad has enough space to accommodate eight ballistas, usually mounted four to a side.

👑Gnome Submersible: Colossal vehicle; Profession (sailor) +2; Spd oars 10 ft. (nautical poor); Overall AC -3; Section hp 90 (hardness 8); Section AC 3; Ram 6d6; Face 70 ft. by 20 ft.; Height 10 ft. (draft 10 ft.); Crew 70 (60 rowers); Cargo 20 tons (oars 5 ft. if 10 tons or more); Cost 80,000 gp.

A gnome submersible can travel the ocean depths, ascending and descending through the use of a complex series of diving fins and air bladders. It can remain underwater for 24 hours at a time, after which it needs 30 minutes at the surface to recharge its air bladders. In addition to its horizontal movement, the ship can freely ascend or descend 10 feet per round. The vessel is entirely enclosed; only a 10-foot square deck is available when the ship is on the surface. A single airlock allows access to the undersea world when the vessel is submerged. Large screws cranked by teams of gnomes propel the vessel (for game purposes, this counts as rowing).

Larger Vessels

Vessels of at least 100 feet in length have enough space to carry passengers, or hide stowaways for quite a while. If the PCs are in charge of the vessel, they have a major responsibility, along the lines of overseeing a keep or a temple. Otherwise, the PCs are only a small portion of the crew, with many crewmates and varied job duties. Many of these ships can go out to sea for weeks and are excellent for long trading voyages or warships.

👑Barge: Colossal vehicle; Profession (sailor) -2; Spd oars 5 ft. (nautical clumsy) or drawn (clumsy); Overall AC -3; Section hp 50 (hardness 5); Section AC 3; Ram —; Face 100 ft. by 40 ft.; Height 10 ft. (draft 10 ft.); Crew 10 (40 rowers); Cargo 100 tons; Cost 6,000 gp.

A barge is a flat-bottomed, usually rectangular boat designed for hauling cargo along inland waterways. Barges are usually simple affairs, some are no more than glorified rafts, although they can be up to 200 feet long. The larger ones usually sport an enclosed space, like a little building on one end of the ship with cots, a table, and chairs inside.

Smaller barges in relatively shallow water are usually poled along by rowers.

👑Galley: Colossal vehicle; Profession (sailor) -2; Spd wind × 15 ft. (nautical poor), oars 20 ft. (nautical

average); Overall AC -3; Section hp 80 (hardness 5); Section AC 3; Rigging 160 hp (hardness 0), AC 1; Ram 18d6; Face 130 ft. by 20 ft.; Height 20 ft. (draft 15 ft.); Crew 200 (160 rowers); Cargo 150 tons (Spd wind × 10 ft. or oars 15 ft. if 75 tons or more); Cost 30,000 gp.

A galley has enough flat deck space to accommodate three heavy catapults or six ballistas or light catapults. War galleys generally convert much of their cargo space into passenger space for soldiers (see Vehicle Augmentations, above). Eight to ten launches would provide enough lifeboat capacity, although many galleys have fewer.

👑Warship: Colossal vehicle; Profession (sailor) +2; Spd wind × 15 ft. (nautical average), oars 20 ft. (nautical good); Overall AC -3; Section hp 100 (hardness 5); Section AC 3; Rigging 80 hp (hardness 0), AC 1; Ram 15d6; Face 100 ft. by 20 ft.; Height 20 ft. (draft 15 ft.); SA Ramming prow; Crew 260 (80 rowers, 160 marines); Cargo 5 tons; Cost 25,000 gp.

A warship can accommodate two heavy catapults or four light catapults or ballistas. Four launches are used as lifeboats and troop transports (not included in the price).

AIR VEHICLES

Flying vessels are generally mistrusted by the masses, with good reason. Most of them are rickety contraptions, and the consequences of failure are drastic. However, creating a stable flying machine is an all-consuming quest for many gnomes, who are the fore-runners in the field of nonmagically powered flight. Members of other races sometimes find their way into the world of experimental engineering, but only gnomes seem to have an inborn knack for it—the “Gift of Garl,” as some sages call it.

Air vehicles maneuver just as flying creatures do, climbing and diving according to their maneuverability rating. None of the vehicles described below has any basis in medieval or Renaissance reality, and almost all rely on magic for lift or propulsion.

👑Hang Glider: Large vehicle; Profession (pilot) +0; Spd fly 30 ft. (poor); Overall hp 20 (hardness 5); Overall AC 4; Ram 2d6; Face 5 ft. by 15 ft.; Height 5 ft.; Crew 1; Cost 300 gp.

This big, wedge-shaped wing consists of a rigid frame with canvas, animal hides, or some other light, sturdy covering spread tightly across it. Unlike most flying vehicles, a hang glider cannot ascend under its own power. Hang gliders rely on either a high launch point or thermal updrafts to gain altitude.

A hang glider's pilot gains one-half cover behind 1 inch of wood and cloth (hp 10, hardness 3).

👑Ornithopter: Large vehicle; Profession (pilot) +2; Spd fly 40 ft. (poor); Overall hp 20 (hardness 5); Overall AC 4; Ram 2d6; Face 5 ft. by 15 ft.; Height 5 ft.; Crew 1; Cost 4,000 gp.

A magically enhanced version of the hang glider, the ornithopter relies on animated wings to propel a Small character through the air. Thus it can ascend like any flying creature with poor maneuverability.

Like the hang glider, the ornithopter gives its pilot one-half cover behind 1 inch of wood and cloth (hp 10, hardness 3).

Zeppelin: Colossal vehicle; Profession (pilot) -4; Spd fly wind \times 20 ft. (clumsy); Overall AC -3; Section hp 30 (hardness 5); Section AC 3; Rigging 200 hp (0 hardness), AC 1; Ram 4d6; Face 40 ft. by 10 ft.; Height 10 ft.; Crew 10; Cargo 10 tons (Spd wind \times 15 ft. if 5 tons or more); Cost 60,000 gp.

A zeppelin relies on hot air trapped in a massive balloon for lift and animated propellers for propulsion. Because it flies, it is light in weight and vulnerable to wind conditions (thus it's treated as a wind-powered vehicle even though it doesn't have sails). The balloon that provides lift is segmented so that one puncture isn't disastrous. Unlike creatures with clumsy maneuverability, zeppelins have no minimum forward speed, and they can hover if they are turned into the wind.

Dirigible: Gargantuan vehicle; Profession (pilot) -2; Spd wind \times 15 ft. (clumsy); Overall AC 1; Section hp 30 (hardness 5); Section AC 3; Rigging 100 hp (0 hardness), AC 1; Ram 2d6; Face 30 ft. by 10 ft.; Height 10 ft.; Crew 6; Cargo 5 tons (Spd wind \times 5 ft. if 3 tons or more); Cost 35,000 gp.

A smaller version of the zeppelin, the dirigible also relies on animated propellers to push it through the air. Wizards sometimes build dirigibles to ferry important underlings from place to place. Like zeppelins, dirigibles have no minimum forward speed, and they can hover if they are turned into the wind.

LAND VEHICLES

Land vehicles range from simple carts or wagons to sophisticated war machines and specialist tools.

Carriage: Huge vehicle; Handle Animal +0; Spd drawn (poor); Overall hp 90 (hardness 5); Overall AC 3; Ram 4d6; Face 15 ft. by 10 ft.; Height 10 ft.; Crew 1 (plus 5 passengers); Weight 400 lb.; Cargo 500 lb.; Cost 500 gp.

The carriage is essentially a fully enclosed wagon designed for passenger comfort, not cargo capacity. The driver and a passenger riding in front have one-half cover behind 1 inch of wood (hp 10, hardness 5). Inside passengers get three-quarters cover. Two heavy horses harnessed abreast pull most wagons at a speed of 35 feet when fully loaded and 50 feet with only a driver and passenger.

Cart: Large vehicle; Handle Animal +0; Spd drawn (poor); Overall hp 30 (hardness 5); Overall AC 4; Ram 2d6; Face 10 ft. by 5 ft.; Height 5 ft.; Crew 1; Weight 200 lb.; Cargo 500 lb.; Cost 15 gp.

A cart is open-topped, so the driver and any passengers gain one-half cover behind 1 inch of wood (hp 10, hardness 5). The most common dray creature for a cart is a mule, which can pull the vehicle at a speed of 20 feet even if it's fully loaded.

👑Chariot, Single: Medium-size vehicle; Handle Animal +2; Spd drawn (average); Overall hp 50 (hardness 5); Overall AC 5; Ram 3d6; Face 5 ft. by 5 ft.; Height 5 ft.; Crew 1; Weight 300 lb.; Cost 100 gp.

The driver of a single chariot gains one-half cover behind 2 inches of wood (hp 20, hardness 5). A light warhorse can pull the chariot at a speed of 60 feet, even with an unusually heavy driver aboard.

👑Chariot, Double: Large vehicle; Handle Animal +2; Spd drawn (poor); Overall hp 80 (hardness 5); Overall AC 4; Ram 4d6; Face 10 ft. by 5 ft.; Height 5 ft.; Crew 1 (plus 1 passenger); Weight 600 lb.; Cost 400 gp.

Occupants of a double chariot gain one-half cover behind 2 inches of wood (hp 20, hardness 5). Two light warhorses harnessed abreast can pull the chariot at a speed of 60 feet. By swerving the chariot, the driver can have it follow behind either horse (this choice doesn't count as movement).

👑Mobile Redoubt: Huge vehicle; Handle Animal +4; Spd drawn (clumsy); Overall AC 3; Section hp 100 (hardness 5); Section AC 3; Ram 9d6; Face 10 ft. by 10 ft.; Height 10 ft.; Crew 1 (plus 7 soldiers); Weight 4 tons; Cargo 1,000 lb.; Cost 1,500 gp.

Essentially a rolling guard tower, the mobile redoubt is a completely enclosed box of heavy timbers, usually drawn by four heavy warhorses. It has arrow slits for firing ranged weapons and heavy doors on each side. The redoubt's weakest point is the dray creatures, so armies using this vehicle usually equip them with the heaviest barding available.

👑Siege Tower, Large: Huge vehicle; Handle Animal +4; Spd drawn (clumsy); Overall AC 3; Section hp 120 (hardness 5); Section AC 3; Ram 12d6; Face 10 ft. by 10 ft.; Height 30 ft.; Crew 3 (plus 25 soldiers); Weight 16 tons; Cargo 1 ton; Cost 4,000 gp.

The large siege tower is a fortress on wheels. Each of its three stories features arrow slits and heavy doors cut into foot-thick wood, while the roof has crenellations and a platform with room for a heavy catapult or two ballistas or light catapults. A large siege tower's only disadvantage is its massive weight—a team of ten heavy warhorses or two elephants is needed to move it into position.

👑Siege Tower, Small: Huge vehicle; Handle Animal +4; Spd drawn (clumsy); Overall AC 3; Section hp 120 (hardness 5); Section AC 3; Ram 10d6; Face 10 ft. by 10 ft.; Height 20 ft.; Crew 1 (plus 15 soldiers); Weight 8 tons; Cost 1,000 gp.

Designed more as an enclosed ladder than a proper vehicle, the small siege tower is built to take punishment while it is being pulled up to enemy walls.

Invading troops can ascend through the center of the siege tower and reach the top of the wall without coming under enemy fire. The inefficient rollers used to help propel the tower limit the vehicle to a speed of 10 feet, but its movement is unaffected by poor terrain.

Builders sometimes mount a light catapult or ballista atop a small siege tower.

Wagon: Large vehicle; Handle Animal +2; Spd drawn (clumsy); Overall hp 40 (hardness 5); Overall AC 4; Ram 3d6; Face 15 ft. by 5 ft.; Height 5 ft.; Crew 1; Weight 300 lb., Cargo 1 ton; Cost 20 gp.

Drawn across ice or snow, the sled is an almost entirely exposed structure. The driver and any passengers gain one-quarter cover behind 1 inch of wood (hp 10, hardness 5). Eight riding dogs can pull the sled over ice or packed snow at a speed of 40 feet, even if it's fully loaded. Untracked snow slows their speed by one-half, and deep snow cuts it to one-quarter.

Stagecoach: Huge vehicle; Handle Animal +0; Spd drawn (clumsy); Overall hp 150 (hardness 5); Overall AC 3; Ram 6d6; Face 20 ft. by 10 ft.; Height 10 ft.; Crew 1 (plus 7 passengers); Weight 750 lb.; Cargo 1,000 lb.; Cost 800 gp.

The stagecoach is a larger version of the carriage (see above). The driver and a passenger riding in front have one-half cover behind 1 inch of wood (hp 10, hardness 5). Passengers inside the vehicle have three-quarters cover. Four heavy horses, arranged in two ranks of two, can pull a stagecoach at a speed of 50 feet.

Zeppelin: Huge vehicle; Handle Animal -2; Spd drawn (poor); Overall hp 60 (hardness 5); Overall AC 3; Ram 4d6; Face 15 ft. by 10 ft.; Height 5 ft.; Crew 1; Weight 400 lb., Cargo 2 tons; Cost 35 gp.

A wagon is open-topped, so the driver and any passengers gain one-half cover behind 1 inch of wood (hp 10, hardness 5). The most common dray creatures for the wagon are two heavy horses, which are strong enough to pull the wagon at a speed of 35 feet, even if it's fully loaded.

Wagons are the most common means for an invading army to move siege engines from place to place. A wagon can also be equipped with a heavy catapult (adding 2 tons to the wagon's weight and eliminating the cargo capacity) or a light catapult (adding 1 ton to weight, leaving 1 ton of cargo space for ammunition).

Worg Warsled: Huge vehicle; Handle Animal +2; Spd drawn (poor); Overall hp 100 (hardness 7); Overall AC 3; Ram 6d6; Face 15 ft. by 10 ft.; Height 5 ft.; Crew 1 (plus 3 passengers); Weight 900 lb.; Cargo 700 lb.; Cost 400 gp.

Goblins in snowy climes use their worg allies to pull massive sleds covered with makeshift armor and spikes. The driver and passengers aboard such a warsled gain three-quarters cover behind a 2-inch-thick barrier of steel and wood (hp 20, hardness 7). Two worgs abreast pull the sled at a speed of 35 feet.

Halfling War-Wagon

Some people find the idea of halfling war-wagons dubious or amusing. These people have never seen one in action. Halfling war-wagons are dangerous and practical. A war-wagon might not be much of a threat to a group of mid-level adventurers, but it's

lethal on the battlefield. Use the stagecoach statistics (above) for war-wagons, except that driver and passengers alike gain full cover.

The standard war-wagon is designed to allow halflings to safely fire ranged weapons on the battlefield and protect their skulkers until they get close enough to strike. However, halflings are clever and resourceful. They often adapt their wagons to suit personal fighting styles or specific circumstances.

Siege Tower

This war-wagon simply has a siege tower mounted on top of it. A wagon is typically 10 feet tall; a siege tower extends its height by another 10 feet. Through a set of gears and scissor mechanisms, the roof of the tower can pop up another 10 feet to deliver a strike force of skulkers onto a parapet.

The siege tower war wagon-weighs 1,000 lb. and costs 2,000 gp.

SPECIAL VEHICLES

Even more types of vehicles are available for specialized needs. Some are strange, rare, or experimental. Others are everyday accessories to getting around.

👑Dwarven Tunneler: Huge vehicle; Profession (miner) +4; Spd burrow 10 ft. (clumsy); Overall AC 3;

Section hp 40/120 (hardness 20/5); Section AC 3; Ram 10d6; Face 10 ft. by 20 ft.; Height 10 ft.; Crew 5 (plus 10 soldiers); Weight 20 tons; Cost 70,000 gp.

This tanklike vehicle slowly digs tunnels through earth (although stone stymies it). Dwarves occasionally use tunnelers in warfare as well: They're adamantine-armored and large enough to accommodate a squad of 10 soldiers. The treads have been magically animated to provide propulsion at the direction of the crew, who pull levers while they watch the earth for signs of cave-ins. The massive drill at the front is better than a ramming prow; the tunneler never takes damage from rams it initiates.

👑Forest Crawler: Huge vehicle; Handle Animal +2; Spd 40 ft. (poor); Overall hp 100 (hardness 7); Overall AC 3; Ram 3d6; Face 10 ft. by 10 ft.; Height 15 ft.; Crew 1 (plus 2 passengers); Weight 900 lb., Cargo 700 lb.; Cost 117,000 gp.

Few vehicles are well suited to the elves' forest homes, but the forest crawler can move through the woods by traveling above the undergrowth on its spindly legs. Looking somewhat like a massive spider, the forest crawler is used to patrol the forest boundaries and get from place to place when speed is of the essence. Its tall legs let it ignore most terrain penalties to movement, and a ballista mounted along the vehicle's undercarriage reloads itself magically. A *veil of obscurity* (see Magical Augmentations, earlier

in this chapter) provides camouflage if the forest crawler remains stationary for 1 full round.

👑 **Kanto's Lament:** Colossal vehicle; Profession (sailor) +4; Spd fly 40 ft. (clumsy) or wind × 20 ft. (nautical average); Overall AC -3; Section hp 50 (hardness 5); Section AC 3; Rigging 80 hp (0 hardness), AC 1; Ram 12d6; Face 80 ft. by 20 ft.; Height 10 ft. (draft 10 ft.); Crew 20; Cargo 150 tons (Spd wind × 15 ft. if 75 tons or more); Cost 450,000 gp.

This magic sailing ship is often used by slavers to move their illicit cargo from place to place. It has a *cloud keel*, enabling it to fly at a speed of 40 feet, but it often raises its *lesser wind-favored sails* to gain a speed of 60 feet. For extraplanar journeys, *planar sails* are stowed belowdecks. The navigator's cabin contains *charts of certainty*. The ship has two ballistas mounted on rotating platforms that fire 5d6 lightning bolts once per round.

The ship is a valuable prize, and the slaver lord who owns it is loath to let anyone know how powerful his ship is. He travels by air only at night and in wilderness areas where *Kanto's Lament* is unlikely to be seen. But the ship comes to earth at prearranged points to pick up and drop off slaves.

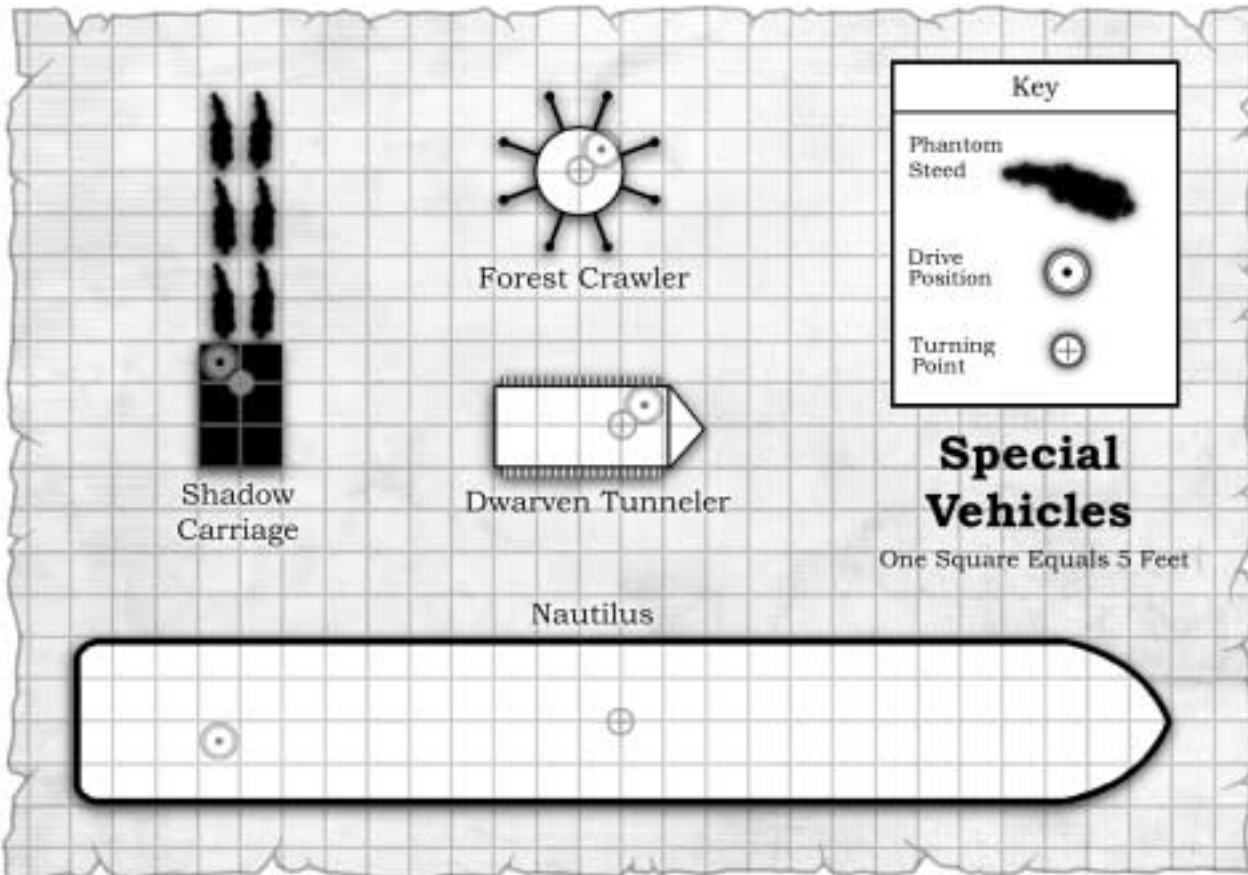

👑 **Nautilus:** Colossal vehicle; Profession (sailor) -6; Spd 20 ft. (nautical poor); Overall AC -3; Section hp 40/80 (hardness 20/5); Section AC 3; Ram 18d6; SA Ramming prow; Face 130 ft. by 20 ft.; Height 20 ft. (draft 15 ft.); Crew 40; Cargo 50 tons; Cost 250,000 gp.

This massive armored vessel was once a galley, though few sailors would today recognize it. It's been armored with adamantine, made airtight, and outfitted with air bladders stolen from a gnome submersible. It includes a ramming prow and five luxury passenger spaces. A Huge water elemental, bound into service, turns the massive screws at the rear of the ship. The vehicle mounts no weapons, relying on its armor and the strength of its crew to survive encounters with aquatic dangers. Though a powerful craft, the *Nautilus* is difficult for even a trained crew to manage.

The creator of the *Nautilus*, the loremaster Rutagha, recently lost the vessel to a kraken and its minions. Rutagha, who *teleported* away, believes that some of his crewmembers may yet survive, and he's willing to hire adventurers to recover the ship.

👑 **Shadow Carriage:** Huge vehicle; Handle Animal +0; Spd 120 ft. (poor); Overall hp 90 (hardness 5); Overall AC 3; Ram 4d6; Face 15 ft. by 10 ft.; Height 10 ft.; Crew 1 (plus 5 passengers); Weight 400 lb.; Cargo 500 lb.; Cost 100,000 gp.

This darkwood carriage, infused with shadowstuff, is drawn by six phantom steeds (as the spell cast by a 13th-level sorcerer). Once per week, it can cross over to the Plane of Shadow for up to 13 hours, traversing 42 miles every hour regardless of terrain on the Material Plane (treat as the *shadow walk* spell cast by a 13th-level sorcerer).

CHAPTER 4: HIRELINGS AND CREATURES

Adventurers stand out from the common rabble because they are exceptional people, with extraordinary skills and powers. Their lives are filled with glory, battles, monsters, and magic. To the common folk, adventurers are the stuff of legend. Many people can aspire to lead a life of excitement, but most are content to stay at home. After all, someone has to raise the crops, feed the livestock, make the goods, and tend the bar. Still, sometimes adventurers need to hire laborers and specialists to haul their treasure, act as bodyguards, or build their keep. Sometimes these hirelings come on for a single project, and sometimes for longer periods of time, even permanently.

In most cases, a PC seeking hirelings doesn't care who they are, where they came from, or what gods they worship. The most basic things to know about hirelings include where to find them, determining how good they are, how much they cost, and how long they take to complete their job.

FINDING HIRELINGS

As long as they are in a populated area, PCs should have no problem finding hirelings such as porters, animal tenders, laborers, and teamsters. Hirelings are found in areas that are appropriate for their profession, such as a wharf (where porters work) or the artisan district (where masons are located). Once there, the PCs should have little difficulty in locating the appropriate help, unless the DM decides to make it more difficult for them to find labor. A Gather Information check (DC 10) should be sufficient to find the right people.

Negotiations can be glossed over, unless the DM wants to make the prospect of employing a hireling more difficult for the adventurers or if it is important to the flow of the story. Sometimes, however, adventure hooks can come from these seemingly innocuous social encounters. For example, the PCs are trying to repair their keep and they head into a nearby city to hire some masons. They soon discover, however, that only a few masons remain in town—the rest having been hired out by some mysterious person who is building an imposing tower many miles away.

Expert or specialized labor, on the other hand, is more difficult to find and depends on the size and population of a community. NPCs in the Community in Chapter 4 of the *DUNGEON MASTER'S Guide* provides an excellent way to break down a given community's

population and figure out how many hirelings of a particular profession are available. Obviously, the larger the population, the better chance of finding hirelings with better skills.

Of course, there is nothing preventing an NPC with class levels to hire on or serve “double duty,” such as a militia member who also works as a blacksmith. In smaller communities, it is common to find a single NPC who has multiple professions (though usually at low levels). However, such people might be reluctant to leave their homes because the community depends on them so much.

GUILDS

In large towns and bigger communities, artisans and other hirelings are usually part of a guild. A guild is an association of craftspeople and artisans of a particular trade. For example, there could be a smiths' guild, a stoneworkers' guild, a painters' guild, and so on. There are also guilds for professions that do not produce items, such as dockworkers, day laborers, and couriers. The larger the community, the more specialized its guilds. In a small city or larger population center, you are more likely to find a goldsmiths' guild alongside a silversmiths' guild, each handling a more specialized trade and with its own needs, members, and policies. More often than not, guilds of two or more similar trades try to work in cooperation—each with its own best interest at heart, of course. Guilds can wield considerable political power, especially in larger cities.

Guilds establish guidelines for hiring artisans, provide legal protection, and set the base prices for goods and services. They act as liaisons between workers and the upper class, trying to increase profits and furthering the interests of the guild and its members. Competing guilds, however, sometimes try to disrupt each other's day-to-day business, including sabotaging projects or undercutting the competition.

Guilds can also form the basis for patrons or competitors for adventurers. A goldsmiths' guild, for example, could commission a party to locate lost treasure (to be melted down) or to guard a group of miners as they tunnel a new vein. Guilds might also become competitors or direct enemies of the PCs, if their agendas clash.

Most, but not all, guilds strike a balance between heavy-handed micromanaging and allowing the artisan to work freely. Use Table 4–1, below, to determine the level of control that a guild has over its members.

TABLE 4–1: GUILD CONTROL

d%	Guild Control Type
01–30	None
31–70	Normal
71–90	Restrictive
91–100	Repressive

None: No guild exists for this particular trade. Artisans set their own wages but do not have any of the protections that a guild provides.

Normal: A guild exists for this trade and is neither too lax nor too restrictive on its members. The guild collects 10% of an artisan's wages per month. The artisan can accept assignments outside of guild channels, although it is frowned upon. An artisan who does this too often, however, is subject to a fine of 1d4 gp and is in the guild's bad graces.

Restrictive: The guild is heavy-handed with its members and collects 20% of an artisan's monthly wages. It is difficult to find a hireling who works outside the guild. An artisan caught going outside guild channels for work must pay the guild the fee collected from the project and an additional fine of 1d4 × 2 gp.

Prices for hiring an artisan from a restrictive guild are increased by 50% (see *Cost of Hirelings*, below).

Repressive: The guild has a stranglehold on this particular profession and collects 40% of an artisan's monthly wage. It's almost impossible to find someone who works outside the guild. An artisan caught going outside guild channels for work must pay the guild the fee collected from the project plus an additional fine of 1d4 × 4 gp.

Prices for hiring an artisan from a repressive guild are increased by 100% (see *Cost of Hirelings*, below).

COST OF HIRELINGS

The prices in Table 5–2: Prices for Hireling Services in the *DUNGEON MASTER'S Guide* and on Table 4–2: Primary Skills for Hirelings (see the next page) are for 1st-level commoner and expert (and rarely, adept) hirelings. Sometimes, though, PCs want to hire better than average hirelings. A worker with greater skill gets the job done faster, with less raw materials, and with better results. In game terms, this corresponds to the NPC's pertinent skill modifier.

If you want to hire better workers, you need to find out if any are available and be willing to pay higher prices for their services. A hireling charges the “per day” rate for each level above 1st. For example, a 1st-level mason (expert) charges 3 sp per day of service, a 2nd-level mason charges 6 sp per day, and a 5th-level mason commands 15 sp per day. This wage is in addition to the cost of raw materials and equipment that might be required to complete the task.

If the PCs hire a master artisan (see *Skill Level of Hirelings*, below), they should be prepared to also hire on the entourage of journeymen and apprentices that often accompany such experts. Many masters turn down an assignment if they are not allowed to bring along their workers. This is not as bad as it sounds: A “crew” that learned from and works under a single master gains a +2 synergy bonus on any relevant Craft check. A typical master artisan has 1d4–2

journeymen (4th–8th level) and 1d4–1 apprentices (1st–3rd level) under his tutelage at any given time.

In addition to the daily wage, PCs must provide food (or additional money for food) for hirelings who go adventuring with them. Trail rations typically cost 5 sp per day per hireling. Employers do not have to pay to feed hirelings who remain inside their home community.

If PCs want hirelings to come along with them into dangerous situations, they may have to offer additional “hazard pay” as incentive, which is explained below.

Adventuring, Hirelings, and Hazard Pay

Hirelings are ordinary people compared to adventurers. They are content to stay at home, live their lives, and pursue their own interests. The Hirelings section in Chapter 5 of the *DUNGEON MASTER'S Guide* gives rules for an NPC's initial attitude toward the PCs. Most hirelings described on Table 4–2: Primary Skills for Hirelings, particularly skilled artisans, are unwilling to leave the safety and comfort of their homes to go adventuring. The table also indicates if a profession is active or sedentary by nature, determining whether the NPC asks for additional pay when going into hazardous situations.

Convincing normally sedentary hirelings to go adventuring requires a Charisma check to alter the hireling's attitude (see *NPC Attitudes* in Chapter 5 of the *DUNGEON MASTER'S Guide*). The hireling's initial attitude is indifferent and must be improved to friendly. The PCs can offer hazard pay, which typically is double the daily wage for that hireling. Doing so decreases the DC of the Charisma check by 5. Offering double hazard pay (four times the daily wage) reduces the DC by 10.

Skill Level of Hirelings

The Hirelings section in Chapter 5 of the *DUNGEON MASTER'S Guide* explains what is necessary to hire people for specific tasks. It assumes that the laborers, artists, and artisans being hired are 1st-level commoners or experts. In most cases, this level of skill is sufficient to get the job done, especially when unskilled labor is required, such as hauling goods or digging ditches. Sometimes, though, hiring unskilled laborers above 1st level makes sense, such as tougher than average porters who can withstand the rigors of an overland adventure in the jungle.

Determining the skill level of a hireling depends on a few factors. First, assume that the hireling is human (but see *Nonhuman Hirelings*, below). Second, the hireling should have the maximum possible ranks in his primary skill (or skills): 4 ranks at 1st level for class skills or 2 ranks for cross-class skills (which should be rare). Third, use the standard ability

score array of 13, 12, 11, 10, 9, and 8 for nonelite NPCs (adept, aristocrat, commoner, expert, and warrior). The highest score (13) is always in the hireling's key ability, which grants a +1 bonus on skill checks. For example, an average blacksmith has a 13 Intelligence, because it is the key ability for the Craft (blacksmithing) skill. Finally, assume that the hireling has Skill Focus for his primary skill as one of his feats, showing his dedication to his profession.

The typical 1st-level hireling has a total bonus of +7 on checks involving his primary skill (4 ranks, + 2 for Skill Focus, +1 for ability score modifier). Hirelings increase their primary skill by +1 rank every level (the maximum allowed). They always increase their key ability as they progress through levels, which

grants an additional +1 bonus on checks using that skill at 4th, 12th, and 20th level.

An artisan is considered an apprentice until he has gained 7 ranks in his primary skill. At that point, the artisan community that he belongs to grants him the title of journeyman. When the artisan has gained 12 ranks in his primary skill, he earns the title of master. These titles have no game play effect but greatly influence how the artisan is treated in social situations. At 5th level and higher, an artisan is likely to have his own set of masterwork tools (if the skill uses tools). See Special and Superior Items in Chapter 7 of the *Player's Handbook* for the benefits of masterwork tools.

Table 4–2: Primary Skills for Hirelings gives a variety of laborers, artisans, and other hirelings,

including commonly employed spellcasters. It also provides the primary skill used by a given hireling, the key ability for that skill, and the average wage per day for that hireling.

Unless otherwise specified, assume that the hireling also has the Profession skill in his related field. So, an armorer would have Craft (armor-smithing) as his primary skill, governing his ability to manufacture armor, and Profession (armorer) for his knowledge of the field, types of armor, and so on.

Craft and Profession Skills

When creating characters, players usually focus on fighting ability. They sometimes skimp on certain skills that may not seem glamorous but can prove very handy. The Craft and Profession skills in particular are

excellent for defining what the character does and what sort of background she came from. Perhaps she's a fighter who learned to wield a sword that she created herself while working as a blacksmith's apprentice. Alternatively, maybe she's a rogue who learned the intricacies of locks and traps while under the tutelage of a local locksmith.

There may be times during a game when a PC's Craft or Profession skill can shine. A character with any sort of Craft skill, such as smithing, carpentry, or stoneworking can create items on the fly when needed. In addition, such characters can possess crucial information about the properties of objects such as doors, walls, and tunnels. A fletcher can provide the party with a ready source of ammunition. A weaponsmith can construct swords and spears to

TABLE 4-2: PRIMARY SKILLS FOR HIRELINGS (CONT.)

¹ If a hireling is being paid to create a specific item, use item prices and working times instead. Wage given is for long-term retention of services. Wages do not include the cost of materials or tools.

² Laborers and porters commonly have a Craft skill but are hired for their strength and endurance.

³ Daily wage only. Each casting of a spell costs additional money (see Hiring Spellcasters, below).

⁴ Minimum daily wage; exotic animal trainers and sages often charge more than this for their services.

⁵ Per mile.

equip mustered troops. Having an armorer in your group insures that everyone's armor remains in top shape after each battle. A bard who is skilled in painting or sculpting can create wondrous works of art that dazzle just as much as song.

Being skilled in a craft or profession also allows the PC to rate the work of others. A trained blacksmith recognizes second-rate swords, while a someone with Craft (shipbuilding) or Profession (sailor) knows if the ship the party plans to board is seaworthy or not. The DM can also work with these skills, giving the PCs an opportunity to solve problems without resorting to violence. By offering to rebuild a collapsing mill, for example, the party could win the favor of local peasants, who are initially indifferent to or suspicious of the adventurers.

Certain Craft skills are closely related. The abilities of a goldsmith vary only slightly from those of a silversmith. In game terms, if a character has ranks in a Craft or Profession skill closely related to a skill that he wants to attempt, then the DM can allow the attempt at a –2 penalty. Examples include a carpenter (Craft [woodworking]) attempting to create a wagon wheel (Craft [wheelwright]) or a blacksmith (Craft [blacksmithing]) trying to create a suit of armor (Craft [armorsmithing]).

TABLE 4–3: COMMONLY CAST SPELL PRICES

Spell	Caster Level	Total Cost
Analyze dweomer	11th	2,160 gp
Continual flame	3rd	110 gp
Control weather	11th	660 gp
Cure light wounds	1st	10 gp
Cure moderate wounds	3rd	60 gp
Cure critical wounds	7th	280 gp
Cure serious wounds	5th	150 gp
Fabricate	9th	450 gp
Gate	17th	1,530 gp
Greater restoration	13th	3,410 gp
Heal	11th	660 gp
Identify	1st	110 gp
Legend lore	11th	910 gp
Lesser restoration	3rd	60 gp
Move earth	11th	660 gp
Permanency	9th	1
Plane shift	9th	450 gp
Raise dead	9th	950 gp
Regenerate	13th	910 gp
Reincarnate	7th	280 gp
Remove blindness/deafness	5th	150 gp
Remove curse	5th	150 gp
Remove disease	5th	150 gp
Restoration	7th	380 gp
Resurrection	13th	1,410 gp
Sending	7th	280 gp
Speak with dead	5th	150 gp
Teleport	9th	2
Teleport without error	13th	2
Teleportation circle	17th	2
Tongues	5th	150 gp
True resurrection	17th	6,530 gp

¹ Varies by spell.

Hiring Spellcasters

NPC Spellcasting in Chapter 5 of the *DUNGEON MASTER'S Guide* provides the necessary rules for paying a spellcaster to cast a certain spell for you. Table 4–3: Commonly Cast Spell Prices provides costs for frequently requested spells. These costs assume the minimum caster level required for the spell, plus any additional costs for XP spent and material foci.

Spellcasters are no more or less likely to go on adventures than other experts for hire—some are content to study their art at home, and others prefer to strike out into the wilderness.

Teleportation Costs

Teleportation is in great demand by PCs for getting from one point to another without the hazard of what might be in between. The prices given below are the average cost that a spellcaster charges. The price is doubled because two castings of the spell are involved: The spellcaster must come along with the customer and then return back through another use of the spell.

Prices for teleportation double if the caster knows he is going into dangerous or hostile territory.

Service	Cost
Teleport, one-shot, very familiar area	900 gp
Teleport, one-shot, studied area	1,080 gp
Teleport, one-shot, area seen casually	1,260 gp
Teleport, one-shot, area viewed once	1,440 gp
Teleport, one-shot, description of area only	1,620 gp
Teleport without error	1,820 gp
Teleportation circle, very familiar area	3,060 gp

Nonhuman Hirelings

The default race for hirelings is human, only because they tend to be the most numerous race in an area. Racial Demographics in Chapter 4 of the *DUNGEON MASTER'S Guide* gives the typical distribution of races among a population, with hirelings following the same percentages. Typically, nonhumans are hired because they are the only type of help available, due to racial preference by the PCs, or because they are particularly suited for the job at hand. In most cases, the race of a hireling does not affect how she does her job—the advantages and disadvantages of a particular race tend to balance out in the end.

PCs should also be aware of possible friction within a group of mixed-race hirelings. In some campaigns, racial animosity runs deep. Hirelings of different races could start trouble among themselves or even against a PC, if they have a particular beef against the PC's race. A DM wishing to play up this tension can assume that a hireling has an initial unfriendly attitude. Of course, a PC with a racist streak could prove quite a hindrance when trying to find specific nonhuman hirelings.

Dwarves: Dwarves make excellent blacksmiths, stonemasons, and engineers. They have the stonemasonry ability, which grants a +2 racial bonus on skills involving stonework of all kinds. If you hire a dwarf for any stone-related job (mason, stonemason, and the like), remember to include this +2 bonus. Dwarves can produce impressive buildings, statues, and feats of engineering. They know that they are the best artisans around, and it is not unheard of for dwarves to charge double or triple the amount a human would ask.

Elves: Elves also produce objects of unparalleled beauty and grace. However, they usually take a long time to produce items and do not work well with the human concept of “deadline.” It is not uncommon for elven artisans to take two or three times longer than other workers to finish an item. However, there is no denying the quality of their work, since they are deeply concerned with aesthetics. Elves tend to be more snobbish than other races and may turn down an assignment simply because they consider it beneath them. Unless you are in an exclusively elven community, the chances of finding an elven porter or laborer are virtually nonexistent.

Gnomes: As long as they can maintain their concentration on a given task, gnomes make excellent hirelings. They are energetic, innovative, and inspired creators. Gnomes have a natural affinity for mechanical devices. However, they enjoy practical jokes, which sometimes disrupt the dull rhythm of a workshop. Gnomes enjoy these diversions, while others find them annoying at best.

Halflings: Although halflings tend to be the most common nonhumans in communities, they are not so readily available as hirelings. Being smaller and weaker than humans, halflings tend to disdain most physical labor. This behavior should not be mistaken for laziness, however: Halflings are insatiably curious but often lack the concentration and willpower to focus on most crafts. However, nomadic halfling clans need to be self-sufficient, so trained artisans and hirelings are more readily available among those groups.

Half-Elves: Half-elves have the energy and zeal of their human parent, plus the long-term vision and admiration of beauty of their elven blood. Their location often dictates what sort of trade they learn. Half-elves who inhabit elven communities probably toil as unskilled laborers, while those found in human communities probably find skilled craft work. Half-elves who choose a particular craft can become true masters, if they overcome the social stigma of their mixed blood.

Half-Orcs: Half-orcs are commonly relegated to physical toil, because few people are willing to take them on as apprentices for more skilled work. Among human communities, they are often found on

the lowest social rung, working at jobs for which their natural strength is an advantage, such as porters, laborers, animal handlers, and ferrymen. Among orcs, half-orcs might still remain in the bottom caste (viewed as tainted half-breeds) or be sought after as having the intelligence to master a trade.

MERCENARIES

Adventurers want to hire a little extra muscle every once in a while, which usually means that they turn to mercenaries. In many ways, recruiting mercenaries is just like getting any other hireling: you find them, set the terms of their employment, and agree on a price. Unlike regular hirelings, mercenaries are brought on to engage in dangerous behavior, which means that their definition of hazard pay is quite different from that of other people. An artisan considers any dangerous situation (such as combat) to be hazardous and either refuses the job or increases the asking wage accordingly. A mercenary charges hazard pay only for unusually dangerous situations, such as assaulting a dragon’s lair, marching hundreds of miles across a scorching desert, or fighting hordes of undead.

Although they are aware of the uncertainties of the battlefield, mercenaries still expect to fight foes that are within their ability. A 1st-level warrior is prepared to do battle against goblins, orcs, skeletons, and other creatures of CR 1 or lower, while higher-level mercenaries can take on correspondingly tougher foes. If mercenaries continually end up fighting creatures that pose bigger challenges, this drastically affects their attitude. If the DM determines that mercenaries are routinely outclassed in combat, their attitude shifts to unfriendly. If the PCs continually thrust them into dangerous situations (say, always making them lead the way in a dungeon infested with beholders), the mercenaries’ attitude shifts to hostile. They either demand more money or leave the party as soon as it is possible (and safe) to do so.

Paying for Mercenaries

PCs can hire a mercenary who comes complete with his own equipment, including armor, weapons, mount, and barding, or they can hire an able-bodied warrior and provide arms and armor. Troops that have their own equipment tend to be better trained but more expensive. Troops without their own equipment have wildly variable abilities but accept less pay per day.

Table 4–4: Sample Mercenary Equipment lists different troops that provide their own equipment. This includes armor and weapons, including horse and barding for mounted troops. The table shows how much their equipment costs and what level the average character must be to afford it. The better the

TABLE 4-4: SAMPLE MERCENARY EQUIPMENT

Troop Type	Level	AC	Base Attack Bonus	Cost	Daily Wage
<i>Skirmishers, Foot</i>					
Padded, buckler, sling, halfspear	1st	13	+3	21 gp	2 sp
Padded, throwing axes (3), dagger	1st	12	+3	31 gp	2 sp

Half-plate, large steel shield, heavy lance, longsword, heavy warhorse, chainmail barding	12th	20	+16/+10/+6	1,671 gp	24 sp

equipment, usually the better the warrior. If you hire mercenaries who have expensive equipment (especially mounted troops), be prepared to pay more per day. The equipment on the table does not include any magic items, which should be very rare among regular mercenaries. Typically, a warrior should be at least 7th level before owning some kind of magic weapon or armor.

If troops of a particular level are not available in the area, the DM can allow lower-level troops to have

better equipment (assuming they obtained it through spoils of war, by formerly working as guards, or for some other reason). They still demand the wage of the level corresponding to their equipment, so it's up to the PCs to decide if they want to pay that daily wage for less able troops.

You can hire troops with no arms or armor and equip them yourself. The daily wage for these mercenaries is 2 sp × level for foot troops and 4 sp × level for mounted ones. Of course, you have to provide

armor and weapons, paying the costs given in the *Player's Handbook* or using arms and armor acquired through adventuring. The mercenaries understand that they do not own their equipment, but they are not responsible for damage to it or loss of it while fighting on behalf of the PCs. Upon completion of an assignment, they return the weapons and armor. There is always the risk, however, that some troops will steal the equipment, especially if they feel they were treated harshly.

Some mercenaries quit if the weapons and armor are not of a certain quality—a 7th-level warrior rarely tolerates being given padded armor and halfspear to fight with, unless times are truly desperate. Use Table 4-4: Sample Mercenary Equipment to determine the typical arms and armor for a warrior of that level. Warriors accept equipment that is up to two “levels” beneath them without a problem. If the PCs offer lower-quality equipment than that, however, the mercenaries’ attitude immediately becomes unfriendly and must be brought up to at least indifferent before they will accept the assignment. Mercenaries of any level happily use equipment that is better than that indicated for their level; this benefit improves their attitude by one step automatically.

It is typical for mercenaries to get a share of the loot acquired during adventuring. The exact amount is set by haggling between the party and the mercenaries.

Mercenary Leaders

Some mercenaries are hired in units and have their own leader. Typically, leaders are also warriors and are at least one level higher than the troops they lead.

Mercenary leaders with their own equipment (which is always the same as that of their troops) receive four times the wage of the troops they command. For example, a leader of light mounted mercenary troops (wage 4 sp) earns 16 sp per day for himself. Mercenary leaders who receive equipment from their employer (which may be better than that of their troops, if the employer so desires) make 6 sp per day at 2nd level, plus an additional 3 sp for each level above 2nd.

The PCs could also hire a leader with levels in fighter, assuming that such mercenaries are even available in the area. It costs 1 gp per day to hire a 1st-level fighter mercenary leader, and the cost increases by 2 gp per additional level.

Leaders are just that: They give orders to their troops, negotiate on their behalf, and enforce discipline. Hiring a squad of mercenaries with a leader means that the warriors are familiar with each other’s tactics and fight well as a cohesive group (+1 bonus to AC and on attack rolls). The downside is that a PC cannot discipline a mercenary who is causing problems without going through the leader—some leaders resent this sort of behavior.

If a mercenary group’s leader dies in combat, the attitude of the group worsens by two steps. If their attitude drops to unfriendly, the group considers leaving as soon as the combat is over. If their attitude drops to hostile, they abandon the fight as soon as it is safe for them to do so. The PCs can make a

Charisma check to change their attitude when this occurs, perhaps convincing the mercenaries to stay. An offer to

double their wage lowers the check DC by 5; additional offers or incentives have no effect.

Types of Mercenaries

Different types of troops specialize in different forms of warfare. The DM decides what sorts of mercenaries are available in a given area.

Skirmishers, Foot: Foot skirmishers are some of the cheapest troops available. They specialize in harassing the enemy with ranged weapons, withdrawing as soon as their attack is complete or when there is any organized retaliation. Skirmishers who use bows do not attack as a group, instead picking out individual targets as they become available.

Elven and halfling mercenaries excel at this sort of warfare. Remember that halflings get a +1 racial bonus on attacks with thrown weapons.

Skirmishers, Mounted: Mounted skirmishers have even greater mobility, attacking the flanks and rear of enemy lines with lightning-fast strikes. Like foot skirmishers, they are good for hit-and-run

attacks but tend to wither beneath a concerted offense. They ride light warhorses with no barding and are usually very skilled in the saddle.

Light Foot: Slightly more heavily armed and armored than skirmishers, light foot troops are meant to stay in more prolonged fighting. Such troops include archers (bows and crossbows), who march in formation and attack en masse. Peasant levies usually fall under this category, although they are commoners, not warriors, and have a lower base attack bonus.

Light Mounted: Fast and mobile, light mounted troops are good at exploiting weak spots in the enemy's formation. They are expected to stay in combat once they engage, although they retreat as soon as things turn sour. They wear primarily leather and studded leather armor to reduce weight.

Medium Foot: The staple forces of an army, medium foot troops are designed to be balanced against most situations. They are well armed and armored, capable of crushing lighter-equipped enemies and able to hold their own against heavier troops. They include pike and spear troops, who are good against mounted opposition. City guards in wealthy communities tend to be medium foot troops.

Medium Mounted: Medium mounted troops fill the same role as heavy mounted troops but cost less to field. They have decent armor (scale mail, chainmail, and occasionally breastplates) and weapons that are more powerful than those of light mounted troops. They ride heavy warhorses with light barding, such as leather and studded leather.

Mercenary Pricing

The formula for determining a mercenary's level is as follows. Take the average money for a warrior (3d4 × 10 gp, or 60 gp) from Chapter 2 of the *DUNGEON MASTER'S Guide*. Then apply the progression in Table 2-44: NPC Gear, also in the *DUNGEON MASTER'S Guide*. Add up the total equipment costs, then figure out at what level the warrior could technically afford to own it all. A heavy hitter, with half-plate, heavy warhorse, lance, and the works, works out to 10th level. This equipment does not include any magic weapons.

Heavy Foot: These are shock troops meant to overwhelm the enemy from the first blow. They wear the heaviest and finest armor, and they use the most devastating weapons. Heavy foot soldiers are likely to be found in the employ of lesser nobles and knights, since they are among the few who can afford such expensive equipment.

Heavy Mounted: Heavy mounted troops tend to be masters of the battlefield. Capable of powerful charges, these troops can break through the enemy line in a single attack. Heavy mounted troops wear half-plate or banded armor and make extensive use of lances, warhammers, and other devastating weapons. They ride heavy warhorses with heavy barding, making them slow but extremely difficult to injure.

Mercenary Statistics

Mercenaries, being members of the warrior class, are proficient with all simple and martial weapons, all armor types, and all shields. However, not all troops have access to good equipment, so they fight with whatever they can get. Members of peasant levies might be skilled in the weapons they possess, but this is not always the case—commoners are proficient with just one simple weapon.

Troops whose primary attack is with a melee weapons have their highest ability score (13) in Strength. Troops who primarily use ranged weapons have their highest ability score in Dexterity. This typically provides them a +1 bonus on attack rolls made with their primary weapon and a +1 bonus on their key skill checks.

It is assumed that average mercenaries take the Weapon Focus feat for their main weapon (such as longbow, for archers) and the Toughness feat at 1st level. Thus, typical mercenaries have an attack bonus of +2 with their primary weapon and +1 with their secondary weapon. Mounted troops put the maximum ranks into their Ride and Handle Animal skills (4 at 1st level) and take Skill Focus (Ride) as soon as possible.

Below are typical game statistics for various types of mercenary troops. Armor Class and damage vary, depending on the type of armor and weapon. Armor may reduce speed and certain skill modifiers, as shown by an asterisk (*).

➤ **Typical Foot Soldier (Melee):** Human War1; CR 1/2; Medium-size humanoid; HD 1d8+4; hp 8; Init +0; Spd 30 ft.*; AC varies; Atk +2 melee (primary weapon), or +1 ranged (secondary weapon); AL N; SV Fort +3, Ref +0, Will -1; Str 13, Dex 11, Con 12, Int 9, Wis 8, Cha 10.

Skills and Feats: Climb +2*, Handle Animal +2, Intimidate +2, Jump +2*, Ride (horse) +1, Swim +2*; Toughness, Weapon Focus (primary weapon).

➤ **Typical Foot Soldier (Ranged):** Human War1; CR 1/2; Medium-size humanoid; HD 1d8+4; hp 8; Init +1; Spd 30 ft.*; AC varies; Atk +2 ranged (primary weapon), or +1 melee (secondary weapon); AL N; SV Fort +3, Ref +1, Will -1; Str 11, Dex 13, Con 12, Int 9, Wis 8, Cha 10.

Skills and Feats: Climb +1*, Handle Animal +2, Intimidate +2, Jump +1*, Ride (horse) +2, Swim +1*; Toughness, Weapon Focus (primary weapon).

➤ **Typical Mounted Soldier (Melee):** Human War1; CR 1/2; Medium-size humanoid; HD 1d8+3; hp 7; Init +1; Spd 30 ft.*; AC varies; Atk +2 melee (primary weapon), or +2 ranged (secondary weapon); AL N; SV Fort +2, Ref +1, Will -1; Str 13, Dex 12, Con 11, Int 9, Wis 8, Cha 10.

Skills and Feats: Handle Animal +4, Ride (horse) +5; Toughness, Weapon Focus (primary weapon).

➤ **Typical Mounted Soldier (Ranged):** Human War1; CR 1/2; Medium-size humanoid; HD 1d8+4; hp 8; Init +1; Spd 30 ft.*; AC varies; Atk +2 ranged (primary weapon), or +1 melee (secondary weapon); AL N; SV Fort +3, Ref +1, Will -1; Str 11, Dex 13, Con 12, Int 9, Wis 8, Cha 10.

Skills and Feats: Handle Animal +4, Ride (horse) +5; Toughness, Weapon Focus (primary weapon).

Exotic Troops

Warfare in the D&D game takes place not just on the battlefield, but sometimes above and even below it. Many other races besides those described in the *Player's Handbook* are willing to sell their fighting skills to the highest bidder. Some types of troops are considered exotic because they are either rare or normally considered enemies of those who employ them. Because of their very nature, exotic troops are found in a variety of places, specialize in drastically different forms of combat, and ask varying prices for their services.

Most of the creatures mentioned in Table 4-5: Exotic Troop Costs are evil. Those who wish to hire evil mercenaries had better be able to prove that they are more powerful (and willing to use that power) than their would-be hirelings. Using threats, intimidation, or violence is often the only way to get creatures such as goblins and orcs to take orders from anyone not of their race. Many nonhuman troops are motivated by desires other than money and may demand different methods of payment—some cultures consider slaves to be worth more than gold.

The prices given in Table 4-5 are only guidelines for what a typical mercenary of those races would ask for in payment. They assume that the mercenary is willing to work with the PCs (though not necessarily friendly). All of the creatures mentioned in the table are average representatives of their

race, with the abilities and equipment given in the *Monster Manual*.

Creatures of CR 1 or lower expect payment that is the equivalent of a human warrior mercenary (2 sp per day for foot troops, 4 sp per day for mounted troops). Those of CR 2 or higher demand the daily wage of troops having PC classes of the same level (2 gp per day × level). For example, a minotaur (CR 4) will demand a minimum of 8 gp per day.

TABLE 4–5: EXOTIC TROOP COSTS

Troop Type	Daily Wage
Goblin: Studded leather, morningstar, javelins (3)	1 sp
Kobold: Leather, halfspear, light crossbow	1 sp
Aasimar: Scale mail, large steel shield, longsword, light crossbow	2 sp
Gnoll: Scale mail, large wooden shield, battleaxe, shortbow	2 sp
Hobgoblin: Leather, small wooden shield, longsword, javelins (3)	2 sp
Orc: Scale mail, greataxe, javelins (3)	2 sp
Tiefling: Studded leather, small steel shield, rapier, light crossbow	2 sp
Troglodyte: Longspear, javelins (3)	2 sp
Bugbear: Leather, small wooden shield, morningstar, javelins (3)	4 gp
Ogre: Hide, Huge greatclub	4 gp
Centaur: Large wooden shield, heavy lance, mighty composite longbow (+4 Str bonus)	6 gp
Minotaur: Huge greataxe	8 gp
Pixie: Dagger, composite shortbow	8 gp
Hill Giant: Hide, Huge greatclub, rocks	14 gp
Ogre Mage: Chain shirt, Huge greatsword, Huge longbow	16 gp
<i>Aquatic Exotic Troops</i>	
Merfolk: Trident, heavy crossbow	2 sp
Sahuagin: Trident, heavy crossbow	4 gp
Triton: Trident, heavy crossbow	8 gp

Aasimar: The noble aasimar rarely serve as mercenaries, considering such employment to be sinister and evil. Sometimes, however, individuals are found who will sell their sword to employers that they deem worthy. These aasimar are usually fanatical in their destruction of evil. They are also likely to turn a vengeful eye toward employers they suspect of not following a strict code of goodness. Aasimar expect to be treated with respect, and they take a dim view of intimidation tactics by their employer.

Bugbear: Sheer greed motivates these creatures, and they will work for anyone that can provide them with adequate loot. They have an extremely short attention span and must be continually motivated by money or threats. They usually do not negotiate beyond “If you fight for me, I’ll give you gold.” Bugbears also accept slaves as payment. They are good skirmishers but collapse under any prolonged and disciplined assault.

Centaur: Young male centaurs sometimes leave the safety and boredom of the herd to find glory in

combat. If they cannot find any battles on their own, they seek out elves and humans who need some extra muscle. Centaurs are hired as mounted troops and prefer to pepper the enemy from a distance with bows before making devastating charges with their heavy lances and hooves. Centaurs hate to go underground or enter buildings and will not work for anyone who intends to venture into a dungeon, castle, or other structure. They also balk at being treated like pack animals and refuse to carry more than their personal gear.

Gnoll: Gnolls are foul creatures that delight in destruction and terror. Any person who can tolerate their despicable behavior will have powerful troops to work with. An employer must keep them well fed and use harsh discipline to prevent them from abandoning their task.

Goblin: Goblins make cheap troops, often asking half or less the normal pay that a human warrior would demand. However, they are difficult to control and respond best to intimidation rather than reason or incentive. Goblins are treacherous in the extreme, so an employer should continually watch his back when payday comes around. Goblins work best in groups, requiring no fewer than ten for any real effect. They will likely flee when the odds turn against them—something to remember if you are depending on steadfast troops.

Hill Giant: Dull-witted and greedy, hill giants are not so much hired as bribed. A prospective employer usually has to offer a large quantity of food in addition to money and treasure. Hill giants are fearsome in combat and act as mobile artillery pieces, lobbing enormous rocks with the strength of a small catapult. However, they are unpredictable and pose almost as great a threat to their allies as to their enemies.

Hobgoblin: Hobgoblins are disciplined and ruthless, they understand the chain of command, and they make perfect skirmishers, light foot, or medium foot troops. They readily form bands and actively look for conflicts. Because of this hard-nosed attitude, hobgoblins expect to be paid well and will refuse (and probably attack) someone who makes a poor offer. Hobgoblin warriors prefer to receive their orders from hobgoblin captains and sergeants, rather than directly from their employer.

Kobold: Even more so than goblins, kobolds require extremely close attention from their employer to get the job done. Hired in bands of ten or more, they are useful for bogging down an enemy with mob tactics. Kobolds are cowards and should only be used against enemies that they are sure to beat (usually through sheer numbers). Kobolds do not bargain well, and they usually have to be intimidated to respond to orders.

Minotaur: Minotaurs make devastating troops but take a lot of coaxing to be persuaded to fight for just

one side. Sometimes, in the heat of battle, a minotaur becomes consumed with bloodlust and attacks anyone within striking distance, including friendly troops. A minotaur can easily go head to head with an armored knight. Minotaurs quickly grow impatient when combat is not imminent, and will either leave or attack their employer out of boredom.

Ogre: Ogre mercenaries are feared in many lands. They are ruthless, cunning, and love to dive into battle. They are often found working with orcs and other barbaric races, deferring any decision-making to their smaller allies.

Ogres respect strength more than anything, and they might demand that an employer prove himself in combat with them before accepting a contract.

Ogre Mage: Ogre mages are cunning creatures that occasionally offer their martial prowess to anyone who will pay. Working as mercenaries “under” an employer, they are just as likely to be sizing him up to stab in the back. However, if the employer is powerful and ruthless enough, ogre mages make powerful and obedient mercenaries. They know that their abilities and strength are worth a great deal, and they ask for just as much in payment—they prefer magic items and slaves over gold.

Orc: Orcs make superb shock troops, diving into any fray with ruthless abandon. If the pay is right, they will happily fight whomever they are told to. However, there is a good chance that they will turn on their employer unless they are convinced that there is no way they could win. Orcs respect power and can be loyal troops—as long as their employer continually shows them who is boss. They prefer to be paid in treasure and will always demand a hefty portion of the loot acquired in battle.

Tiefling: Devious, violent, and greedy, tieflings are drawn to becoming mercenaries. They shun large battles, preferring to act as bodyguards (or assassins) for a rich employer. In rare instances where a band of tiefling mercenaries is available for hire, they form elite strike teams that excel at

attacking individual targets, such as commanders and wizards. Like many of the other evil beings mentioned here, tieflings can turn on their employer in moments.

Troglodyte: Only the truly desperate or depraved will hire troglodyte mercenaries. These foul creatures delight in battle, specializing in ambushes and hit-and-run attacks. They do not fight for money but accept payment in slaves and food, usually demanding a few live sentient creatures up front.

Aquatic Exotic Troops

Merfolk: The normally peace-loving merfolk make fierce mercenaries in times of distress. Sometimes individuals or whole clans are forced to take up arms, especially in waters that see a lot of naval combat. They normally disdain coins and jewels (which they can find in abundance within sunken ships and lost treasures) but ask for payment in goods that are not readily found beneath the waves—forged metal items of all kinds, weapons, and “exotic” foods, such as beef. Merfolk excel at hit-and-run tactics, both above and below the water. They can sabotage ships with ease and pick off individual sailors with their crossbows.

Sahuagin: Sahuagin have a rigid society that determines the place of each individual. When one is found unfit to dwell in that society, it is cast out. Some of these outcasts will do the unthinkable and fight for nonsahuagin. Employers who can overlook their disgusting habits find in sahuagin powerful troops that will perform extremely dirty tasks. Like merfolk, they make perfect underwater sappers, using their powerful claws and tridents to puncture the hulls of ships. In addition to treasure as payment, sahuagin mercenaries expect to take back slaves—usually for food.

Triton: Suspicious and slightly xenophobic, tritons are rarely mercenaries. Those willing to sell their services have either been shunned by their community or are bent on vengeance against some group of surface dwellers who have done them wrong. Triton mercenaries are always considered “mounted,” riding along on the backs of war-trained porpoises or hippocampi (both described later in this chapter). They always accept any assignment that allows them to attack their hated racial enemies, the sahuagin.

Animal Empathy and Handle Animal

The Animal Empathy skill specifically works with animals, and with beasts and magical beasts if you accept a -4 penalty. Material in this book does not change that. Handle Animal has no such limitation, but the sample DCs presented in Chapter 4 of the *Player's Handbook* are only for animals and beasts. This book presents a new feat, [Creature Type] Trainer (later in this chapter), which allows you to train other, nonintelligent creatures with Handle Animal as if they were beasts.

Option: Training Intelligent Creatures

Lawful creatures, regardless of intelligence, understand the necessity of training. Even highly intelligent lawful creatures that wish to serve as guards or mounts understand that they must learn the necessary skills. Assuming the creature consents to training, reduce the Handle Animal check DC by 1 for every 2 points of Intelligence over 2 to simulate its cooperation.

Chaotic creatures tend to be less accepting of discipline and repetition. Even when they agree to it, they reluctantly submit to the strictures of training. However, they are easily moved by emotional appeals. In this case, a resourceful trainer can substitute Diplomacy for Handle Animal and lower the check DC by 5 to gain a chaotic creature's cooperation.

Exotic Mounts for Mercenaries

Some mercenaries come with exotic mounts and charge their employer more for the care and feeding of these creatures. Table 4–6: Exotic Mount Cost shows the average additional price for some unusual mounts. Typically, herbivorous mounts cost less than carnivorous ones, and mounts that are particularly dangerous in combat cost even more. If a mercenary has one of these special mounts, remember to increase the mercenary's daily wage (because he is considered to be mounted).

For more information on different types of mounts, see Companions, Pets, and Mounts, below.

COMPANIONS, PETS, AND MOUNTS

The world contains a multitude of creatures, not all of them hostile. Many can be domesticated, or at least trained, to serve as pets, guards, or mounts outside of the normal "animal companion" standards. Some of these creatures are not even animals—nearly creature can be trained, convinced, or manipulated to serve. The trick is knowing how.

The creature entries that follow are by no means comprehensive. They are intended as an overview of what can be capably trained, and how. They can also serve as benchmarks against which DMs and players can develop their own creations.

Intelligent Creatures

Canny characters may use the Leadership feat to attract a cohort that can serve as a mount or guard (intelligent creatures generally do not accept the role of "pet"). See Leadership in Chapter 2 of the *DUNGEON MASTER'S Guide*. You cannot use this feat to attract a creature with Intelligence lower than 4. If you already have a special mount, familiar, or animal companion, this imposes a -2 penalty on your Leadership

score. Table 2–27: Example Special Cohorts in Chapter 2 of the *DUNGEON MASTER'S Guide* includes some creatures that can also serve as mounts or guards; use these as a guideline if you want to add more examples.

TABLE 4–6: EXOTIC MOUNT COST

Exotic Mount	Additional Cost	
	Per Day	Typical Riders
Blink dog, riding	+15 gp	Halflings, gnomes
Deinonychus/megaraptor	+40 gp	Troglodytes, goblins, hobgoblins
Dire badger	+20 gp	Gnomes, dwarves
Dire bat	+20 gp	Drow, goblins
Dire boar	+15 gp	Dwarves, orcs, goblins, hobgoblins
Dire shark	+10 gp	Sahuagin, tritons
Dire wolf	+10 gp	Elves, orcs, goblins
Elephant	+10 gp	Hill giants, ogres, humans
Giant eagle	+10 gp	Elves, humans, aasimar
Giant owl	+5 gp	Elves, gnomes
Hippocampus	+10 gp	Tritons, merfolk, aquatic elves
Hippogriff	+20 gp	Humans, elves
Lizard, riding	+5 gp	Dwarves, troglodytes
Pegasus	+20 gp	Elves, humans, aasimar
Porpoise	+5 gp	Tritons, merfolk
Rhinoceros	+10 gp	Dwarves, ogres
Triceratops	+50 gp	Dwarves, orcs
Winter wolf	+15 gp	Orcs, goblins, hobgoblins
Worg	+15 gp	Orcs, goblins, hobgoblins
Wyvern	+50 gp	Orcs, goblins, troglodytes

Training

To make a creature do what you want, you must be able to give it instructions. For some creatures, this involves weeks of training. For others, it is a simple matter of telling them what you want done.

Creatures take to their training more easily and thoroughly if they start young. A creature reared from infancy becomes domesticated (see Domestication, below) for purposes of further training. This is reflected in lower Handle Animal check DCs for training. A domesticated creature is docile around strangers and does not attack unless provoked.

Creatures with Intelligence of 2 or lower (such as animals and beasts) are trainable using the rules for Handle Animal in Chapter 4 of the *Player's Handbook*. Those with Intelligence of 3 or higher (such as most magical beasts) can understand language and often require different techniques, depending on the creature. Creatures having human intelligence, particularly those with the gift of language, require the use of Diplomacy. Generally, Handle Animal is used unless otherwise stated.

Reputable trainers know the difference between a creature with animal intelligence (Int 1 or 2) and one that is brighter. Before they begin training a sentient creature, they find a way to communicate with it and ask its permission. Someone attempting to train such a creature against its will could be arrested for slavery.

Smart creatures learn faster. For every 2 points of Intelligence above 2 that a creature has, training in a task takes two fewer weeks to accomplish (to a

minimum time of one day). Therefore, to train a dragonne (Int 6) to guard an abbey takes one month instead of the standard two. Teaching a pegasus (Int 10) to serve as a mount requires just one day.

Spells can also be a great boon to a trainer, particularly *charm monster*. It takes half the normal time to train a creature under the influence of a mind-affecting spell that causes it to befriend or obey the trainer, and the DC of the necessary skill check is reduced by 10. Creatures with Intelligence 3 or higher often resent this sort of magical coercion; while they can be taught quickly with the aid of mind-affecting spells, they might not wish to perform tricks they learned under a spell's influence after the spell ends.

In some circumstances, the DM may rule that a creature of Intelligence 5 or higher who can communicate with its rider by speaking or telepathy should be considered a follower. This is likely if the PC often consults with the creature and uses its abilities outside of conditions it was strictly trained for. In this case, the PC must adhere to the cohort rules in Chapter 5 of the *DUNGEON MASTER'S Guide*, including giving the creature a half share of experience.

Domestication

Domesticated creatures are docile in civilized areas and calm among strangers. Anyone with the Handle Animal skill can direct them to perform tasks they have been taught.

Not every creature that can be trained can be domesticated. An owlbear, for instance, is devoted to its master if raised from a chick but can never be tamed. Animal companions are not considered domesticated. Further, creatures of evil alignment rarely accept domestication.

Creatures that take to domestication well usually include animals, beasts, and magical beasts of canine, feline, and equine form. Assume that a creature can be domesticated unless its alignment is always evil or its description states otherwise.

Training Other Types of Creatures

Most campaign ecologies contain more than just animals and beasts. It's a safe assumption that in a world of such astonishing variety, the ingenuity of the common races would lead to a way to train other types of creatures.

Training plant creatures requires special techniques and facilities, but any plant with an Intelligence score can learn tricks within its capabilities. Nonintelligent plants, such as the assassin vine, are untrainable.

Constructs and undead have no Intelligence scores and so are untrainable. However, a designated master can command these types of creatures. They do not listen to any voice but their master's, and

they cannot follow very specific instructions. When the master is not around, a construct or undead creature follows only simple orders that the master left for it. Such a creature is easily confused and shows no initiative. These creatures defend themselves if attacked, however.

Other types of creatures must be assessed on a case-by-case basis. Some, such as oozes, are untrainable and only barely controllable. Others, such as chaotic evil outsiders, are trainable but not controllable. A few savage creatures, such as bulettes, are just not worth the effort. While they are theoretically trainable, it's usually safer and simpler to find a more easily domesticated creature to perform the same task.

Pets

People keep pets for love and companionship. Nearly anything can be a pet to somebody, but for care and companionship, some creatures make better pets than others do. The best pets generally have no more than 1 HD, have Intelligence no higher than 2, and are no larger than Small size. Creatures with more than 1 HD (especially carnivores) continually struggle with their owners for dominance, those with Intelligence 3 or higher resent being kept, and unusually large creatures are unwelcome in most civilized areas.

Notable exceptions include the following.

Animated Object: A wizard might animate objects around her house and then grow fond of them. If left animated long enough, they usually develop quirks that resemble personality.

Dog: These animals make excellent pets, regardless of their HD or size.

Elemental: The *Monster Manual* doesn't mention elementals below Small size, but it's safe to assume that Tiny or Diminutive elementals with animal intelligence could exist. A fire elemental might seem a dangerous pet, but if it "lived" in the hearth, it might well enjoy a simple existence there.

Homunculus: Unusually intelligent for a construct, a homunculus shares its creator's mindset. It literally lives to serve, making it an excellent pet if that is all its creator asks of it.

New Feat:

[Creature Type] Trainer

You are skilled at training a particular type of creature.

Prerequisite: Handle Animal 8 ranks.

Benefit: When you take this feat, choose a type of creature other than animal or beast. You may rear and train creatures of that type, using the Handle Animal skill, as if they were beasts, provided their Intelligence score is 4 or lower.

Special: You can gain this feat multiple times. Its effects do not stack. Each time you take the feat, it applies to a new creature type.

Exceptions: This feat does not increase the DCs for training creatures presented in the *Monster Manual*, such as the pegasus. However, it lowers them when appropriate.

Normal: Handle Animal does not apply to training creatures other than animals or beasts.

Pets and Animal Companions

A pet is less useful and less reliable than a druid or ranger's animal companion. A pet must be trained with the Handle Animal skill to accomplish even the simplest tasks. A pet also does not feel the deep loyalty toward its owner that an animal companion does. When threatened, a pet must make a Will save (DC 15). If it fails, the pet ignores any training and flees.

Pseudodragon: These dragons live to be pampered, and their sole ambition seems to be comfort. Pseudodragons are perfectly happy to be thought of as pets, as long they eat well and are treated with the respect they feel they deserve.

GUARD CREATURES

Guard creatures must be fierce, alert, and dependable. Intelligence takes a back seat to these considerations and is sometimes even a liability for a good guardian.

“Guard” is a blanket term that describes any creature trained to protect or attack. Guard creatures serve in different capacities. Most often, they are left in an enclosed area to defend a place (smarter ones don’t need to be enclosed). Other creatures serve well as bodyguards, traveling with their master. Still others are held for special occasions such as hunts or gladiatorial combat.

Each of the following entries gives information about a particular creature serving as a guard. The entry includes situations in which the creature is commonly used, quirks that a trainer would be aware of, or special tricks that the creature can learn. It ends with Handle Animal check DCs for training both young and adult creatures, the market price for one egg or young of the creature, and a trainer’s charge to rear or train the creature.

Blink Dog

Blink dog packs try to prevent it, but opportunists sometimes steal their pups and train them as guard creatures. Some are treated horribly by abusive masters. Being both intelligent and lawful good, blink dogs trained in such an environment are reluctant guards, but like slaves raised in captivity, they are too beaten and ignorant of freedom to disobey orders.

On rare occasions, a pack of blink dogs serve as guardians and friends for a tribe of wild elves or a lawful good person who has done a great service to the pack. In these instances, the blink dogs require no training and act of their own volition. At no time, however, are they considered domesticated or tame.

DC Young/Adult: 22/29; *Young Price:* 10,000 gp; *Training Cost:* 1,000 gp.

Ethereal Marauder

Only a very few ethereal marauders have been caught, fewer trained, and none domesticated. They are exceptional guards, but perhaps not worth the effort.

Trainers who wish to try anyway must first arrange a method of trapping an ethereal marauder on the Material Plane—usually by means of a magic item such as a *collar of material entrapment* (see the sidebar). Then they must locate one of these creatures. This in itself has been the subject of years-long quests; kings and rich merchants have arranged ethereal expeditions in fruitless attempts to capture one of these predators.

The problems do not end once the creature has been captured. Little is known about their ecology, and many ethereal marauders mysteriously die in captivity. Further, not only is the concept of training foreign to them, they don’t even understand language as it is known on the Material Plane. The trainer (or some interested party) must either use some form of telepathy or make a successful Innuendo check (DC 25) to communicate the meaning of all the bewildering behavior to the creature.

Happily, once this is done, an ethereal marauder turns out to be surprisingly intelligent, and if convinced to submit, serves its master faithfully. It quickly learns nearly any trick and performs them all well. As guards, ethereal marauders usually remain on the Ethereal Plane, watching their charge intently and attacking interlopers ruthlessly.

DC Young/Adult: 20/27; *Young Price:* 50,000 gp; *Training Cost:* 5,000 gp.

Gargoyle

Gargoyles are excellent guardians, but only for as long as they choose to be. They are best left in places that the owner does not expect to visit very often, since they can be antagonistic toward even the person who placed them.

Gargoyles serve only powerful or persuasive masters, and even then they must be convinced that plenty of foolish prey will attempt to get past them while they wait in place. *Geas* or *quest* spells also work well. Gargoyles do not submit to training.

DC Young/Adult: —/—; *Young Price:* —; *Training Cost:* —.

Hell Hound

Hell hounds are aggressive hunters that get restless if enclosed and left alone to protect some place or object. Evil masters can use them as guardians, but they must let the hounds roam and hunt as they please. One or two hell hounds can serve as personal guards, or packs can be kept in infernal kennels for an occasional round of “the most dangerous game.”

Although hell hounds and howlers have similar needs and can do many of the same things, they cannot be kept near one another—the two fight viciously.

DC Pup/Adult: 22/29; *Young Price:* 15,000 gp; *Training Cost:* 3,000 gp.

New Item: Collar of Material Entrapment

This silvery collar has an emerald sheen in the light. A creature wearing the collar is completely barred from extra-dimensional travel, as the *dimensional anchor* spell, for as long as it wears the collar. The collar expands or contracts to fit any size creature. The DC to break or slip out of the collar is 40.

Caster Level: 7th; *Prerequisites:* Craft Wondrous Item, *dimensional anchor*; *Market Price:* 30,000 gp; *Weight:* 1 lb.

Krenshar

Though krenshars adapt well to civilized habitats, they still play hunting games with each other and their masters when off duty. Playful krenshars try to jump out and scare their masters as often as possible. Masters attribute numerous gray hairs to this “play.”

Due to their social natures, krenshars prefer to stay among their own kind even when domesticated. A solitary domesticated krenshar must be kept constantly socialized or it becomes jittery and its skin tightens, reducing the effectiveness of its scare ability (it no longer gets the +3 bonus on Bluff checks).

DC Young/Adult: 20/27; Young Price: 500 gp; Training Cost: 500 gp.

Manticore

With their flight and spike volley abilities, manticores are best employed as guards in wide-open spaces. Manticores quickly grow bored when left to guard a stationary object. They spend long, dull hours setting up elaborate blinds and ambushes or inventing ways to extort more payment or favors from their masters. Especially because of the latter habit, manticores are better employed as bodyguards or hunters. When protecting a person, a manticore passes the time in subtly threatening conversation, trying to catch its charge in logic traps or pointing out how a clever attacker could separate the two of them and kill the charge. This is a manticore’s way of demonstrating that it is alert and aware of its surroundings. Few clients seem to appreciate the effort.

DC Young/Adult: 24/31; Young Price: 4,000 gp; Training Cost: 3,500 gp.

Mimic

Mimics are near-perfect property guards. They’re intelligent, they speak Common, and they are willing to sit still for years at a time as long as they are paid in treasure and food for their trouble. A mimic’s main drawback is its potential disloyalty. It can sometimes be bought off if an intruder offers better rewards. In addition, if intruders prove too strong, a mimic might bargain information for its life. Under no circumstances, though, will a mimic surrender treasure.

Mimics reject attempts at formal training—they instinctively know how to guard items and places, and they have little desire to protect people. Would-be trainers must use Diplomacy instead of Handle Animal to get a mimic to do something it does not want to do. Fortunately, mimics are unskilled diplomats.

No young mimic has ever been found. It is unknown how or if mimics reproduce.

DC Young/Adult: —/opposed Diplomacy check; Young Price: —; Training Cost: —.

Otyugh

A favorite entrance for thieves into an otherwise well-guarded fortification is through the garbage chute or sewers. It happens so often, one would think all the rich and powerful would take this into account. Those who keep guard otyughs do.

Even untrained, otyughs sometimes enter symbiotic relationships with other beings, not attacking if fed regularly and left alone in their refuse. Trained otyughs are smart enough not only to refrain from attacking their benefactors, but also to accept complex instructions about whom to attack, when, and how. They can listen for passwords or musical phrases, look for identifying insignia, or follow specific verbal instructions such as “Attack anyone except Baron Roquefort and his retinue or Stephen the dung boy, and don’t attack anyone for an hour after sunrise.”

DC Young/Adult: 24/31; Young Price: 2,000 gp; Training Cost: 1,500 gp.

Owlbear

Owlbears are theoretically trainable. However, it is not necessary to train them to attack, and not very productive to teach them anything else. Owlbears are best employed by leaving them in an enclosed area and tossing in raw meat occasionally. Further interaction is usually pointless.

If raised from chicks, owlbears become very devoted to their trainers. They never transfer this devotion to anyone else, though, and continue to display their famously surly attitude to anyone who isn’t the trainer.

The most useful trick to teach a guard owlbear is a version of “Alert” (see the New Tricks sidebar), whereby it makes a distinct noise when it fights something besides another owlbear. Owlbears can be taught other tricks, but they always perform them sullenly and violently. Any time an owlbear is commanded not to attack, its master must make a successful Handle Animal check (DC 15) or it attacks anyway.

DC Young/Adult: 23/30; Young Price: 3,000 gp; Training Cost: 2,000 gp.

New Tricks

The following tricks are in addition to those described under Animal Companions in Chapter 2 of the *DUNGEON MASTER’s Guide*.

“Don’t Attack”: This is not a command but a standing order. The creature never attacks one specific person or creature besides the master. This takes a separate trick for each individual who is not to be attacked.

“[Special Ability]”: If a creature has a special ability (such as a breath weapon), it can be trained to use only that ability until commanded to stop. If the ability is not usable every round, then the creature retreats to safety or repositions itself during the rounds when it cannot use the ability.

“Alert”: The creature makes some distinctive noise when it detects or attacks intruders.

“Disable”: The creature fights until it senses that its target has been incapacitated. Then it backs off. This does not guarantee that the creature won’t kill a target, only that it ceases attacking if the target falls down and stops resisting.

“Disarm”: If a creature is capable of making disarm attacks, it attempts to do so until commanded to stop.

“Subdue”: If possible, the creature deals subdual damage instead of normal damage.

“Trip”: If a creature is capable of making trip attacks, it attempts to do so until commanded to stop.

Phantom Fungus

Phantom fungi are insidious guards. Not only are they invisible and quiet, but most detection spells fail to register their presence. Unfortunately, these same undetectable qualities make phantom fungi difficult to train. Seasoned trainers usually tie ribbons around key points on the phantom fungus or give it an occasional dusting of flour to keep up with it. They typically teach the creature to clack its teeth together to alert them when it completes a trick. Adventurers who know this listen for an occasional clacking sound when they suspect the presence of trained phantom fungi.

Phantom fungi are only trainable as adults. Their spores are nonintelligent and immobile.

DC Young/Adult: —/27; *Spore Price:* 1,000 gp; *Training Cost:* 1,000 gp.

Rust Monster

Domesticated rust monsters are quite friendly toward their masters, but their lust for rust overcomes any notion of friendship or loyalty. Masters who enjoy carrying metal items usually just leave their rust monsters alone in an enclosed area as free-roaming guards. Since rust monsters do very little real damage, they are often the first line of defense, to dissuade intruders rather than harm them (or to soften them up for the more dangerous second line).

DC Young/Adult: 23/30; *Young Price:* 1,000 gp; *Training Cost:* 1,200 gp.

Sea Lion

For castles built on ocean cliffs, royal yachts out on pleasure cruises, or underwater treasure grottoes, sea lions make excellent guardians. Sea lion trainers are usually locathahs or merfolk; land dwellers are at too great a disadvantage in attempting to soothe and teach these ferocious predators. Because of their fighting tactics and disposition, sea lions are best kept and trained in prides. They cannot be domesticated.

DC Young/Adult: 24/31; *Young Price:* 3,500 gp; *Training Cost:* 2,500 gp.

Shadow Mastiff

With their bay ability, shadow mastiffs are best employed as personal escorts of evil masters or left among other evil creatures. Their natural abilities are also heightened underground, deep indoors, or just in the proximity of tall things that cast a lot of shadows, where light is less likely to hamper them.

DC Young/Adult: 22/29; *Young Price:* 10,000 gp; *Training Cost:* 3,000 gp.

Shocker Lizard

These magical beasts are guardians for the fashionably rich. Because of their habitat preference,

clutches or whole colonies of shocker lizards are placed in the gardens and inner courtyards of expensive houses to guard against the inevitable thief who tries entry under cover of heavy foliage. Others keep shocker lizards as personal protection, wearing them on their shoulders like exotic pets, or walking a pair of them on short leashes while out and about.

Trainers usually teach household shocker lizards not to attack children or favored servants. Vindictive owners, though, sometimes have them trained not to emit their customary warning clicks before attacking.

DC Young/Adult: 20/27; *Egg Price:* 750 gp; *Training Cost:* 1,000 gp.

Vargouille

Evil or unusually twisted masters employ these hideous outsiders to guard their valuables. Predictably, vargouilles most often guard tombs and mausoleums from graverobbers. Clever despots also hide them outside their palaces among rows of pikes topped with severed heads.

Vargouilles have little personality and no easily discernible response to reward or punishment. These qualities make them tough to train.

DC Young/Adult: —/26; *Young Price:* —; *Training Cost:* 1,500 gp.

New Guard Creatures

These new animals and beasts can be trained as guards.

Climbdog

Small Animal

Hit Dice: 2d8+4 (13 hp)

Initiative: +2 (Dex)

Speed: 40 ft., climb 40 ft.

AC: 17 (+1 size, +2 Dex, +4 natural), touch 13, flat-footed 15

Attacks: Bite +4 melee

Damage: Bite 1d6+3

Face/Reach: 5 ft. by 5 ft./5 ft.

Special Qualities: Low-light vision, scent

Saves: Fort +5, Ref +5, Will +1

Abilities: Str 15, Dex 15, Con 15, Int 2, Wis 12, Cha 6

Skills: Climb +19, Hide +6, Listen +6, Spot +6

Climate/Terrain: Any hill or mountains

Organization: Solitary, pair, or pack (5–20)

Challenge Rating: 1

Treasure: None

Alignment: Always neutral

Advancement: 3–4 HD (Medium-size); 5–6 HD (Large)

Climbdogs live vertically. These canine creatures clamber about effortlessly on the rocky cliffs where

they are found. They can climb nearly anything short of a sheer surface.

A climbdog has mottled short gray fur, black eyes, and short legs. It is thickly muscled, and its wide paws are four-toed—two facing forward and two facing to the rear. This arrangement allows climbdogs to hook their curved claws into a cliffside whether they face up or down.

Climbdogs live in sparse packs, claiming entire cliffs for their territory. They feed on cliff-dwelling birds and make their dens in shallow caves. Their short legs belie the amazing speed at which they can scuttle about on vertical surfaces.

In some cities, climbdogs have been imported to curb bird overpopulation. After the bird problems are solved, however, packs of half-wild climbdogs remain roaming the alleys, trading a nuisance for a potential threat.

Adult climbdogs are about 3 feet long and weigh up to 70 pounds.

Combat: Primitive halflings are well known for domesticating and training climbdogs, though any race can do so. The creatures are easily taught and exceptionally loyal. Climbdogs fight to the death in defense of their masters.

True to their nature, they prefer to attack from above, leaping down on prey if possible.

Skills: Climbdogs receive a +4 racial bonus on Climb checks, in addition to the +8 bonus on Climb checks from having a climb speed.

Training a Climbdog: Training a climbdog as a hunting or guard animal requires a successful Handle Animal check (DC 10 young, DC 17 adult). Climbdog pups are worth 30 gp on the open market. Professional trainers charge 125 gp to rear or train a climbdog.

Thudhunter

Medium-Size Beast

Hit Dice: 4d10+12 (34 hp)

Initiative: +0

Speed: 30 ft., burrow 10 ft.

AC: 16 (+6 natural), touch 10, flat-footed 16

Attacks: 2 claws +7 melee and bite +2 melee

Damage: Claw 1d6+4, bite 1d8+2

Face/Reach: 5 ft. by 5 ft./5 ft.

Special Attacks: Improved grab

Special Qualities: Darkvision 60 ft., low-light vision, thud

Saves: Fort +7, Ref +4, Will +2

Abilities: Str 19, Dex 10, Con 17, Int 2, Wis 12, Cha 6

Skills: Jump +12, Spot +8

Climate/Terrain: Any temperate and warm land

Organization: Pack (5–10)

Challenge Rating: 2

Treasure: None

Alignment: Always neutral

Advancement: 5–8 HD (Large); 9–12 HD (Huge)

These dark blue, thick-skinned, hairless predators hunt burrowing creatures. Their footfalls rumble through the ground, upsetting their prey's tremorsense and driving it to the surface, where they pounce on it.

After bringing down a kill, the pack feasts, often sleeping for days afterward. A full belly can sustain a thudhunter for up to two weeks. Though thudhunters love a big kill, they can also survive on a diet of small burrowing animals.

Thudhunters take well to domestication, although they need frequent exercise to stay sharp for hunting. Rich sport hunters sometimes keep trained packs of the beasts solely for the occasional bulette hunt.

Thudhunters stand 2 1/2 feet tall at the shoulder and weigh upwards of 100 pounds.

Combat: Unlike most predators, thudhunters are loud and obvious. Hunting in packs, they keep their shovel-noses close to the ground. Their footfalls thunder for a quarter-mile or more through the air, and farther underground, as they attempt to flush

out their quarry. Once a burrowing creature surfaces, the nearest thudhunters attack with their claws and grapple to keep it from escaping while others burrow underneath. Together, the pack claws and bites its prey to death.

Improved Grab (Ex): If a thudhunter hits with a claw, it deals normal damage and attempts to start a grapple as a free action without provoking an attack of opportunity. It has the option to conduct the grapple normally, or simply use that claw to hold the opponent (–20 on grapple checks, but the thudhunter is not considered grappled). Each successful grapple check it makes during successive rounds automatically deals the damage given for the claw attack.

Thud (Ex): Their thick, stumpy legs loudly stomp the ground when thudhunters prowl. Creatures with tremorsense within 120 feet are driven to distraction by the disruptive vibrations, and are forced to surface unless they succeed on a Will save (DC 16). Once they do surface, they must succeed on a second Will save (DC 16) or be stunned for 1 round.

Skills: Thudhunters receive a +5 racial bonus on Jump checks.

Training a Thudhunter: Training a thudhunter as a hunting or guard beast requires a successful Handle Animal check (DC 22 young, DC 29 adult). Thudhunter young are worth 200 gp on the open market. Professional trainers charge 500 gp to rear or train a thudhunter.

MOUNTS

Mounts are great to have around. They get you where you need to go quickly and help you out in combat, and the smarter ones can provide friendship and advice in uncertain times. Mounts are also a lot of trouble. They're big, they eat a lot, they're finicky, and they require specialized knowledge and equipment. Basically, they're party members without hands.

Nearly any creature can be a mount for a clever, tenacious rider. The general rule is that mounts must be at least one size larger than their riders. So a gnome (Small) can ride a dire badger (Medium-size), an elf (Medium-size) can ride a

giant eagle (Large), and an ogre (Large) can ride an elephant (Huge).

A creature can carry as many passengers as its space and carrying capacity allow. One Small or Medium-size rider or passenger can fit in each 5-foot square the creature occupies and still have room to move around and fight if necessary. Riders, of course, must arrange themselves according to the creature's shape.

Care and Feeding

Mounts vary so widely that it is impractical to create a single rule for determining how much one eats or how much attention it needs from a stablehand. Many DMs don't even worry about details of mount care and feeding, and for good reason—it's boring. However, some guidelines are worth considering.

Exotic mounts need exotic care. In civilized areas, stable, feed, and grooming for a horse or riding dog costs 5 sp per day. If a mount is larger, is oddly shaped, or has an unusual diet, a stablemaster might double or quadruple that price. If the creature eats something difficult to obtain, the owner must be prepared to provide it.

In the wilderness or underground, assume that the owner must spend about an hour each day on various "mount maintenance" tasks. If there are no unusual considerations, the character is assumed to take care of these tasks during the time that wizards and clerics prepare their spells for the day. Otherwise, having a dedicated hireling to handle the mount is a smart consideration. For animal mounts, the wage of 15 cp per day found in Chapter 5 of the *DUNGEON MASTER'S Guide* is adequate. For beasts and magical beasts with special abilities or grooming needs, the price can easily double, to 3 sp per day. Larger or more dangerous mounts might run up to 1 or 2 gp per day, since caring for these creatures requires specialized knowledge and skills that rival those of an alchemist or sage.

New Equipment

Most of the following equipment and magic items are created for use with horses. Unless otherwise stated, references to "horse" include mules, donkeys, and ponies. Presumably, any craft worker or spellcaster who could create an item for use with a horse could create a similar item for a more exotic mount.

Barding: Chapter 7 of the *Player's Handbook* provides rules, weight, and cost for barding for Medium-size and Large mounts. For creatures of larger size, barding is usually cost-prohibitive and unnecessary, and creatures with special movement types (burrow, fly, swim) are especially hampered by the extra weight and bulk. However, exceptions abound. For larger or stranger mounts than the norm, refer to the table below, applying the appropriate multiplier to the cost of the armor as given on Table 7–5: Armor in the *Player's Handbook*.

BARDING FOR UNUSUAL MOUNTS

Unusual Nature	Cost	Weight
Huge	×8	×4
Gargantuan	×16	×16
Colossal	×32	×256
Odd shape	×2	×1

Howdah: A howdah is a seat or box, usually with a canopy and railing, placed on the back of a Huge

Weight Limits for Flying Mounts

Flying creatures can fly at their given speed if carrying no more than a light load (this is a change from the *Monster Manual*). The weight of the rider and the rider's armor and equipment count against this limit.

or larger creature. Four Medium-size riders can fit on a howdah. Ornate howdahs are status symbols for rich or noble people, but open-air versions also make excellent fighting platforms. In addition to placing occupants out of the reach of most infantry, a howdah provides one-half cover. *Cost:* 200 gp; *Weight:* 100 lb.

Sidecar Saddle: A long mount that is at least two size categories larger than its rider can carry sidecar saddles. This type of exotic saddle hangs off a creature's side, allowing it to carry passengers without crowding the rider. If a mount is only two size categories larger than the rider (such as a horse carrying a halfling), sidecar saddles must be worn and weighted in pairs to keep the mount from becoming unbalanced. If the mount is three or more size categories larger than the rider (such as a half-orc on an ancient bronze dragon), then the added weight is negligible for the mount and not unbalancing. Riders in a sidecar saddle automatically get one-half cover from attacks coming from the opposite side of the mount. *Cost:* 60 gp; *Weight:* 40 lb.

Magic Items

Bracelet of Friends: Rather than a unique magic item, this is a special application of the *bracelet of friends* found in the *DUNGEON MASTER'S Guide*. It has the same prerequisites and cost. Instead of keying charms to people, the wearer may key the charms to her mount, animal companion, or guard creature, and call the creature to her wherever she may be.

Bridle of Ease: This magic bridle grants trainers a +5 competence bonus on Handle Animal checks when training a mount. Versions of this item are available for exotic mounts.

Caster Level: 7th; *Prerequisites:* Craft Wondrous Item, charm monster; *Market Price:* 500 gp; *Weight:* 1 lb.

Clever Bridle: This bit-and-bridle set always looks clean and new. When worn by a horse, a *clever bridle* grants the ability to learn three, six, or nine more tricks than the horse could normally learn, depending on the version. The horse must wear the bridle for 8 hours per day to maintain any extra tricks it learns.

Caster Level: 5th; *Prerequisites:* Craft Wondrous Item, animal friendship; *Market Price:* 3 tricks 1,000 gp, 6 tricks 4,000 gp, 9 tricks 9,000 gp; *Weight:* 1 lb.

Equestrian's Saddle: Anyone seated in this military saddle feels more comfortable and competent

at equestrianism. The saddle grants a +10 circumstance bonus on Ride checks with horses.

Caster Level: 5th; *Prerequisites:* Craft Wondrous Item; *Market Price:* 2,000 gp; *Weight:* 30 lb.

Horseless Saddle: When the command word is spoken, this riding saddle leaps into the air and fastens itself around a *phantom steed*, as the spell cast by an 8th-level caster. If the steed is killed, the saddle cannot be reactivated for 24 hours.

Caster Level: 8th; *Prerequisites:* Craft Wondrous Item, *phantom steed*; *Market Price:* 43,200 gp; *Weight:* 25 lb.

Horseshoes of Thunder: Once per day, when a horse gallops at a full run, and the rider speaks the command word, these shoes emit a loud crack of thunder. Any creature in a 20-foot radius (excluding the mount, rider, and any passengers) comes under the effect of a *shout* spell cast by a 7th-level caster.

Caster Level: 7th; *Prerequisites:* Craft Wondrous Item, *shout*; *Market Price:* 10,080 gp; *Weight:* 1 lb. each.

Saddlebags of Holding:

These saddlebags open into an extradimensional space, allowing them to hold much more than they would seem able to. *Saddlebags of holding* always come in pairs. Each bag contains 30 cubic feet of space and can hold 250 pounds. They otherwise operate identically to the *bag of holding 1* described in the *DUNGEON MASTER'S Guide*.

Caster Level: 9th; *Prerequisites:* Craft Wondrous Item, *Leomund's secret chest*; *Market Price:* 5,000 gp; *Weight:* 30 lb.

Saddlebags of Providing:

Each bag of this pair serves a different function. Every morning, the right bag contains enough food to feed whatever creature it is slung over for one day. For horses, this is generally oats and a few lumps of sugar; for griffons, it means several pounds of raw horsemeat. If removed and not eaten, the food spoils after 24 hours. Food does not appear if anything else is placed in the bag.

The left bag contains a masterwork set of grooming and leather repair tools. The grooming tools are appropriate for whatever creature the bag is slung over. In addition, the left bag contains 10 cubic feet of space for the rider's personal effects, and in all other ways acts as a *bag of holding*. Both bags weigh the same as regular empty saddlebags, regardless of their contents.

Caster Level: 9th; *Prerequisites:* Craft Wondrous Item,

create food and water, *Leomund's secret chest*; Market Price: 8,000 gp; Weight: 16 lb.

Shielding Blinders: This set of blinders is black with gold inlaid glyphs covering the outer surfaces. A horse wearing *shielding blinders* is completely protected from gaze attacks.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *darkness*; **Market Price:** 12,000 gp; **Weight:** 2 lb.

Shrink Collar: Rather than resizing to fit its wearer, as most wearable magic items do, this half-inch-wide metal collar studded with tiny jewels resizes its wearer. When worn, the collar grows to 2 inches wide, and the jewels enlarge to cover most of its surface. Regardless of his or her original size, the wearer shrinks to Small size, becoming around 3 feet in height and weighing no more than 60 pounds. None of the creature's other attributes change. Unwilling targets get a Fortitude save (DC 11) to resist. If the save is successful, the collar snaps and is ruined.

A creature with Intelligence 2 or lower must succeed on a Will save (DC 11) or become panicked by the transformation. Animal companions do not have to make this save, nor do creatures that have the effect of the collar explained to them beforehand somehow, such as through telepathy or *Speak with animals*.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *reduce*; **Market Price:** 10,000 gp; **Weight:** 1 lb.

Whip of Obedience: This masterwork leather riding whip grants its user a +10 circumstance bonus on Handle Animal checks. This bonus applies only to creatures with Intelligence 2 or lower.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *animal friendship*; **Market Price:** 2,000 gp; **Weight:** 2 lb.

Other Animal Mounts

Horses are not the only animals that can be ridden. Many different animals make excellent mounts—sometimes even

better than horses, depending on the climate and regional preferences.

Each of the following entries gives information about a particular creature serving as a mount. It ends with statistics for carrying capacity, Handle Animal check DCs for rearing both young and adult creatures, the market price for one egg or

young of the creature, and the trainer's charge to rear or train the creature.

Camel

Camels are favored mounts in the desert. When fully stocked, a camel can travel up to a week with little food and no water. Further, camels require no shoeing or fussy grooming as horses do. Dromedary camels (one hump) are best for riding, while bactrians (two humps) are best for carrying cargo. Camels are thought to be bad-tempered and to carry grudges against people who mistreat them, getting revenge by kicking or spitting. Actually, while no creature likes being mistreated, camels are fairly patient and hard workers.

Carrying Capacity: Light 300 lb., medium 600 lb., heavy 900 lb.; **DC Young/Adult:** 11/18; **Young Price:** 50 gp; **Training Cost:** 10 gp.

Dire Badger

In communities where gnomes are the primary race, elite soldiers ride dire badgers. These gnome "cavalry" units are especially well coordinated, since the riders can talk to their mounts using their innate *Speak with animals* ability. Conversations are never long or deep, but rider and mount learn how to communicate economically in the 1-minute time they have each day, talking about the day's agenda, war efforts, and each other's physical and emotional states.

Carrying Capacity: Light 87 lb., medium 174 lb., heavy 263 lb.; **DC Young/Adult:** 16/23; **Young Price:** 100 gp; **Training Cost:** 15 gp.

Dire Bat

Dire bats are saddled with so many evil associations, one would hardly think of adding a rider too. Yet they make excellent mounts. Some riders prefer dire bats to the more willful giant eagles or owls, if for no other reason than that they do not have the same pesky good alignment associations.

Bat riding is difficult since it commonly occurs in the dark, and the bat's blindsight has much longer range than most riders' darkvision. Riders must pay close attention to their mounts' movement and allow it to help steer. In low-light conditions, the DM might increase the Ride check DC, given that the bat reacts to things the rider is unaware of.

Carrying Capacity: Light 258 lb., medium 519 lb., heavy 780 lb.; **DC Young/Adult:** 17/24; **Young Price:** 150 gp; **Training Cost:** 100 gp.

Dire Boar

Boar riders must pay close attention to their mounts in a fight. Due to its innate ferocity, a dire boar gives no indication that it is hurt or near death in combat. A rider caught up in his own battle can

How Much Will a Trainer Charge?

Trainers with the equipment and know-how to train exotic mounts are rare, and they know it. They can set their own prices for their services. However, this is not price gouging. Training is long, hard work. Especially in the case of rearing young creatures, the price a trainer charges might be her entire income for the year.

The following table provides some general guidelines for what a trainer might charge. This is just a starting point; DMs can adjust prices up or down.

Training Conditions	Training Cost
DC 15–19	125 gp
DC 20–24	250 gp
DC 25–29	500 gp
DC 30–35	1,000 gp
Unusual movement (fly, swim, burrow)	500 gp
Difficult special ability	500 gp
Vicious creature	1,000 gp
Assistant required	100 gp each
Charm monster scroll	700 gp

Trainers charge much less for animals, which require less risk and specialized knowledge. On the other hand, creatures with alien mindsets or ecologies (such as those from other planes) or with sharp alignment differences from the trainer, or those requiring unique equipment, can drive the price up even farther.

take an especially hard tumble when the mount falls beneath him, taking an extra 1d6 points of falling damage from being thrown by the boar's sudden stop.

Dire boars are voracious omnivores and tear up the ground mercilessly in search of roots and grubs. As long as a boar stays aboveground near decent-sized vegetation, its master doesn't even need to pack food. The mount simply forages for what it needs.

Carrying Capacity: Light 1,038 lb., medium 2,076 lb., heavy 3,120 lb.; *DC Young/Adult:* 20/27; *Young Price:* 400 gp; *Training Cost:* 75 gp.

Dog, Riding

Halfling riding dogs are hard workers, famed for their ferocity and loyalty on the battlefield. Though stoic animals, riding dogs hate to be left tied up "with the mounts." They prefer to lounge by the fire with their masters at night. In the wild, this is sometimes even a preferable arrangement. However, too much socialization is usually not in a working dog's best interests, since it can begin to forget its training. Some masters are permissive anyway and even allow them indoors. Housebreaking a riding dog counts as a trick.

Carrying Capacity: Light 100 lb., medium 200 lb., heavy 300 lb.; *DC Young/Adult:* 10/17; *Young Price:* 50 gp; *Training Cost:* 10 gp.

Elephant

Elephants are mobile war platforms. Smart, patient, and stronger than some giants, an elephant is often the best conventional weapon on the battlefield. An elephant equipped with a howdah (see above) can hold up to four Medium-size passengers as well as the rider. A common complement is three fighters with polearms and a cleric whose main job is to keep the elephant healthy. In lands where wild elephants abound, these animals are captured in yearly round-ups and trained en masse for the next season.

Carrying Capacity: Light 3,192 lb., medium 6,384 lb., heavy 9,600 lb.; *DC Young/Adult:* 23/31; *Young Price:* 500 gp; *Training Cost:* 40 gp.

Llama

Llamas are distant relatives of the camel. They are generally calm, trainable, and curious about new things. They stand about 4 feet tall at the shoulder and average around 350 pounds. Llamas make excellent pack animals and can also be trained to pull carts. Small riders also find them to be agreeable mounts. Llamas are statistically similar to camels, except that they are Medium-size, have 2 HD, and have a Strength score of 12.

Carrying Capacity: Light 129 lb., medium 258 lb., heavy 390 lb.; *DC Young/Adult:* 10/17; *Young Price:* 50 gp; *Training Cost:* 10 gp.

Porpoise/Dolphin

Aquatic races of all kinds ride porpoises. Rather than saddling the porpoise, riders wear seaweed twisted into a harness. Then they slide loops of braided seaweed around the porpoise's nose as a bridle and connect these to the harness. This harness grants the same benefits as a military saddle.

Porpoises are an exception to the normal size restrictions for mounts. Thanks to the buoyancy of water, Medium-size creatures can ride porpoises. There is no room for passengers. Porpoises become encumbered quickly, so riders try to shed unnecessary pounds.

Though distinct creatures, porpoises and dolphins are similar enough to share the same statistics.

Carrying Capacity: Light 57 lb., medium 114 lb., heavy 173 lb.; *DC Young/Adult:* 15/22; *Young Price:* 100 gp; *Training Cost:* 20 gp.

Rhinoceros

Many dwarves love the solid feel of a war rhinoceros beneath them. A rhino's willingness to charge enemies only endears it further to them. A rhinoceros has a nearly prehensile upper lip, which it mainly uses for feeding. With training, though, a rhino can hold and carry delicate items such as a potion vial with its lip.

Carrying Capacity: Light 918 lb., medium 1,839 lb., heavy 2,760 lb.; *DC Young/Adult:* 21/28; *Young Price:* 200 gp; *Training Cost:* 50 gp.

Animal and Magical Beast Mounts

These creatures are enough like normal animals that they generally make good mounts. However, they also require special consideration in training and care.

Blink Dog, Riding

Halfling paladins who call for a mount have occasionally been rewarded with a willing blink dog, which gains all paladin mount abilities but retains its higher Intelligence. Blink dogs have also been known to serve other good masters who have done their packs a great service. Over time, a blink dog mount begins to think of its associated adventuring party as its new pack, and

Taking a Friend Along

For simplicity's sake, you position a rider on the rear square of a horse taking up two 5-foot squares. However, sometimes a horse has a rider and a passenger. Really big mounts can have a rider and a whole group of passengers. What then?

A rider is the person in control of the mount (or at least the one trying to control the mount). A passenger is anyone else traveling on the mount. Any time a passenger must occupy the same 5-foot square as the rider, he or she cramps the rider's ability to do much other than steer the mount. Ride checks have a -5 penalty under these circumstances.

In most cases, the rider has the seat farthest forward or positioned for best visibility. For exotic mounts, assume the rider occupies the square closest to the creature's head. Other passengers sit behind the rider. If every passenger has his or her own square on the mount, the rider doesn't have to be crowded.

Passengers who want to fight rather than simply hold on must make a Ride check (DC 5). Failure means that the passenger may not attack and can only hold on for that round. Regardless of where passengers sit, normal combat penalties apply for using ranged weapons from a moving mount. Passengers with the Mounted Archery feat gain the benefit of the feat. Other feats that have the Ride skill as a prerequisite may only be used by the rider, not passengers.

When Your Mount Is Smarter than You

A 5th-level paladin has Intelligence 5. Though she is brave and honorable, her warhorse is smarter than she is. How embarrassing. What will the other warhorses think?

Having someone who is demonstrably less intelligent in authority over a more intelligent subordinate can be frustrating for both sides. If the master has the Leadership feat, the creature naturally recognizes her supremacy and never creates any problems. If not, treat the creature like a cohort who doesn't get a share of experience.

Lawful creatures usually work within the bounds of the relationship, and when ordered to do something thoughtless, try to reason with the master. Chaotic creatures tend to be impatient and rebellious. Good creatures generally play along, accepting the state of affairs as yet another of life's trials. Evil creatures take advantage of the situation and attempt to manipulate a stupid master. Neutral creatures try to make the best of things without doing anything suicidal or blatantly stupid.

Creatures with high Charisma scores are more socially adept and tend to diplomatically redirect attention away from a master's lack of intelligence. Those with average Charisma put up with their masters' foibles but gossip or complain when the master is gone. A creature with low Charisma might sigh loudly and be openly sarcastic to the master's face (but still obedient).

it occasionally tests some member of the party to find dominance. A blink dog always considers its rider to be the pack alpha.

If a blink dog's rider wears a *ring of blinking*, the dog and ring attune to each other through a sympathetic magical effect so that dog and rider *blink* in unison. No effect has been discovered that allows a blink dog to teleport with its rider using *dimension door*. However, blink dogs and their riders often develop flanking routines and quick get-aways that make good use of this ability.

Carrying Capacity: Light 99 lb., medium 198 lb., heavy 300 lb.; **DC Young/Adult:** 22/29; **Young Price:** 10,000 gp; **Training Cost:** 1,000 gp.

Deinonychus/Megaraptor

These dinosaurs are favored as mounts by remote barbarian tribes. Capturing one's mount is often a rite of passage into adulthood for young members of these tribes. Since these creatures are difficult to train in adulthood, the rite usually revolves around stealing eggs. Facing adults (or a pack) is sometimes used as a test of a stranger's worthiness, though.

The deinonychus is normally a single-rider creature, but it can easily carry a passenger. The megaraptor is a rare mount, difficult to control. When trained, it can carry up to five Medium-size passengers in addition to its rider on long hunting trips.

A common trick rider/trainers teach their dinosaurs is pack hunting techniques. One or more dinosaurs learn to flush prey into traps set up by their riders. With this trick, the mounts also know how to flank with their riders in combat.

Though technically bipeds, because of their build and leg strength, both types of dinosaur have carrying capacities as quadrupeds. Eggs and young of these dinosaurs are unusually expensive due to the extreme distances and hardships involved in bringing them back from their isolated homelands.

Deinonychus: **Carrying Capacity:** Light 348 lb., medium 699 lb., heavy 1,050 lb.; **DC Young/Adult:** 22/29; **Egg Price:** 10,000 gp; **Training Cost:** 1,500 gp.

Megaraptor: **Carrying Capacity:** Light 918 lb., medium 1,836 lb., heavy 2,760 lb.; **DC Young/Adult:** 26/33; **Egg Price:** 13,000 gp; **Training Cost:** 2,000 gp.

Lizard, Riding

These carnivorous lizards are almost exclusively Underdark mounts, rarely seen on the surface and jealously guarded by their breeders. They are so protected because they have sticky pads on their feet that allow them to climb walls—a necessity for getting about in unpredictable underground passages. These creatures stand 4 feet tall at the shoulder and weigh around 600 pounds.

Carrying Capacity: Light 300 lb., medium 600 lb., heavy 900 lb.; **DC Young/Adult:** 20/27; **Egg Price:** 300 gp; **Training Cost:** 1,000 gp.

Lizard, Riding: CR 1; Large magical beast; HD 2d10+6; hp 17; Init +1; Spd 40 ft.; AC 16 (touch 10, flat-footed 15); Atk +5 melee (1d6+4, 2 claws), +3 melee (1d8+2, bite); Face/Reach 5 ft. by 10 ft./5 ft.; SQ darkvision 60 ft., light blindness, low-light vision, *sticky pads*; AL N; SV Fort +6, Ref +4, Will +1; Str 18, Dex 13, Con 17, Int 2, Wis 13, Cha 6.

Skills and Feats: Hide -3, Listen +3, Spot +3; Multi-attack.

Sticky Pads (Sp): A riding lizard has large, circular pads on its toes that exude adhesive. At will, a riding lizard can stick to any vertical or inverted surface as *spider climb* cast by a 20th-level sorcerer.

Owlbear

Only the brave or foolish ride owlbears. Foolishness, at least, is never in short supply.

The primary training method for owlbears is pain. Most good members of the common races consider the exercise cruel, even for owlbears. However, only repeated, excessive beatings have consistently been proven to work, first to train an owlbear not to attack its trainer, and eventually to allow a rider. Magic renders an owlbear docile for a short time. Unlike other creatures, though, when the enchantment ends, the owlbear reverts, forgetting anything it learned.

Regardless of the frequency or severity of beatings, owlbears are incurably hateful and turn on their riders at the first sign of weakness. Any time a rider takes more than 15 points of damage in a single round, he must make a Ride check to control his mount in battle (DC 20). If he fails, the owlbear immediately tries to throw the rider (DC 20 Ride check to stay in the saddle) and ignores other opponents. If the rider ever falls from the saddle, the owlbear attacks him immediately.

Carrying Capacity: Light 459 lb., medium 918 lb., heavy 1,380 lb.; **DC Young/Adult:** 23/30; **Young Price:** 3,000 gp; **Training Cost:** 2,000 gp.

Triceratops

Working with a triceratops is all about teamwork. A team of four to six dwarves rears a young triceratops,

usually with magic training devices; it's the only way to consistently get good results. Once the dinosaur is on the battlefield, teamwork continues. One rider sits high on the creature's neck, receiving one-half cover from most attacks thanks to the bone plate jutting up and around from its head. Meanwhile, up to four more dwarves armed with crossbows and polearms lay into opponents from the beast's back. A howdah is often used for this purpose.

Carrying Capacity: Light 798 lb., medium 1,596 lb., heavy 2,400 lb.; *DC Young/Adult:* 36/41; *Young Price:* 7,000 gp; *Training Cost:* 10,000 gp.

Worg

Goblins and worgs are a potent combination, but not the only one. Some orc and hobgoblin tribes have been known to breed Large worgs as mounts too.

The fact that worgs can speak is often overlooked by adventurers. Their unique howling and barking speech is understandable at greater distances (to someone who knows the language) than regular voices, and they have no qualms about using language to coordinate tactics and communicate scouting information. Unsuspecting adventurers hear only wolf howls when volumes are being told. As mounts, worgs can also convey this information to their riders. This ability allows bands of evil humanoids to appear supernaturally well informed about events around the countryside.

Carrying Capacity: Light 258 lb., medium 519 lb., heavy 780 lb.; *DC Young/Adult:* 22/29; *Young Price:* 1,000 gp; *Training Cost:* 1,500 gp.

New Mounts

These new creatures can be trained as mounts.

Axebeak

Large Animal

Hit Dice: 3d10+6 (22 hp)

Initiative: +2 (Dex)

Speed: 65 ft.*

AC: 14 (−1 size, +2 Dex, +3 natural), touch 11, flat-footed 12

Attacks: Beak +3 melee and 2 kicks −2 melee

Damage: Beak 1d8+2, kick 1d4+1

Face/Reach: 5 ft by 5 ft./10 ft.

Saves: Fort +5, Ref +5, Will +0

Abilities: Str 15, Dex 15, Con 15, Int 2, Wis 9, Cha 6

Skills: Hide −2, Jump +6, Listen +5, Spot +5**

Climate/Terrain: Temperate and warm desert and plains

Organization: Flock (5–20)

Challenge Rating: 1

Treasure: None

Alignment: Always neutral

Advancement: 4–6 HD (Large); 7–9 HD (Huge)

These large, flightless birds are like ostriches, only larger and more dangerous.

Unsurprisingly, an axebeak's main weapon is its axe-shaped beak. Scholars differ over whether this is a natural growth or the product of magical experimentation. Either way, it suits the beast's omnivorous diet well. An axebeak can run down nearly any prey on flat ground, and can hack away at obstructing growth that small game usually hides in.

Axebeaks are attracted to shiny things such as jewelry, spectacles, or *ioun stones*. They peck at them obsessively if given the opportunity, and every breeder has a story about an unfortunate child or noble who was killed or seriously gouged by a curious axebeak. Because of this behavior quirk, axebeak riders do not polish their armor or weapons.

An axebeak stands 9 feet tall and weighs 400 pounds. In lands where axebeaks are native, they serve as mounts and pack animals as commonly as horses do in other lands.

***Speed:** Axebeaks move five times their normal speed when running instead of four times the speed.

****Skills:** Due to their keen eyesight, axebeaks receive a +8 racial bonus on Spot checks in the daytime.

Training an Axebeak: Training an axebeak as a mount requires a successful Handle Animal check (DC 11 young, DC 18 adult). Axebeak eggs are worth 20 gp on the open market, while chicks are worth 40 gp each. Professional trainers charge 50 gp to rear or train an axebeak.

Riding a trained axebeak requires an

exotic saddle. An axebeak can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check. Because of its build and leg strength, an axebeak has a carrying capacity as a quadruped.

Carrying Capacity: Light 198 lb., medium 399 lb., heavy 600 lb.

Hippocampus

Large Magical Beast (Aquatic)

Hit Dice: 4d10+12 (34 hp)

Initiative: +2 (Dex)

Speed: Swim 60 ft.

AC: 16 (–1 size, +2 Dex, +5 natural), touch 11, flat-footed 14

Attacks: Tail slap +8 melee, bite +3 melee

Damage: Tail slap 1d6+5, bite 1d8+3

Face/Reach: 5 ft. by 10 ft./5 ft.

Saves: Fort +7, Ref +6, Will +4

Abilities: Str 20, Dex 15, Con 16, Int 10, Wis 13, Cha 13

Skills: Hide –2, Listen +8, Sense Motive +5, Spot +8, Swim +13, Wilderness Lore +5

Feats: Iron Will

Climate/Terrain: Temperate and warm aquatic

Organization: Solitary, pair, or pod (5–20)

Challenge Rating: 2

Treasure: None

Alignment: Always chaotic good

Advancement: 5–8 HD (Large); 9–12 HD (Huge)

A hippocampus is a thoroughbred steed for the aquatic set. It is prized as an underwater mount and gladly serves good causes.

A hippocampus looks like a horse gone native underwater with colors ranging from black to aquamarine. The front half resembles a horse with short hair, except that fins replace hooves and mane. The hindquarters are those of a great fish, with scales and a muscular tail fanning out into a large fin.

Wild hippocampi speed through open water, living wild and free. Though fairly intelligent, they are simple creatures. They enjoy races and displays of strength and endurance. They do not get bored or restless as long as they keep moving and have a challenge or competition. Winning does not even seem to be the most important thing for a hippocampus—simply striving is their joy. Marathon relay races and long distance scavenger hunts are favorite forms of competition.

While they do not take naturally to domesticated life, hippocampi can be convinced that living among an underwater civilization is a good idea. Even domesticated, a hippocampus tries to make a contest out of everyday tasks. If another hippocampus is nearby to challenge, so much the better. Masters try to discourage this behavior, since hippocampi can become quite reckless in the heat of a race.

Hippocampi speak Aquan.

Training a Hippocampus: Training a hippocampus as a mount requires a successful Handle Animal check (DC 22 foal, DC 29 adult). Hippocampus foals are worth 2,500 gp on the open market. Professional trainers charge 1,000 gp to rear or train a hippocampus.

Riding a trained hippocampus requires an exotic saddle. A hippocampus can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Carrying Capacity: Light 459 lb., medium 918 lb., heavy 1,380 lb.

Monster Mounts

Stranger creatures often require stranger tactics to ride and keep them successfully. These mounts can never be left with the stablehands.

Couatl

Even the most powerful, beneficent paladins lose their warhorses in righteous battle. When such a paladin calls for a new mount to continue the fight against depredations of the wicked, a couatl sometimes answers, serving as a steady mount and advisor. When serving this way, a couatl does not receive a paladin mount's bonus HD, natural armor, or Strength adjustment. It keeps its natural

Intelligence, but it does gain special abilities appropriate for the level of paladin it bonds to.

Riding one of these magnificent outsiders in a dignified manner is difficult, but well worth the effort. All Ride check DCs are 5 higher than normal due to the couatl's sinuous method of flying. On the other hand, a couatl requires no training, and it gladly accepts the role of mount and servant in the battle against evil.

Couatls love to offer their advice on arcana, history, nature, or any area in which they have Knowledge ranks. Though never intrusive, they like to show off their learning and sometimes offer more advice than is technically necessary.

Theoretically, a young couatl might be given to a respected ruler or temple for training, as parents might entrust a child to be raised in a monastery. A brazen bandit might also make her way to the celestial planes and steal an egg. In these cases, a couatl might be trained at a site removed from its native plane. Adults are not likely to consent to such treatment, though, and can never be considered domesticated.

Carrying Capacity: Light 100 lb., medium 200 lb., heavy 300 lb.; *DC Young/Adult:* 27/—; *Egg Price:* 20,000 gp; *Training Cost:* 2,000 gp.

Dragon

If reared from the egg, knowing no other life, a dragon consents to training. After birth, no amount of Handle Animal skill can convince a dragon to serve as a mount; Diplomacy is the only way to convince a dragon to serve another creature.

It can be several years before a dragon raised from birth is large enough to ride. Every time the dragon advances to a new age category, a trainer must reassert her dominance by making a new Handle Animal check for every trick she has taught her dragon, opposed by the dragon's Sense Motive check. Even young dragons are strong-willed; if a dragon wins the opposed check, it never performs that trick again.

Dragons are born more intelligent than some people. Any dragon older than a wyrmling almost certainly has its own motives for allowing itself to be ridden, even if it is held in check by training. A dragon rider is best served by treating the mount as a partner, rather than a servant. The best way to display respect for a dragon is, of course, with treasure. Smart dragon riders provide their mounts with a lair appropriate to their age category and treasure equal to 1,000 gp per Hit Die of the dragon. This is a good starting point, though the personality of the dragon and the power of the rider determine if more must be done to cement the relationship.

Carrying capacities vary widely depending on the age and type of dragon. Handle Animal check DCs

are equal to 25 + the dragon's HD; Diplomacy check DCs can only be determined by the situation. The price for an egg begins at 10,000 gp and goes up depending on the buyer. There is no "open market" for dragon eggs. The training cost is widely variable, but never less than 5,000 gp. Dragons can never be domesticated.

Gelatinous Cube

Gelatinous cubes are not mounts for the faint of heart, or for those in a particular hurry. Bizarre "cavalry" in Underdark wars, gelatinous cubes are used to herd opposing troops and chew through defensive lines, or to protect valuable spellcasters after their magic is spent.

Cube riders require special gear just to survive the ride. The "saddle" for a cube is a special magic item, an *amulet of ooze riding* (see the sidebar). The amulet activates a force sphere whenever the wearer comes in contact with an ooze. Then, with some effort, the rider nudges the sphere to the center of the cube and rides safely inside. It takes 1 minute to fully mount or dismount a gelatinous cube; once inside, a cube rider can't be dislodged by any normal means. Ride checks incur a -5 circumstance penalty if the rider is not fully mounted.

Gelatinous cubes are air-permeable, so breathing is never an issue. However, carrying a rider disorients a cube's ability to find prey by scent—everything smells like food when an organic creature occupies its center. Denied their sense of smell, occupied cubes sense prey solely through vibration.

Although cubes are nonintelligent (and therefore untrainable), they can be directed. "Steering" a gelatinous cube is an odd art. Taking advantage of the cube's impaired senses, a rider creates vibrations within its mass by banging on the force sphere. With practice, specific vibrations can fool the cube into sensing external movement. Thus, the cube continually chases phantom "food" in the direction the rider indicates.

A rider must exit his cube at a decent speed (at least faster than the cube's land speed of 15 feet), since the cube immediately tries to engulf any food that suddenly appears near it.

Carrying Capacity: Light 198 lb., medium 396 lb., heavy 600 lb.; *DC Young/Adult:* —/29; *Young Price:* 5,000 gp; *Training Cost:* —.

Hieracosphinx

These sphinxes look much like griffons, and the two can be easily confused at a distance. A hieracosphinx is tougher and stronger than a griffon, but

New Magic Item: Amulet of Ooze Riding

Any time the wearer of this amulet comes into contact with an ooze, a sphere of force springs up around the wearer. The sphere prevents any contact with an ooze and protects the wearer from direct attacks by oozes.

Caster Level: 7th; *Prerequisites:* Craft Wondrous Item, *Otiluke's resilient sphere*; *Market Price:* 28,000 gp.

the greatest difference is its evil nature. A griffon attacks only when riled or hungry, and it makes an excellent flying mount when trained. A hieracosphinx enjoys fighting for its own sake and is a contentious mount, regardless of training.

However fearsome a foe it may be, a hieracosphinx is predictably distracted by the appearance of a gynosphinx. Clever illusionists keep this ace up their sleeves against a rider on one of these magical beasts.

Carrying Capacity: Light 459 lb., medium 918 lb., heavy 1,380 lb.; *DC Young/Adult:* 27/34; *Egg Price:* 5,500 gp; *Training Cost:* 2,500 gp.

Hydra

Hydras are insanely difficult to train, more so than even an experienced trainer might guess. Each head must be trained independently, and untrained heads do not wait patiently for their turns. Trainers must use aggressive magical aid to even begin the training process; a spellcaster can make a decent living just casting *charm monster* every few days to keep the other heads docile while the trainer works with a single head. Training the largest hydras can take years, and failed Handle Animal checks can be disastrous. For this reason, any trainer who consents to even attempt this task usually refuses to train a hydra with more than five or six heads.

Carrying Capacity: Light 516 lb., medium 1,038 lb., heavy 1,560 lb.; *DC Young/Adult:* 23/30 (five heads), 24/31 (six heads); *Egg Price:* 4,000 gp (five heads), 4,500 gp (six heads); *Training Cost:* 1,500 gp per head, 2,000 gp per head (pyrohydra or cryohydra).

Nightmare

Nightmares are untrainable. They do as they will and do not suffer fools. Even powerful evil creatures must dominate nightmares to ride them as mounts, either magically or through sheer force of will. Afterward, a nightmare serves willingly, but only as long as it thinks its master is a means to more power and pleasure for itself. Since a nightmare's greatest pleasure is to spread evil and fear, this is an easy achievement.

Carrying Capacity: Light 300 lb., medium 600 lb., heavy 900 lb.; *DC Young/Adult:* 28/35; *Young Price:* 5,000 gp; *Training Cost:* —.

Purple Worm

Riding on the outside of a purple worm is impossible, so mind flayers ride inside it. They place an irritant

inside a purple worm's mouth that causes the growth of a large cyst. After a cyst reaches roughly 6 feet in diameter, the illithid drains its new "cyst saddle" and rides in the worm's mouth. The cyst's membrane is stretched so thin that it is nearly transparent. The mind flayer uses *charm monster* to keep the worm compliant during training, but since purple worms have no language, illithid riders must lower themselves to issuing commands verbally in Undercommon.

A purple worm with a cyst saddle in its mouth can swallow only Medium-size or smaller creatures. If the worm successfully swallows a creature whole, that creature can make an attack of opportunity against the cyst (AC 5) as he or she passes. An opponent balancing on or flying into the worm's maw without being swallowed can also attack the cyst. Until torn, the cyst provides full cover for the rider inside. However, its membrane is delicate—only 10 points of damage tears the cyst and exposes the illithid inside to the worm's maw as well. Because of this danger, experienced riders order their mounts to swallow whole only when victory is certain and they wish to see a foe's terror-stricken face on the way to oblivion.

Purple worms have no place for cargo. Riders must carry any cargo on their persons.

Carrying Capacity: As rider; *DC Young/Adult:* 34/41; *Young Price:* 15,000 gp; *Training Cost:* —. (No one but mind flayers has ever trained a purple worm.)

Rust Monster

Although single-minded, rust monsters make surprisingly good mounts. When fed generously and treated well, they become friendly and even affectionate, crowding around, uttering a staccato *chit-chit-chit* noise, and making feathery strokes with their antennae against the faces of trainers approaching with bags of scrap metal.

Gnomes are the most common race to domesticate rust monsters, but some dwarf armies breed Large specimens for special cavalry units. Clothed in hide armor and armed with stone hammers, a unit of dwarves mounted on rust monsters can rout an opposing army in minutes.

Carrying Capacity: Light 99 lb., medium 198 lb., heavy 300 lb.; *DC Young/Adult:* 23/30; *Young Price:* 1,000 gp; *Training Cost:* 1,200 gp.

Skeletal Horse

Necromancers, liches, and other dark beings find live horses skittish and their upkeep bothersome. When they need a mount, it is more expedient and characteristically ghoulish to slay a horse and cast *animate dead* on its corpse.

Use the Large skeleton statistics from the *Monster Manual*, except that a skeletal horse's speed is 60 feet,

Challenge Rating and Mounts

Using the Encounter Level rules found in Chapter 4 of the *DUNGEON MASTER'S Guide*, treat a character and her mount as a mixed pair. Thus, the EL of the group is 1 more than the character's CR if her mount's CR is 3 less than her level. This is a decent rule of thumb until about 8th level.

Creatures above 5 HD are generally varied enough in their tactics and usefulness that a DM must take them into account as much as party members. Unless the mount does nothing more than transport characters and occasionally help fight, it's probably a good idea to begin treating it as a cohort.

it attacks with two hooves instead of claws (dealing the same amount damage), and its face and reach are as a long creature instead of a tall one (5 ft. by 10 ft./5 ft.). Skeletal horses cannot be domesticated.

Carrying Capacity: Light 174 lb., medium 348 lb., heavy 525 lb.; *DC Young/Adult:* —; *Young Price:* —; *Training Cost:* —.

Tendriculos

The only known way to train a tendriculos is to raise it from a seed, grown in a special mixture that negates its paralytic digestive juices. This makes the tendriculos completely dependent on its master, since it can no longer digest food. The tendriculos needs someone to feed it pulped meat. If left alone, it starves.

With its digestive acids so neutralized, the stomach of a tendriculos is a perfect niche for riders and cargo. A device resembling a bear trap serves as a bridle to lock the tendriculos's jaws open or shut (for the rider's visibility or protection, respectively), and to provide contact points for reins. With this device activated, the tendriculos cannot use its bite attack.

In training, the tendriculos is taught not to swallow enemies whole, since that puts an enemy inside with the rider. However, these savage plants get carried away. In battle, a rider must make a successful Ride check (DC 20) to control this swallowing instinct the first time a tendriculos grabs a creature.

Carrying Capacity: Light 2,400 lb., medium 4,800 lb., heavy 7,200 lb.; *DC Young/Adult:* 27/—; *Seed Price:* 3,000 gp; *Training Cost:* 2,000 gp.

Wyvern

Despite its claws and wicked sting, a wyvern is a far safer mount than one of its more intelligent cousins. Once caught and tamed, a wyvern behaves predictably and follows relatively standard training procedures.

Though reputedly stupid, wyverns are better described as “tactically challenged.” When properly disciplined and cared for, a wyvern can learn many different commands and follow complex orders, even away from its master. However, if it is confused or hurt without a master to issue orders, it reverts to instinct and attacks the source of its discomfort. A wyvern can never be domesticated.

Carrying Capacity: Light 696 lb., medium 1,398 lb., heavy 2,100 lb.; *DC Young/Adult:* 25/32; *Young Price:* 3,000 gp; *Training Cost:* 3,000 gp.

New Exotic Mounts

These new creatures can be used as mounts.

Equine Golem

Large Construct

Hit Dice: 6d10 (33 hp)

Initiative: +1

Speed: 50 ft.

AC: 15 (–1 size, +1 Dex, +5 natural), touch 10, flat-footed 14

Attacks: 2 hooves +8 melee and bite +3 melee

Damage: Hoof 1d8+5; bite 1d4+2

Face/Reach: 5 ft. by 10 ft./5 ft.

Special Attacks: *Shatter*

Special Qualities: Construct, DR 5/+1, magic immunity

Saves: Fort +2, Ref +3, Will +2

Abilities: Str 21, Dex 13, Con —, Int —, Wis 11, Cha 1

Climate/Terrain: Any land and underground

Organization: Solitary

Challenge Rating: 5

Treasure: None

Alignment: Always neutral

Advancement: 7–12 HD (Large)

Equine golems are golems shaped as heavy warhorses instead of humanoids. An equine golem is faster and more agile than a regular golem, but less durable.

The standard material used for golems is too heavy to make a good horse, and earth elementals are too plodding to make a swift mount. Instead, equine golems are crafted out of thick hardwood, and the animating spirit is an air elemental.

Equine golems leave no scent. They creak quietly as they walk but can gallop tirelessly, moving at a full run for an entire day (180 miles per day with a light load). Because the golem doesn't flex with the rider, however, riding one all day at a gallop is sore work. Riders who attempt to ride longer than 8 hours per day begin to feel the effects as if under a forced march (see Chapter 9 of the *Player's Handbook*).

Since these mounts are constructs, they need no training. They simply do what their masters tell them to the best of their ability.

Combat: An equine golem attacks as a warhorse, leading with hoof attacks against whatever its master points out. It can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Shatter (Sp): Three times per day, an equine golem can emit an ear-splitting whinny, which acts as a *shatter* spell cast by a 10th-level sorcerer.

Magic Immunity (Ex): An equine golem is immune to all spells, spell-like abilities, and supernatural effects, except as follows. A *warp wood* or *wood shape* spell slows it (as the *slow* spell) for 2d6 rounds. A *repel wood* spell pushes it back normally, but if the golem resists the spell, it can hold its ground. This spell never splinters or breaks any part of the construct. Fire and electricity effects char the golem but do not harm it.

Carrying Capacity: Light load 459 lb., medium 918 lb., heavy 1,380 lb.

Construction: An equine golem's body must be carved from a single hardwood tree at least 100 years old.

The golem costs 20,000 gp to create, which includes 400 gp for the body. Assembling the body requires a successful Craft (woodworking) check (DC 13).

The creator must be 12th level and able to cast arcane spells. Completing the ritual drains 750 XP from the creator and requires *animate objects*, *geas/quest*, *limited wish*, *phantom steed*, and *shatter*.

living on a zaratan's back. Some don't even know they're on a turtle.

No fewer than four people can attempt to steer a zaratan. The primary rider must stand on the shell near the head and shout or sing loudly to the creature, giving instructions and motivation to overcome its natural lethargy. Riders can make Diplomacy, Intimidate, or Perform checks (DC 31) to get the zaratan to carry out their wishes. Other riders must stand equidistant around the circumference of the shell and stamp their feet or pound it with a bludgeoning weapon to encourage the zaratan to go only forward, and no other direction (they may also make aid another attempts with any appropriate skill). Though the frontmost rider might not

need aid to convince the zaratan to move, it is not sufficiently motivated without these vibrations.

A zaratan's rocky shell is 80 feet long and 80 feet wide, with a sandy outer layer where seeds and pollen take root, sometimes growing into small trees. Even larger zaratans have been reported by old sailors telling tales around the fire.

Combat: If attacked, zaratans prefer to flee rather than fight, but they are able defenders. At first sign of aggression, a zaratan pulls its head and flippers into its shell, waiting for the attacks to stop. If the attacks continue for more than 2 rounds, it lashes out with its bite and sweeps with its fins for 1 round, then swims away in the next round. It continues to alternate attacking and fleeing until the opponent is discouraged or dead. If a zaratan knows it has riders, it will not dive underwater unless its life is in danger.

Fin Sweep (Ex): The zaratan thrashes all four of its fins simultaneously, affecting everything in the water in a 40-foot radius. Objects and creatures within the swept area automatically take 2d8+16 points of bludgeoning damage. Affected creatures can attempt a Reflex save (DC 38) to take half damage.

Training a Zaratan: Zaratans do not appear to be trainable. They are intelligent enough to carry out even complex commands under direct orders (if delivered with appropriate vigor) but lapse into dim torpor when orders cease. These creatures have

Zaratan

Colossal Magical Beast

Hit Dice: 38d10+345 (554 hp)

Initiative: +0

Speed: 10 ft., swim 30 ft.

AC: 32 (−8 size, +30 natural), touch 2, flat-footed 32

Attacks: Bite +46 melee

Damage: Bite 4d6+24

Face/Reach: 80 ft. by 100 ft./40 ft.

Special Attacks: Fin sweep

Special Qualities: Darkvision 60 ft., low-light vision

Saves: Fort +30, Ref +21, Will +16

Abilities: Str 43, Dex 11, Con 28, Int 6, Wis 19, Cha 12

Skills: Listen +12, Spot +12, Swim +24

Feats: Alertness, Toughness

Climate/Terrain: Warm aquatic

Organization: Solitary

Challenge Rating: 20

Treasure: Double standard

Alignment: Usually neutral

Advancement: 39–76 HD (Colossal)

These enormous, sedentary turtles are easily mistaken for small islands. Clever or lucky groups of people who find one can ride it.

Zaratans normally ride the warm ocean currents with their mouths open, allowing food and jetsam to wash in. Shipwrecked sailors are sometimes found

incredibly long life spans, and young zaratans are so rare as to be a nonissue. Rather than capturing and training a zaratan, explorers must simply use one when available. Zaratans can understand rudimentary commands in most languages, including Common, but speak only Aquan.

Carrying Capacity: Light 76,800 lb., medium 153,600 lb., heavy 230,400 lb.

Soarwhale

Colossal Magical Beast

Hit Dice: 32d10+291 (467 hp)

Initiative: +0

Speed: Fly 20 ft. (good)

AC: 14 (−8 size, +12 natural), touch 2, flat-footed 14

Attacks: Tail slap +38 melee

Damage: Tail slap 2d6+21

Face/Reach: 40 ft. by 80 ft./15 ft.

Special Attacks: Breath weapon

Special Qualities: Darkvision 60 ft., low-light vision

Saves: Fort +27, Ref +18, Will +12

Abilities: Str 39, Dex 10, Con 29, Int 1, Wis 14,

Cha 6

Skills: Listen +3, Spot +3

Feats: Toughness

Climate/Terrain: Temperate and warm land

Organization: Solitary, pair, or pod (5–20)

Challenge Rating: 15

Treasure: None

Alignment: Always neutral

Advancement: 33–70 HD (Colossal)

Soarwhales resemble unusually large baleen whales that swim through the air instead of in water. They domesticate easily and are widely used as cargo transports by civilizations that occupy high places.

A soarwhale is a cross between a vehicle and a creature. It is not so much ridden like a horse as steered like a ship. A gondola is commonly slung under a soarwhale to haul passengers, although occasionally a

soarwhale is outfitted with an enormous howdah so that passengers can ride on top.

Both docile and strong, soarwhales are used to carry tons of cargo over long distances.

Quarry owners find especially them useful for delivering stone to customers hundreds of miles away. Soarwhales are also used as raiding platforms by air pirates, and as sky yachts by the very rich.

In the wild, soarwhales are content to float calmly. They apparently do not need to eat, and they have no natural enemies. Their breath weapon is quite effective at fending off most predators. Sages agree the prospect of such a creature occurring naturally is slim, but if soarwhales were ever involved with magical experimentation, it happened so long ago or in such a remote location that no one has any record of it.

Breath Weapon (Su): A soarwhale quickly empties its air bladders as a defense mechanism. This loss of buoyancy causes the soarwhale to drop 100 feet, leaving a cloud of paralyzing gas in a 10-foot radius around its previous position. Any creature caught in the gas must make a successful Fortitude save (DC 35) or be paralyzed for 2d4 rounds.

Training a Soarwhale: Training a soarwhale as a mount or beast of burden requires a successful Handle Animal check (DC 18 young, DC 25 adult). Soarwhale young are worth 10,000 gp on the open market. Professional trainers charge 500 gp to rear or train a soarwhale.

Riding a trained soarwhale requires a gondola or howdah. A soarwhale can fight while carrying a rider. Riders and passengers may fight with no need for Ride checks.

Carrying Capacity: Light 44,736 lb., medium 89,568 lb., heavy 134,400 lb.

Vermin Mounts

Vermin serving in the role of domesticated creatures is such an alien concept that vermin riders are either extraordinary individuals or part of an unusual society that uses vermin in everyday life. The creatures' lack of intelligence makes domestication tricky but not impossible.

Vermin riders must remain with their mounts almost constantly to maintain their bond. Mount and rider even sleep in the same room in specially constructed barracks/stables. As a result, the bond is deep: Riders grow close to their mounts and connect with their subtle personalities. Generations-long vendettas have been started over a vermin mount slaying.

New Potion: Queen Pheromone Admixture

When consumed, this potion causes the drinker to exude pheromones that mimic those of a queen ant. In response, 1d4 giant ants within 60 feet must make a Will save (DC 13). If they fail, they remain docile and follow the drinker in a line, quietly and slavishly for a week. After this, the potion wears off and the drinker must take another draught to keep the ants. Ants who succeed on the Will save or those in range who otherwise do not succumb attack the false “queen” viciously.

Caster Level: 3rd; *Prerequisites:* Brew Potion; *Market Price:* 300 gp.

Giant Ant

Worker ants are tireless pack animals, and soldier ants are fast, fearless mounts. Both also have the useful ability to climb vertical surfaces with a rider. Due to their connection with the queen, though, ants can be difficult to separate from the hive and tame. To solve this problem, alchemists have developed an admixture that makes the drinker smell like a queen ant (see the sidebar).

Carrying Capacity: Light 50 lb., medium 99 lb., heavy 150 lb. (worker); light 87 lb., medium 174 lb., heavy 263 lb. (soldier); *DC Young/Adult:* —/27; *Larva Price:* 200 gp; *Training Cost:* 100 gp.

Giant Praying Mantis

These are the vermin of choice for palace, city wall, and ceremonial guards because of their natural tendency to stand still for long periods. Ceremonial mantis mounts are often dyed exotic colors to make their effect more striking, as well as easier to

find in case one gets separated from its rider.

Carrying Capacity: Light 696 lb., medium 1,398 lb., heavy 2,100 lb.; *DC Young/Adult:* —/29; *Larva Price:* 500 gp; *Training Cost:* 300 gp.

Giant Wasp

“Mean as a wasp” is a cliché for good reason. When a giant wasp takes damage in combat, it attempts to attack the person who hurt it exclusively. As a move-equivalent action, a rider must succeed on a Ride check (DC 20) to get the wasp to disengage or attack another foe. A rider involved in such a skirmish usually finds it easier just to go where the wasp wants. Giant wasps make excellent fast-strike mounts for elite soldiers.

Carrying Capacity: Light 300 lb., medium 600 lb., heavy 900 lb.; *DC Young/Adult:* —/30; *Larva Price:* 800 gp; *Training Cost:* 750 gp.

Monstrous Scorpion

Large monstrous scorpions ride too low to make good mounts for Medium-size creatures. Humans and their ilk find Huge or larger scorpions to be better fits. However, this size of vermin is extraordinarily difficult to tame in adulthood, and the consequences of failure are dire. It is practically a necessity to purchase a scorpion

from a reputable trainer rather than attempt to train it alone.

Carrying Capacity: Light 918 lb., medium 1,836 lb., heavy 2,760 lb.; *DC Young/Adult:* —/41; *Egg Price:* 2,000 gp; *Training Cost:* 1,000 gp.

Monstrous Spider

Like monstrous scorpions, Large spiders are too gangly and ride too low to be good mounts. Specimens of at least Huge size are required. Those who can actually tame spiders of this size find hunters to be better mounts than web spinners, since they are more inclined toward moving and stalking rather than weaving webs and waiting. Like giant preying mantises, however, web-spinning spiders are good for stationary duty, such as guarding gates.

Carrying Capacity: Light 696 lb., medium 1,398 lb., heavy 2,100 lb.; *DC Young/Adult:* —/35; *Egg Price:* 1,000 gp; *Training Cost:* 1,000 gp.

New Vermin Mounts

These new vermin can be used as mounts.

Giant Dragonfly

Large Vermin

Hit Dice: 3d8+3 (16 hp)

Initiative: +1

Speed: 20 ft., fly 60 ft. (good)

AC: 14 (–1 size, +1 Dex, +4 natural), touch 10, flat-footed 13

Attacks: Bite +5 melee

Damage: Bite 1d8+6

Face/Reach: 5 ft. by 10 ft./5 ft.

Special Qualities: Vermin, darkvision 60 ft.

Saves: Fort +4, Ref +2, Will +2

Abilities: Str 18, Dex 12, Con 13, Int —, Wis 12, Cha 12

Skills: Hide –3, Intuit Direction +7, Spot +7

Climate/Terrain: Temperate and warm aquatic and marsh

Organization: Solitary, pair, or swarm (5–20)

Challenge Rating: 1

Treasure: None

Alignment: Always neutral

Advancement: 4–6 HD (Large); 7–9 HD (Huge)

Raiders and bandits who ride flying vermin prefer giant dragonflies to other mounts. They're less aggressive than wasps but more so than bees. They also make a distinct thrumming sound in flight that strikes fear into common folk.

Riders prefer to use female dragonflies, since males are very territorial. A giant dragonfly is 10 feet long with a 10-foot wingspan. Its body is only 2 feet wide.

Training a Giant Dragonfly: Training a giant dragonfly as a mount requires a successful Handle Animal check (DC 30). Giant dragonfly eggs are

worth 500 gp on the open market. Professional trainers charge 300 gp to tame a giant dragonfly.

Riding a giant dragonfly requires an exotic saddle. A giant dragonfly can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Carrying Capacity: Light 300 lb., medium 600 lb., heavy 900 lb.

Giant Firefly

Large Vermin

Hit Dice: 3d8+6 (19 hp)

Initiative: +2

Speed: 20 ft.; fly 50 ft. (good)

AC: 13 (–1 size, +2 Dex, +2 natural), touch 11, flat-footed 11

Attacks: Bite +4 melee

Damage: Bite 1d3+4

Face/Reach: 5 ft. by 10 ft./5 ft.

Special Qualities: Vermin, darkvision 60 ft.

Saves: Fort +5, Ref +3, Will +2

Abilities: Str 16, Dex 15, Con 14, Int —, Wis 12, Cha 13

Skills: Hide –2, Intuit Direction +7, Spot +7

Climate/Terrain: Temperate hill and forest

Organization: Solitary or swarm (5–20)

Challenge Rating: 1/2

Treasure: None

Alignment: Always neutral

Advancement: 4–6 HD (Large); 5–9 HD (Huge)

These vermin make excellent search and rescue creatures. Their abdomens glow a soft yellow or green and shed light in a 10-foot radius.

A common trick that riders direct giant fireflies to perform is “Light.” This keeps a firefly’s phosphorescent abdomen lit indefinitely while the riders search for ground targets. Giant fireflies make poor combatants, so their riders flee battle as soon as possible. A giant firefly is 9 feet long.

Training a Giant Firefly: Training a giant firefly as a mount requires a successful Handle Animal check (DC 30). Giant firefly eggs are worth 300 gp on the open market. Professional trainers charge 300 gp to tame a giant firefly.

Riding a giant firefly requires an exotic saddle. A giant firefly can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Carrying Capacity: Light 228 lb., medium 459 lb., heavy 690 lb.

Humanoid-Shaped Mounts

Pushing the bounds of what could be called a mount, some humanoid-shaped creatures can be ridden. Because of their shape and carrying capacity, such mounts are usually two size categories larger than their riders. The saddle for such a creature resembles

an open backpack with leg holes. When covering distance, riders prefer to ride facing forward, looking over the mount’s shoulder. In battle, riders often find it easier to fight back-to-back with their mounts, essentially riding backward.

Girallon

Though these creatures are savage in the wild, girallons captured young can make hearty mounts for primitive tribespeople. However, riders must keep a tight rein on them, since it is impossible to train away a girallon’s aggression and territoriality. Although they are not as unrelentingly mean as owlbears, girallons require many of the same training strategies.

Carrying Capacity: Light 612 lb., medium 1,226 lb., heavy 1,840 lb.; *DC Young/Adult:* 25/32; *Young Price:* 4,000 gp; *Training Cost:* 3,000 gp.

Gray Render

A gray render does not need a saddle. Its hunched shoulders provide a broad, flat seating surface, and when carrying a passenger, its gait is surprisingly smooth. Some Small riders even stand up and pace while riding one.

All this is dependent on the gray render allowing itself to be ridden, of course. No one understands why or how a gray render makes its decisions about whom to “adopt” but simply accept the powerful gift it bestows. Once a gray render has adopted a person, it can be trained normally. If its adoptee attempts the training, the Handle Animal check DC is 10. Attempting to train an unwilling gray render is tantamount to suicide. The beasts are unnaturally hard to train; even the rare baby, stolen from its parent, is savage and recalcitrant. The training cost given below assumes that the gray render is not bonded to its trainer.

Carrying Capacity: Light 400 lb., medium 800 lb., heavy 1,200 lb.; *DC Young/Adult:* 33/40; *Young Price:* 6,000 gp; *Training Cost:* 20,000 gp.

Ogre

An ogre sometimes straps a goblin with a crossbow to its back and uses the little wretch as a tail gunner. Clever goblins (of which there are a few) nurture this relationship, praising their new “mount” and doing nice things for the ogre. Over time, the goblin can manipulate the ogre enough that the ogre not only does whatever its rider wants but believes it to be its own idea.

From time to time, communities of Small folk have raised an ogre baby as one of their own. It grows up friendly to its adopted family and gladly lets them ride piggyback, especially if it can roam with its friends.

Carrying Capacity: Light 306 lb., medium 612 lb., heavy 920 lb.; *DC Young/Adult:* 22/29; *Young Price:* 1,000 gp; *Training Cost:* 1,500 gp.

CHAPTER 5: MAGIC ITEMS

Here are some new magic items to add to those described in Chapter 8 of the *DUNGEON MASTER'S Guide*. Items in this chapter follow the format presented there unless otherwise specified.

ARMOR

Magic armor bonuses are enhancement bonuses that stack with regular armor bonuses and with the armor and enhancement bonuses from shields. All magic armor is masterwork armor, so armor check penalties are reduced by 1.

Armor may also have special abilities, which count as additional bonuses for determining the market value of an item, but they do not improve Armor Class.

Armor and Shield Special Abilities

A suit of armor or shield with a special ability must have at least a +1 enhancement bonus.

Acidic: A suit of armor or shield with this ability has a slick sheen and is constantly covered in a layer of lightly smoking acid. The wearer (and anything she carries) is immune to acid, including that produced by the armor. *Acidic armor* deals 2d4 points of acid damage per round of contact during a grapple; momentary touch attacks have no effect. Objects not held by the wearer can be damaged by direct contact with the armor for a full round.

Caster Level: 6th; *Prerequisites:* Craft Magic Arms and Armor; *Melf's acid arrow, resist elements*; *Market Price:* +4 bonus.

Aquatic: This armor appears streamlined and possesses a greenish glint. *Aquatic armor* enables its wearer to move freely through water without the need for Swim checks. Drowning rules still apply (see the Drowning Rule in Chapter 3 of the *DUNGEON MASTER'S Guide*), unless the wearer can breathe water. Rare versions of *aquatic armor* include a persistent *water breathing* effect (as the spell, but affecting only the wearer).

Caster Level: 7th; *Prerequisites:* Craft Magic Arms and Armor, *freedom of movement, water breathing* (when present); *Market Price:* +2 bonus (+3 bonus with *water breathing*).

Arrow Catching: A shield with this quality attracts ranged weapons to it. It grants a +1 deflection bonus to Armor Class against ranged weapons as projectiles and thrown weapons veer toward the shield, not the shield bearer. Additionally, any projectile or thrown weapon aimed at a target within 5 feet of the shield's bearer diverts from its original target and targets the shield's bearer instead. (If the shield bearer has total cover with respect to the attacker, the

projectile or thrown weapon is not diverted.) Projectiles and thrown weapons that have an enhancement bonus higher than the shield's total bonus to AC are not diverted, but the shield's increased AC bonus still applies against attacks directed at the bearer.

Those attacking the shield bearer with ranged weapons ignore any miss chance that would normally apply due to concealment or magical effects. The bearer activates this ability with a command word and can shut it off by repeating it.

Caster Level: 8th; *Prerequisites:* Craft Magic Arms and Armor, *entropic shield*; *Market Price:* +1 bonus.

Bane Blind: A favorite of rangers and bounty hunters, *bane blind armor* grants *improved invisibility* to the wearer against a specific creature type chosen when the armor is created. Creatures who are subject to the *bane blind* find that their scent ability is likewise unable to detect the wearer, although hearing, tremorsense, and other sensing methods still work. Any category of creature on the ranger's favored enemy list can be chosen for the *bane blind* effect.

The following table determines what type of creature a random suit of *bane blind* armor affects.

d%	Creature Type
01–10	Aberrations
11–15	Animals
16–30	Beasts
31–32	Constructs
33–34	Elementals
35–37	Fey
38–47	Giants
48–57	Humanoid type (DM chooses specific race)
58–67	Magical beasts
68–77	Monstrous humanoids (DM chooses specific race)
78–79	Oozes
80–81	Outsider, chaotic (DM chooses specific race)
82–83	Outsider, lawful (DM chooses specific race)
84–86	Outsider, evil (DM chooses specific race)
87–89	Outsider, good (DM chooses specific race)
—	Plants ¹
90–94	Shapechangers
95–97	Undead
98–100	Vermin

¹ There are no examples of *bane blind* armor designed for use against plants.

Caster Level: 7th; *Prerequisites:* Craft Magic Arms and Armor, *improved invisibility*; *Market Price:* +3 bonus.

Buffering: *Buffering armor* and *buffering shields* are always dull black, and they appear to possess depths that couldn't exist. A suit of armor or a shield with this quality absorbs ability-draining and level-draining attacks. It can absorb as many points of ability damage or levels drained per day as its enhancement bonus. It also allows Fortitude saves against energy-drain attacks that normally don't allow such saves. A successful save halves the effect. *Buffering armor* and *buffering shields* do not change saves against attacks that already allow them.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *restoration*; **Market Price:** +3 bonus.

Command: This armor or shield always appears brilliant and gleaming, no matter what the conditions and despite all attempts to paint over or obscure it. Coveted by military leaders of all sorts, it carries a powerful aura that grants a +4 competence bonus on Charisma-based skill checks and reaction checks. Furthermore, all allies within 30 feet of the wearer of the armor or shield get a +2 morale bonus on Will saves. *Command armor* and *command shields* make their owners very noticeable, imposing a –6 penalty on Hide checks.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, 5 levels of spellcasting ability; **Market Price:** +2 bonus.

Dancing: The wearer can release a *dancing shield* as a standard action and command it to protect a single character (possibly the wearer himself). The *dancing shield* floats in the air in front of the protected character, darting in the way of an opponent's weapons and providing cover against attacks from one opponent per round. Treat the shield's armor bonus (including its enhancement bonus) as a cover bonus to Armor Class. At the end of 4 rounds, the *dancing shield* falls to the ground. It must be picked up and commanded for it to function again. It ceases dancing before 4 rounds have passed if so commanded.

Only one *dancing shield* can protect a character at a time. It is half as effective (half the cover bonus to Armor Class) when protecting a Large creature, and it cannot provide meaningful cover for a Huge or bigger creature. A *dancing shield* functions only for a character that is proficient with shields.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *animate objects*; **Market Price:** +3 bonus.

Daylight: A suit of armor or a shield with this quality glows with the brilliant light of a *daylight* spell for up to 30 minutes per day. A command word, usually inscribed on the inside of the armor or the back of the shield, activates and deactivates the illumination. Except when glowing, this armor or shield appears completely normal.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, *daylight*; **Market Price:** +2 bonus.

Distracting: Armor or shields with this quality shimmer and glow hypnotically. Anyone engaged in combat with the wearer must succeed on a Will save each round or be affected by the *daze* spell. Once per day, the wearer can activate *hypnotic pattern* (as the spell from a 9th-level caster).

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *daze*, *hypnotic pattern*; **Market Price:** +3 bonus.

Fearsome: This suit of armor or shield creates an aura of fear around the wearer (as the *fear* spell from a 7th-level caster). This aura affects all opponents within 40 feet of the wearer. The armor or shield

appears completely normal, except to those who fail their save. The fearful see a creature from their worst nightmares in place of the wearer.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *fear*; **Market Price:** +2 bonus.

Feathered: A suit of armor or a shield with this ability appears to be created from thousands of iridescent feathers. This characteristic has no effect on the armor's or shield's weight, armor check penalty, or other statistics. *Feathered armor* or a *feathered shield* allows the wearer to fly up to 50 minutes per day (as the *fly* spell).

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, *fly*; **Market Price:** +2 bonus.

Sacred: A suit of armor or a shield with this quality assists only wearers who have the ability to turn or rebuke undead. *Sacred armor* or a *sacred shield* increases the owner's effective level for the turning check by +2. Armor and shields with this ability are always specific to a deity and prominently feature the god's holy symbol.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, ability to turn or rebuke undead; **Market Price:** +2 bonus.

Wrapping: A shield with this quality hinders foes who are struck by it. With a successful shield bash attack, the *wrapping shield's* bearer can make the shield magically bind itself to the opponent. It will not move until the command words are uttered (often "shield release"), the target dies, or the shield is pulled off with a successful Strength check (DC 20). The bearer loses any benefit to Armor Class while the shield is attached to the target. A *wrapping shield* does not function against Huge or larger creatures, nor does it work on incorporeal foes. The wearer can loose himself from the shield normally.

It is difficult for the opponent to perform any physical actions while the shield is so attached, and it's equally difficult for the *wrapping shield's* bearer to do much while someone is wriggling against the shield. Both incur an additional armor check penalty of –5 (which stacks with any existing armor check penalties, but applies only to skill checks) and a –2 circumstance penalty on attacks.

Caster Level: 3rd; **Prerequisites:** Craft Magic Arms and Armor, *make whole*; **Market Price:** +1 bonus.

Specific Armor and Shields

The following specific suits of armor and shields usually are preconstructed with exactly the qualities described here.

Armor of Weapon Creation: This +1 *half-plate* has built-in armor spikes and spiked gauntlets (see Armor Descriptions in Chapter 7 of the *Player's Handbook*). As a standard action, the armor can produce any of the following simple melee weapons: dagger, punching dagger, light mace, sickle, halfspear,

heavy mace, or morningstar. The weapon forms out of the armor itself, in whichever hand the wearer chooses. The wearer can also choose to create a weapon in each hand, although it requires another action to do so. The weapon type can be changed each round.

Weapons created by the suit cannot be removed, and the wearer cannot be disarmed of any such weapon. Created weapons last indefinitely or until the wearer chooses to get rid of them. If a weapon is destroyed, the armor cannot create a new weapon for 24 hours.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *major creation*; **Market Price:** 42,305 gp; **Cost to Create:** 21,555 gp + 1,660 XP.

Bale Eye: This suit of +2 *half-plate* is completely covered with engravings of sinister-looking eyes. Three times per day, the owner can cast *emotion* (fear only) as an 11th-level sorcerer. The wearer also gains a +4 morale bonus on Will saves against fear effects.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *emotion*, *remove fear*; **Market Price:** 38,360 gp; **Cost to Create:** 19,805 gp + 1,504 XP.

Disarmor: This +2 *scale mail* has an irregular overlapping pattern. Seemingly indiscriminate, the scales overlap down, up, and sideways. Three times per day, the wearer may direct the armor to execute a disarm attempt when an opponent scores a hit with a melee weapon. The scales seem to come alive and attempt to wrench the opponent's weapon out of his or her hands as if the wearer had the Improved Disarm feat and a readied attempt to disarm. When disarming in this fashion, the armor uses the wearer's melee attack bonus with an additional +5 bonus.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor; **Market Price:** 10,875 gp; **Cost to Create:** 5,538 gp + 427 XP.

Gazebane: Created for the ranger Arilus, this armor helped him eliminate several nests of medusas that infiltrated his swampy home. This +1 *chain shirt* is extremely polished, actually allowing someone to see their reflection in its chain links. Three times per day, the wearer can ignore the effects of any gaze attacks.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *limited wish*; **Market Price:** 74,050 gp; **Cost to Create:** 37,150 gp + 2,952 XP.

Plantbane: This +1 *leather armor* is the color of dried leaves and dead wood. It is excellent for clearing pathways through thickly forested terrain, although it does leave an obvious trail of dead and dying plants. Druids, elves, and other nature lovers take a dim view of uncontrolled use of this armor. It continually produces a *diminish plants* effect, and once per day the wearer can cast *antiplant shell* (as the spells from a 7th-level caster).

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *antiplant shell*, *diminish plants*; **Market Price:** 41,240 gp; **Cost to Create:** 20,700 gp + 1,643 XP.

Skin Paint: *Skin paint armor* was brought to civilization from remote barbarian tribes. This magic paint is mixed from rare dyes and herbs found only in remote parts of the world and comes in small pots. One pot contains three applications; one application lasts for 24 hours. The paint imbues its wearer with a +5 armor bonus to AC. This is considered light armor that has no maximum Dexterity bonus and no armor check penalty. Its weight is negligible. It takes 4 minutes to apply *skin paint armor* (2 minutes if another character does nothing but assist you), 1 minute to do so hastily, and 1 minute to remove (30 seconds if another character does nothing but assist you).

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, Alchemy 5 ranks; **Market Price:** 5,000 gp; **Cost to Create:** 2,500 gp + 200 XP.

Spider Shield: A painting of a stylized red spider pierced by a spike adorns this +2 *small steel shield*. The spike continually oozes spider poison (injury; DC 11, 1d3 Str/1d3 Str). Once per day, the shield can be commanded to turn into a Small monstrous spider that fights on behalf of its owner. The spider is a normal creature in all respects.

If the spider is killed, it immediately reverts into shield form and cannot be activated again for 24 hours. If the spider is killed using *disintegrate*, it is completely destroyed and does not turn back into a shield.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *poison*, *polymorph any object*; **Market Price:** 40,809 gp; **Cost to Create:** 20,489 gp + 1,626 XP.

Stonecunning: This dwarf-sized +1 *full plate* is beautifully engraved with images of dwarven stonemasons practicing their craft. Humans who wear the armor gain the stonecunning ability. Dwarves who wear the armor gain a +4 circumstance bonus on any stonecunning checks, which stacks with their racial bonus. In addition, the dwarf can use *stone shape* and *stone tell* once per day.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *stone shape*, *stone tell*; **Market Price:** 32,130 gp; **Cost to Create:** 16,890 gp + 1,220 XP.

Swarm Shield: This shield appears to be a single bracer when first worn. When the command word is spoken, thousands of flying insects swarm toward the bracer, converging in a circular shape the size of a small shield. The insects move with the wearer's arm and act as a +1 *small shield*. Once per day, when the wearer speaks a second command word, the insects stream away from the wearer's arm toward a target as if the wearer had cast *summon swarm* (with the flying beetles swarm type). The swarm lasts as long as the wearer concentrates, but she has no shield while the swarm is active.

Caster Level: 3rd; **Prerequisites:** Craft Magic Arms and Armor, *summon swarm*; **Market Price:** 6,160 gp; **Cost to Create:** 3,155 gp + 241 XP.

Tessellated Armor: This curiosity usually appears to be an ornate, lacquered box containing hundreds of identical metallic shapes. Numerous variations exist for the shapes, including lizards, beetles, mounted riders, and Peloran suns. When the command word is spoken, the shapes stream from the box and flow over the wearer's body, interlocking perfectly to create a single, smooth suit of +2 *full plate*. This armor is lighter and more flexible than normal full plate and is considered medium armor rather than heavy. Its armor check penalty is -4, and it has an arcane spell failure chance of 25%. Once per day on command, the shapes wriggle and move about the wearer's body, creating a *hypnotic pattern* effect.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *hypnotic pattern*; **Market Price:** 11,560 gp; **Cost to Create:** 6,605 gp + 397 XP.

Useful Buckler: This +1 *buckler* has the ability to transform into a variety of different tools on command. To determine which tools the buckler has, roll five times on the following table, ignoring duplicate results:

d10	Tool
1	Saw, wood
2	Wrench, adjustable
3	Grappling hook
4	Hacksaw
5	Grappling hook
6	Bolt cutters
7	Spike/chisel
8	Bow drill
9	Shovel, small
10	Tongs, large

Small symbols of the tools the buckler can turn into are engraved on the inside face. The wearer says a command word to transform the shield into a tool or to switch between tools, although he must be touching the shield/tool to activate the ability. The tools are also made of metal and have the same break point as the shield (hardness 10, 5 hp).

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *fabricate*; **Market Price:** 10,265 gp; **Cost to Create:** 5,215 gp + 404 XP.

Vampire Hunter: This +3 *banded mail* was created to assist brave adventurers in the struggle against vampires. It is usually found in the armories of churches dedicated to vanquishing these bloodsuckers. Protective symbols from benevolent gods cover *vampire hunter armor*, which has noticeably thick neck protection.

On command, the armor produces *daylight* and *protection from evil*. Once per day, it can produce *sunburst* and *holy smite* as the spells from a 15th-level cleric.

Vampire hunter armor grants a +4 morale bonus on Will saves against *domination* attempts. Energy drain attacks by vampires (and only vampires) are reduced from two negative levels to one negative level. *Vampire*

hunter armor also has armbands made of wood that can “grow” wooden stakes that appear against the upper arm. These can be removed and used as +1 weapons (1d3 damage, threat range 19–20, piercing). It takes a full-round action to regrow a stake once it has been removed from an armband.

The armor bestows one negative level on any non-good creature wearing it. This negative level persists as long as the armor is worn and disappears when the armor is removed. The negative level never results in actual level loss, but it cannot be overcome in any way (including *restoration* spells) while the armor is worn.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *daylight*, *holy smite*, *minor creation*, *protection from evil*, *sunburst*; **Market Price:** 100,000 gp; **Cost to Create:** 50,200 gp + 3,984 XP.

Variable Shield: A *variable shield*, normally a +1 *small steel shield*, can change its size on mental command. As a standard action, the shield can shrink or grow from a buckler to a tower shield. All the rules for carrying items with shields apply to the new shield size (see Armor Descriptions in Chapter 7 of the *Player's Handbook*). You cannot use a weapon in your hand if it also carries a small shield, and you must drop an item in that hand if you're carrying a large or tower shield. Characters not proficient in shields take an additional -2 armor check penalty during the following round if the *variable shield's* size changes during combat.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, *enlarge*; **Market Price:** 6,560 gp; **Cost to Create:** 3,360 gp + 257 XP.

WEAPONS

Magic weapons have enhancement bonuses just as magic armor does, and all magic weapons are masterwork. However, the +1 enhancement bonus for a masterwork weapon does not stack with the +1 enhancement bonus that all magic weapons have.

Weapons also have special abilities, which count as additional bonuses for determining market value, but they do not improve attack or damage rolls.

Magic Weapon Special Abilities

A magic weapon with a special ability must have at least a +1 enhancement bonus.

Acidic Burst: An *acidic burst weapon* functions as a *corrosive weapon* (see below) that also explodes with acid upon scoring a successful critical hit. The acid does not harm the hands that hold the weapon. Acidic burst weapons deal +1d10 points of bonus acid damage on a successful critical hit. If the weapon's critical multiplier is $\times 3$, add +2d10 points of bonus acid damage instead, and if the multiplier is $\times 4$, add +3d10 points of bonus acid damage. Bows, crossbows,

and slings with this ability bestow the acid energy upon their ammunition.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *acid fog*, *Melf's acid arrow*, or *storm of vengeance*; **Market Price:** +2 bonus.

Balanced: A *balanced weapon* can be wielded more easily by smaller characters. A creature one size smaller than the weapon can use it in one hand. For example, a halfling could wield a *balanced battleaxe* in one hand.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *reduce*; **Market Price:** +2 bonus.

Binding: This weapon prevents extradimensional movement by those it hits. Once per day, the wielder of a *binding weapon* may make a binding strike. On a successful attack, the target of the binding strike cannot move extradimensionally by any means, as though affected by the *dimensional anchor* spell. This effect lasts for 13 minutes. If the attack misses, the binding strike for that day is wasted.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *dimensional anchor*; **Market Price:** +1 bonus.

Commanding: A *commanding weapon* looks imposing and lends force to the wielder's personality. Even when sheathed or stowed, this weapon grants a +2 enhancement bonus on Bluff, Diplomacy, and Intimidate checks. When held or drawn, a *commanding weapon* provides a +4 enhancement bonus on Intimidate checks. In addition, the wielder can cast *suggestion* once per day as a 7th-level sorcerer.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *suggestion*; **Market Price:** +2 bonus.

Corrosive: Upon command, a *corrosive weapon* becomes slick with a thick layer of acidic fluid. The acid does not harm the hands that hold the weapon. *Corrosive weapons* deal +1d6 points of bonus acid damage on a successful hit. Bows, crossbows, and slings with this ability bestow the acid energy upon their ammunition.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *acid fog*, *Melf's acid arrow*, or *storm of vengeance*; **Market Price:** +1 bonus.

Crazed: This weapon gives its wielder the ability to fly into a rage once per day as though affected by *emotion (rage)*, but without the compulsion to fight heedless of danger. While in a rage, the wielder gains a +2 morale bonus to Strength and Constitution, and a +1 morale bonus on Will saves, but takes a -1 penalty to Armor Class. This effect does not stack with *emotion (rage)* or with barbarian rage. While in a rage, the wielder of a *crazed weapon* suffers the same restrictions to feat and skill use that a barbarian suffers while raging. The rage lasts for 3 rounds. Only melee weapons can be crazed.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *emotion*; **Market Price:** +1 bonus.

Disarming: This weapon has one special purpose: disarming opponents of their weapons. It eliminates

the opponent's bonuses for weapon size and two-handed weapons. Weapons with this ability also grant the wielder a +1 bonus on the opposed attack roll during a disarm attempt; this bonus does not apply to any other attack roll. Only melee weapons can have this ability.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor; **Market Price:** +2 bonus.

Energy Aura: Any weapon with this ability may add an additional amount of damage from an energy type of the wielder's choice (acid, cold, electricity, fire, or sonic). Regardless of the energy type selected, the energy does not harm the hands that hold the weapon. The weapon deals an additional +1d6 points of damage of the appropriate energy type on a successful hit. Changing the weapon's energy aura is a free action available once per round. Bows, crossbows, and slings with this ability bestow the energy type upon their ammunition.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *chill metal*, *flame blade*, *lightning bolt*, *Melf's acid arrow*, *sound burst*; **Market Price:** +3 bonus.

Eager: An *eager weapon* is easy to draw and allows its possessor to react quickly to danger. It grants a +2 bonus on its owner's initiative checks, regardless of whether it is being used. An *eager weapon* may be drawn as a free action. Only melee weapons can have this ability.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *cat's grace*; **Market Price:** +2 bonus.

Everbright: These weapons are as bright and shiny as polished silver. They never tarnish and are immune to corrosive attacks. The weapon flashes with a brilliant light up to twice per day upon the wielder's command. All within 20 feet except the wielder must succeed on a Reflex saving throw (DC 14) or be blinded for 1d4 rounds.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *blindness/deafness*, *searing light*; **Market Price:** +2 bonus.

Fierce: If its wielder is willing to forgo the opportunity to evade foes, a *fierce weapon* can land tremendous blows. It allows the wielder to transfer some or all of his Dexterity bonus to damage rolls (reducing his Armor Class by the same amount). As a free action, the wielder chooses how to allocate his Dexterity bonus at the start of his turn, and the effect lasts until his next turn.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *bull's strength*; **Market Price:** +2 bonus.

Force: On a successful hit, a *force weapon* emits a powerful jolt of magical force. The magical force does not harm the weapon's wielder. *Force weapons* deal +1d6 points of force damage on a successful hit. If the weapon successfully hits a target protected by a force effect, such as a *shield* spell or *bracers of armor*, it might dispel the force effect in addition to damaging the

target. Make a dispel check (1d20+10) against the effect (DC 11 + caster level). If the check succeeds, the force effect is dispelled (if a spell) or suppressed (if a magic item). Ranged weapons bestow this property on their ammunition. Incorporeal creatures get no miss chance against *force weapons*.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *wall of force*; **Market Price:** +3 bonus.

Fortunate: A fortunate weapon gives its wielder incredible luck—a +1 luck bonus on all saving throws.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *bleed*; **Market Price:** +1 bonus.

Grasping: A *grasping weapon* is more effective when attempting to trip or disarm an opponent. It grants its wielder a +2 circumstance bonus on trip and disarm attempts. Disarm attempts made with *grasping weapons* do not provoke attacks of opportunity. Only melee weapons can have this ability.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *web*; **Market Price:** +2 bonus.

Harmony: *Harmony weapons* help their wielders press the advantage against a flanked opponent. When flanking an opponent, the wielder of this weapon gains a +4 bonus on attacks rather than the normal +2 bonus for flanking. Only melee weapons can have this ability.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *detect thoughts*; **Market Price:** +1 bonus.

Heartfinder: This weapon allows its wielder to strike particularly vulnerable areas of a foe. Much like a rogue's sneak attack ability, *heartfinder weapons* deal extra damage to flat-footed or flanked foes. Any time the wielder's target would be denied its Dexterity bonus to AC, or when the wielder flanks the target, this weapon deals an additional 1d6 points of damage. This bonus damage has no effect against creatures that are immune to critical hits. Only piercing melee weapons can have this ability.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *keen edge*; **Market Price:** +2 bonus.

Impact: Any bludgeoning weapon with this ability has its threat range doubled. For example, an *impact quarterstaff* scores a threat on a 19–20, and an *impact heavy flail* scores a threat on a 17–20. This ability does not affect piercing or slashing weapons.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor; **Market Price:** +1 bonus.

Ki Focus: This weapon serves as a channel for the wielder's *ki*, allowing her to use any *ki*-based special attacks (such as a monk's stunning attack, *ki* strike, and quivering palm, and the Stunning Fist feat) through the weapon as if they were unarmed strikes. Only melee weapons can have this ability.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, creator must be a monk; **Market Price:** +1 bonus.

Knockback: A weapon with this ability can drive its targets back. On a successful hit, the target of the attack must succeed on a Fortitude save (DC 19) or be knocked back 10 feet. If the target can't move back 10 feet, it instead falls to the ground. If the first save fails, the target must succeed on another Fortitude save (DC 19), or be stunned for 1 round. Knockback weapons work only on creatures of the wielder's size or smaller.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *repulsion*; **Market Price:** +3 bonus.

Merciful: The weapon deals 1d6 points of bonus damage, and all damage it deals is subdual damage. On command, the weapon suppresses this ability until commanded to resume it. Bows, crossbows, and slings bestow the effect upon their ammunition.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, *cure light wounds*; **Market Price:** +1 bonus.

Precise: Only ranged weapons can have this ability. A *precise weapon* can be shot or thrown at an opponent engaged in melee without incurring the standard –4 penalty. This weapon doesn't grant any further benefit to wielders who already have the Precise Shot feat.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, Precise Shot; **Market Price:** +1 bonus.

Proficient: The wielder of a *proficient weapon* never takes a nonproficiency penalty when attacking with it.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *Tenser's transformation*; **Market Price:** +2 bonus.

Quick-Loading: Only crossbows can have this ability. A *quick-loading crossbow* accesses an extradimensional space that can hold up to 100 bolts, allowing the wielder to reload the crossbow more rapidly than normal. Reloading a hand or light crossbow is a free action (allowing a character with multiple attacks to make a full attack), and reloading a heavy crossbow is a move-equivalent action. Adding a bolt to or removing one from the extradimensional space by hand requires a move-equivalent action. The extradimensional space can hold different types of bolts, and the wielder may select freely from these when reloading the crossbow.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *Leomund's secret chest*, *shrink item*; **Market Price:** +2 bonus.

Radiant: A *radiant weapon* can give off brilliant light. At will, it emits *daylight* as the spell cast by a 9th-level cleric.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *daylight*; **Market Price:** +2 bonus.

Screaming: Upon command, a *screaming weapon* emits a low hum that is grating upon the ears but does not harm the wielder. If it hits a target, it produces a high-pitched sound and deals +1d6 points of

bonus sonic damage. Bows, crossbows, and slings with this ability bestow the sonic energy upon their ammunition. *Screaming weapons* don't deal this bonus damage if the target is within a *silence* spell. They have no additional adverse effects on creatures with unusually acute hearing, although such creatures dislike them.

Caster Level: 10th; *Prerequisites:* Craft Magic Arms and Armor, *shout* or *sound burst*; *Market Price:* +1 bonus.

Seeking: Only ranged weapons can have this ability. The weapon veers toward the target, negating any miss chances that would otherwise apply, such as from concealment. The wielder still has to aim the weapon at the right place. Arrows mistakenly shot into an empty space, for example, do not veer and hit invisible enemies, even if they are nearby.

Caster Level: Craft Magic Arms and Armor, *true seeing*; *Market Price:* +1 bonus.

Shadowstrike: A *shadowstrike weapon* can reach through the wielder's own shadows to catch foes off guard. Once per day, the wielder can make such an attack. The weapon reaches 5 feet farther than normal, and the target is denied its Dexterity bonus to AC for this attack. To make a shadowstrike attack, the weapon must be illuminated by a light source or be outside on a day bright enough to cast shadows.

Caster Level: 15th; *Prerequisites:* Craft Magic Arms and Armor, *shadow walk*, *shadow conjuration*; *Market Price:* +2 bonus.

Shrinking: This weapon can shrink, as if affected by the *shrink item* spell, on command.

Caster Level: 5th; *Prerequisites:* Craft Magic Arms and Armor, *shrink item*; *Market Price:* +1 bonus.

Stunning: When striking a foe, a *stunning weapon* emits a powerful burst of sonic energy. It deals +1d6 points of bonus sonic damage on a successful hit. The sonic energy does not harm the weapon's wielder or others nearby. On a successful critical hit, the target must succeed on a Fortitude save (DC 17) or be stunned for 1 round. Bows, crossbows, and slings with this ability bestow the sonic energy on their ammunition.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *sound burst*, *hold monster*; *Market Price:* +2 bonus.

Sure Striking: A *sure striking weapon* harms creatures with damage reduction as if it had a +5 enhancement bonus. Bows, crossbows, and slings cannot have this ability.

Caster Level: 6th; *Prerequisites:* Craft Magic Arms and Armor, *greater magic weapon*; *Market Price:* +1 bonus.

Sweeping: This ability grants a +4 bonus on any Strength checks the wielder makes as part of an attempt to trip an opponent with the weapon. Only melee weapons can have this ability.

Caster Level: 5th; *Prerequisites:* Craft Magic Arms and Armor, *bull's strength*; *Market Price:* +1 bonus.

Vicious: When a *vicious weapon* strikes an opponent, it creates a flash of disruptive energy that resonates between the opponent and the wielder. This energy deals 2d6 points of bonus damage to the opponent and 1d6 points of bonus damage to the wielder. Only melee weapons can have this ability.

Caster Level: 7th; *Prerequisites:* Craft Magic Arms and Armor, *enervation*; *Market Price:* +1 bonus.

Specific Magic Weapons

The following specific weapons usually are preconstructed with exactly the qualities described here.

Acid Fang Dagger: Etched with a seemingly random pattern of thin lines, this +1 *dagger* is constantly covered with a thin sheen of acid. Although the weapon's magic prevents the acid from harming the wielder, an *acid fang dagger* deals an additional +1d6 points of acid damage with each hit. In addition, the wielder gains power over reptilian animals, including snakes. Once per day, the dagger can cast a specialized version of the *animal friendship* spell that affects only snakes and reptiles. The dagger's wielder can befriend a maximum of 8 Hit Dice worth of creatures at one time. While holding the dagger, the wielder can speak with reptiles as the *speak with animals* spell.

Caster Level: 4th; *Prerequisites:* Craft Magic Arms and Armor, *animal friendship*, *speak with animals*, *Melf's acid arrow*; *Market Price:* 19,102 gp; *Cost to Create:* 9,702 gp + 752 XP.

Arrow of Disintegration: When this arrow strikes a target, the target must succeed on a Fortitude save (DC 19) or vanish as though struck with a *disintegrate* spell. Like the spell, the arrow can be used to disintegrate nonliving matter as well as creatures. A creature that makes a successful saving throw takes 5d6 points of damage. The arrow is consumed in the attack.

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, *disintegrate*; *Market Price:* 3,307 gp; *Cost to Create:* 1,657 gp + 132 XP.

Arrow of Eyes: The fletching of this +1 *arrow* is painted with brightly colored eyes. When fired, an *arrow of eyes* allows its wielder to see through a magical sensor located within its fletching. The sensor behaves exactly like an *arcane eye* spell cast by a 10th-level sorcerer, except that it moves only when the arrow moves. The wielder must concentrate to use the magical sensor, which lasts for 10 minutes. If the arrow lodges in a moving object, the sensor moves with it. Neither the arrow nor the sensor provide any illumination of their own. The *arcane eye* ability functions only once. If an *arrow of eyes* is recovered intact after firing, it functions only as a +1 *arrow*.

Caster Level: 10th; *Prerequisites:* Craft Magic Arms and Armor, *arcane eye*; *Market Price:* 1,047 gp; *Cost to Create:* 527 gp + 42 XP.

Arrowdeath Flail: This +2/+1 *dire flail* provides excellent protection against projectile attacks. While holding an *arrowdeath flail*, the wielder can deflect projectiles and thrown weapons as if she had the Deflect Arrows feat. When taking the total defense action, an *arrowdeath flail* grants an additional +2 deflection bonus to Armor Class that applies only to ranged weapon attacks.

Caster Level: 13th; *Prerequisites:* Craft Magic Arms and Armor, *protection from arrows*; *Market Price:* 33,690 gp; *Cost to Create:* 17,190 gp + 1,320 XP.

Axe of Anger: This +2 *greataxe* allows its wielder to push himself beyond the normal limits of rage. Whenever a character wielding the *axe of anger* uses the barbarian rage ability, he may sustain the rage for 2 additional rounds. In addition the raging character is not limited by height when using the Jump skill.

Caster Level: 14th; *Prerequisites:* Craft Magic Arms and Armor, creator must have the rage ability, *emotion*; *Market Price:* 18,320 gp; *Cost to Create:* 9,320 gp + 720 XP.

Axe of Falls: This +2 *returning throwing axe of distance* can be thrown normally, or it can be thrown in a special sweeping attack that can trip foes. When making a ranged trip attempt with the *axe of falls*, the wielder makes a touch attack, and if successful, makes an opposed Strength check against the target. This opposed check works exactly like a normal trip attempt, but if the wielder loses there is no return trip attempt possible. The *axe of falls* provides no bonus on normal trip attacks. Feats that affect normal trip attempts, such as Improved Trip, do not apply to the ranged trip attack.

Caster Level: 6th; *Prerequisites:* Craft Magic Arms and Armor, *clairaudience/clairvoyance*, *grease*, *telekinesis*; *Market Price:* 50,308 gp; *Cost to Create:* 25,308 gp + 2,000 XP.

Axe of Pairs: This +2 *handaxe* is easier to wield as an off-hand weapon. Whenever the *axe of pairs* is used in the off hand, its wielder may make one additional off-hand attack at a -5 penalty. This penalty is subtracted from the wielder's worst off-hand attack bonus. For example, a fighter with a base attack of +6/+1 and the Ambidexterity, Two-Weapon Fighting, and Improved Two-Weapon Fighting feats wielding an *axe of pairs* in the off-hand would get five attacks. The two attacks with the primary weapon would be at +4/-1, and the attacks with the *axe of pairs* in the off hand would be at +4/-1/-6.

Caster Level: 7th; *Prerequisites:* Craft Magic Arms and Armor, *haste*; *Market Price:* 50,306 gp; *Cost to Create:* 25,306 gp + 2,000 XP.

Axe of Shards: This +3 *dwarven waraxe* has a clear, crystalline blade. Three crystal spikes protrude from the back of the axe head. Although the main blade is as hard as normal steel, all of the three crystal spikes can easily be removed by the weapon's wielder. Each

sharp, balanced spike is treated as a masterwork throwing dagger. The spikes last for only one day once removed from the axe, and they cannot be reattached. Once a spike is removed from the axe, a new one begins to grow slowly in its place. It takes a spike three days to grow, and spikes cannot be removed from the axe before they are completely formed.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *fabricate*; *Market Price:* 19,330 gp; *Cost to Create:* 9,830 gp + 760 XP.

Axe of Storms: This powerful orc double axe has two intricately carved heads joined by a shaft made of a strange blue-tinted wood. Each head bears an ability that gives the weapon part of its name. One head is *thundering*, and the other is *shock*. Furthermore, the axe is imbued with a flexible enhancement bonus. At the beginning of each round, the wielder of an *axe of storms* may allocate the weapon's +4 enhancement bonus between its two heads (minimum +0). The allocation lasts until the beginning of the wielder's next round. For example, on one round the wielder could allocate +2 to each head of the weapon, then change the allocation to +3 *shock* in the primary hand and +1 *thundering* in the off hand on the following round.

Caster Level: 17th; *Prerequisites:* Craft Magic Arms and Armor, *blindness/deafness*, *call lightning* or *lightning bolt*; *Market Price:* 98,660 gp; *Cost to Create:* 49,660 gp + 3,920 XP.

Axe of the Joyous Dance: This +3 *dancing handaxe* always looks well-polished and new, and its blade is covered with light etchings of satyrs dancing. Once per day while dancing, the axe can, at the mental command of its owner, produce *Tasha's hideous laughter* (as the spell from a 4th-level caster) instead of making a normal attack. Creatures affected can make a Will save (DC 19) to resist the axe's effects.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *animate objects*, *Tasha's hideous laughter*; *Market Price:* 107,906 gp; *Cost to Create:* 54,106 gp + 4,304 XP.

Axe of the Winds: This +3 *battleaxe* gives its possessor great power over the wind. The possessor is unaffected by severe winds, including magical effects such as the *gust of wind* spell. Furthermore, three times per day the wielder can cause a *gust of wind* by swinging the *axe of the winds* over his head as a standard action. Once per day, the wielder can create a *wind wall* in a similar manner. Both effects are as the spells from an 11th-level caster.

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, *gust of wind*, *wind wall*; *Market Price:* 65,830 gp; *Cost to Create:* 33,070 + 2,621 XP.

Badgerclaw: This +2 *light pick* grants its wielder powerful abilities to shape and move stone. Three times per day its wielder may swing it at stone and have the weapon cast *stone shape* as a 5th-level caster.

In addition, the wielder may *meld into stone* once per day as a 5th-level caster.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, *meld into stone, stone shape*; **Market Price:** 32,304 gp; **Cost to Create:** 16,304 gp + 1,280 XP.

Balor's Sword of Flame: The traditional weapon of the balor demon is a Large +1 *vorpal bastard sword* that can *detect good* as the spell from a 12th-level caster, except that its range is 30 feet. These weapons are often mistaken for *flaming swords* because they look like tongues of flame.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *death spell, detect good, keen edge*; **Market Price:** 115,870 gp; **Cost to Create:** 58,270 gp + 4,608 XP.

Balor's Sword of Lightning: A variation on the traditional balor's blade is this Large +1 *brilliant energy shock bastard sword*. This weapon can *detect law* as cast by a 12th-level sorcerer, but with a range of 30 feet. These weapons resemble bolts of lightning.

Because the market price of this item is the same as for the *balor's sword of flame*, it can be substituted for that weapon with no adjustment to the balor's treasure.

Caster Level: 16th; **Prerequisites:** Craft Magic Arms and Armor, *continual flame, detect law, gaseous form, and call lightning or lightning bolt*; **Market Price:** 115,870 gp; **Cost to Create:** 58,270 gp + 4,635 XP.

Balor's Sword of Smiting: This Large +5 *unholy bastard sword* allows its wielder to smite good once per day. The wielder adds his Charisma modifier (if positive) to his attack roll and deals +10 damage, in addition to the +2d6 points of unholy damage the weapon normally deals. This special smite attack is in addition to any smite ability the wielder might already have, but the wielder cannot use two different smite abilities on the same attack. This weapon looks like a bolt of red lightning.

Because the market price of this item is close to that of the *balor's sword of flame*, it can be substituted for that weapon with no adjustment to the balor's treasure.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *unholy blight*, creator must be evil and have a smite ability; **Market Price:** 118,670 gp; **Cost to Create:** 59,670 gp + 4,720 XP.

Balor's Sword of Soul Stealing: The most fearsome weapon carried by the balors, this Large +3 *vorpal bastard sword* appears as a crackling black-and-purple flame. A precious black sapphire is set in the weapon's pommel. When it severs the head of a living creature, the sword draws forth the soul of the victim and imprisons it in the black sapphire, as the *soul bind* spell. The victim receives a Will save (DC 23) to avoid the *soul bind* effect. If the weapon severs the head of a creature with more than 30 Hit Dice, the sapphire shatters without imprisoning the soul, and it must be replaced. The sapphire can contain only one soul at a

time, but balors are rumored to know mystic rituals that can draw the soul out of the gem, allowing them to use it for various vile purposes.

This item is significantly more expensive than the standard-issue balor weapon. A balor equipped with a *sword of soul stealing* typically has only its sword and its whip, and no additional treasure.

Caster Level: 17th; **Prerequisites:** Craft Magic Arms and Armor, *death spell, keen edge, soul bind*; **Market Price:** 219,870 gp; **Cost to Create:** 125,270 gp + 7,568 XP.

Battleaxe of the Bull: This +2 *battleaxe* has a thick, heavy blade and a large spike on the top of its haft ideal for charging foes. The axe grants the Improved Bull Rush feat to anyone holding it. If used in both hands, the axe's powerful blows can push foes back. When used to make a two-handed melee attack, any successful hit forces the target 5 feet directly away from the wielder in addition to dealing normal damage. Creatures bigger than Large are immune to this effect.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *bull's strength*; **Market Price:** 32,310 gp; **Cost to Create:** 16,310 gp + 1,280 XP.

Blade of Deception: The flat steel blade of this +3 *rapier* is hard to follow in combat. Any time the wielder uses the Bluff skill to feint in combat while wielding the *blade of deception*, the blade provides a +2 enhancement bonus on the Bluff check. The *blade of deception* provides no bonus on other Bluff checks. In addition, any time a feint is successful in combat, the wielder can move freely without provoking attacks of opportunity from the target of the feint. Anyone not the target of the feint may take attacks of opportunity against the wielder normally.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *blur*; **Market Price:** 19,820 gp; **Cost to Create:** 10,070 gp + 780 XP.

Blade of the Duelist: A potent weapon in nearly any situation, this +2 *rapier* is doubly effective when facing a single opponent in melee combat. When threatened by only one foe in melee, the wielder gains a +2 insight bonus to AC effective only against melee attacks from that opponent, and a +2 bonus on all disarm checks made with the *blade of the duelist*. If at any time during the round the wielder is threatened by more than one opponent, she loses these benefits until the beginning of her next turn. Attacks and spells made from a distance do not remove the benefits.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *minor image, shield*; **Market Price:** 16,320 gp; **Cost to Create:** 8,320 gp + 640 XP.

Bladed Crossbow: This +2 *heavy crossbow* is magically strengthened and fitted with sharp metal blades. In addition to functioning as a normal +2 *heavy crossbow*, the *bladed crossbow* can be used as a melee weapon with a +2 enhancement bonus that deals 1d8+2 points

of damage (critical $\times 2$). Unless the wielder takes the Exotic Weapon Proficiency (*bladed crossbow*) feat, melee attacks made with the weapon incur the -4 nonproficiency penalty.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *blade barrier*; **Market Price:** 32,350 gp; **Cost to Create:** 16,350 gp + 1,280 XP.

Bolt of Freedom: These $+1$ bolts are constantly coated with a thin film of oil or grease. They leave a thin, oily residue wherever they lie, and even the fletching seems soaked in oil. Any target hit by a *bolt of freedom* is covered with a thin layer of grease. This coating grants a $+10$ bonus on Escape Artist checks and on grapple checks made to escape a grapple. A creature so coated takes a -10 penalty on grapple checks made to hold another creature. The effect lasts for 1d4 rounds.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *grease*; **Market Price:** 247 gp; **Cost to Create:** 127 gp + 10 XP.

Bolt of Voices: These $+2$ bolts have bright fletching and often have brightly painted shafts as well. Also known as *magebane bolts*, they are feared by many spellcasters. Anyone hit by a *bolt of voices* must succeed on a Will save (DC 16) or suffer from the bolt's distracting effects. Targets who fail their saves hear voices that seem to whisper inside their heads. Those affected by a *bolt of voices* must make a Concentration

check (DC 16 + spell level) to cast any spells. This effect lasts for 1d6 rounds.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *feblemind*; **Market Price:** 767 gp; **Cost to Create:** 387 gp + 31 XP.

Bonebreaker Hammer: This massive $+2$ warhammer glows on command with a fierce red light. The hammer sheds light as the *light* spell. On a critical hit, the *bonebreaker hammer* deals 1d6 points of temporary Dexterity damage in addition to its normal damage.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *harm*; **Market Price:** 18,312 gp; **Cost to Create:** 9,312 gp + 720 XP.

Bow of Arcane Might: This $+1$ mighty ($+2$) composite longbow is covered in intricate arcane runes. The *bow of arcane might* allows its wielder to channel the energy of arcane spells through it to make attacks with the bow more damaging. As a move-equivalent action that does not provoke an attack of opportunity, the wielder can sacrifice a prepared arcane spell from memory (or a unused spell slot if a spontaneous arcane caster). Doing so adds a damage bonus equal to the sacrificed spell's level to the next attack made with the *bow of arcane might*. This damage bonus stacks with the normal enhancement bonus from the bow and any magic arrows used in the attack.

DM

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *greater magic weapon*; **Market Price:** 8,600 gp; **Cost to Create:** 4,600 gp + 320 XP.

Bow of Force: This +2 mighty (+3) composite longbow imbues each arrow shot from it with magical force. Arrows shot from the *bow of force* become force attacks that have no miss chance against incorporeal targets and bypass damage reduction, but they don't damage creatures immune to force effects.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *magic missile*; **Market Price:** 32,700 gp; **Cost to Create:** 16,700 gp + 1,280 XP.

Bow of Mighty Pulling: Made of thick but flexible wood, this +3 composite *shortbow* allows its wielder to put all of his strength into a shot. While using the *bow of mighty pulling*, the wielder may take a move-equivalent action to pull the bow. This allows the wielder to apply up to his full Strength modifier to damage on the next single shot with the bow, provided that shot occurs within 1 round of the pull action.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *bull's strength*; **Market Price:** 26,375 gp; **Cost to Create:** 13,375 gp + 1,040 XP.

Bow of Radiance: On command, this +2 longbow radiates light out to 60 feet as the *daylight* spell. Furthermore, every arrow shot from the bow of radiance sheds *light* as the spell. There is no limit to the

amount of time that the bow itself can radiate light, but the light shed by an arrow shot from the bow lasts only 10 minutes.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *light*, *daylight*; **Market Price:** 40,375 gp; **Cost to Create:** 20,375 + 1,600 XP.

Bow of the Solars: This Large +2 mighty (+5) composite longbow turns any arrow it fires into a *slaying arrow* targeting any creature type the wielder chooses.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *finger of death*; **Market Price:** 100,100 gp; **Cost to Create:** 50,500 gp + 3,968 XP.

Bow of Songs: Made from fine wood by elven hands, this +2 *shortbow* blends music with every shot to deadly effect. As a move-equivalent action that does not provoke an attack of opportunity, the wielder may give up one daily use of bardic music to add his Charisma bonus to attack and damage rolls on the next single attack made with the *bow of songs*.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, creator must be elven, creator must have bardic music ability, *sculpt sound*; **Market Price:** 32,330 gp; **Cost to Create:** 16,330 gp + 1,280 XP.

Bow of the Steppes: The magical properties imbued in this +2 mighty (+2) composite *shortbow* make it easier to use when mounted. Shots fired from the *bow of the steppes* while mounted incur only a -2 penalty on attacks if the wielder's mount takes a

double move. Shots fired while the wielder's mount is running take only a -4 penalty on attacks.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *phantom steed*; **Market Price:** 18,525 gp; **Cost to Create:** 9,525 gp + 720 XP.

Bow of Sympathetic Enhancement: In addition to its own magical enhancement, this $+2$ *shortbow* imparts a temporary enhancement bonus to any arrow shot from it. Arrows shot from the *bow of sympathetic enhancement* are treated as $+1$ arrows for 1 round. Arrows that were magic to begin with gain no additional benefit.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *greater magical weapon*; **Market Price:** 32,330 gp; **Cost to Create:** 16,330 gp + 1,280 XP.

Bowstaff: As a move-equivalent action, the wielder can change this thin, flexible $+2$ *quarterstaff* into a $+2$ *longbow* or back again. Both forms perform exactly like a regular magic weapon of their type.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *polymorph any object*; **Market Price:** 10,975 gp; **Cost to Create:** 5,975 gp + 400 XP.

Breaking Blade: Cleverly shaped and magically enhanced to shatter opponent's weapons, the *breaking blade* grants its wielder the Sunder feat while she holds the weapon. This $+2$ *halberd* is particularly effective when used against simple and martial reach weapons. When attacking such weapons, it deals double damage. The metal haft of the *breaking blade* has a hardness of 15 and 20 hit points.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *shatter*; **Market Price:** 18,310 gp; **Cost to Create:** 9,310 gp + 720 XP.

Brutal Axe: This $+1$ *keen battleaxe* has a thick haft and a heavy, almost unbalanced head. Whenever the *brutal axe* scores a successful critical hit, the wielder may make a free trip attempt against the target. If the *brutal axe* is used in two hands, the wielder can apply $1\frac{1}{2}$ times his Strength bonus to this trip attempt.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *keen edge*; **Market Price:** 18,310 gp; **Cost to Create:** 9,310 gp + 720 XP.

Celestial Blade: This Large $+3$ *bastard sword* is the favored weapon of planetars. It always shines light equivalent to a torch (20-foot radius), and its blade is typically engraved with the symbol of the deity served by the planetary.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor; **Market Price:** 18,335 gp; **Cost to Create:** 9,335 gp + 720 XP.

Celestial Mace: This $+3$ *disruption heavy mace* is the favored weapon of astral devas. It always shines light equivalent to a torch (20-foot radius).

Caster Level: 14th; **Prerequisites:** Craft Magic Arms and Armor, *heal*; **Market Price:** 50,312 gp; **Cost to Create:** 25,312 gp + 2,000 XP.

Chain of Entangling: This hooked $+2$ *spiked chain* wraps around foes, entrapping them and dealing continuous damage. On a successful hit, the *chain of entangling* allows its wielder to attempt to grapple the target. On subsequent attacks, the wielder can attempt to hold the target in the chain. Treat the attack as a normal hold attempt that it deals the damage of the spiked chain rather than unarmed damage. The target may attempt to break the grapple as normal.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, *Evard's black tentacles*; **Market Price:** 32,325 gp; **Cost to Create:** 16,325 gp + 1,280 XP.

Changeling Spear: This $+2$ *halfspear* can easily shift forms. As a free action, the wielder can change the weapon into a shortspear, a longspear, or back to a halfspear. The wielder may change the spear in this way once per round.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *alter self*; **Market Price:** 18,301 gp; **Cost to Create:** 9,301 gp + 720 XP.

Chargebreaker: This $+1$ *keen longspear* has a barbed shaft that deals even more damage when set against a charging opponent. When a character uses a ready action to set *chargebreaker* against a charge, it deals triple damage on a successful hit.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, *keen edge*; **Market Price:** 18,305 gp; **Cost to Create:** 9,305 gp + 720 XP.

Claws of the Leopard: This pair of $+2$ *spiked gauntlets* have been shaped to look like the paws of an oversized cat. In addition to their enhancement bonus, they provide several feline-like advantages. While wearing the *claws of the leopard*, the wielder gains low-light vision and a $+10$ enhancement bonus on Climb checks. During the first round of combat, the wielder can leap on a foe, allowing her to make a full attack with the *claws of the leopard* even if she has already taken a move action. This ability functions exactly like the leopard's pounce ability (see Appendix 1: Animals of the *Monster Manual*).

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, creator must have 5 ranks in Climb, *cat's grace*; **Market Price:** 38,305 gp; **Cost to Create:** 19,305 gp + 1,520 XP.

Closing Blade: This $+3/+2$ *two-bladed sword* allows its wielder to continue fighting effectively when grappled. Any time the wielder is grappled, he can make attacks against the creature he is grappling as if the *closing blade* were a Tiny weapon.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *free action*; **Market Price:** 58,700 gp; **Cost to Create:** 29,700 gp + 2,320 XP.

Crossbow, Deathwand: The two thin hollows in this $+2$ *light crossbow's* stock have a magical affinity with wands. The wielder of the *deathwand crossbow* is considered to be holding either of the wands when she wields the crossbow, and she can use either wand

normally without letting go of the crossbow. Removing or stowing a wand in the crossbow takes a move-equivalent action. If the crossbow is destroyed, any wands it holds are also destroyed.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *Leomund's secret chest*; **Market Price:** 10,335 gp; **Cost to Create:** 5,335 gp + 400 XP.

Crossbow, Dwarven Mauler: This Large +2 *heavy crossbow* is covered with dwarven runes, and the intricate stock has been carved to resemble the head of a hammer. Because of its increased size, the *dwarven mauler* deals 1d12 points of damage on a successful hit. This increase in size does not affect the time it takes to load the crossbow. Furthermore, against all giants and goblinoids, the *dwarven mauler's* critical multiplier is increased to $\times 4$.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, creator must be a dwarf; **Market Price:** 18,700 gp; **Cost to Create:** 9,700 gp + 720 XP.

Crossbow, Inevitable: The stock and rest of this +1 *light crossbow* are covered in carvings, each resembling a slightly different eye. If a bolt from an *inevitable crossbow* misses, the wielder's next shot, if aimed at the same target, gains an additional +1 insight bonus on the attack roll. If the second shot misses, the insight bonus increases to +2. As long as the wielder continues to fire at the same target and continues to miss, subsequent shots gain bigger insight bonuses, increasing by +1 each time, up to a maximum of +5. This sequence of shots must occur on consecutive rounds; if a round passes without the wielder shooting at the same target, the crossbow's insight bonus reverts to +0.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *true strike*; **Market Price:** 18,335 gp; **Cost to Create:** 9,335 gp + 720 XP.

Crossbow of Retrieving: This +2 *hand crossbow* has a cleverly carved stock that resembles a beckoning hand. Any inanimate object struck by a bolt from a *crossbow of retrieving* is affected by a *mage hand* spell. See Attack an Object in Chapter 8 of the *Player's Handbook* for rules on attacking inanimate objects.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *mage hand* or *telekinesis*; **Market Price:** 13,400 gp; **Cost to Create:** 6,900 gp + 520 XP.

Crossbow of Trailing Flame: Made from a deep red-hued wood, this +1 *flaming repeating crossbow* is strengthened by bands of wrought iron and carved with shallow markings that resemble flickering flames. Anytime the *crossbow of trailing flame* is fired more than once in the same round, its additional property is activated. Each shot after the first in the round deals a cumulative +1 point of fire damage. For example, the second shot in a round deals 1d8+1 normal damage and 1d6+1 fire damage, and the third shot in the same round deals 1d8+1 normal damage and 1d6+2 fire damage.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms

and Armor, *flame blade*, *flame strike*, or *fireball*; **Market Price:** 18,550 gp; **Cost to Create:** 9,550 gp + 720 XP.

Cutlass of Surety: The magical properties of this +2 *shortsword* make it impossible for the wielder to be disarmed. The sword grants no bonus on disarm attempts initiated by the wielder.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, *magic weapon*; **Market Price:** 18,310 gp; **Cost to Create:** 9,310 gp + 720 XP.

Dagger of Defense: This +4 *defending dagger* has a long, thin blade and a broad guard, and is an excellent parrying weapon. As long as the wielder holds the *dagger of defense* in his off hand, he cannot be flanked. Rogues of 16th level or higher can flank the character normally.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *shield*; **Market Price:** 58,302 gp; **Cost to Create:** 29,302 gp + 2,320 XP.

Dagger of Entry: Greatly prized by rogues and others with larceny on their minds, a *dagger of entry* looks like a plain, if finely crafted dagger. This +1 *dagger's* one oddity is its strangely shaped hilt, which looks like an oversized key. The dagger is capable of opening almost any door, allowing its possessor to cast *knock* once per day as a 9th-level caster. In addition, the dagger allows its wielder to cast *find traps* once per day and *detect secret doors* once per day (both as the spells from a 9th-level caster).

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *detect secret doors*, *find traps*, *knock*; **Market Price:** 18,502 gp; **Cost to Create:** 9,402 gp + 728 XP.

Dart of Pinning: Although it looks more like a large needle than an instrument of war, this +2 *dart* has the deadly ability to hold a foe motionless. Targets struck by a *dart of pinning* must make a successful Fortitude save (DC 13) or be paralyzed as though by carrion crawler brain juice (see Poison in Chapter 3 of the *DUNGEON MASTER'S Guide*). The effect lasts for 7 rounds.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *hold monster*; **Market Price:** 18,300 gp; **Cost to Create:** 9,300 gp + 720 XP.

Desert's Heart: The dark metal of this +2 *flaming falchion* is imbued with a deep red tint. Any creature holding *desert's heart* is immune to fire damage and takes double damage from cold effects. Creatures with the cold subtype do not gain this benefit. Instead, *desert's heart* bestows a negative level on them, which persists as long as they hold the blade. This negative level never results in actual level loss, but it cannot be overcome in any way (including *restoration* spells) while the weapon is wielded.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *fireball*, *protection from elements*; **Market Price:** 71,175 gp; **Cost to Create:** 35,775 gp + 2,832 XP.

Disarming Flail: The magic chain on this +2 *heavy flail* gives the weapon a greater ability to pull opponents' weapons from their grasp. The *disarming*

*Electric Lash**Dagger of Entry**Deathwand Crossbow**Elven Leaf Arrows**Crossbow of Trailing Flame**Dragontooth**Desert's Heart**Dwarven Mauler Crossbow*

DM

flail grants a +2 circumstance bonus on disarm checks and allows the wielder to make disarm attempts as though she possessed the Improved Disarm feat. This bonus stacks with the normal bonus flails receive on disarm checks.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, *magic weapon*; **Market Price:** 18,395 gp; **Cost to Create:** 9,355 gp + 723 XP.

Doorbreaker: This plain-looking +1 *battleaxe* resembles mundane wood-chopping axes more than other battleaxes, and it is especially effective against wood and similar materials. A *doorbreaker* deals double damage to all objects made predominantly of wood and to plant creatures.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, *warp wood*; **Market Price:** 8,310 gp; **Cost to Create:** 4,310 gp + 320 XP.

Dragontooth: Made from a single tooth of an ancient blue dragon, this +2 *shock rapier* projects a fearsome aura around its wielder. Foes within 5 feet of the wielder must succeed on a Will save (DC 16) or suffer the effects of the *fear* spell from an 8th-level caster. Once foes have made a successful saving throw against the fear aura, they are immune to the aura's effects for one day.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *fear*, *lightning bolt*; **Market Price:** 40,720 gp; **Cost to Create:** 20,520 gp + 1,616 XP.

Electric Lash: The blue-tinged leather of this +2 *shock whip* seems to spark with small motes of electric energy. Three times per day, the wielder of the *electric lash* may make an arcing strike. This attack deals an additional +2d6 points of electricity damage (3d6 total) to the target if the attack is successful. Furthermore, the electric jolt arcs to any one creature within 5 feet of the target. That target takes half as much electricity damage as the first target did. If more than one creature is within 5 feet of the target, roll randomly to see which one is affected by the arc of electricity. Arcing strike damage is not multiplied by critical hits.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *lightning bolt*; **Market Price:** 50,301 gp; **Cost to Create:** 25,301 gp + 2,000 XP.

Elven Leaf Arrow: These +2 *arrows* are tipped with magically strengthened leaves rather than metal tips. Anyone firing an *elven leaf arrow* can, as a free action, declare that the arrow deals subdual rather than regular damage. Furthermore, whenever an *elven leaf arrow* deals subdual damage in a temperate woodland environment, the target must succeed on a Will save (DC 11) or be charmed as the *charm monster* spell from a 10th-level caster.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, creator must be an elf, *charm monster*; **Market Price:** 1,167 gp; **Cost to Create:** 587 gp + 47 XP.

Emerald Caltrops: These magic caltrops dissolve into small puddles of acid when stepped on. Like normal caltrops, emerald caltrops are scattered on the ground to slow enemies, but the act of scattering them also activates their magic. One 2-pound bag covers an area 5 feet square. Each time a creature moves into an area covered by *emerald caltrops*, make an attack roll (with a +1 bonus) using the rules for caltrops found in Chapter 7 of the *Player's Handbook*. Any creature struck by the caltrops takes an additional +1 point of damage and 1d6 points of acid damage. *Emerald caltrops* turn to vapor 1 hour after being removed from their original container.

Caster Level: 4th; *Prerequisites:* Craft Magic Arms and Armor, *Melf's acid arrow*; *Market Price:* 166 gp; *Cost to Create:* 86 gp + 7 XP.

Equestrian's Spear: The magical properties of this +2 *longspear* make it suited for use on foot or on horseback. When used by a character on foot, the *equestrian's spear* functions exactly like a *longspear*. When used by a mounted character proficient with the heavy lance, the *equestrian's spear* is treated in all respects as a heavy lance. Mounted characters not proficient in the heavy lance may still use the weapon as a *longspear*.

Caster Level: 10th; *Prerequisites:* Craft Magic Arms and Armor, *phantom steed*, *polymorph any object*; *Market Price:* 26,615 gp; *Cost to Create:* 13,615 gp + 1,040 XP.

Erythnul's Slaughter: This +2 *unholy morningstar* is sacred to clerics of Erythnul, the god of slaughter. Any cleric wielding *Erythnul's slaughter* can prepare spells as if he had access to the War domain in addition to his other domains. Clerics who already have access to the War domain gain no additional benefit. If for any reason the cleric loses possession of *Erythnul's slaughter*, all prepared spells from the War domain are lost, unless the cleric normally has access to that domain.

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, creator must have access to War domain, *unholy blight*; *Market Price:* 72,308 gp; *Cost to Create:* 36,308 gp + 2,880 XP.

Ethereal Bolt: These +1 *bolts*, once fired, flicker between the Material Plane and Ethereal Plane. This jumping between planes gives the bolts a hazy, insubstantial appearance. Flickering between the planes gives the bolts several powers. Although they provide no ability to see onto the Ethereal Plane, the bolts themselves affect ethereal creatures normally. Furthermore, they can pass through solid objects. For each 5 feet of solid material the bolt passes through, there's a 50% chance that the bolt is on the Material Plane when it passes, stopping the bolt and ending its flight. All attacks with *ethereal bolts* have a 20% miss chance. The planar flickering lasts only for one shot; if recovered intact after

being fired, an *ethereal bolt* is thereafter treated as a normal +1 *bolt*.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *blink*; *Market Price:* 797 gp; *Cost to Create:* 402 gp + 32 XP.

Everburning Chain: On command, this +2 *flaming spiked chain* turns into a column of fire. Like other flaming weapons, the fire does not harm the wielder. As a standard action, the wielder can sweep the chain around her head, spreading flame in a 10-foot radius. This attack deals 1d6 points of damage to creatures within the area of effect (Reflex half DC 13) and can cause flammable materials to ignite. Trip attacks made with an *everburning chain* may ignite the target's clothing if it is flammable.

Caster Level: 10th; *Prerequisites:* Craft Magic Arms and Armor, *burning hands*, *fireball*; *Market Price:* 22,725 gp; *Cost to Create:* 11,525 gp + 896 XP.

Fey Arrow: This light, slender +1 *arrow* has a small point and brightly colored fletching. On a successful hit, a pale glow surrounds the target. The glow functions exactly like the *faerie fire* spell from a 5th-level caster, preventing an outlined target from gaining the benefits of concealment caused by darkness, *blur*, displacement, invisibility, or similar effects.

Caster Level: 5th; *Prerequisites:* Craft Magic Arms and Armor, *faerie fire*; *Market Price:* 297 gp; *Cost to Create:* 152 gp + 12 XP.

Fellstone: This +3 *heavy pick* is made entirely from stone, and its magical properties give its wielder great power over stone. Earth creatures struck with *fellstone* must succeed on a Fortitude save (DC 13) or be dazed until the beginning of the wielder's next action. Whenever both the wielder and her opponent are touching the ground, *fellstone* grants a +1 bonus on attacks and damage. If an opponent is airborne or waterborne, the wielder takes a -4 penalty on attacks and damage. Furthermore, as long as the wielder is touching the ground, she can start a bull rush without provoking an attack of opportunity. The combat modifiers given above for melee attacks also apply to the wielder's opposed Strength check when attempting a bull rush.

Caster Level: 12th; *Prerequisites:* Craft Magic Arms and Armor, *stone shape*, *summon monster VI*; *Market Price:* 32,308 gp; *Cost to Create:* 16,308 gp + 1,280 XP.

Flail of Shadows: Made from forge-blackened iron and darkwood, this +2 *shadowstrike heavy flail* has a powerful bond with the Plane of Shadow. In addition to its *shadowstrike* ability, the *flail of shadows* allows its wielder to cast *dimension door* with a command word (as the spell from an 11th-level caster, but the *dimension door* must originate and terminate in an area of shadow).

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, *dimension door*, *shadow conjuration*, *shadow walk*; *Market Price:* 48,155 gp; *Cost to Create:* 24,235 gp + 1,914 XP.

Flameshroud Axe: Made from an incredibly hard red metal (hardness 15, 30 hp), this +3 flaming battle-axe can wrap its wielder in a protective shield of fire. Once per day, the flameshroud axe can produce an effect similar to the *fire shield* spell (chill version) from an 11th-level sorcerer. Activating the axe's *fire shield* ability is a full-round action that provokes an attack of opportunity.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *fireball*, *fire shield*; **Market Price:** 51,510 gp; **Cost to Create:** 25,910 gp + 2,048 XP.

Foe Reaper: This +2 mighty cleaving scythe can cut through foes three at a time. During extra attacks granted by the Cleave feat or the scythe's mighty cleaving ability, its threat range is doubled. *Foe reaper* is treated as a *keen weapon* for purposes of spells interacting with it, meaning it cannot be the target of *keen edge* or *bless weapon*, nor can it receive the vicious ability.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *divine power*, *keen edge*; **Market Price:** 32,318 gp; **Cost to Create:** 16,318 gp + 1,280 XP.

Force Web: This +4 net is made of pure magical force and can hold even incorporeal creatures. A creature entangled in a *force web* can attempt to escape as a full-round action (Escape Artist check, DC 20). The net has a hardness of 10 and 30 hit points and can be burst with a DC 40 Strength check as a full-round action.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *forcecage*; **Market Price:** 72,320 gp; **Cost to Create:** 36,320 gp + 2,880 XP.

Foretelling Blade: Otherwise unadorned, the pommel of this +2 longsword is carved to look like a large, unblinking eye. Once per day, the possessor of the *foretelling sword* may roll 1d20. Once over the course of the ensuing day, the wielder may choose to use the result of that roll instead of making an attack roll. To use this ability, the wielder must announce this choice before making the attack roll. For the chosen attack, the wielder simply uses the result of the earlier 1d20 roll as if that were his attack roll.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *augury*; **Market Price:** 18,315 gp; **Cost to Create:** 9,315 gp + 720 XP.

Frost Shard Dagger: This completely translucent +1 dagger radiates cold and looks as if it is sculpted out of ice. Despite its appearance, the dagger is as resilient as normal steel until used to make a successful melee or ranged attack. The first successful attack made with a *frost shard dagger* causes it to explode in a burst of cold energy, dealing 3d6 points of cold damage to everyone within 5 feet of the target. All creatures other than the original target may attempt a Reflex save (DC 17) to take half damage. The *frost shard dagger* is destroyed after one successful attack.

Caster Level: 3rd; **Prerequisites:** Craft Magic Arms and Armor, *cone of cold*; **Market Price:** 1,052 gp; **Cost to Create:** 677 gp + 30 XP.

Ghost Hands: These roughly wrought iron gauntlets remain a dull, dark gray regardless of how often they are polished. Despite their crude appearance, *ghost hands* are a surprisingly light pair of +1 *ghost touch gauntlets*. While wearing *ghost hands*, the wielder is immune to the *magic jar* spell and a ghost's malevolence ability. *Ghost hands* provide a +1 enhancement bonus on attack and damage rolls but attacks with them are still considered unarmed for purposes of provoking attacks of opportunity.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *plane shift*, *protection from evil*; **Market Price:** 18,302 gp; **Cost to Create:** 9,302 gp + 720 XP.

Glaive of Torment: This +1 wounding glaive gains additional power in the hands of a barbazu or any other creature with a natural wounding ability. Whenever such a creature wields the weapon, those struck by it are racked with pain, taking a -4 penalty on attack rolls, skill checks, and ability checks, for 3 rounds. A successful Fortitude save (DC 16) lessens the penalty to -2.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *bestow curse*, *Mordenkainen's sword*; **Market Price:** 74,308 gp; **Cost to Create:** 37,308 gp + 2,960 XP.

Gnome Steam Bow: Covered with levers and small repositories for alchemical fluids, and strung with a system of pulleys, this +1 *shortbow* offers several

Glaive of Torment

advantages. The wielder can choose from the following three options, each requiring a move-equivalent action to activate. The wielder can remove any penalty on damage rolls from a low Strength score for the next shot from the bow. The wielder can add his Intelligence modifier to the attack roll for the next shot from the bow. Finally, the wielder can double the range increment of the bow for the next shot from it. None of these actions provokes an attack of opportunity. If the wielder spends the time, it's possible to set up a shot that benefits from all three abilities.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *bull's strength*, *clairaudience/clairvoyance*, *true strike*; **Market Price:** 18,530 gp; **Cost to Create:** 9,430 gp + 728 XP.

Gnome's Toolkit: Covered in hooks, small sliding compartments, and tiny nooks perfect for potion vials, this +2 *light crossbow* can hold several small items. The *gnome's toolkit* stores a set of masterwork lockpicks, a magnifying glass, and a small silver mirror. These items are magically bonded to the crossbow, and they disappear if taken more than 20 feet from it. Items removed like this reappear within the crossbow after 1 minute. The *gnome's toolkit* can also hold up to six more small items such as keys or potion vials. No item stored in the crossbow can be more than 2 inches long or weigh more than

6 ounces. Additional stored items do not become bonded to the crossbow and function normally if removed. While holding a *gnome's toolkit*, the wielder can retrieve any item stored in the crossbow as a free action.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *Leomund's secret chest*; **Market Price:** 10,335 gp; **Cost to Create:** 5,335 gp + 400 XP.

Grasping Dagger: In addition to its main blade, this +3 *keen punching dagger* has two large barbs that project from the dagger's hilt. On a successful critical hit, these barbs can hook into the target's flesh, holding it fast. After a successful critical hit, the wielder may make a grapple attempt as a free action. If successful, the target is hooked on the dagger's barbs. While grappling in this manner, the wielder can attack with the *grasping dagger* normally.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *hold person*, *keen edge*; **Market Price:** 50,302 gp; **Cost to Create:** 25,302 gp + 2,000 XP.

Gray Snare: The rubbery gray strands of this +1 *net* are tightly woven and give off a tangy, acidic scent. Although the *gray snare* lacks the hooks of other combat nets, its sticky strands are just as hard to escape. Once per day on command, the net transforms into a gray ooze. If the net transforms while it entangles a target, the ooze is considered to have grappled the target. The transformation takes a full

round, and once complete the ooze acts on the wielder's initiative. The wielder has no special ability to control the ooze but can transform it back into a net with a command word. See the Ooze entry in the *Monster Manual* for more information on the gray ooze. If killed while in ooze form, the net is destroyed.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *summon monster IV*; **Market Price:** 74,320 gp; **Cost to Create:** 37,320 gp + 2,960 XP.

Gruumsh's Revenge: This +3 *longspear* is greatly prized by clerics of Gruumsh. The wielder of *Gruumsh's revenge* can take a standard action and expend a rebuke undead attempt to imbue the spear with divine power. If the next successful attack with the *longspear* hits an elf, the spear deals an additional 1d6 points of divine damage per point of the wielder's Charisma bonus (minimum 1d6).

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, creator must be an evil humanoid with the ability to rebuke undead, *unholy blight*; **Market Price:** 50,305 gp; **Cost to Create:** 25,305 gp + 2,000 XP.

Guardian Bow: The magical properties imbued in this +2 *mighty* (+3) *composite longbow* protect its wielder when enemies are near. The *guardian bow* provokes an attack of opportunity only from the target of its attack. If someone fires the *guardian bow* while surrounded by enemies, only the foe shot at may take an attack of opportunity, even if other opponents threaten the archer.

Caster Level: 14th; **Prerequisites:** Craft Magic Arms and Armor, *shield*; **Market Price:** 50,700 gp; **Cost to Create:** 25,700 gp + 2,000 XP.

Guerrilla Spear: This +2 *shortspear* is extremely effective when used in ambush. Whenever the wielder makes a successful attack against an opponent who is denied his Dexterity bonus to Armor Class, the *guerrilla spear* deals an additional 2d6 points of damage.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *invisibility*; **Market Price:** 32,302 gp; **Cost to Create:** 16,302 gp + 1,280 XP.

Guisarme of Long Falls: The curved blade at the end of this +2 *guisarme* is hooked even more than that of a normal *guisarme* and can cause particularly jarring falls. Whenever the wielder uses the *guisarme of long falls* to make a successful trip attempt, the target must succeed on a Fortitude save (DC 16) or be stunned for one round.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *telekinesis*; **Market Price:** 18,309 gp; **Cost to Create:** 9,309 gp + 720 XP.

Halberd of Vaulting: This +2 *halberd* allows its wielder to make powerful leaping attacks. The *halberd of vaulting* gives its wielder a +30 bonus on Jump checks and removes the usual maximums for jumping distance. Whenever the wielder takes the charge

action, she may attempt a vaulting charge. If the wielder can make a running high jump at least 5 feet high during the charge, the charge attack deals double damage. To make a vaulting charge, the wielder must have a clear path through the air to the target. In an area with a low ceiling or overhanging obstructions, a vaulting charge might not be possible.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *jump*; **Market Price:** 20,310 gp; **Cost to Create:** 10,310 gp + 800 XP.

Halfling's Exit: These +2 *sling bullets* provide a ready cover for those needing a quick escape and are often carried by rogues in case such situations arise. These gray *sling bullets* seem filled with swirls of thick, black fog, and their surface roils with constant motion. On a successful hit, the bullet releases a billowing cloud of fog that fills a 30-foot radius with a *fog cloud* (as the spell from a 6th-level caster). The fog lasts for 1 hour, although it can be dispersed by strong wind. The cloud blocks all sight, including darkvision, beyond 5 feet. A creature within 5 feet has one-half concealment (20% miss chance). Creatures farther away have total concealment (50% miss chance and the attacker can't use sight to locate the target). Each *halfling's exit* creates fog only once; bullets recovered intact are thereafter +2 *sling bullets*.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, creator must be a halfling, *fog cloud*; **Market Price:** 247 gp; **Cost to Create:** 127 gp + 10 XP.

Hammer of the Magesmith: This +1 *warhammer* is useful when creating other magic weapons. When used in the forging of another magical weapon, the *hammer of the magesmith* reduces the cost of the raw materials that must be supplied by 5%. This reduction applies only to the gold piece cost of materials, not the XP requirement. In addition, once per day the *hammer of the magesmith* can imbue another weapon with temporary magic power. This works exactly like the *magic weapon* spell from a 10th-level caster, including the requirement that the *hammer of the magesmith* touch its target.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *magic weapon*; **Market Price:** 45,912 gp; **Cost to Create:** 23,112 gp + 1,824 XP.

Hammer of Sacrifice: Heavier than other weapons of its type, this +2 *warhammer* weighs 16 pounds and is made entirely from a single piece of black iron ore. At the beginning of each round, the wielder of the *hammer of sacrifice* can sacrifice up to 5 hit points. Hit points sacrificed in this manner are then added to the damage of each successful attack made with the hammer until the beginning of the following round. Hit points sacrificed to the hammer are treated as normal damage to the wielder.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *vampiric touch*; **Market Price:** 32,312 gp; **Cost to Create:** 16,312 gp + 1,280 XP.

Hand of Heironeous: This +3 *longsword* is greatly prized by paladins and clerics of Heironeous. The wielder of the *hand of Heironeous* can take a standard action and expend a turn undead attempt to imbue the sword with divine power. If the next successful attack by the sword hits an undead target, the sword deals an additional 1d6 points of divine damage for each point of the wielder's Charisma bonus (minimum 1d6).

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, creator must have the turn undead ability, creator must be good, *divine power*, *searing light*; **Market Price:** 50,315 gp; **Cost to Create:** 25,315 gp + 2,000 XP.

Havoc Blade: This +3 *keen chaotic greataxe* is a powerful weapon of disorder. In addition to its other properties, a *havoc blade* causes *confusion* (as the spell from a 5th-level caster) with a successful critical hit. The target is allowed a Will save (DC 19) to avoid the *confusion* effect. A target who fails the Will save is *confused* for 5 rounds. An ungainly-looking weapon at best, a *havoc blade* is a swirl of three different metals, apparently only partly blended. The shaft is also slightly twisted, as if warped by long exposure, although it can still be wielded without penalty.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *chaos hammer*, *confusion*, *keen edge*, creator must be chaotic; **Market Price:** 98,320 gp; **Cost to Create:** 49,320 gp + 3,920 XP.

Ice Talon: With blades carved from the pale claws of an ancient white dragon, this +2 *frost greataxe* radiates cold. The area within 5 feet of an *ice talon* is always 10 degrees cooler than the ambient temperature. Even without the aura of cold, an *ice talon's* frosty nature is evident from its appearance; the pale dragon claws sit atop a haft of magically strengthened ivory, making the entire weapon an eerie shade of white. An *ice talon* grants its wielder the ability to withstand cold as the *endure elements (cold)* spell from a 10th-level caster. In addition, the wielder's movement is never reduced due to snow or ice, and she never needs to make a Balance check to keep her footing on ice. Although it is made from ivory, an *ice talon* has a hardness of 15 and 20 hit points due to its magical reinforcement.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *cone of cold*; **Market Price:** 24,320 gp; **Cost to Create:** 12,320 gp + 960 XP.

Incandescent Sword: This +4 *holy greatsword* glows with a bright light (a 30-foot radius equivalent to a sunrod) when it is held by a character of chaotic good alignment. It is the preferred weapon of ghaele eladrins.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *holy smite*, *light*, creator must be chaotic good; **Market Price:** 72,400 gp; **Cost to Create:** 36,375 gp + 2,882 XP.

Ioun Blade: This +1 *dagger* can hold any one *ioun stone* in a special socket in its pommel. As long as the wielder holds the *ioun blade*, any stone held in the pommel affects her as if it were spinning around her head normally. Placing or removing an *ioun stone* from the socket is a move-equivalent action that provokes an attack of opportunity.

Caster Level: 5th; *Prerequisites:* Craft Magic Arms and Armor, *fabricate*; *Market Price:* 6,302 gp; *Cost to Create:* 3,302 gp + 240 XP.

Javelin of Chain Lightning: This dangerous magic weapon becomes a bolt of *chain lightning* when thrown. The character who throws the javelin chooses the primary target, but the secondary bolts arc to the nearest eleven creatures within 30 feet of the target. The thrower has no control over the secondary bolts. The primary bolt deals 11d6 points of damage to the target (Reflex half DC 19) and 5d6 points of damage to secondary targets (half with a successful save). The javelin is consumed in the attack.

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, *chain lightning*; *Market Price:* 3,301 gp; *Cost to Create:* 1,651 gp + 132 XP.

Javelin of Lightning, Greater: When thrown, this javelin becomes a 10d6 *lightning bolt*. It is consumed in the attack.

Caster Level: 10th; *Prerequisites:* Craft Magic Arms and Armor, *lightning bolt*; *Market Price:* 1,501 gp; *Cost to Create:* 751 gp + 60 XP.

Javelin of Obliteration: When thrown, this javelin becomes a disintegrator ray that functions as a *disintegrate* spell from a 15th-level caster. The wielder makes a touch attack using her normal ranged touch modifier to determine whether or not the ray hits. The javelin is consumed in the attack.

Caster Level: 15th; *Prerequisites:* Craft Magic Arms and Armor, *disintegrate*; *Market Price:* 9,301 gp; *Cost to Create:* 4,801 gp + 360 XP.

Javelin of Precision: This +3 *javelin* has a long, narrow point and incredible balance. When thrown, the javelin ignores cover bonuses to AC. This ability does not allow the wielder to make attacks that would otherwise not be possible, so total cover prevents attacks from the *javelin of precision*. In addition to ignoring cover, the wielder never takes a penalty on her attack roll when throwing the *javelin of precision* into melee. The javelin does not reduce the effects of concealment.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *true strike*; *Market Price:* 50,301 gp; *Cost to Create:* 25,301 gp + 2,000 XP.

Kama of Pure Aim: This +2 *kama* allows a wielder with great mental fortitude to ignore many effects that would disrupt his aim. Each round, the wielder of the *kama of pure aim* can attempt a Wisdom check (DC 20). If this check is successful, the wielder may ignore any miss chance created by

concealment, including effects such as *blur* and *invisibility*, but not miss chances from other conditions such as incorporeality or the *blink* spell. Although the *kama of pure aim* can potentially remove the miss chance from an invisible foe, the attacker must still target the correct space. The wielder does not automatically know which space an invisible or otherwise concealed foe is in. The weapon is otherwise identical to a +2 *kama*.

Caster Level: 15th; *Prerequisites:* Craft Magic Arms and Armor, creator must have a Wisdom score of 20, *true seeing*; *Market Price:* 32,302 gp; *Cost to Create:* 16,302 gp + 1,280 XP.

Khopesh of the Loyal Minion: This +1 *khopesh* is a favored weapon of minions of Set (an evil god detailed in *Deities and Demigods*). When the wielder changes into a form that has a natural claw attack (such as an animal form), the *khopesh* merges with the new form and grants its +1 enhancement bonus to one of the creature's claw attacks, as if the *magic fang* spell had been cast on the creature. When the wielder returns to a form that uses weapons, the *khopesh* returns to its normal form and functionality as well.

Caster Level: 5th; *Prerequisites:* Craft Magic Arms and Armor, *polymorph self* or creator must have a shape-altering ability (including *wild shape* or alternate form); *Market Price:* 6,320 gp; *Cost to Create:* 3,320 gp + 240 XP.

Knight's Sword: This +2 *bastard sword* is extremely effective from horseback. When riding a mount and performing the charge action, the wielder can double the damage dealt with the *knight's sword* during the attack.

Caster Level: 7th; *Prerequisites:* Craft Magic Arms and Armor, *phantom steed*; *Market Price:* 18,335 gp; *Cost to Create:* 9,335 gp + 720 XP.

Kukri of Crippling: The curved blade of this +2 *kukri* has been imbued with magic capable of laming a foe. Anytime the wielder of the *kukri of crippling* scores a critical hit, the target's move rate is halved. This reduction lasts for one day, until the creature is successfully treated with the Heal skill (DC 15), or until it receives at least 1 point of magical healing. Creatures with multiple movement rates have only one of their movement rates reduced by each critical hit. Roll randomly to determine which movement rate is affected.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *slow*; *Market Price:* 18,308 gp; *Cost to Create:* 9,308 gp + 720 XP.

Lance of Bravery: As long as a mounted rider holds the *lance of bravery*, both she and her mount are immune to all fear effects. The *lance of bravery* is otherwise identical to a +2 *heavy lance*.

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, *remove fear*; *Market Price:* 30,310 gp; *Cost to Create:* 15,310 gp + 1,200 XP.

Lance of Jousting: This +3 *light lance* was created to put smaller riders on par with their larger counterparts. When in the hands of a Small humanoid, the *lance of jousting* has a reach of 10 feet. In all other respects, the weapon functions like a normal +3 *light lance*.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *enlarge*; *Market Price:* 32,306 gp; *Cost to Create:* 16,306 gp + 1,280 XP.

Lance of Mangling: This +2 *heavy lance* can destroy an opponent's shield with a successful critical hit. If the wielder scores a successful critical hit against an opponent using a shield, the opponent's shield is torn away and ruined in addition to the attack's normal effect.

Caster Level: 7th; *Prerequisites:* Craft Magic Arms and Armor, *shatter*; *Market Price:* 18,310 gp; *Cost to Create:* 9,310 gp + 720 XP.

Lance of the Unending Charge: This +2 *mighty cleaving heavy lance* allows a charging wielder to plow through multiple foes. Whenever the wielder takes the charge action, she gains the ability to move great distances between Cleave attempts. Anytime during a charge that the wielder is granted an extra attack by the Cleave feat, she can continue moving in the direction of her charge up to the limit of her mount's movement before making that extra attack. The same benefit applies to the extra attack granted by the weapon's *mighty cleaving* quality.

Caster Level: 13th; *Prerequisites:* Craft Magic Arms and Armor, *expeditious retreat*, *haste*; *Market Price:* 50,310 gp; *Cost to Create:* 25,310 gp + 2,000 XP.

Larethian Protector: This +2 *longbow* is greatly prized by clerics of the elven god Corellon Larethian. The wielder of the *Larethian protector* can take a standard action and expend a turn undead attempt to imbue the bow with divine power. The next arrow from the bow that hits an evil humanoid deals an additional 1d6 points of divine damage per point of the wielder's Charisma bonus (minimum 1d6).

Caster Level: 13th; *Prerequisites:* Craft Magic Arms and Armor, creator must be an elf with the ability to turn undead, *holy smite*; *Market Price:* 50,375 gp; *Cost to Create:* 25,375 gp + 2,000 XP.

Living Net: This well-made +2 *net* seems to writhe of its own accord. The wielder of the *living net* can attack targets up to 20 feet away. Any time a foe is entangled by the *living net*, the wielder may make a trip attack as a free action. If the wielder is tripped during his own trip attempt, he may drop the *living net's* trailing cord to avoid being tripped. Folding the *living net* is a move-equivalent action that provokes an attack of opportunity.

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, *animate objects*; *Market Price:* 18,320 gp; *Cost to Create:* 9,320 gp + 720 XP.

Mace of Form: This +2 *bane (shapechanger) light mace* protects its wielder from shapechanging magic and can dispel such effects on others. Any successful hit against a creature not in its natural form forces the target to succeed on a Fortitude save (DC 22) or return to its natural form. This effect does nothing to prevent subsequent shapechanging effects. In addition, the wielder of the *mace of form* cannot change shape. While holding the *mace of form*, the wielder simply ignores the effects of all shapechanging magic, including self-targeting spells such as *alter self*. Note that the *mace of form* does nothing to prevent illusory changes to appearance from taking effect, so spells like *change self* still function normally for the wielder.

Caster Level: 15th; *Prerequisites:* Craft Magic Arms and Armor, *polymorph any object*; *Market Price:* 100,312 gp; *Cost to Create:* 50,312 gp + 4,000 XP.

Mace of the Snail: This +2 *heavy mace* has an unadorned shiny metal head. Three times per day, the *mace of the snail* allows its wielder to cast *slow* as a 7th-level caster. Targets must make a Will save (DC 14) to resist this effect. In addition, whenever its wielder takes the total defense action, the mace grants an additional +2 bonus to Armor Class that stacks with all other bonuses.

Caster Level: 6th; *Prerequisites:* Craft Magic Arms and Armor, *shield*, *slow*; *Market Price:* 30,992 gp; *Cost to Create:* 15,612 gp + 1,224 XP.

Mace of Unlife: This +3 *heavy mace* can bring the dead back as undead servants of its wielder. Whenever the *mace of unlife* is used to deliver the killing blow to a creature, its wielder can cause that creature to rise as a zombie. Using this ability is a full-round action. Zombies raised in this manner are under the control of the mace's wielder. Up to 20 Hit Dice of zombies may be controlled at any one time. Any condition that would normally prevent a creature from being animated as a zombie prevents the *mace of unlife* from working as well.

Caster Level: 10th; *Prerequisites:* Craft Magic Arms and Armor, *animate dead*, *control undead*; *Market Price:* 138,312 gp; *Cost to Create:* 69,312 gp + 5,520 XP.

Mace of Voices: The bell-shaped head of the *mace of voices* produces several sonic effects, from peals of thunder to soothing tones that magically enhance the wielder's oratory. This +2 *thundering heavy mace* allows clerics who wield it to channel divine energy to produce magically infused oratory. Once per day, while holding the *mace of voices*, a cleric can give up one turn undead attempt to cast *enthral*. The spell is treated as if cast by the cleric himself, and the save DC and caster level are figured accordingly. In addition, the *mace of voices* grants a +2 bonus on the wielder's Diplomacy checks to adjust a creature's attitude.

Caster Level: 13th; *Prerequisites:* Craft Magic Arms and Armor, *blindness/deafness*, *enthral*; *Market Price:* 37,712 gp; *Cost to Create:* 19,012 gp + 1,496 XP.

Mageblade: This +2 *longsword of spell storing* is covered in arcane symbols. While holding a *mageblade*, the wielder can sacrifice a prepared arcane spell from memory as a move-equivalent action that does not provoke an attack of opportunity. Doing so removes the nonproficiency penalty (if any) for using the *mageblade* for a number of rounds equal to the sacrificed spell's level. Furthermore, if the sacrificed spell dealt damage of a particular energy type, the *mageblade* deals an additional 1d6 points of damage of that energy type with each successful hit. The energy damage lasts 1 round per level of the sacrificed spell. If the sacrificed spell has more than one energy type associated with it, the *mageblade* wielder may choose the energy type.

Caster Level: 17th; **Prerequisites:** Craft Magic Arms and Armor, creator must be at least 15th level; **Market Price:** 50,315 gp; **Cost to Create:** 25,315 gp + 2,000 XP.

Manticore Blade: The wavy blade of this +3 *greatsword* begins in an oversized hilt adorned with six spikes. As an attack action, the wielder can launch one of the spikes from the sword at a ranged target. The spikes have a range increment of 20 feet, deal 1d6 points of piercing damage, and grant a +1 enhancement bonus on attack and damage rolls. When making a ranged attack with a spike, the

wielder applies her Dexterity modifier to her attack roll and her Strength modifier to her damage roll. Making a ranged attack with a spike provokes an attack of opportunity just like making a normal ranged attack. The spikes crumble to dust 1 round after being launched from the sword. The sword regenerates spikes at the rate of one per day.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *magic missile*; **Market Price:** 20,350 gp; **Cost to Create:** 10,350 gp + 800 XP.

Maul of Construction: This Large +2 *warhammer* gives its wielder power over stone. Because of its size, a *maul of construction* deals 2d6 base damage, weighs 16 pounds, and must be used in two hands by Medium-size characters. The maul allows its wielder to cast *stone shape* and *wall of stone* once per day each, as the spells from a 15th-level caster.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *stone shape*, *wall of stone*; **Market Price:** 51,824 gp; **Cost to Create:** 26,224 gp + 2,048 XP.

Mirror Blade: Shined to a mirror-bright brilliance, this +2 *longsword* sheds magical light in a 20-foot radius. The light glimmers along the sword's blade and through the many gems in its hilt, creating a dazzling pattern of light. All creatures that remain within 5 feet of the wielder for an entire round must succeed on a Will save (DC 15) or become dazzled

by the sword's light. Creatures without eyes are not susceptible to this effect.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *flare*, *hypnotic pattern*, *light*; **Market Price:** 38,315 gp; **Cost to Create:** 19,315 gp + 1,520 XP.

Moonsilver Shard: This silvery dart turns into a small bolt of magical force when thrown and unerringly strikes its target for 1d4+1 points of damage. Once thrown, a *moonsilver shard* behaves in all manner like a dart from the *magic missile* spell, except that it has an effective range of 150 feet. Attempting to throw a *moonsilver shard* at a target beyond this range causes the dart to transform and then dissipate harmlessly. A *moonsilver shard* vanishes after one use.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, *magic missile*; **Market Price:** 50 gp; **Cost to Create:** 25 gp + 2 XP.

Morningstar of Exhilaration: The magical properties imbued in this +2 *morningstar* grant the wielder tremendous benefits if she is victorious in combat. Whenever a successful hit from the *morningstar of exhilaration* drops a foe below 0 hit points, the wielder gains 6 temporary hit points and a +1 morale bonus on attack rolls and saving throws. The temporary hit points and morale bonus last for 10 rounds. Repeat triggering of this power does not stack.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *aid*, *bless*; **Market Price:** 28,308 gp; **Cost to Create:** 14,308 gp + 1,120 XP.

Nunchaku of Mastery: Joined by a wrought-iron chain, the jet-black handles of this +2 *nunchaku* reflect almost no light. By spending a full-round action twirling the *nunchaku of mastery* around his head and body, the wielder gains a +20 bonus on his next attack roll with the *nunchaku*, provided that the attack occurs on the following round. In all other respects, this effect functions exactly like the *true strike* spell from a 7th-level caster.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *true strike*; **Market Price:** 22,302 gp; **Cost to Create:** 11,302 gp + 880 XP.

Packmaster Flail: This +2 *bane* (gnoll) *light flail* is feared and revered by gnolls. Its head, carved to resemble the snarling visage of a gnoll, inspires obedience in any gnoll who sees it. While holding the *packmaster flail*, the wielder gains a +10 bonus on Intimidate and Diplomacy checks made against gnolls. Furthermore, once per day the wielder can summon 1d3 fiendish gnolls. The fiendish gnolls obey anyone holding the *packmaster flail*. The gnolls remain for 10 rounds before disappearing.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *summon monster I*; **Market Price:** 48,708 gp; **Cost to Create:** 24,508 gp + 1,936 XP.

Piercing Tongue of Kath Kadan: This impressive name belongs to the traditional weapon of the

noble salamander. It is a Huge +3 *longspear* that is always wreathed in fire like a *flaming weapon*, and it deals +1d8 points of bonus fire damage on a successful hit.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *flame blade*, *flame strike*, or *fireball*; **Market Price:** 35,610 gp; **Cost to Create:** 18,810 gp + 1,400 XP.

Plague Spreader: The head of this perpetually filthy +3 *heavy flail* always appears dingy and ill cared for. Even the chain of the flail appears rusted and caked with small bits of long-rotten matter. Any successful hit from the *plague spreader* can potentially infect the target with filth fever. A target hit by the *plague spreader* must succeed on a Fortitude save (DC 20) or be infected with the disease. The disease has an incubation period of 1d3 days, after which it deals 1d3 points of temporary Dexterity damage and 1d3 points of temporary Constitution damage. See Disease in Chapter 3 of the *DUNGEON MASTER'S Guide* for more information. Creatures immune to disease are immune to this effect.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *contagion*; **Market Price:** 104,715 gp; **Cost to Create:** 52,515 gp + 4,176 XP.

Raking Blade: The wielder of this +4/+3 *two-bladed sword* can make an additional raking attack if she manages to get inside her opponent's defenses. Anytime the wielder hits the same target with the first attack made with her primary hand and the first off-hand attack during the same round, the wielder may make an extra attack with the *raking blade*. This extra attack is at -5 on the wielder's best attack bonus.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *cat's grace*, *haste*; **Market Price:** 116,700 gp; **Cost to Create:** 58,700 gp + 4,640 XP.

Rankbreaker Glaive: Created to deal with formations of polearm-wielding foes, this completely unadorned +2 *glaive* looks like a normal soldier's weapon. When used in combat, its fearsome powers become evident. While using a *rankbreaker glaive*, the wielder can act as if he had the Cleave feat. A wielder who already has the Cleave feat gains no additional benefit. Whenever the wielder takes a charge action using a *rankbreaker glaive*, he deals an additional 1d6 points of damage on each successful hit.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *righteous might*; **Market Price:** 32,308 gp; **Cost to Create:** 16,308 gp + 1,280 XP.

Ranseur of Readiness: The magical properties of this +2 *eager ranseur* make it a deadly tool against charging foes. Anytime the wielder gets an attack of opportunity against a charging foe, he may make that attack as if he had readied an action to set the ranseur against the charge. Attacks set in this manner deal double damage to charging foes. Anytime the wielder readies a *ranseur of readiness* against a charging foe, any attacks of opportunity triggered by that foe are also

*Mirror Blade**Sapling Club**Scimitar of Exertion**Packmaster Flail**Ringsword**Plague Spreader**Raking Blade**Nunchaku of Mastery*

DM

resolved normally. This ability does not allow the wielder to make two double-damage attacks against one charging attacker in the same round.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *cat's grace*, *haste*; **Market Price:** 50,310 gp; **Cost to Create:** 25,310 gp + 2,000 XP.

Ricochet Sling: This +2 *sling* allows the wielder to bounce attacks off nearby surfaces and catch opponents off guard. Any time the wielder makes an attack against a target within 5 feet of a wall, that target is denied its Dexterity bonus to Armor Class. This ability does not function against a foe of Intelligence 5 or greater who has experienced the *ricochet sling* effect before.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *telekinesis*; **Market Price:** 32,300 gp; **Cost to Create:** 16,300 gp + 1,280 XP.

Ringsword: The narrow end of this +3 *longsword's* hilt fits a magic ring perfectly. While holding the *ringsword*, the wielder gains the benefit of the ring held on its hilt without compromising her ability to wear a magic ring on each hand. Only one magic ring may be attached to the sword at a time. Removing or attaching a ring to the *ringsword* is a move-equivalent action that does not provoke an attack of opportunity.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *animate objects*; **Market Price:** 22,315 gp; **Cost to Create:** 11,315 gp + 880 XP.

Sap of Stunning: This +2 *sap* delivers stunning blows to the unaware, making them easy to subdue. Whenever the target of an attack made with the *sap of stunning* is denied its Dexterity bonus to Armor Class, the *sap* delivers a stunning attack. With each stunning attack, the target must succeed on a Fortitude save (DC 15) or be stunned for 1 round.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, *sound burst*; **Market Price:** 32,301 gp; **Cost to Create:** 16,301 gp + 1,280 XP.

Sapling Club: This irregular +1 *club* always has a leaf or three adorning it, and the wood retains the resiliency of a freshly cut branch. By spending a full-round action holding the *sapling club* to the ground, the wielder can cause the club to transform into a treant. The treant acts as a summoned creature, attacking the nearest foe unless the wielder commands otherwise. A *sapling club* may spend up to 12 rounds as a treant each day, although the rounds need not be consecutive. At any time, the wielder of the club can utter a command word to transform the *sapling club* back to its original form. If killed while in treant form, the *sapling club* is destroyed.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *changestaff*; **Market Price:** 32,540 gp; **Cost to Create:** 16,420 gp + 1,290 XP.

Scimitar of Colors: On command, the blade of this +3 *scimitar* becomes infused with a shimmering

haze of multicolored magical energies. These have a variety of effects, similar in nature to the powerful *prismatic spray* spell. Whenever the wielder makes a successful melee attack with the *scimitar of colors*, consult the chart below to see what additional effects apply.

d8	Color	Effect
1	Red	Deals additional 2 points of fire damage
2	Orange	Deals additional 4 points of acid damage
3	Yellow	Deals additional 8 points of electricity damage
4	Green	Poison deals 1d2 Con/1d2 Con, DC 15
5	Blue	Deals additional 2 points of cold damage
6	Indigo	Causes <i>confusion</i> , Will (DC 15) negates
7	Violet	Deals additional 2 points of sonic damage
8	Two colors	Roll again twice; ignore subsequent "8" results

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *prismatic spray*; **Market Price:** 36,515 gp; **Cost to Create:** 18,415 gp + 1,448 XP.

Scimitar of Exertion: This +2 *scimitar* allows its wielder to undertake tremendous feats of strength. Once per day by uttering a command word, the wielder can invoke the scimitar's exertion ability. On the round the command word is uttered, the wielder gains a +2 enhancement bonus to Strength. Two rounds later, the bonus increases to +4. Two rounds after that, the bonus subsides to +2, and 2 rounds after that, the bonus fades entirely. For the next 10 rounds, the wielder takes 2 points of temporary Strength damage every other round. Once the command word is uttered, the progression of increasing and decreasing Strength continues regardless of whether the wielder continues to use or even possess the *scimitar of exertion*.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *bull's strength*; **Market Price:** 18,315 gp; **Cost to Create:** 9,315 gp + 720 XP.

Scourge of the Pomarj: One side of this +2/+2 *dire flail* is *bane* (*monstrous humanoids*), and the other is *bane* (*goblinoids*). While holding the *scourge of the Pomarj*, the wielder can understand (but not speak) Orc and Goblin.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *comprehend languages*, *summon monster I*; **Market Price:** 68,690 gp; **Cost to Create:** 34,690 gp + 2,720 XP.

Self-Loading Crossbow: This +1 *heavy crossbow* is much easier to load than mundane crossbows. After firing, the crossbow's string is magically reset to the cocked position, requiring the wielder to simply place a bolt in the weapon to load it.

Loading a *self-loading crossbow* requires only a move-equivalent action.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *animate objects*; **Market Price:** 12,350 gp; **Cost to Create:** 6,350 gp + 480 XP.

Shadow's Hand: Although it is made from obsidian, the magical properties of this +2 *wounding shuriken* make it as strong as steel. Once per day, the wielder can make a blinding strike with *shadow's hand*. To make a blinding strike, the wielder makes a normal ranged attack with the weapon. If the attack is successful, the target must succeed on a Fortitude save (DC 14) or be blinded as the *blindness/deafness* spell from a 10th-level caster.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *blindness/deafness*, *Mordenkainen's sword*; **Market Price:** 30,301 gp; **Cost to Create:** 15,301 gp + 1,200 XP.

Shield Blade: This versatile +2 *short sword* is most often employed as an off-hand weapon. As a move-equivalent action, the wielder can transform the *shield blade* into a large steel shield. The shield provides an armor bonus but no enhancement bonus to the wielder's Armor Class. It does retain a +2 enhancement bonus on attack and damage rolls when used in shield bash attacks.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *animate objects*, *shield*; **Market Price:** 10,630 gp; **Cost to Create:** 5,630 gp + 400 XP.

Siangham of Focus: This +3 *siangham* enhances the wielder's ability to focus on combat. When using a *siangham of focus*, the wielder gains a +2 enhancement bonus on Reflex saves made to deflect ranged weapons using the Deflect Arrows feat. Furthermore, monks and other characters with the Stunning Fist feat may make stunning attacks while attacking with the *siangham of focus*.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *hold person*, *protection from arrows*; **Market Price:** 19,303 gp; **Cost to Create:** 9,803 gp + 760 XP.

Sickle of Talons: This +2 *keen sickle* is particularly useful to those who can change their shape. Whenever its wielder transforms into a shape with natural claw or bite attacks, the *sickle of talons* grants a +2 enhancement bonus on the new form's claw and bite attacks.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, *keen edge*, *magic fang*; **Market Price:** 26,306 gp; **Cost to Create:** 13,306 gp + 1,040 XP.

Skullshaker Hammer: This +2 *warhammer* is favored by dwarven clerics of Moradin. If a *skullshaker hammer* is ever discovered in enemy hands, followers of Moradin go to great lengths to recover it. The hammer delivers painful, ringing blows that are said to echo with the sounds of Moradin's forge. Three times per day, a *skullshaker hammer* deals an additional 1d6 points of temporary Wisdom damage on a successful hit.

Self-Loading Crossbows and the Rapid Reload feat

If the wielder has the Rapid Reload feat described in *Sword and Fist*, loading a *self-loading crossbow* is a free action, and the weapon does not restrict the wielder's ability to make multiple attacks in a round.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, creator must be a dwarf, *spiritual weapon*; **Market Price:** 18,312 gp; **Cost to Create:** 9,312 gp + 720 XP.

Skybow: This +2 *longbow* functions as a bane weapon against all earth creatures. In addition, once per day the wielder may launch an arrow against any target known to be in range, and the arrow travels to the target around all forms of cover, even around corners. This ability functions in all respects like the *seeker arrow* class feature of the 4th-level arcane archer, except that the wielder of a *skybow* must be under the open sky to use this ability.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *gust of wind*, *true strike*; **Market Price:** 25,975 gp; **Cost to Create:** 13,175 gp + 1,024 XP.

Sling of Misdirection: This +1 *bane (construct)* sling temporarily robs constructs of their ability to follow their instructions. Any construct hit by a bullet or stone from a *sling of misdirection* must succeed on a Will save (DC 12) or suffer the effects of the *random action* spell. This ability affects even creatures otherwise immune to mind-influencing magic.

Caster Level: 4th; **Prerequisites:** Craft Magic Arms and Armor, *random action*; **Market Price:** 30,300 gp; **Cost to Create:** 15,300 gp + 1,200 XP.

Soldier's Rest: The magical properties of this +1 *glaiive* are a great boon to anyone engaging in long marches, protracted battles, or other extended physical exertion. While holding *soldier's rest*, the wielder ignores the effects of fatigue. Anytime the wielder becomes fatigued, he does not take the penalties associated with the condition. Although helpful, *soldier's rest* does not allow unending exertion. If the character becomes exhausted, he takes the normal penalties associated with that condition.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *endurance*; **Market Price:** 4,808 gp; **Cost to Create:** 2,558 gp + 180 XP.

Songblade: Every move made with this +1 *rapier* fills the air with sweet sounds. While holding *songblade* unsheathed, the sword's wielder gains a +2 enhancement bonus on Perform checks. A bard wielding the *songblade* may use his bardic music abilities one additional time per day. The blade is scored in a beautiful, intricate pattern, and air moving across this magic etching generates the music of the *songblade*. Thus, the blade's musical qualities do not function underwater, in a vacuum, or in other environments where air cannot freely pass over the blade.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, creator must have the bardic music ability, *sculpt sound*; **Market Price:** 6,400 gp; **Cost to Create:** 3,360 gp + 243 XP.

Sorcerer's Hand: The stock of this +2 *light crossbow* has been carved to resemble a humanoid forearm ending in a closed hand with two outstretched fingers.

Despite its unusual appearance, this crossbow is a potent tool for casting ray spells. If held and used as an additional arcane focus when casting a ray spell, the spell's effective caster level is increased by 1. This increase affects all aspects of the spell, including damage, range, and duration. Furthermore, the *sorcerer's hand* grants a +2 enhancement bonus on attack rolls for rays.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, any ray spell; **Market Price:** 18,335 gp; **Cost to Create:** 9,335 gp + 720 XP.

Spear of Impaling: The barbed head of this +2 *long-spear* holds foes fast once they have been run through. After a successful critical hit, the wielder of a *spear of impaling* may make a grapple attempt as a free action. If this grapple attempt succeeds, the wielder may then make a pin attempt as part of the same action. Grapples and pins caused by a *spear of impaling* can be broken normally. If a foe is grappled in this manner, but not pinned, the wielder can use subsequent attacks to attempt to deal damage or initiate a pin. Opponents grappled by a *spear of impaling* can make an opposed grapple check to break the pin and escape the grapple, but not to deal damage or initiate pins of their own.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *hold person*; **Market Price:** 32,305 gp; **Cost to Create:** 16,305 gp + 1,280 XP.

Spear of the Hunt: This shaft of this light +1 *bane (animal)* *shortspear* is eternally fresh, appearing to be newly cut wood. The spear is tipped with a bone point rather than metal, but its magic ensures that it is no less effective than a typical spear. When outdoors, the *spear of the hunt* grants its wielder the Track feat, if the wielder does not already have it. The spear grants no bonus on Wilderness Lore or Search checks.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, creator must have the Track feat; **Market Price:** 28,302 gp; **Cost to Create:** 14,302 gp + 1,120 XP.

Spear of Skirmishing: This +2 *returning halfspear* grants its wielder superior speed in combat. Any round in which the wielder throws the *spear of skirmishing*, he may add 10 feet to his speed.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *expeditious retreat*, *telekinesis*; **Market Price:** 32,301 gp; **Cost to Create:** 16,301 gp + 1,280 XP.

Spell Shield Falchion: This +2 *falchion* is particularly effective against spellcasters. Any round in which the wielder takes the total defense action, spells targeting her reflect back at their caster. This ability works exactly as if *spell turning* protecting against seven spell levels. This protection applies only on rounds in which the wielder takes the total defense action and is renewed at the beginning of each such round.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *spell turning*; **Market Price:** 38,708 gp; **Cost to Create:** 19,541 gp + 1,533 XP.

Spider's Nest Bullet: This oddly shaped sling bullet consists of a tightly packed cluster of small spheres rather than one smooth mass. On a successful hit, a *spider's nest bullet* creates a *web*, as the spell from a 7th-level caster, and releases 2d4 Small monstrous spiders. The spiders move through the web freely and swarm over any creatures caught in it. The spiders do not leave the web and are destroyed if it is. The spiders and the web last for 10 minutes.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *summon monster III*, *web*; **Market Price:** 1,057 gp; **Cost to Create:** 532 gp + 42 XP.

Spinning Blade: This +2 *returning throwing scimitar* is ideal for knocking opponents' weapons out of their hands. In addition to making normal attacks, the wielder can make a special ranged disarm attack with the *spinning blade*. This functions exactly like a melee disarm attempt except that it does not provoke an attack of opportunity. The *spinning blade* does nothing to prevent attacks of opportunity that the wielder provokes for other reasons, such as attacking with a ranged weapon while threatened in melee. Ranged disarm attempts with the *spinning blade* incur the normal penalties for range.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *magic stone*, *telekinesis*; **Market Price:** 50,315 gp; **Cost to Create:** 25,315 gp + 2,000 XP.

Staff of Balance: Longer and thinner than most, this +2 *quarterstaff* improves the wielder's sense of equilibrium. Any round in which the wielder holds the *staff of balance* in both hands and does not make a melee attack, the staff grants a +10 enhancement bonus on Balance checks. While holding the staff in this manner, the wielder can move at his full movement rate without incurring penalties on Balance checks made during that round. In addition, the wielder gains a +4 enhancement bonus on Strength checks made to resist being tripped.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *cat's grace*; **Market Price:** 26,600 gp; **Cost to Create:** 13,600 gp + 1,040 XP.

Staff of Discipline: This +2 *lawful quarterstaff* reinforces a monk's martial abilities. While wielding the *staff of discipline*, a monk may make attacks using her better unarmed rate. She can use the *staff of discipline* as a double weapon and still get the benefit of her increased rate of attacks, but she takes all of the normal penalties while doing so.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, creator must be lawful, *order's wrath*; **Market Price:** 50,600 gp; **Cost to Create:** 25,600 gp + 2,000 XP.

Staff of Memory: More the tool of a wizard than a warrior, this sturdy +1 *quarterstaff* can enhance the memory of its wielder. Once per day, the wielder can lose a prepared spell from memory in order to recall

a spell of lower level that she has already cast. The recalled spell is treated exactly as if the spell caster had prepared it normally. Exchanging prepared spells in this manner is a standard action that does not incur an attack of opportunity.

Caster Level: 17th; **Prerequisites:** Craft Magic Arms and Armor, creator must be at least 12th level, *Rary's mnemonic enhancer*; **Market Price:** 32,600 gp; **Cost to Create:** 16,600 gp + 1,280 XP.

Standard of Ulek: Each side of this +2 *mithral dwarven waraxe* is engraved with the red axe symbol of the Principality of Ulek. Dwarves allied with the wielder gain a +1 morale bonus on their attack rolls as long as they stay within 10 feet of the wielder. The wielder does not benefit from the morale bonus.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *bless*; **Market Price:** 23,830 gp; **Cost to Create:** 15,830 gp + 640 XP.

Stirge Bolt: These +3 *bolts* are hollow tubes designed to draw out the blood of the target. Each has a metal tip, hollow like the rest of the bolt, with thin flanges molded to look like the double wings of a stirge. The round after a successful hit, the bolt begins to drain the target's blood, dealing 1d4 points of temporary Constitution damage each round until destroyed. As a Tiny wooden weapon, each *stirge bolt* has a hardness of 5 and 1 hit point. While draining blood from a target, the bolt has an AC of 12 (+2 size). *Stirge bolts* that miss their targets are consumed.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *poison*; **Market Price:** 1,007 gp; **Cost to Create:** 507 gp + 40 XP.

Stone Spear: Made entirely from magically augmented stone, this +2 *shortspear* weighs 10 pounds. Because of its weight and unwieldy nature, the *stone spear* has a range increment of only 10 feet. A *stone spear* deals double damage against any creatures with the Air subtype on a successful hit. If a wielder standing on the ground uses a ready action to set the *stone spear* against a charge, it deals triple rather than double damage.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *wall of stone*; **Market Price:** 32,302 gp; **Cost to Create:** 16,302 gp + 1,280 XP.

Summoning Arrow: The head of a *summoning arrow* is sculpted to look like a bird of prey, and the fletching is always made of feathers from the same bird. When launched from a bow, a *summoning arrow* transforms into an eagle (see the Animals section of the *Monster Manual*) and attacks the foe that the arrow was fired at. If not launched at a specific target, a *summoning arrow* turns into an eagle when it's 30 feet away from the wielder, then attacks the nearest creature. The eagle remains for 5 rounds or until slain, whichever comes first. After 5 rounds, the eagle flies away. It does not return to arrow form.

Caster Level: 5th; **Prerequisites:** Craft Magic Arms and Armor, *summon monster I*; **Market Price:** 257 gp; **Cost to Create:** 132 gp + 10 XP.

Sword of Avoidance: Also called the coward's sword, this +3 *longsword* grants its wielder a better chance to avoid mishaps of all kinds. Whenever the wielder takes the total defense action while holding the *sword of avoidance*, he gains a +4 luck bonus to AC and on all saving throws. This bonus lasts until the beginning of the wielder's next turn.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *bless*; **Market Price:** 38,315 gp; **Cost to Create:** 19,315 gp + 1,520 XP.

Sword of Countering: This +1 *longsword* is feared by spellcasters for its ability to disrupt their spells. Three times per day, a *sword of countering* can use *dispel magic* to counterspell, as the spell from a 13th-level caster. The *sword of countering* is incapable of dispelling existing effects.

Caster Level: 13th; **Prerequisites:** Craft Magic Arms and Armor, *dispel magic*; **Market Price:** 33,905 gp; **Cost to Create:** 17,110 gp + 1,344 XP.

Sword of Crypts: The blade of this elegant +2 *holy longsword* is inscribed with runes and symbols sacred to the clergy of Heironeous. While holding the *sword of crypts*, a cleric gains one extra turn undead attempt per day. In addition, if the wielder is a cleric of Heironeous, the sword provides a +2 enhancement bonus on the wielder's turn damage on all attempts to turn undead.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, creator must be good, *holy smite*; **Market Price:** 42,315 gp; **Cost to Create:** 21,315 gp + 1,680 XP.

Sword of the Diplomat: The gold hilt of this +3 *defending short sword* is elaborately carved to resemble the folded wings of a bird. The possessor of this ornate blade is shielded by a constant aura of magical force. This force effect functions exactly like a permanent version of the *mage armor* spell, providing a +4 armor bonus to the possessor's AC. Like the *mage armor* spell, this bonus applies to incorporeal attacks.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *mage armor*, *shield*; **Market Price:** 64,310 gp; **Cost to Create:** 32,310 gp + 2,560 XP.

Sword of Escape: This +2 *short sword* allows its user to escape almost any confining situation. For up to 10 rounds per day, the wielder can act normally regardless of magical effects that impede movement. This power is similar to the granted power of the Travel domain in that the effect occurs automatically as soon as it applies, lasts until it runs out or is no longer needed, and can operate multiple times per day up to the total daily limit of rounds. In addition, when used against a creature or object holding the wielder, the *sword of escape* grants an additional +1 bonus on attack and damage. The *sword of escape* can be used to attack in a grapple even

if it is not a light weapon for the wielder (see Grapple in Chapter 8 of the *Player's Handbook*).

Caster Level: 10th; *Prerequisites:* Craft Magic Arms and Armor, *freedom of movement*; *Market Price:* 88,310 gp; *Cost to Create:* 44,155 gp + 3,532 XP.

Sword of Graceful Strikes: This +3 *short sword* allows graceful wielders to deal extra damage based on agility, not brute force. All melee attacks made with the *sword of graceful strikes* add the wielder's Dexterity modifier to damage rather than his Strength modifier. Furthermore, an unsuccessful disarm attempt made with the *sword of graceful strikes* does not allow the target a chance to disarm the wielder.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *Tenser's transformation*; *Market Price:* 72,310 gp; *Cost to Create:* 36,310 gp + 2,880 XP.

Sword of Judgment: This +2 *lawful longsword* prevents those near it from lying. Up to three times per day, the wielder may utter a command word and cause the sword to emit a *zone of truth*. Creatures coming within 25 feet of the *sword of judgment* must succeed on a Will save (DC 13) or be unable to speak any deliberate and intentional lie.

Caster Level: 13th; *Prerequisites:* Craft Magic Arms and Armor, creator must be lawful, *order's wrath*, *zone of truth*; *Market Price:* 43,115 gp; *Cost to Create:* 21,715 gp + 1,712 XP.

Sword of the Mammoth: This +2 *greatsword* grants its wielder an enhanced ability to withstand blows. Anyone holding a *sword of the mammoth* gains 6 temporary hit points. These hit points are added to the wielder's maximum and current totals. Unlike other temporary hit points, the bonus hit points supplied by the *sword of the mammoth* are not lost first. Instead, should the wielder ever lose hold of the sword, the hit points are subtracted from both his maximum and current total. The only way to regain these hit points in such a situation is to regain the sword.

Caster Level: 11th; *Prerequisites:* Craft Magic Arms and Armor, *endurance*; *Market Price:* 18,350 gp; *Cost to Create:* 9,350 gp + 720 XP.

Sword of Opportunity: This +2 *longsword* allows its wielder to take advantage of openings in its opponent's defenses. A *sword of opportunity* grants its wielder the ability to make one additional attack of opportunity per round. This ability stacks with the Combat Reflexes feat, but any condition that would prevent that feat from being used also prevents the additional attack of opportunity from the sword.

Caster Level: 6th; *Prerequisites:* Craft Magic Arms and Armor, *cat's grace*; *Market Price:* 18,315 gp; *Cost to Create:* 9,315 gp + 720 XP.

Sword of Readiness: The wielder of this +2/+2 *two-bladed sword* can anticipate foes' movements and attack accordingly. When readying an action to attack

with the *sword of readiness*, the wielder can ready a full attack action. The wielder can do nothing else in the turn she readies the action.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *haste*; **Market Price:** 36,700 gp; **Cost to Create:** 18,700 gp + 1,440 XP.

Sword of Retribution: This +3 *bastard sword* allows the wielder to return blows against successful attackers. Whenever the wielder is wounded in melee combat, the *sword of retribution* adds a +2 morale bonus on both the attack and damage rolls of the wielder's next attack, as long as that attack is directed against the opponent who damaged him. The bonus lasts for only 1 round after the wielder is struck, and it is lost if the wielder does not attack that foe with his next attack action. If more than one foe strikes the wielder in melee combat in a round, the bonus applies only to attacks against the source of his most recent injury.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, *righteous might*; **Market Price:** 72,335 gp; **Cost to Create:** 36,335 gp + 2,880 XP.

Sword of Sanctuary: A +2 *longsword*, the *sword of sanctuary* offers its wielder temporary protection when in battle. Once per day, the *sword of sanctuary* can create a *sanctuary* effect centered on the sword (as the spell heightened to 3rd level by a 5th-level caster). While protected by the sword's *sanctuary*, any opponent attempting to attack the wielder must succeed on a Will save (DC 14) to do so. In addition, the sword can cast an *obscuring mist* spell once per day (heightened to 3rd level by a 5th-level caster). If the wielder drops or otherwise loses possession of the *sword of sanctuary*, these effects cease to function.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, *obscuring mist*, *sanctuary*; **Market Price:** 19,115 gp; **Cost to Create:** 9,715 gp + 752 XP.

Sword of the Solars: This awesome weapon is a Large +5 *dancing vorpal bastard sword*. It always shines light equivalent to a torch (20-foot radius). This weapon's high effective enhancement bonus makes it an epic weapon, beyond the reach of most player characters. The *Epic Level Handbook* has rules for creating such weapons.

Caster Level: 18th; **Prerequisites:** Craft Magic Arms and Armor, Craft Epic Magic Arms and Armor, *animate objects*, *death spell*, *keen edge*; **Market Price:** 3,920,335 gp; **Cost to Create:** 1,960,335 gp + 49,200 XP.

Sword of Versatility: As a move-equivalent action that does not provoke an attack of opportunity, the wielder can transform this +2/+2 *two-bladed sword* into two +1 *longswords*. Recombining the swords is also a move-equivalent action. Both halves of the *sword of versatility* function exactly like normal +1 *longswords* when separated from each other.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and

Armor, make whole, shatter; **Market Price:** 36,700 gp; **Cost to Create:** 18,700 gp + 1,440 XP.

Sword of Zeal: This +2 *holy bastard sword* is doubly effective in the hands of a paladin. Attacks with the *sword of zeal* ignore outsiders' damage reduction. In addition, paladins wielding the *sword of zeal* can channel their positive energy from their lay on hands ability through the sword against evil outsiders and undead. When channeling the ability in this way, the paladin can give up points of her daily healing allotment in order to add an equivalent amount of damage to her next attack with the *sword of zeal*. The paladin decides how many points of lay on hands to use in this manner after the attack hits. The attack with the *sword of zeal* is always a regular melee attack, dealing normal damage in addition to the channeled energy from lay on hands. Creatures other than evil outsiders and undead are not affected by the channeled energy.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, creator must be good, *bless weapon*, *holy smite*; **Market Price:** 72,335 gp; **Cost to Create:** 36,335 gp + 2,880 XP.

Thirsting Blade: This +4 *longsword* can dehydrate those it strikes. Whenever the wielder scores a successful critical hit, the *thirsting blade* deals an additional 1d6 points of subdual damage. This damage cannot be recovered unless the victim first imbibes at least 1 quart of water. Creatures who take subdual damage from a *thirsting blade* are also considered fatigued (see Environment in Chapter 3 of the *DUNGEON MASTER'S Guide*). Outsiders and creatures immune to critical hits are immune to this subdual damage.

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *disintegrate*; **Market Price:** 72,315 gp; **Cost to Create:** 36,315 gp + 2,880 XP.

Tourney Lance: This +2 *lawful heavy lance* is prized by any who wish to fight without killing their opponents. If the wielder of the *tourney lance* strikes to deal subdual rather than normal damage, she takes no attack penalty.

Caster Level: 9th; **Prerequisites:** Craft Magic Arms and Armor, creator must be lawful, *hold person*, *order's wrath*; **Market Price:** 50,310 gp; **Cost to Create:** 25,310 gp + 2,000 XP.

Trident of the Depths: This +1 *trident* allows its wielder to move through water with ease. While holding a *trident of the depths*, the wielder can swim at a speed of 30 feet. When submerged in water of any kind, the trident gains an additional +1 bonus on attack and damage. When submerged in ocean water, this bonus increases to +2; the bonus for being underwater stacks with the trident's enhancement bonus.

Caster Level: 6th; **Prerequisites:** Craft Magic Arms and Armor, *water walk*; **Market Price:** 8,315 gp; **Cost to Create:** 4,315 gp + 320 XP.

DM

Truestone Hammer: This utilitarian +2/+1 *gnome hooked hammer* is useful as a tool as well as a weapon. Three times per day, when in contact with an illusion or an object that is the target of an Illusion spell, the hammer can *dispel magic* (as the spell cast by a 15th-level caster, except that it affects only spells from the school of Illusion). Once per day, a *truestone hammer* can be used to cast *stone shape*, as the spell from a 15th-level caster.

Caster Level: 15th; *Prerequisites:* Craft Magic Arms and Armor, *dispel magic*, *stone shape*; *Market Price:* 51,120 gp; *Cost to Create:* 25,870 gp + 2,020 XP.

Twin Blade: Each side of this +3 *guisarme's blade* is etched with the image of a miniscule *guisarme*. Twice per day, the wielder of the *twin blade* can create a *spiritual weapon* (as the spell from an 8th-level caster). The *spiritual weapon* has the +6 attack bonus of an 8th-level cleric, and the wielder of the *twin blade* directs it as a free action. Only one of a *twin blade's* weapon counterparts can be in existence at one time. Creating the second always causes the first to disappear harmlessly.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *spiritual weapon*; *Market Price:* 29,829 gp; *Cost to Create:* 15,069 gp + 1,181 XP.

Vanishing Blade: A *vanishing blade* is a +3 *rapier* that allows its wielder to travel short distances instantaneously. Once per day, after a successful

melee attack, the wielder of the *vanishing blade* may transfer himself instantaneously to any spot within 800 feet. This effect functions exactly as the *dimension door* spell from a 10th-level caster.

Caster Level: 10th; *Prerequisites:* Craft Magic Arms and Armor, *dimension door*; *Market Price:* 47,120 gp; *Cost to Create:* 23,720 gp + 1,872 XP.

Vigilant Halberd: Each side of this +4 *defending halberd* is etched with the faint image of a disembodied eye hovering over an unadorned shield. The *vigilant halberd* is a powerful weapon of good. When a paladin uses her *smite evil* ability and successfully attacks with a *vigilant halberd*, the *smite* deals 2 points of damage per level instead of 1 point of damage per level.

Caster Level: 12th; *Prerequisites:* Craft Magic Arms and Armor, creator must be good, *holy word*, *shield* or *shield of faith*; *Market Price:* 72,310 gp; *Cost to Create:* 36,155 gp + 732 XP.

Viper Whip: This +2 *whip* is made of braided pieces of multicolored leather cut to look like the scaly skin of a snake. On command, the tip of the weapon transforms into the head of a *Tiny viper*. While transformed, the weapon delivers poison with each successful melee attack. The poison deals 1d6 points of temporary Constitution damage (both initial and secondary). Struck opponents must succeed on a Fortitude save (DC 11) to resist

the poison. The weapon can remain transformed for a total of 10 rounds each day, and these need not be consecutive.

Caster Level: 15th; **Prerequisites:** Craft Magic Arms and Armor, *polymorph any object*, *summon nature's ally I*; **Market Price:** 38,301 gp; **Cost to Create:** 19,301 gp + 1,532 XP.

Warrenguard: The hilt of this well-crafted +2 *short sword* has been shaped to resemble a heavily armored gnome soldier standing at attention. Small characters wielding *warrenguard* underground gain a +1 morale bonus on their melee attack damage for each ally within 5 feet. *Warrenguard* also helps its wielder coordinate blows with companions. If the wielder and an ally flank an opponent, the wielder of a *warrenguard* gains a +4 flanking bonus on his attack roll instead of the usual +2 bonus.

Caster Level: 8th; **Prerequisites:** Craft Magic Arms and Armor, *bleed*; **Market Price:** 40,310 gp; **Cost to Create:** 20,310 gp + 1,600 XP.

Weaponeater: This +3 *club* can cause most metal weapons to instantly rust away. In order to activate the rusting ability, the wielder of a *weaponeater* must attack his opponent's weapon. Unless the wielder has the Sunder feat, this provokes an attack of opportunity from the target. If the wielder succeeds in striking a metal weapon in this manner, the target must succeed on a Fortitude save (DC 16) or the struck weapon instantly crumbles to dust. Magic weapons struck in this manner provide a bonus equivalent to their enhancement bonus on their wielder's saving throw. After 50 uses of the rusting ability, a *weaponeater* crumbles to dust itself.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *rusting grasp*; **Market Price:** 58,300 gp; **Cost to Create:** 29,300 gp + 2,320 XP.

Whirling Axe: This +2 *greataxe* gives its wielder the ability to make tremendous, whirling attacks. Once per day, the wielder of a *whirling axe* can make an attack that has a chance of striking all opponents within 5 feet. This functions like the Whirlwind Attack feat and requires a full action. Instead of making his regular attacks, the wielder instead makes one melee attack at his full base attack bonus against each adjacent opponent.

Caster Level: 11th; **Prerequisites:** Craft Magic Arms and Armor, *haste*; **Market Price:** 18,320 gp; **Cost to Create:** 9,320 gp + 720 XP.

Whisperblade: Three times per day, the wielder of this +4 *greataxe* can make a special silent attack. If the attack hits, the target must make a successful Will save (DC 14) or be affected by *silence* (as the spell heightened to 3rd level by a 5th-level caster). If the attack misses, the use is wasted. Otherwise plain, a *whisperblade's* sturdy blade bears stylized dwarven runes that read, "Let dissenting voices be still."

Caster Level: 12th; **Prerequisites:** Craft Magic Arms and Armor, *silence*; **Market Price:** 48,520 gp; **Cost to Create:** 24,420 gp + 1,928 XP.

POTIONS

Potions function like spells cast on the imbiber. A potion, oil, or elixir can be used only once.

Potion of Animal Senses: This murky brown potion smells like the pelt of a wet animal. When imbibed, it grants low-light vision, the scent ability (see Special Qualities in the *Monster Manual*), and +2 circumstance bonus on all Listen checks for 1 hour.

Caster Level: 5th; **Prerequisites:** Brew Potion, creator must be a spellcaster of 5th level; **Market Price:** 380 gp.

Potion of Watery Breath: This aquamarine potion is the opposite of the *fire breath* potion. It grants the drinker the ability to launch massive amounts of water from her mouth, similar to the geyser effect of the *decanter of endless water*. She can breathe water up to three times, creating a 20-foot-long, 1-foot-wide stream of water at 30 gallons per round. The force of this geyser deals 1d4 points of damage against one target, who must make a Strength check (DC 12) to avoid being knocked down. The water also douses most normal fires but has no effect against magical flames. Unused blasts dissipate 1 hour after the potion is consumed. The potion does not allow the drinker to breathe underwater.

Caster Level: 5th; **Prerequisites:** Brew Potion, creator must be a spellcaster of 5th level; **Market Price:** 300 gp.

Elixir Armor

Gnome potionmakers jealously guard the secrets of what they call "elixir armor." Featuring the distilled properties of various animals and vermin found around their homes, these potions grant the drinker a temporary natural armor bonus (and in some cases, other benefits).

Beetle Elixir: *Beetle elixir* causes the drinker's skin to bulk up, darken, and gloss over. Short antennae also sprout from his or her forehead. The drinker gains a +2 natural armor bonus and darkvision up to 60 feet. The effects last for 1 hour.

Caster Level: 6th; **Prerequisites:** Brew Potion, *alter self*, *darkvision*, Alchemy skill; **Market Price:** 8,300 gp.

Electric Eel Elixir: The drinker's skin turns silvery and gains a +1 natural armor bonus. In addition, the drinker's touch deals 1d8+1 points of electricity damage once while the potion is in effect. The drinker gains a +3 circumstance bonus on the touch attack if the target is wearing metal armor. The effects last for 1 hour.

Caster Level: 3rd; **Prerequisites:** Brew Potion, *alter self*, *shocking grasp*, Alchemy skill; **Market Price:** 2,050 gp.

Porcupine Elixir: *Porcupine elixir* toughens the drinker's skin, granting a +1 natural armor bonus. In

addition, hundreds of needle-sharp quills sprout from the drinker's body. These quills deal 1d6 points of piercing damage with a successful grapple attack. The quills sprout through light armor or hide armor, but heavier armors prevent the quills from growing. The effects last for 1 hour.

Caster Level: 3rd; *Prerequisites:* Brew Potion, *alter self*, Alchemy skill; *Market Price:* 2,300 gp.

Rhino Elixir: The drinker's skin thickens and turns gray, granting a +3 natural armor bonus. An unfortunate side effect is that the drinker's vision stops at 30 feet. The effects last for 1 hour.

Caster Level: 9th; *Prerequisites:* Brew Potion, *alter self*, Alchemy skill; *Market Price:* 17,500 gp.

RINGS

A character can effectively wear only two magic rings. A third magic ring doesn't work if the owner is already wearing two.

Alignment Command: Similar in some ways to the mighty *rings of elemental command*, the four varieties of *rings of alignment command* grant the wearer great power over outsiders of a certain alignment. Each appears to be a lesser magic ring until its powers are fully activated, as described in its entry. The four varieties have the following common properties.

- Outsiders with the alignment subtype (Chaotic, Evil, Good, or Lawful) to which the ring is attuned can't attack the wearer, or even approach within 5 feet of her. If the wearer desires, she may forego this protection and instead attempt to charm the outsider (as *charm monster*, Will save DC 17). If the charm attempt fails, however, absolute protection is lost and no further attempts at charming can be made.
- Outsiders with the alignment subtype to which the ring is attuned who attack the wearer (if a *charm* attempt fails) take a –1 penalty on their attack rolls. The ring wearer gains a +2 resistance bonus on saving throws against the creature's attacks. She also gains a +4 morale bonus on all attacks against such creatures. Any weapon she uses bypasses the damage reduction of such creatures, regardless of whether it has a sufficient enhancement bonus to do so.
- The wearer of the ring is able to converse with creatures with the alignment subtype to which her ring is attuned. These creatures recognize that she wears the ring. They show a healthy respect for the wearer if alignments are similar. If alignments are opposed, creatures fear the wearer if she is strong. If she is weak, they hate and desire to slay her. Fear, hatred, and respect are determined by the DM.
- The possessor of a *ring of alignment command* takes a saving throw penalty as follows:

Alignment	Saving Throw Penalty
Chaotic	–2 against lawful spells
Evil	–2 against good spells
Good	–2 against evil spells
Lawful	–2 against chaotic spells

In addition to the powers described above, each specific ring gives its wearer the following abilities according to its alignment.

Chaotic: This ring has the following powers.

- *Random action* (unlimited use)
- *Shatter* (unlimited use)
- *Chaos hammer* (2/day)
- *Dispel law* (1/day)
- *Animate objects* (1/week)

Evil: This ring has the following powers.

- *Bane* (unlimited use)
- *Desecrate* (unlimited use)
- *Unholy blight* (2/day)
- *Dispel good* (1/day)
- *Create undead* (1/week)

Good: This ring has the following powers.

- *Bless* (unlimited use)
- *Aid* (unlimited use)
- *Holy smite* (2/day)
- *Dispel evil* (1/day)
- *Blade barrier* (1/week)

Lawful: This ring has the following powers.

- *Command* (unlimited use)
- *Calm emotions* (unlimited use)
- *Order's wrath* (2/day)
- *Dispel chaos* (1/day)
- *Hold monster* (1/week)

Caster Level: 15th; *Prerequisites:* Forge Ring, *planar ally*, all appropriate spells; *Market Price:* 200,000 gp.

Filcher's Friend: When used, this plain steel ring draws any loose metal object within 1 foot and weighing no more 1 ounce—usually coins and jewelry—toward it. The objects do not have to be ferrous, simply metal in some way. The ring grants a +5 circumstance bonus on Pick Pocket checks involving metal objects.

Caster Level: 12th; *Prerequisites:* Forge Ring, *mage hand*; *Market Price:* 500 gp.

Force Armor: This pair of black iron rings must be worn as a set, one on either hand with no other magic ring, to function. They sheathe their wearer in a field of magical force, granting a +4 armor bonus to AC (as the *mage armor* spell). This sheath is harmful to the touch: Any creature whose bare flesh contacts the wearer takes 1d4 points of damage. The wearer's unarmed strikes gain a +1 enhancement bonus on attacks and deal an additional 1d4 points of damage.

Caster Level: 9th; **Prerequisites:** Forge Ring, *mage armor*, *magic weapon*, *wall of force*; **Market Price:** 45,000 gp.

Greater Counterspelling: This seems to be a ring of spell storing upon first examination. However, while it allows a single spell of 1st through 9th level to be cast into it, that spell cannot be cast out of it again. Instead, should that spell ever be cast upon the wearer, or within 90 feet of the wearer (if the wearer retains line of sight to the caster), the spell is immediately countered, as a counterspell action, requiring no action (or even knowledge) on the wearer's part. Once so used, the spell cast into the ring is gone. A new spell (or the same one as before) may be placed in it again.

Caster Level: 18th; **Prerequisites:** Forge Ring, *spell turning*, *wish*; **Market Price:** 16,000 gp.

Hive Mind: These rings are formed of a brownish-red substance like horn or chitin, resembling the carapace of a formian. A single ring of *hive mind* provides no benefit to its wearer unless another character with another ring of the same kind is within 1 mile. All characters wearing rings of *hive mind* within 1 mile of one another can communicate telepathically among themselves, and their minds mesh in a close joining. If one such character is aware of a particular danger, they all are. If one character in a group is not flat-footed, none of them are. No such character in a group is considered flanked unless all of them are.

Caster Level: 17th; **Prerequisites:** Forge Ring, *Rary's telepathic bond*, *wish*; **Market Price:** 180,000 gp.

Lockpicking: This ring is made up of tiny prongs, wires, and other small devices that spring to life on command. The ring grants a +5 competence bonus on Open Lock checks and can cast *knock* three times a day, as the spell from a 12th-level caster.

Caster Level: 12th; **Prerequisites:** Forge Ring, *knock*; **Market Price:** 7,700 gp.

Magic Fang: While worn, this ring grants one (and only one) of the wearer's natural weapons (bite, slam, fist, and so on) a +1 enhancement bonus on attack and damage rolls.

Caster Level: 12th; **Prerequisites:** Forge Ring, *magic fang*; **Market Price:** 6,000 gp.

Misdirection: This plain silver band is nondescript and unadorned. The wearer is under a continuous *misdirection* effect, redirecting Divination spells that reveal auras cast upon him. Such spells automatically target their caster rather than the ring's wearer.

Caster Level: 3rd; **Prerequisites:** Forge Ring, *misdirection*; **Market Price:** 7,000 gp.

Thunderclaps: This ring is made out of lapis lazuli, with a lightning bolt etched along the rim. Three times per day, the wearer can affect someone with *shocking grasp*. Once per day, this effect can combine with a powerful thunderclap that duplicates the

effects of a *shout* spell. The target must be touched for the *shout* effect to happen. Both of these effects are as the spells from a 7th-level caster.

Caster Level: 12th; **Prerequisites:** Forge Ring, *shocking grasp*, *shout*; **Market Price:** 11,200 gp.

Universal Elemental Resistance, Minor: This ring functions as a ring of minor elemental resistance for all types of energy: fire, cold, electricity, acid, and sonic. Whenever the wearer would normally take such damage, subtract 15 points of damage per round from the amount before applying.

The major version of this ring is an epic magic item described in the *Epic Level Handbook*.

Caster Level: 15th; **Prerequisites:** Forge Ring, *protection from elements*; **Market Price:** 144,000 gp.

RODS

Rods are scepterlike devices that have unique magic powers and do not usually have charges. Anyone can use a rod.

Construct Control: This rod is in the shape of a muscular humanoid carved from a single piece of marble. If the wielder is within 60 feet of a construct with no Intelligence score, the *rod of construct control* allows the bearer to override any commands that the construct might have and replace them with new commands as if the wielder were the creator of that construct (see the Golem entry in the *Monster Manual*). Against constructs with Intelligence scores, the construct must succeed on a Will save (DC 23) or the wielder takes control.

If its creator is within 60 feet, an intelligent construct gains a +4 bonus on the Will save.

Caster Level: 17th; **Prerequisites:** Craft Wondrous Item, *dominate monster*; **Market Price:** 68,850 gp.

Embassy: There are actually many varieties of this item, and they vary so widely in appearance that it is practically impossible to characterize them at all. Each kind of *rod of embassy* is keyed to a different plane of existence, most to a specific Outer Plane. In general, the design and decoration of a given rod is strongly reminiscent of the plane it is keyed to. Thus, a *rod of embassy* keyed to the Seven Mounting Heavens of Celestia is made of precious metals and includes images of archons, while one keyed to the Ever-Changing Chaos of Limbo is almost amorphous, resembling an elongated ooze, though careful examination reveals the likenesses of slaadi lightly etched into its surface.

When a creature carries a *rod of embassy* keyed to its home plane, it is considered to be on that plane for as long as it holds the rod. The creature's type does not change, but it is no longer considered an extraplanar creature. Thus, it cannot be sent away by *banishment* or *dismissal*, or even the powerful *blasphemy*, *dictum*, *holy word*, and *word of chaos* spells.

In addition, it can use similar spells to banish other extraplanar creatures as if it were on its home plane. If a creature holds a *rod of embassy* keyed to a plane that is not that creature's home plane, the rod has no effect.

Caster Level: 9th; **Prerequisites:** Craft Rod, *plane shift*; **Market Price:** 20,000 gp.

Force: This rod is made of black iron, 18 inches long and a half-inch wide. The rod has three functions, any of which can be used, in any combination, five times per day.

- **Blast of Force:** A blast of force projects from the rod with a range of 100 feet. This is a ranged touch attack and deals 10d6 points of damage.
- **Wall of Force:** As the spell.
- **Blade of Force:** A 3-foot-long glowing blade of force springs forth from the rod that lasts for 10 rounds. This can be used as a +1 *brilliant energy longsword*.

Caster Level: 13th; **Prerequisites:** Craft Rod, *magic missile*, *Mordenkainen's sword*, *wall of force*; **Market Price:** 125,000 gp.

Ghost Rod: This ornate scepter is made of bluish glass. Though not suitable for use as a normal melee weapon, it can be used to make a special touch attack against incorporeal creatures. If this touch attack succeeds, the creature takes 2d4 points of damage.

Once per day, the wielder of a *ghost rod* can become incorporeal. This allows the character to harm other incorporeal creatures normally, as well as passing through walls and all the other benefits (and drawbacks) of an incorporeal state, as described in the *DUNGEON MASTER'S Guide*. The character is not ethereal and has no connection to the Ethereal Plane, unlike a true ghost. He can remain incorporeal for a maximum of 15 rounds, after which he becomes fully material again.

Caster Level: 15th; **Prerequisites:** Craft Rod, *plane shift*; **Market Price:** 50,000 gp.

Mimicry: This strange, short rod is crowned with an image of a mynah. When held, its wielder can mimic any voice or sound she has heard. Listeners must succeed on a Will save (DC 17) to detect the ruse.

The wielder also receives a +10 competence bonus on Disguise, Forgery, and Use Magic Device checks, and can use the *ventriloquism* spell at will.

Caster Level: 6th; **Prerequisites:** Craft Rod, *change self*, *ventriloquism*; **Market Price:** 30,000 gp.

Paralysis: This rod is created out of sickly pink coral and topped with spikes like those on a puffer fish. The spikes constantly produce an exotic venom that has paralytic qualities. These rods are commonly created by kuo-toas, who are immune to the effects they produce.

Anyone struck by the rod must succeed on a Fortitude save (DC 25) or be paralyzed for 1d4 rounds. The wielder can also expend a charge to cast *hold person* and *hold animal* twice per day and *hold monster* once

per day (as the spells from a 9th-level caster). The rod holds 50 charges for the spells, but the poison lasts indefinitely.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *hold monster*, *hold person*; **Market Price:** 22,000 gp.

Tentacle Rod: This rod comes in two varieties, greater and lesser. Each appears to be a long, sinuous rod of unknown (but presumably organic) composition. The lesser rod ends in three "branches," while the greater has six.

Upon command, these branches animate and grapple like tentacles, using their own attack bonus (including the rod's +3 enhancement bonus) rather than the wielder's bonus. The rod's attacks count as a standard action for the wielder.

The tentacle attacks follow all the normal rules for grapple attacks, with two exceptions: These attacks don't incur attacks of opportunity, and the wielder need not move into the target's space to maintain the grapple. The tentacle, not the wielder, is considered to be the grappler (and the wielder doesn't suffer any of the drawbacks of grappling). Treat the rod as a Medium-size creature for purposes of the special size modifier to the grapple check.

Each rod also has one or more special powers that affect any target touched by three (or six) of its tentacles in the same round (regardless of whether the tentacles actually grapple the target).

Rod of Embassy

If all three of the *lesser rod's* tentacles touch a target, it must succeed on a Fortitude save (DC 14) or be affected by a *slow* spell for 12 rounds. If any three of the *greater rod's* tentacles touch a single target, it must succeed on a Will save (DC 14) or be affected by a *bestow curse* spell (a permanent -4 enhancement penalty on attacks, saves, and checks). If all six of the *greater rod's* tentacles touch a single target in the same round, the victim must succeed on a Fortitude save (DC 17) or take 1 point of permanent Dexterity drain.

Each tentacle has hardness 10, 20 hp, and a break DC of 30.

Rod	Number of Attacks	Attack Bonus/ Grapple Check ¹	Damage*	Str
Lesser	3	+9	6 points	16
Greater	6	+15	9 points	22

¹ These numbers include the rod's Strength bonus.

Caster Level: 12th; **Prerequisites:** Craft Rod, *animate objects*, *bestow curse* (greater rod only), *Evard's black tentacles*, *slow* (lesser rod only); **Market Price:** 21,000 gp (lesser rod) or 57,000 gp (greater rod).

Tracking: These two identical copper rods are a foot long and topped with a smooth clear crystal. Taking a full action and doing nothing else, the wielder can determine the exact distance and direction of the other rod. By spending another full action, the wielder can determine if the rod is being held by a creature and what that creature's current physical status is (alive and healthy, injured, dying, or unconscious). It does not determine the mental status (dazed, stunned, and the like) or any magical effects (such as *charmed* or *dominated*).

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *locate creature*, *status*; **Market Price:** 37,800 gp.

Trees: This wooden rod resembles a small staff of the woodlands, having a shape that suggests natural growth. It can be used as a melee weapon as if it were a cudgel with *shillelagh* cast upon it: It strikes with a $+1$ enhancement bonus on attack and damage rolls and deals 1d10 points of damage ($+1$ for its enhancement bonus). It also grants its wielder a $+5$ natural armor bonus.

The wielder of a *rod of trees* can animate trees as a treant. She can animate trees within 180 feet, controlling up to two trees at a time and no more than two trees per day. It takes a full round for a normal tree to uproot itself. Thereafter it moves at a speed of 10 feet and otherwise fights as a treant in all respects. The ability is otherwise similar to *liveoak* from a 12th-level caster.

Caster Level: 12th; **Prerequisites:** Craft Rod, *barkskin*, *liveoak*, *shillelagh*; **Market Price:** 120,000 gp.

Warning: This slender, 4-foot-long rod breaks down into four separate sections. When all four of these sections are planted at least halfway into the

ground, they cast *alarm* and *detect scrying* as from a 9th-level caster. The area is defined by the location of the rods and is, in theory, unlimited. In practice, however, most users find a 300-foot diameter to be the largest useful area. The *alarm* lasts until the person who placed a section removes it. If anyone other than that person removes a section, then the *alarm* automatically triggers. The user can also choose what does not trigger the alarm, such as creature type, specifying size from Fine to Gargantuan.

Caster Level: 9th; **Prerequisites:** Craft Rod, *alarm*, *detect scrying*; **Market Price:** 58,000 gp.

STAFFS

A staff is a long, wooden spell storage device. It has 50 charges when created.

Artisan: This staff is extremely well crafted, covered with gold leaf and images of artisans at work. The *staff of the artisan* allows use of the following spells:

- *Minor creation* (1 charge)
- *Major creation* (1 charge)
- *Fabricate* (1 charge)
- *Mending* (1 charge)

Caster Level: 12th; **Prerequisites:** Craft Staff, *fabricate*, *mending*, *minor creation*, *major creation*; **Market Price:** 69,800 gp.

Assassin's Staff: This slender, unadorned wooden staff is shorter than usual for staffs, only 4 feet long, and it has a leather strap attached, making it easy to sling over the shoulder. It allows use of the following spells:

- *Obscuring mist* (1 charge)
- *Pass without trace* (1 charge)
- *Improved invisibility* (2 charges)
- *Poison* (2 charges, DC 16)

Caster Level: 7th; **Prerequisites:** Craft Staff, *improved invisibility*, *obscuring mist*, *pass without trace*, *poison*; **Market Price:** 24,000 gp. This price assumes the staff is made by an assassin.

Cacophony: Though elegantly carved, this wooden staff depicts violent and contorted images of screaming faces and figures clutching their ears. Favored by evil or wantonly chaotic bards, it allows use of the following spells:

- *Shatter* (1 charge, DC 13)
- *Sound burst* (1 charge, DC 13)
- *Tasha's hideous laughter* (1 charge, DC 13)
- *Sculpt sound* (1 charge, DC 14)
- *Shout* (1 charge, DC 16)

Caster Level: 10th; **Prerequisites:** Craft Staff, *sculpt sound, shatter, shout, sound burst, Tasha's hideous laughter*; **Market Price:** 60,000 gp.

Creation: This wooden staff is about 5 feet long. One end is forked and the other forms a graceful hook, making it resemble certain scepters of office or symbols of authority. It allows use of the following spells:

- *Create food and water* (1 charge)
- *Minor creation* (1 charge)
- *Major creation* (2 charges)

Caster Level: 9th; **Prerequisites:** Craft Staff, *create food and water, major creation, minor creation*; **Market Price:** 45,000 gp.

Destruction: This 6-foot-long staff is made of cracked white marble. Despite its appearance, however, the staff is curiously light and solid. The staff shatters into a thousand pieces as soon as all the charges are used up. It allows use of the following spells:

- *Shatter* (1 charge, DC 13)
- *Disintegrate* (1 charge, DC 20)
- *Earthquake* (2 charges)

Caster Level: 15th; **Prerequisites:** Craft Staff, *disintegrate, earthquake, shatter*; **Market Price:** 98,500 gp.

Fallen: This is a heavy black iron staff, fairly short, and decorated with images of demonic faces and leering skulls. Usually made by blackguards, the *staff of the fallen* allows use of the following spells:

- *Doom* (1 charge, DC 11)
- *Shatter* (1 charge, DC 13)
- *Contagion* (2 charges, DC 14)
- *Summon monster IV* (evil creatures only, 2 charges)

Caster Level: 7th; **Prerequisites:** Craft Staff, *contagion, doom, shatter, summon monster IV*, creator must be evil; **Market Price:** 24,000 gp. This price assumes the staff is made by a blackguard.

Fellowship: This staff is a smooth shaft of gleaming steel engraved with the word "peace" in many languages. It allows use of the following spells:

- *Calm emotions* (1 charge, DC 11)
- *Shield other* (1 charge)
- *Status* (1 charge)
- *Rary's telepathic bond* (1 charge)
- *Heroes' feast* (2 charges)

Caster Level: 11th; **Prerequisites:** Craft Staff, *calm emotions, heroes' feast, Rary's telepathic bond, shield other, status*; **Market Price:** 80,000 gp.

Glorious: Formed of glass and crowned with a golden sunburst, a *staff of glory* is awe-inspiring, though dreaded by creatures of darkness. It allows use of the following spells:

- *Daylight* (1 charge)
- *Searing light* (1 charge, DC 14)
- *Holy smite* (1 charge, DC 16)
- *Sunbeam* (2 charges, DC 20)

Caster Level: 13th; **Prerequisites:** Craft Staff, *daylight, holy smite, searing light, sunbeam*; **Market Price:** 80,000 gp.

Goblin Lord: This shabby-looking and gnarled staff is topped with a rat skull. It grants a +2 enhancement bonus to Charisma in the hands of a goblin or orc. A *staff of the goblin lord* allows use of the following spells:

- *Protection from law* (1 charge)
- *Confusion* (1 charge, DC 16)
- *Unholy blight* (1 charge, DC 16)

Magic Items that Grant Feats

Pricing feats for magic items is a very fuzzy area. If a feat is purely mechanical, such as Great Fortitude, default to the rules in the *DUNGEON MASTER'S Guide* with an adjustment for the fact that the bonus has no type. For instance, the *belt of endurance* grants Great Fortitude, which adds a +2 bonus on all Fortitude saves. A +2 resistance bonus on all saves would cost 4,000 gp. It shouldn't be more or as economical to buy bonuses to all saves separately, so a +2 bonus on Fortitude saves alone should cost 2,000 gp. If the bonus has no type assigned to it, you could double or even triple that.

Metamagic feats should adjust the level of the spells to which they apply, and thus change the price. While this is still a matter of judgment, consider increasing all the spell levels by +1 if the item affects spells of 0–3rd level, by +2 if the item affects spells of 0–6th level, and by +4 if the item affects spells of any level.

A general guideline for other kinds of feats is that they cost 10,000 gp, plus another 5,000 gp to 10,000 gp per prerequisite.

Caster Level: 12th; **Prerequisites:** Craft Staff, *confusion*, *protection from law*, *unholy blight*; **Market Price:** 26,625 gp.

Liberation: Appearing to be little more than a rustic walking-stick, this staff allows use of the following spells:

- *Remove fear* (1 charge)
- *Remove paralysis* (1 charge)
- *Remove curse* (1 charge)
- *Freedom of movement* (2 charges)
- *Break enchantment* (2 charges)

Caster Level: 9th; **Prerequisites:** Craft Staff, *break enchantment*, *freedom of movement*, *remove curse*, *remove fear*, *remove paralysis*; **Market Price:** 45,000 gp.

Madness: This staff is formed of wildly twisting and entangled rods of iron. It allows use of the following spells:

- *Random action* (1 charge, DC 11)
- *Confusion* (1 charge, DC 16)
- *Insanity* (2 charges, DC 20)
- *Weird* (2 charges, DC 23)

Caster Level: 17th; **Prerequisites:** Craft Staff, *confusion*, *insanity*, *random action*, *weird*; **Market Price:** 110,000 gp.

Righteousness: Made of elegantly shaped mithral, this staff is a badge of purity and righteousness. It allows use of the following spells:

- *Divine favor* (1 charge)
- *Prayer* (1 charge)
- *Dispel evil* (1 charge)
- *Holy sword* (2 charges)

Caster Level: 7th; **Prerequisites:** Craft Staff, *dispel evil*, *divine favor*, *holy sword*, *prayer*; **Market Price:** 34,000 gp.

Sacred Fire: Almost indistinguishable from a *staff of fire*, this staff usually incorporates a deity's holy symbol into its design, often the leafy face of Obad-Hai. It allows use of the following spells:

- *Flame strike* (1 charge, DC 16)
- *Fire storm* (2 charges, DC 20)

Caster Level: 13th; **Prerequisites:** Craft Staff, *fire storm*, *flame strike*; **Market Price:** 60,000 gp. This price assumes the staff is created by a druid.

Spider: The *staff of the spider* is made from black hardwood and etched with silver web patterns. It allows the use of the following spells:

- *Spider climb* (1 charge)
- *Web* (1 charge, DC 13)

- *Summon swarm* (spiders only, 1 charge)
- *Poison* (1 charge, DC 16)
- *Insect plague* (2 charges, DC 17)

Caster Level: 12th; **Prerequisites:** Craft Staff, *insect plague*, *poison*, *spider climb*, *summon swarm*, *web*; **Market Price:** 42,600 gp.

Undying Staff: This staff is constructed from humanoid bones wired together into a single piece. It allows use of the following spells:

- *Animate dead* (1 charge)
- *Create undead* (2 charges)

Caster Level: 12th; **Prerequisites:** Craft Staff, *animate dead*, *create undead*; **Market Price:** 27,375 gp.

WONDROUS ITEMS

Wondrous items can be configured to do just about anything from create a breeze to improve ability scores.

Armband of Reduction: This metal armband allows its wearer to reduce his height to one-half normal, as if a *reduce* spell had been cast upon him. This effect functions once per day, lasts for 2 hours, and may be dismissed at will by the wearer.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *reduce*; **Market Price:** 2,000 gp; **Weight:** 1 lb.

Bag of Endless Caltrops: This nondescript leather pouch creates an endless supply of caltrops. The owner can reach into the pouch and pull out handful after handful. It takes one standard action to fill a 5-foot square by hand. If the pouch is dumped out (as a partial action), it produces the equivalent of a 2-pound unit, but does not produce any more caltrops at all for 2 whole rounds.

The caltrops produced are not magical and follow all the rules for normal caltrops (see Chapter 7 of the *Player's Handbook*).

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *Leomund's secret chest*; **Market Price:** 2,300 gp; **Weight:** —.

Banner of Valor: Made from bright silks, gold thread, and other flashy materials, the *banner of valor* bolsters the spirits of all friendly troops that gaze upon it. The banner holder can *remove fear* at will on chosen creatures within a 20-foot radius. In addition, the holder can produce a *healing circle* three times a day. All these effects are as the spells from a 9th-level caster.

Caster Level: 8th; **Prerequisites:** Craft Wondrous Item, *healing circle*, *remove fear*; **Market Price:** 61,000 gp; **Weight:** 10 lb.

Belt of Endurance: This belt is made of numerous thin but solid chains and a large iron buckle. The *belt of endurance* grants a +2 enhancement bonus to the

Bracers of Armor and Armor Special Abilities

A character who has the Craft Magic Arms and Armor and Craft Wondrous Item feats, as well as *mage armor* and all the other prerequisites necessary, can add the armor special abilities shown on Table 8–6 in the *DUNGEON MASTER'S Guide* to a set of *bracers of armor*. The cost is the same as for adding a special ability to normal armor: an increase in the effective bonus of the bracers. Just as magic armor can never exceed a +8 enhancement bonus, *bracers of armor* never provide more than a +8 armor bonus. However, special abilities can increase the effective bonus as high as +13 (*bracers* +8 with an ability valued at +5, such as heavy fortification).

The market prices for *bracers of armor* with an effective bonus higher than +8 are as follows: 81,000 gp (+9), 100,000 gp (+10), 121,000 gp (+11), 144,000 gp (+12), 169,000 gp (+13). Any special ability that can be added to armor can be added to *bracers of armor*. Armor qualities with a cost expressed in gp rather than an effective bonus can be added to bracers for the same price.

If you are using the *Epic Level Handbook*, characters with Craft Epic Magic Arms and Armor and Craft Epic Wondrous Item can create *bracers of armor* with a higher effective bonus than +13. To calculate the market price for such items, square the total effective bonus and multiply the result by 10,000 gp.

wearer's Constitution score, and she gains the Great Fortitude feat while she wears the belt.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *righteous might*; **Market Price:** 10,000 gp; **Weight:** 1 lb.

Blindfold of True Darkness: This black, silky blindfold grants the blind-sight ability with a range of 60 feet (see Special Qualities in the *Monster Manual*). Because the wearer's eyes are protected, he is also immune to gaze attacks, spells, or effects that rely on sight. Wearing the blindfold takes up the same space as goggles. The wearer cannot use vision in any way while wearing the blindfold.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *see invisibility*; **Market Price:** 9,000 gp; **Weight:** —.

Bracers of Exit: These bracers each bear a crude design of a square bisected by an arrow. The wearer can negate one *dimensional anchor* effect per day.

Caster Level: 7th; **Prerequisites:** Craft Wondrous Item, *dimensional anchor*; **Market Price:** 11,200 gp; **Weight:** 1 lb.

Boots of the Mountain King: These rugged and worn iron-shod boots allow full movement in rocky, rugged, or mountain terrain (see Movement in Chapter 9 of the *Player's Handbook*), including bad or very bad surfaces. The wearer can also cast *stoneskin* on herself twice per day, as the spell from a 12th-level caster.

Caster Level: 12th; **Prerequisites:** Craft Wondrous Item, *freedom of movement*, *stoneskin*; **Market Price:** 48,810 gp; **Weight:** 1 lb.

Boots of the Sea: These are knee-high boots made from fine sharkskin. The wearer can *water walk* and cast *water breathing* on himself at will. The wearer also gains a +10 competence bonus on Swim checks.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *water breathing*, *water walk*; **Market Price:** 56,500 gp; **Weight:** 1 lb.

Boots, Steadfast: These thick and heavy iron-toed boots help keep the wearer from getting knocked down.

Someone wearing *steadfast boots* cannot be tripped or pushed back by a bull rush. As long as the wearer carries a melee weapon that is Medium-size or larger, she also counts as being set against a charge. The weapon does not have to have reach.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *bull's strength*; **Market Price:** 6,000 gp; **Weight:** 1 lb.

Boots of Tracklessness: These pale green boots are slim and elegant, with perfectly smooth soles. They grant *pass without trace* to the wearer and can cast *improved invisibility* (wearer only) three times per day.

Caster Level: 7th; **Prerequisites:** Craft Wondrous Item, *improved invisibility*, *pass without trace*; **Market Price:** 33,500 gp; **Weight:** 1 lb.

Boots of Woodland Striding: These durable boots feel amazingly light when picked up. The boots allow full movement in forest or jungle terrain, including moderate or heavy obstruction (see Movement in Chapter 9 of the *Player's Handbook*). In addition, the wearer can *detect snares and pits* at will and *tree stride* once per day, as the spells from a 12th-level caster.

Caster Level: 12th; **Prerequisites:** Craft Wondrous Item, *detect snares and pits*, *tree stride*; **Market Price:** 23,600 gp; **Weight:** 1 lb.

Candle of Icy Death: This black candle is 1 foot tall, 12 inches thick, and icy to the touch. When lit, the flame burns a pale blue, gives off no smoke or heat, and doesn't melt down. If examined with *detect magic*, the candle radiates a necromantic aura. Every minute that the candle burns reduces the temperature by 1° in a 20-foot-diameter area until 0° Fahrenheit is reached.

Bracers of Armor
with Lightning
Resistance

In addition, the candle prevents any healing, natural or magical, from occurring in its range. A wounded creature inside the area does not regain any lost hit points, and *cure* spells targeting a creature inside the area automatically fail (but are considered cast). Once lit, the candle can be snuffed only by a *bless* spell. The temperature of the area returns to the regular temperature at a normal rate.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *enervation*, *fire shield*; **Market Price:** 34,800 gp; **Weight:** 1 lb.

Choker of Eloquence: Coveted by bards, singers, and public speakers, this beautiful piece of jewelry is carved from ivory and jade. There are two versions of these chokers. The *lesser choker of eloquence* grants a +5 competence bonus on Diplomacy, Innuendo, Bluff, and Perform (vocal only) checks. The *greater choker of eloquence* increases the bonus to +10.

Caster Level: 6th; **Prerequisites:** Craft Wondrous Item, creator must be a spellcaster of 6th level; **Market Price:** 1,500 gp (*lesser*), 6,000 gp (*greater*); **Weight:** —.

Cinders of the Inferno: This tiny iron box contains a small bit of ash and cinders. When dumped into a flame at least as big as an average campfire, the cinders cause the fire to flare and sputter dramatically.

In 1d4+1 rounds, an equal number of Small fire elementals leap from the fire. The elementals are not under any control, although they can be controlled later through *charm monster* or other magic. They attack the nearest creature or creatures, continuing their rampage until destroyed or banished.

Caster Level: 17th; **Prerequisites:** Craft Wondrous Item, *elemental swarm*; **Market Price:** 7,650 gp; **Weight:** —.

Clasp of the Elder: Forged by dwarven artisans, this clasp is meant to be worn around a beard. It is carved from pure gold and studded with brilliant gems.

If the wearer is a nondwarf, the clasp only grants a +1 competence bonus on Diplomacy checks. If a dwarf wears the clasp around the beard, it grants a +2 enhancement bonus to the wearer's Wisdom score, and a +5 competence bonus on Diplomacy and Intimidate checks.

Caster Level: 10th; **Prerequisites:** Craft Wondrous Item, creator must be a dwarf, creator must be a spellcaster of 10th level; **Market Price:** 6,000 gp; **Weight:** —.

Cloak of Shelter: This plain but sturdy-looking cloak provides excellent protection against wind, cold, sun, and rain. On command, the cloak turns itself into a 4-person tent. This tent includes an *alarm* spell (as if cast by a 7th-level sorcerer) but is otherwise normal. Once per day, the cloak can turn into a small lodge, as *Leomund's secure shelter*.

Caster Level: 7th; **Prerequisites:** Craft Wondrous Item, *alarm*, *Leomund's secure shelter*; **Market Price:** 12,080 gp; **Weight:** 1 lb.

Coin of Eternal Rest: A raised skull adorns both sides of this otherwise featureless copper coin. When placed in the mouth of a corpse, the coin prevents it from being *raised*, *resurrected*, or turned into undead of any sort. Vermin and undead avoid a corpse bearing this coin, but they can overcome the aversion with a successful Will check (DC 20). The coin does not work in the mouth of a living or undead being.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *gentle repose*; **Market Price:** 6,000 gp; **Weight:** —.

Dimensional Chalk Holder: This small, elaborately carved silver tube is designed to hold a single piece of normal chalk. On mental command, the user can "draw" in the air, which leaves behind a vibrant blue line of crackling energy. Once a complete circle has been formed, the enclosed space suddenly disappears, creating a *gate* to wherever the user wishes. It only allows the planar travel aspect of the *gate* spell, not the ability to call forth creatures.

The item allows its user to draw only a circle. The user can feel it resisting anything but a curved line. There is no size limit to the circle, but it must be completely drawn in 1 full round to create the *gate*.

The *dimensional chalk holder* can draw 1d4+1 *gates* before crumbling into dust. Drawing a line counts as one use, regardless of whether a complete circle was made or not.

Caster Level: 17th; **Prerequisites:** Craft Wondrous Item, *gate*; **Market Price:** 22,950 gp; **Weight:** —.

Dragonfly Medallion: This silver dragonfly-shaped medallion is covered with precious gems. It grants the Improved Initiative feat while worn. If the wearer already has this feat, it grants an additional +1 competence bonus on Initiative rolls.

Once per day, the medallion can transform into a Large dragonfly to attack at the command of its owner. The owner can give mental commands to the dragonfly from up to 200 feet away. If the dragonfly is slain in its vermin form, then the medallion is destroyed as well. If the owner is killed, knocked unconscious, or taken out of range while the medallion is in dragonfly form, it converts back into a medallion immediately.

➤ **Giant Dragonfly:** CR 1; Large vermin; HD 3d8+3; hp 16; Init +1; Spd 20 ft., fly 60 ft. (good); AC 14 (touch 10, flat-footed 13); Atk +5 melee (1d8+6, bite); Face/Reach 5 ft. by 10 ft./5 ft.; SQ Vermin, dark-vision 60 ft.; AL N; SV Fort +4, Ref +2, Will +2; Str 18, Dex 12, Con 13, Int —, Wis 12, Cha 12.

Skills: Hide –3, Intuit Direction +7, Spot +7.

Vermin: Immune to all mind-influencing effects.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *animate objects*, *cat's grace*; **Market Price:** 29,760 gp; **Weight:** —.

Droplets of the Storm: This tiny blue vial contains a small amount of constantly moving water. When poured into a pool of water at least a foot deep, the droplets cause the pool to bubble and froth furiously.

In 1d4+1 rounds, an equal number of Small water elementals emerge from the pool. The elementals are not under any control, although they can be controlled later through *charm monster* or other magic. They attack the nearest creature or creatures, continuing their rampage until destroyed or banished.

Caster Level: 17th; *Prerequisites:* Craft Wondrous Item, *elemental swarm*; *Market Price:* 7,650 gp; *Weight:* —.

Dust of the Zephyr: This clear vial and stopper contains a small amount of dust. When released into a breeze, the dust creates sudden bursts of wind.

In 1d4+1 rounds, an equal number of Small air elementals are created from the wind. The elementals are not under any control, although they can be controlled later through *charm monster* or other magic. They attack the nearest creature or creatures, continuing their rampage until destroyed or banished.

Caster Level: 17th; *Prerequisites:* Craft Wondrous Item, *elemental swarm*; *Market Price:* 7,650 gp; *Weight:* —.

Dimensional Prism: This translucent and oddly shaped prism seems to fade in and out of existence when seen in daylight. The prism grants *see invisibility* when looked through. When shattered (requiring a DC 15 Strength check), the crystal releases a greenish burst of energy. Any creatures within 30 feet that are on nearby transitive planes such as the Astral Plane, Ethereal Plane, or Plane of Shadow (including those using spells such as *blink*, *maze*, or *shadow walk*), must succeed on a Will save (DC 30) or be forced onto the Material Plane. Creatures that are made tangible in this way cannot leave the Material Plane for 1d6 rounds.

Caster Level: 7th; *Prerequisites:* Craft Wondrous Item, *dimensional anchor*, *see invisibility*; *Market Price:* 17,600 gp; *Weight:* —.

Everfull Mug: With a command word, this common-looking mug fills with 12 ounces of water, cheap ale, or watery wine (user's choice). It functions three times per day.

Caster Level: 1st; *Prerequisites:* Craft Wondrous Item, *create water*; *Market Price:* 800 gp; *Weight:* —.

Everlasting Feedbag: This feedbag has a small medallion on it with an embossed cornucopia symbol. When placed around the muzzle of a horse, donkey, or other equine animal, it produces an unlimited amount of suitable feed. Care must be taken that the animal does not overeat, and most creatures must still eat other plants for proper nutrition. The feedbag produces nothing when it is not placed around an animal's muzzle.

Caster Level: 5th; *Prerequisites:* Craft Wondrous Item, *create food and water*; *Market Price:* 15,000 gp; *Weight:* 1 lb.

Eversoaking Sponge: This large, normal-looking sponge is capable of absorbing an enormous quantity of water. If placed in a body of water, it floats and begins soaking it up at the rate of 1,000 gallons per round. The sponge stops once it has absorbed 225,000 gallons of water—the size of a pool 100 feet long, 50 wide, and 6 feet deep. This water disappears completely, and if the sponge is squeezed afterward, it releases only as much water as a normal wet sponge. The *eversoaking sponge* absorbs only water, not mud or muck. Acid, oil, and other liquids affect it as they would a normal sponge.

Caster Level: 11th; *Prerequisites:* Craft Wondrous Item, *disintegrate*; *Market Price:* 26,400 gp; *Weight:* —.

Fan of Furious Flame: This collapsible fan is made of thin red iron and resembles licking flames when opened. Three times per day, the fan can create a cone 30 feet long that causes any open flames, including candles, torches, or lanterns, to explode in a burst of fire and deal the indicated damage (Reflex half DC 15).

Flame Size	Damage	Area
Candles (1–5)	1d4	5-ft. diameter
Candelabra (6+)	1d6	5-ft. diameter
Lantern	1d8	5-ft. square
Torch	1d10	10-ft. square
Campfire	1d12	10-ft. square

All fire that explodes in this way is permanently extinguished. The explosion occurs too quickly for nearby combustibles to catch on fire. The *fan of furious flame* has no effect on magical fires such as those created by *continual flame*.

Caster Level: 5th; *Prerequisites:* Craft Wondrous Item, *fireball*; *Market Price:* 18,750 gp; *Weight:* 1 lb.

Fruit Blossom Spike: When driven or hammered into a fruit tree, this slim wooden stake causes the tree to go through an amazingly fast rejuvenation, growing extremely healthy and producing an enormous amount of fruit. It takes 1 complete round to complete this growth, at which point the fruit falls to the ground and the tree begins to wither and die. Both the tree and the spike are utterly destroyed in the process.

A single tree produces enough fresh fruit to feed eight creatures for two days, acting like a maximized *goodberry* spell. After three days, the fruit turns into worthless mush. *Fruit blossom spikes* do not work on plant creatures such as treants or tendriculos.

Caster Level: 7th; *Prerequisites:* Craft Wondrous Item, *goodberry*, *plant growth*; *Market Price:* 5,800 gp; *Weight:* —.

Gloves of Brachiation: These tight leather gloves allow the wearer to travel from branch to branch

using only her arms, as a monkey or gibbon would. As long as she is at medium encumbrance or less, the wearer can move at her full speed through the tree canopy. The wearer also gains a +10 circumstance bonus on Jump checks as long as she is aboveground (leaping from tree branch to tree branch, for example).

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *cat's grace*; **Market Price:** 4,000 gp; **Weight:** —.

Goggles of Day: The lenses of this item are made of silvered crystal. When they are placed over the eyes, the wearer can operate without penalty in preternaturally bright light, such as might result from a *flare*, *sunbeam*, or *sunburst* spell. Vampires wearing *goggles of day* have a full-round action before dissolution when confronted with sunlight, as opposed to just a partial action.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *darkvision*; **Market Price:** 4,000 gp; **Weight:** —.

Hammersphere: This magic sphere is 4 inches in diameter, made of silver, and covered in small rubies. Etched into it in four places is the hammer-and-anvil symbol of the deity Moradin. When held aloft and activated with a command word, the sphere conjures forth a giant hammer. This hammer functions as a *spiritual weapon* except that it deals 3d6 points of damage per hit. The user of the *hammersphere* does not have to concentrate on the hammer or keep the sphere aloft while the hammer attacks. The *hammersphere* is usable once per day.

Caster Level: 7th; **Prerequisites:** Craft Wondrous Item, *spiritual weapon*, *greater magic weapon*; **Market Price:** 2,500 gp; **Weight:** —.

Hat of Anonymity: This broad-brimmed black hat obscures the wearer from being detected, allowing him to blend into a crowd with ease. The wearer is under a continuous *nondetection* effect and has a +10 bonus on Hide checks while the hat is worn.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *nondetection*; **Market Price:** 34,050 gp; **Weight:** —.

Horned Helm: This dark leather helm has an open face and sports a pair of impressive deer antlers that rise from the forehead. When worn, the antlers join solidly with the wearer's skull. The wearer's base speed is doubled, and the *horned helm* grants a +2 enhancement bonus on melee attacks with the horns, which deal 1d8 points of damage.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *haste*, *magic fang*; **Market Price:** 38,000 gp; **Weight:** 1 lb.

Idol of False Vision: This large statue automatically detects any attempt to scry (including *scrying* and similar spells such as *arcane eye* and *clairaudience/clairvoyance*) any individuals or locations within 50 feet of it. Any such effect triggers a *false vision* spell that masks any creature attuned to the idol from being scried. Attunement may be performed during

the idol's creation or at any later time by touching the idol and speaking a command word chosen during creation. The idol can cast *false vision* three times per day.

Caster Level: 10th; **Prerequisites:** Craft Wondrous Item, *detect scrying*, *false vision*; **Market Price:** 54,500 gp; **Cost to Create:** 33,500 gp + 1,680 XP; **Weight:** 400 lb.

Incense of the Gorgon: This foul-smelling incense is typically found in a dark green vial with the embossed image of a gorgon. When burned, however, it creates a truly overwhelming smoke that fills a 10-foot cube. The incense is consumed after 1 round and the smoke dissipates naturally. Those in the area and not holding their breath must succeed on a Fortitude save (DC 19) or be turned to stone as if affected by the *flesh to stone* spell.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *flesh to stone*; **Market Price:** 6,600 gp; **Weight:** —.

Insatiable Locust: Banned in almost every civilized society, this 1-foot-long statue of a locust is capable of incredible destruction to crops and agricultural areas. It is carved from a single piece of brilliant jade and has two large rubies for eyes.

On command, the *insatiable locust* can animate. It then goes on an eating rampage, devouring up to ten tons of grain, crops, and fruits per day for up to seven days, over a diameter of fifty miles. It never attacks people or livestock and attempts to fly away when confronted with violence. The locust first eats planted crops, such as corn, wheat, and rye, followed by fruit and finally wild vegetation. The locust attacks and consumes plant creatures, but only after all other vegetation has been destroyed first.

Once the locust has eaten for seven days (or there is no more food), it unerringly returns to its owner and reverts to its statue form. It cannot be reactivated again for another full seven days. The eaten crops are utterly destroyed.

➤ **Jade Locust:** CR 1/2; Tiny construct; HD 3d10; hp 16; Init +2; Spd 40 ft., fly 80 ft. (good); AC 14 (touch 14, flat-footed 12); Atk +3 melee (1d3–1, bite); Face/Reach 2 1/2 ft. by 2 1/2 ft./0 ft.; SQ Construct, *darkvision* 60 ft.; AL N; SV Fort +1, Ref +3, Will –4; Str 8, Dex 14, Con –, Int –, Wis 1, Cha 1.

Skills and Feats: Hide +10.

Construct: Immune to mind-influencing effects and to poison, sleep, paralysis, stunning, disease, death effects, necromantic effects, and any effect that requires a Fortitude save unless it also works on objects; cannot heal damage (though regeneration and fast healing still apply, if present); not subject to critical hits, subdual damage, ability damage, ability drain, or energy drain; not at risk of death from massive damage, but destroyed when reduced to 0 hit points or less; cannot be raised or resurrected.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *animate objects*, *disintegrate*; **Market Price:** 29,975 gp; **Weight:** 10 lb.

Ioun Stone of Resistance: These *ioun stones* (usually burnt orange in color) possess all the features of a standard *ioun stone*. *Ioun stones of resistance* offer magic protection in the form of a +1 to +5 resistance bonus on all saving throws.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *resistance*, caster level must be three times that of the *ioun stone's* bonus; **Market Price:** 2,000 gp (+1), 8,000 gp (+2), 18,000 gp (+3), 32,000 gp (+4), 50,000 gp (+5); **Weight:** —.

Lantern of Brightness: This ornate bullseye lantern is adorned with gold filigree and sun patterns. It is illuminated with a permanent *light* spell. Twice per day, the lantern can emit a *sunbeam* (as the spell from a 13th-level caster).

Caster Level: 13th; **Prerequisites:** Craft Wondrous Item, *light*, *sunbeam*; **Market Price:** 66,520 gp; **Weight:** 3 lb.

Libram of Flesh: This weighty tome details the creation of flesh golems. Additionally, the magical inscriptions of the libram allow the reader to create a flesh golem even if not a 14th-level arcane spellcaster. The reader gains a +2 bonus to effective caster level for the purpose of making golems and can emulate knowledge of the requisite spells necessary to create a flesh golem. Thus, an 11th-level arcane spellcaster still couldn't create a golem using the libram, though a 12th-level spellcaster could, because 14th level is the minimum to create a flesh golem.

Flesh golems created using the *libram of flesh* retain up to five abilities from one of the donor bodies used in the golem's creation, which are layered on the flesh golem as if using a template. The DM determines which abilities of a donor body are appropriate, and which are inappropriate, which abilities stack, and which do not.

Each time a flesh golem is created using the libram, enchantment visibly drains from the book as inscriptions fade. When first created, a *libram of flesh* has enough magical power to create seven golems. After this time, the book falls into ruin.

Caster Level: 17th; **Prerequisites:** Craft Wondrous Item, *wish*; **Market Price:** 178,500 gp; **Weight:** 5 lb.

Magebane Manacles: These sturdy masterwork manacles have an *antimagic field* that extends around anyone locked in them, including any magic items the captive might be carrying. Although expensive, they are commonly found in the prisons of metropolitan cities that are used to dealing with high-level troublemakers.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *antimagic field*; **Market Price:** 132,000 gp; **Weight:** 2 lb.

Mask of Lies: This black, featureless mask only has slits for the eyes and mouth. The wearer can cast

change self on himself at will and is continually under the effect of *undetected alignment*. In addition, he or she gains a +5 bonus on Bluff checks.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *change self*, *undetected alignment*; **Market Price:** 17,000 gp; **Weight:** —.

Mask of the Feather Queen: This vibrantly colored mask is made from the feathers of a variety of rare and beautiful songbirds. The wearer can *levitate* and *charm* birds by uttering a command word. Once per day, the wearer can cast *fly* (on herself or another person), as the spell from a 12th-level caster.

Caster Level: 12th; **Prerequisites:** Craft Wondrous Item, *charm person or animal*, *fly*, *levitate*; **Market Price:** 27,120 gp; **Weight:** —.

Medallion of Contact: Once per day, the wearer of this silver disk can speak a command word and forge a telepathic bond (as *Rary's telepathic bond*) with one person lasting for 1 minute. Range is one mile.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *Rary's telepathic bond*; **Market Price:** 5,000 gp; **Weight:** —.

Medallion of the Lycanthrope: Found in lands where lycanthropy is an epidemic, these medallions grant powerful protection. Once per day, the medallion can cast *antipathy* against lycanthropes as the spell from a 15th-level caster. In addition, any melee weapons carried by the wearer damage lycanthropes as though they were made of silver. Ranged weapons are not affected.

Caster Level: 15th; **Prerequisites:** Craft Wondrous Item, *antipathy*, *magic weapon*; **Market Price:** 44,200 gp; **Weight:** —.

Mirror of Secrets Revealed: This ornate silver mirror reveals hidden objects and auras when viewed in the reflection. The wielder can cast *analyze dweomer* once per day and *true seeing* twice per day. Each of these abilities functions like the spells from an 11th-level caster.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *analyze dweomer*, *detect magic*, *true seeing*; **Market Price:** 95,000 gp; **Weight:** 1/2 lb.

Necklace of the Marauding Beast: There are three different versions of these necklaces, commonly found among primitive tribesfolk. Each necklace incorporates parts from a different, dangerous predator.

Raging Bear Necklace: This crudely made leather necklace is adorned with uncut precious stones and claws from an enormous bear. The wearer gains a +2 enhancement bonus to Strength. In addition, if the wearer has the ability to rage, each rage lasts 1 round longer than normal.

Frenzied Shark Necklace: Crafted from tough seaweed and sharks' teeth, this necklace grants the wearer a +2 enhancement bonus to Strength and a +4 circumstance bonus on Swim checks. In addition, if

the character has the ability to rage, each rage lasts 1 round longer than normal.

Rampaging Boar Necklace: This necklace is crafted from the two tusks of a boar, clasping together in the middle. The wearer gains the Sunder feat (Great Sunder if she already possesses this feat) and a +1 enhancement bonus to Constitution. In addition, if the character has the ability to rage, each rage lasts 1 round longer than normal.

Caster Level: 7th; **Prerequisites:** Craft Wondrous Item, *bull's strength*, *emotion*; **Market Price:** 11,840 gp (*raging bear*), 12,160 gp (*frenzied shark*), 12,440 gp (*rampaging boar*); **Weight:** —.

Necklace of the Wild Beast: A necklace of this sort appears to be a normal piece of nonvaluable jewelry until it is placed about the neck of a character capable of casting *animal friendship*. The *necklace of the wild beast* has one or more special beads.

Special Bead Type	Special Bead Ability
<i>Bead of calming</i>	Wearer can cast <i>calm animals</i> .
<i>Bead of servitude</i>	Wearer can cast <i>dominate animal</i> .
<i>Bead of the fang</i>	Wearer can cast <i>greater magic fang</i> .
<i>Bead of beckoning</i>	Wearer can cast <i>summon nature's ally IV</i> .
<i>Bead of the great beast</i>	Wearer can cast <i>animal growth</i> .
<i>Bead of awakening</i>	Wearer can cast <i>awaken</i> .

Each special bead can be used only once, and then becomes forever inert. The power of a special bead is lost if removed from the necklace.

Caster Level: 10th; **Prerequisites:** Craft Wondrous Item, *animal friendship*, and one or more of the following spells: *animal growth*, *awaken*, *calm animals*, *dominate animal*, *greater magic fang*, *summon nature's ally IV* (as appropriate); **Market Price:** 500 gp (*bead of calming*), 1,500 gp (*bead of servitude*), 1,500 gp (*bead of the fang*), 2,000 gp (*bead of beckoning*), 2,500 gp (*bead of the great beast*), 3,750 gp (*bead of awakening*); **Cost to Create:** As normal except 1,250 gp plus 250 XP (*bead of awakening*); **Weight:** —.

Oracle Beads: Made from perfectly clear crystal beads, this necklace assists in receiving visions and oracles. The wearer gains a +5 insight bonus on Scry checks. In addition, the wearer can cast *divination* once per day. If the wearer is able to cast divine spells, then *divination* can be cast twice per day.

Caster Level: 7th; **Prerequisites:** Craft Wondrous Item, *divination*; **Market Price:** 19,192 gp; **Weight:** —.

Pelt of Animal Senses: This pelt, worn like a cloak, is made from large predator: a wolf, bear, or great cat. When worn, it grants low-light vision, scent, and a +2 circumstance bonus on Listen checks. Animals react poorly to the wearer while it is worn; herbivores in general become nervous and try to flee, while carnivores generally become aggressive.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *see invisibility*; **Market Price:** 30,080 gp; 1 lb.

Phylactery of Change: The wearer of this item can invoke a *polymorph self* ability with an indefinite duration (or until the phylactery is removed, destroyed, or dispelled). A new form can be adopted once per day. The wearer can assume his natural form without limitation, however.

Caster Level: 7th; **Prerequisites:** Craft Wondrous Item, *polymorph self*; **Market Price:** 11,200 gp; **Weight:** —.

Pitons, Burrowing: Covered with various runes and sigils meaning “earth,” these pitons burrow into earth, rock, and stone, providing a secure support for ropes and other climbing gear. It requires a partial action to burrow into solid, cut stone and other masonry. The pitons grant a +2 circumstance bonus on Climb checks while using climbing equipment. They are single-use items.

A burrowing piton used in melee deals 1d8 points of damage (×3 critical) against stone golems, clay golems, earth elementals, and any other creature composed of earth or stone. It has no special effect against other types of creatures.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *soften earth and stone*; **Market Price:** 380 gp; **Weight:** 1/2 lb.

Pixie Dust: This sparkling, silvery dust is created by several different fey but primarily used by pixies. It comes in long, thin, silvery tubes. A single tube's contents finely coat a 5-foot square, and any passage through the area stirs up the dust for 1d6 rounds. Alternatively, the contents of a tube can be blown at a target creature as a ranged touch attack (maximum range 5 feet). A creature that stirs up the dust or is targeted by someone wielding a tube of the dust must make a successful Fortitude save (DC 15) or begin shrinking to the size of a grig (Tiny). In addition, the creature acts as though under the effect of a *charm person* spell from a 9th-level caster, obeying the person who spread the dust. Both effects last for 9 hours before restoring the person to normal.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *reduce*, *charm person* or creator must be a fey; **Market Price:** 2,700 gp; **Weight:** —.

Portable Bridge: Once per day on command, this tiny statue of a bridge can turn into a fully functioning bridge. The bridge is always 5 feet wide and can extend in length from 5 feet to 50 feet. It takes a full round for the bridge to extend, regardless of the length of the bridge. The owner can choose which side the bridge retracts to, making it ideal for crossing chasms and leaving pursuers behind.

The statue must be placed on solid rock or earth to work. Ideally, there should be equally solid rock or earth on the other side. If there is not stable ground on the other side (it reaches maximum range and

doesn't touch anything, there is loose sand, and so on), the bridge spends another round retracting to its statue form.

The bridge can be destroyed through *disintegrate* or by normal means such as breaking and chipping. Each 5-foot square has 75 hit points and a hardness of 8.

Caster Level: 20th; *Prerequisites:* Craft Wondrous Item, wall of stone; *Market Price:* 36,000 gp; *Weight:* 1 lb.

Preserving Jar: This large glass jar has been magically treated to preserve any organic material placed in it. The jar can hold the equivalent of 2 gallons of liquid. Anything small enough to fit in the jar does not rot, age, or wilt. The lid must be placed securely on the top for the effect to work.

A Tiny or smaller creature can be placed in the jar, but without a supply of air and food it eventually dies, although the corpse never rots.

Caster Level: 3rd; *Prerequisites:* Craft Wondrous Item, gentle repose; *Market Price:* 3,000 gp; *Weight:* 2 lb.

Restricting Band: This plain, 1-foot diameter, 1-inch-thick steel band grows and shrinks on verbal command. Its maximum size is 5 feet in diameter, but retains the same thickness. It can shrink to the size of a ring, reducing in thickness accordingly. If placed around a person, say to bind their arms to their sides, it can be sized to fit snugly around them. The band never shrinks to the point where it deals damage; it's simply uncomfortably tight. It requires an Escape Artist check (DC 30) to wiggle out of a restricting band placed around the body and arms (DC 25 when the band is placed around arms or legs only).

Caster Level: 3rd; *Prerequisites:* Craft Wondrous Item, enlarge, reduce; *Market Price:* 5,400 gp; *Weight:* 2 lb.

Rope of Stone: This normal-looking silk rope can become as hard as stone (8 hardness, 15 hp) when a command word is spoken. The rope retains its exact shape when hardened. If it is ever broken in either form, it becomes normal rope.

Caster Level: 11th; *Prerequisites:* Craft Wondrous Item, flesh to stone; *Market Price:* 11,800 gp; *Weight:* 5 lb.

Saddle of Growth: When a command word is uttered, this saddle causes a horse, mule, or donkey to increase by one size category. For example, a horse, which is normally Large (long), would increase to Huge (long) while wearing the saddle. Another command word causes the steed to shrink back to its normal size. This effect can be done three times a day.

Caster Level: 9th; *Prerequisites:* Craft Wondrous Item, animal growth; *Market Price:* 48,600 gp; *Weight:* 25 lb.

Saddle of the Pegasus: This exquisitely crafted saddle is heavily adorned with the feathers from pegasi wings. The saddle adjusts to fit any normal-sized horse, donkey, or mule. When securely placed,

it allows the steed and rider to fly (as the *fly* spell from a 5th-level caster, except maneuverability is clumsy) three times per day upon command. The saddle acts as an exotic military saddle for the rider.

The first time someone uses this saddle on a steed untrained in flying, the rider must make a DC 15 Ride check to keep the steed from panicking.

Caster Level: 5th; *Prerequisites:* Craft Wondrous Item, fly; *Market Price:* 16,875 gp; *Weight:* 25 lb.

Saddle of Weather Protection: A boon to travelers, this highly polished saddle protects the steed and rider from the elements. The steed and rider are completely immune to "normal" temperature from 0° to 110° Fahrenheit and remain perfectly dry unless completely immersed in a body of water. In addition, the rider can cast *protection from elements* on himself and his mount once per day.

Caster Level: 5th; *Prerequisites:* Craft Wondrous Item, protection from elements; *Market Price:* 5,400 gp; *Weight:* 25 lb.

Saw of Prodigious Cutting: This one-person, steel-and-brass band saw is etched with leaf patterns. Its razor-sharp blade easily cuts through most normal wood and trees. The saw ignores the hardness of any wooden object that it cuts into and deals 4d6 damage to it. The saw can be used in melee against plant creatures with a similar effect, although the wielder takes a -4 penalty on attacks for using such an unwieldy weapon. The saw automatically avoids other living creatures and twists out of a person's hand if used as a weapon against them.

Caster Level: 3rd; *Prerequisites:* Craft Wondrous Item, magic weapon; *Market Price:* 2,000 gp; *Weight:* 3 lb.

Seeds of the Treant: This pouch made from tightly interwoven leaves contains 1d4 large acorns. When one or more of these are planted in soil, a treant begins to grow from that spot. It takes two full rounds for the treant to be completely summoned. If two seeds are planted next to each other, then the summoned treant is increased by one size (8 HD, Huge). If three seeds are planted next to each other, then the summoned treant is two sizes bigger (17 HD, Gargantuan).

The treant is not controlled at the time of summoning, although it can be *charmed*, *dominated*, or made friendly through Diplomacy. The treant's initial attitude is indifferent. The treant remains indefinitely, although it could perish if summoned in terrain that is not suitable for its survival (desert, for example). The treant takes a dim view of being summoned in this manner and more than likely will attack the summoner.

Caster Level: 17th; *Prerequisites:* Craft Wondrous Item, summon nature's ally IX; *Market Price:* 15,300 gp per acorn; *Weight:* —.

Shards of the Fissure: This handful of sharp gray flint chips is usually found inside a tattered

brown pouch. When emptied onto solid earth or stone, the shards burrow into the earth, causing a slight tremor.

In 1d4+1 rounds, an equal number of Small earth elementals claw to the surface. The elementals are not under any control, although they can be controlled later through *charm monster*, *dominate monster*, and so on. They attack the nearest creature or creatures, then continue their rampage until destroyed or banished.

Caster Level: 17th; **Prerequisites:** Craft Wondrous Item, *elemental swarm*; **Market Price:** 7,650 gp; **Weight:** —.

Singing Bowl: Carved from a single piece of flawless crystal (10 hardness, 10 hp), this bowl comes with a smooth, thick wooden stick. Running the stick slowly along the edge of the bowl produces a clear, vibrating hum. The volume can range from barely audible to intensely loud. While the bowl is being played, spells in a 30-foot radius with a verbal component are prevented as though under the effect of a *silence* spell. Spells cast with the Silent Spell feat still work, however. The bowl's effect can be activated with any stick—the one provided has no special abilities. It requires at least 1 rank of Performance (any percussion instrument).

In addition, the bowl can cast *shatter* and *blindness/deafness* (*deafness* only) once per day as a 12th-level bard.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *blindness/deafness*, *shatter*, *silence*; **Market Price:** 19,440 gp; **Weight:** 4 lb.

Sparring Dummy of the Master: This battered wooden dummy is designed for monks to practice their striking and blocking techniques. It consists of a plain round wooden post that stands 6 feet high and 1 foot thick. Six smaller posts stick out horizontally from the post, roughly representing a defending enemy's limbs.

To gain the benefit of its magic, a person with at least one level in monk must train with the dummy 8 hours a day for four weeks. If the training is ever interrupted for more than a 24 hours, she must begin again. If this training is interrupted twice, the monk can never gain the benefit of the *sparring dummy*.

Once she has completed the required training, the monk is allowed to make a 10-foot adjustment whenever she can normally make a 5 foot adjustment.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *haste*; **Market Price:** 30,000 gp; **Weight:** 40 lb.

Stalwart Eye: This Tiny birdlike item allows its owner to speak a command word and see through its eyes. The *stalwart eye* has AC 18, hardness 8, 5 hp, and cannot move on its own except to turn its head as the owner desires. No range limitation exists on the power except that the owner must be on the same plane as the *stalwart eye*.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *alarm*, *animal messenger*; **Market Price:** 10,000 gp; **Weight:** 2 lb.

Steadfast Stone: This dwarven item is commonly given out to dwarven defenders and other tunnel guards who require instant fortifications. The *steadfast stone* is a granite cube, 1 inch on each side, with runes indicating "growth" written on all sides. When thrown upon the ground and the command word uttered, the cube grows as a *wall of stone* cast by a 9th-level cleric. The stone can grow up to two times per day. The wall lasts for up to 24 hours or until the command word is uttered, causing it to shrink back into cube form.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *wall of stone*; **Market Price:** 32,400 gp; **Weight:** 1 lb.

Stove of Everlasting Flame: Tired of hearing adventurers complain about not being able to start a fire in the middle of rainstorms or underground, an enterprising mage created the first of these handy devices for cooking food.

This enclosed metal box easily fits in the palm of someone's hand. It has two metal flaps on one end that pop open to reveal a continuously burning flame. The heat of the flame is equivalent to a torch, although the flame's size (and the light it produces) is the same as a candle. The metal of the box remains slightly warm to the touch, whether the flaps are open or not.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *produce flame*; **Market Price:** 2,400 gp; **Weight:** 1 lb.

Stylus of the Masterful Hand: This elegant but sturdy metal stylus grants +5 competence bonus on Forgery checks. On command, the stylus can also "remember" up to three different types of handwriting, which allows another Forgery attempt without having to make a roll—the DC of that handwriting is "fixed" at whatever was rolled during the attempt.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *Scribe Scroll*, *read magic*; **Market Price:** 3,000 gp; **Weight:** —.

Testing Chalice: Made from tough clear glass, this chalice immediately discerns the properties of any liquid poured into it. The color of the chalice varies depending on the liquid poured into it. The opacity of the chalice also varies, depending on the strength of the liquid.

See the table below for the various results.

Chalice Color	Liquid (example)
Clear	Water
Black	Poison
Red	Potion (magical, not alchemical)
Blue	Alchemical liquid (antitoxin, alchemist's fire)
Green	Acid
Silver, shiny ¹	Holy water
Silver, tarnished ¹	Unholy water
Purple	Any other liquid (oil, blood)

Chalice Opacity	Strength/purity (example)
Clear	Very weak/very impure (filthy water)
Translucent	Average/slightly impure (pond water)
Smoky	Strong/very pure (well water)
Solid	Extremely strong/completely pure (distilled water)

¹ The stronger the holy water, the more reflective the glass. The stronger the unholy water, the more tarnished it becomes.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *detect magic*, *detect poison*; **Market Price:** 4,000 gp; **Weight:** 1/2 lb.

Thurible of Divining: This perforated metal vessel usually comes in the shape of a deity's holy symbol or some totem creature associated with a deity or cult. If it is filled with incense and lighted, the thurible produces the effect of a *prayer* spell for as long as the incense burns. A character wielding the lighted thurible can also trigger the following spells:

- Three times per day: *detect magic*, *detect good*, or *detect law*. The user can use one effect three times, each effect once, or any other combination of effects totaling three uses per day. Some thuribles may detect other alignments.
- Once per day: *augury* or *locate object*.
- Once per week: *divination* or *true seeing*.
- Once per month: *commune*.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *commune*, *detect good*, *detect law*, *detect magic*, *divination*, *prayer*, *true seeing*; **Market Price:** 77,000 gp; **Weight:** 1 lb.

Thurible of Retribution: This item is similar to a *thurible of divining*. It produces a *prayer* effect when lighted and allows the following spell effects:

- Three times per day: *command*, *doom*, or *inflict light wounds*.
- Once per day: *spiritual weapon* or *searing light*.
- Once per week: *inflict critical wounds* or *circle of doom*.
- Once per month: *geas/quest*.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *circle of doom*, *command*, *doom*, *geas/quest*, *inflict critical wounds*, *inflict light wounds*, *prayer*; **Market Price:** 77,000 gp; **Weight:** 1 lb.

Thurible of Warding: This item is similar to a *thurible of divining*. It produces a *prayer* effect when lighted and allows the wielder to use the following spell effects:

- Three times per day: *entropic shield*, *endure elements*, or *sanctuary*.
- Once per day: *silence* or *dispel magic*.

- Once per week: *spell immunity* or *spell resistance*.
- Once per month: *blade barrier*.

Caster Level: 11th; **Prerequisites:** Craft Wondrous Item, *blade barrier*, *dispel magic*, *endure elements*, *entropic shield*, *sanctuary*, *silence*, *spell immunity*, *spell resistance*, *prayer*; **Market Price:** 77,000 gp; **Weight:** 1 lb.

Triton Shell: Created by tritons, these backpacks are made from single giant shells. They have been magically treated to keep anything placed inside perfectly dry and protected from pressures of the ocean. Due to the shape and composition of the shell, it does not hinder the wearer's ability to swim underwater.

Some versions of this magical device are enchanted with *gust of wind*, allowing Tiny or smaller air-breathing creatures to survive inside the shell.

Caster Level: 5th; **Prerequisites:** Craft Wondrous Item, *resist elements*, *gust of wind*; **Market Price:** 3,000 gp (without air), 18,000 gp (with air); **Weight:** 3 lb.

Trumpeter's Gift: This shiny mouthpiece fits any brass instrument such as trumpets and horns. It grants a +5 competence bonus on Performance checks using the instrument. Once per day, the trumpeter can use the horn to cast a *shout* spell. Unless the horn is at least masterwork quality, however, it is destroyed once the spell is complete.

Caster Level: 7th; **Prerequisites:** Craft Wondrous Item, *shout*; **Market Price:** 12,200 gp; **Weight:** —

Weightless Scabbard: This magical scabbard grows and shrinks in size to accommodate any Large to Tiny bladed weapon. This includes greatsword, falchion, scimitar, rapier, longsword, short sword, and dagger. While the weapon is in the scabbard, its weight is reduced to zero, although the scabbard retains its own weight.

Caster Level: 3rd; **Prerequisites:** Craft Wondrous Item, *reduce*; **Market Price:** 1,600 gp; **Weight:** 1 lb.

Yondalla's Wagon Wheel: Created by adepts of Yondalla, one of these small amulets is in the shape of a wagon wheel. Throwing it upon the ground and uttering a command word causes the wheel to grow into a normal-sized covered wagon. It can remain in that form indefinitely, until the command word is uttered again. Once per day, the amulet (in wagon form only) can create *Leomund's secure shelter* as the spell from a 9th-level caster. The shelter's outside appearance blends in perfectly with the exterior of the wagon, so it is not possible to tell that the spell is in effect until someone steps inside. When the spell effect ends, the wagon remains.

Caster Level: 9th; **Prerequisites:** Craft Wondrous Item, *Leomund's secure shelter*, *major creation*, *reduce*; **Market Price:** 92,880 gp; **Weight:** 1 lb.

CHAPTER 6: SPECIAL MAGIC ITEMS

Not every magic item has straightforward game effects and pricing. Intelligent items are characters in their own right, cursed items mix beneficial and dangerous effects, and artifacts are beyond the ken of mortal crafters.

INTELLIGENT ITEMS

The material in the *DUNGEON MASTER'S Guide* describing intelligent items offers a straightforward method of adjusting the market price for a magic item that possesses intelligence, adding a flat value to the market price based on the initial roll to determine the item's capabilities. A roll of 01–34 on Table 8–31, for example, generates an item with two ability scores averaging 12 and one score averaging 10.5, semiempathic communication, and one primary ability, and such an item has a market price 10,000 gp higher than a nonintelligent but otherwise identical item. However, since the possibility exists, although slim, of generating an extraordinary power or even a special purpose for that item's one “primary ability,” as well as the smaller disparities among abilities on the same tables, there is a need for pricing guidelines that accurately reflect the value of the abilities an intelligent item possesses.

The following tables, adapted from those in the *DUNGEON MASTER'S Guide*, give market price modifiers for each communication form, special ability, and ability score, as a means of generating market prices for intelligent items that reflect their capabilities.

TABLE 6–1: BASIC MARKET PRICE MODIFIERS

Quality	Market Price Modifier
Each point of Intelligence bonus	+400 gp
Each point of Wisdom bonus	+400 gp
Each point of Charisma bonus	+400 gp
Semiempathy	+1,000 gp
Empathy	+2,000 gp
Speech	+3,000 gp
Telepathy	+5,000 gp

All of these modifiers are cumulative. Thus, a magic sword with Int 19, Wis 19, and Cha 11 and the abilities of speech and telepathy has a basic market price modifier of +11,200 gp.

Table 6–2: Primary Abilities and Market Price Modifiers is a reproduction of Table 8–33: Intelligent Item Primary Abilities, with the addition of a market price modifier for each ability.

TABLE 6–2: PRIMARY ABILITIES AND MARKET PRICE MODIFIERS

d%	Primary Ability	Market Price Modifier
01–04	Item can Intuit Direction (10 ranks)	+2,000 gp
05–08	Item can Sense Motive (10 ranks)	+2,000 gp
09–12	Wielder has free use of Combat Reflexes	+10,000 gp
13–16	Wielder has free use of Blind-Fight	+10,000 gp
17–20	Wielder has free use of Improved Initiative	+10,000 gp
21–24	Wielder has free use of Mobility	+10,000 gp
25–28	Wielder has free use of Sunder	+10,000 gp
29–32	Wielder has free use of Expertise	+10,000 gp
33–39	<i>Detect</i> [opposing alignment] at will	+1,800 gp
40–42	<i>Find traps</i> at will	+10,000 gp
43–47	<i>Detect secret doors</i> at will	+1,800 gp
48–54	<i>Detect magic</i> at will	+1,800 gp
55–57	Wielder has free use of uncanny dodge (as a 5th-level barbarian)	+10,000 gp
58–60	Wielder has free use of evasion	+25,000 gp
61–65	Wielder can <i>see invisibility</i> at will	+10,000 gp
66–70	<i>Cure light wounds</i> (1d8+5) on wielder 1/day	+1,800 gp
71–75	<i>Feather fall</i> on wielder 1/day	+350 gp
76	<i>Locate object</i>	+10,000 gp
77	Wielder does not need to sleep	+5,000 gp
78	Wielder does not need to breathe	+7,500 gp
79	<i>Jump</i> (20th-level caster) on wielder 1/day	+7,200 gp
80	<i>Spider climb</i> (3rd-level caster) on wielder 1/day	+2,000 gp
81–90	Roll twice again on this table	—
91–100	Roll on Table 6–3 instead	—

Table 6–3: Extraordinary Powers and Market Price Modifiers is a revision of Table 8–34 in the *DUNGEON MASTER'S Guide*, standardizing spell effects by caster level and giving market price modifiers for extraordinary powers.

TABLE 6–3: EXTRAORDINARY POWERS AND MARKET PRICE MODIFIERS

d%	Extraordinary Power	Market Price Modifier
01–05	<i>Charm person</i> on contact, 3/day	+1,080 gp
06–10	<i>Clairaudience/clairvoyance</i> , 3/day	+16,200 gp
11–15	<i>Magic missile</i> (5th-level caster), 3/day	+5,400 gp
16–20	<i>Shield</i> on wielder, 3/day	+1,080 gp
21–25	<i>Detect thoughts</i> , 3/day	+6,480 gp
26–30	<i>Levitate</i> (wielder only), 3/day	+6,480 gp
31–35	<i>Invisibility</i> (wielder only), 3/day	+6,480 gp
36–40	<i>Fly</i> (wielder only), 2/day	+16,200 gp
41–45	<i>Lightning bolt</i> (8th-level caster), 1/day	+8,640 gp
46–50	<i>Summon monster III</i> , 1/day	+5,400 gp
51–55	<i>Rary's telepathic bond</i> , 2/day	+32,400 gp
56–60	<i>Cat's grace</i> (wielder only), 1/day	+2,160 gp
61–65	<i>Bull's strength</i> (wielder only), 1/day	+2,160 gp
66–70	<i>Haste</i> (wielder only, 10th-level caster), 1/day	+10,800 gp
71–73	<i>Telekinesis</i> (10th-level caster), 2/day	+36,000 gp
74–76	<i>Heal</i> , 1/day	+23,760 gp
77	<i>Teleport</i> (12th-level caster), 1/day	+21,600 gp
78	<i>Globe of invulnerability</i> , 1/day	+23,760 gp
79	<i>Stoneskin</i> (wielder only), 2/day	+20,160 gp

d%	Extraordinary Power	Market Price Modifier
80	<i>Feeblemind</i> by touch, 2/day	+32,400 gp
81	<i>True seeing</i> , at will	+81,000 gp
82	<i>Wall of force</i> , 1/day	+16,200 gp
83	<i>Summon monster VI</i> , 1/day	+23,760 gp
84	<i>Finger of death</i> , 1/day	+32,760 gp
85	<i>Passwall</i> , at will	+81,000 gp
86–90	Roll twice again on this table	—
91–100	Roll again on this table, and then roll for a special purpose on Table 6–4	—

Extraordinary powers (as well as the handful of primary abilities that duplicate spell effects) are command-word-activated spell-like abilities. As with most magic items, the effective caster level of the power is usually the minimum required to cast the spell, unless noted otherwise on the tables. The saving throw DC for powers with a saving throw is equal to 10 + the spell level + the intelligent item's best ability score modifier.

TABLE 6–4: SPECIAL PURPOSE POWERS AND MARKET PRICE MODIFIERS

d%	Special Purpose Power	Market Price Modifier
01–10	<i>Blindness</i> for 2d6 rounds	+12,000 gp
11–20	<i>Confusion</i> for 2d6 rounds	+56,000 gp
21–25	<i>Fear</i> for 1d4 rounds	+56,000 gp
26–55	<i>Hold monster</i> for 1d4 rounds	+90,000 gp
56–65	<i>Slay living</i>	+90,000 gp
66–75	<i>Disintegrate</i>	+132,000 gp
76–80	<i>True resurrection</i> on wielder, one time only	+12,650 gp
81–100	+2 luck bonus on all saving throws, +2 deflection bonus to AC, spell resistance 15	+78,000 gp

Most special purpose powers are use-activated spell-like abilities. If the intelligent item is a weapon, the power takes effect when its wielder successfully hits a foe in pursuit of the weapon's special purpose. If the intelligent item is not a weapon, the wielder must make a successful touch attack with the item to activate the power. In either case, the target gets a saving throw as normal for the spell. The true resurrection power activates automatically the first time the item's wielder dies. The last power (saving throw bonus, AC bonus, and spell resistance) is continually in effect upon the item's wielder, as long as the wielder pursues the intelligent item's special purpose. The item can choose not to activate any special purpose power if the wielder is not actively aiding the item in fulfilling its purpose.

Determining Ego

The starting point for determining an intelligent item's Ego score is its enhancement bonus. For items with no enhancement bonus, compare the item's base market price to Table 8–10: Weapons in the *DUNGEON MASTER'S Guide*. Find the highest weapon base price that is not higher than the item's market price, and use the corresponding enhancement bonus as the

item's base Ego. For example, *Mark of the Favored* is an intelligent ring of regeneration. The base market price for a ring of regeneration is 90,000 gp. The highest weapon base price that does not exceed 90,000 gp is 72,000, for a +6 equivalent weapon bonus. Its base Ego score is 6.

Creating Intelligent Items

The simple rules in the *DUNGEON MASTER'S Guide* for creating intelligent items may not satisfy some players who wish more control over the characteristics of the items they create, nor do they function smoothly with the revised pricing guidelines included above. Particularly if you use these revised pricing rules, allow magic item creators to choose the powers their items possess, using the following guidelines.

As described in the *DUNGEON MASTER'S Guide*, a character's caster level must be at least 15th to create an intelligent item. The item has the same alignment as its creator.

When deciding to make an intelligent magic item, first consult Table 8–31: Item Intelligence, Wisdom, Charisma, and Capabilities in the *DUNGEON MASTER'S Guide*. Choose a line of that table to generate the item's mental ability scores, which in turn determines its communication capabilities. The creator (or the DM) rolls the item's ability scores and adds their cost, and the cost for the item's communication mode(s), to the market price for the item.

Next, the creator chooses abilities for the item. She is not limited to the capabilities shown on Table 8–31, since random die rolls could generate a special purpose for an item limited to semiempathic communication. However, no item can have a special purpose unless it also has an extraordinary power. As well, though this is not specified in the *DUNGEON MASTER'S Guide*, a character must have access to a spell in order to imbue an item with the ability to use that spell. Likewise, she must have access to a skill, feat, language, or class ability in order to bestow that ability on an item. As with other magic item prerequisites, the presence of another character who knows a prerequisite spell or other ability is sufficient; the item creator need not have personal knowledge of the prerequisite.

After choosing primary abilities, extraordinary powers, and any special purpose and power for the item, work out the item's total market price. Time, money, and XP costs for creating the item are based on this price.

Sample Intelligent Items

All of these sample items' market prices are calculated according to the tables at the beginning of this chapter.

Blackrazor

Blackrazor is a +3 *greatsword* whose blade resembles a piece of the night sky studded with strange stars. It has the ability to detect living creatures within a 60-foot radius; this works in a similar fashion to the *detect thoughts* spell, but it can determine only the presence or absence of creatures (whether conscious or not) and how many, not their mental strength or their surface thoughts. In addition, the sword can cast *haste* upon its wielder, as a 10th-level caster, once per day, and it grants its wielder immunity to mind-affecting spells and effects. *Blackrazor* communicates telepathically, and it can both speak and read Common, Abyssal, Draconic, and Giant.

Blackrazor has a special purpose: to consume souls. It is not finicky about whose soul it consumes, and under certain circumstances it will happily feed on its wielder's. Whenever *Blackrazor* deals enough damage to bring a living creature to -1 or fewer hit points (even below -10), it immediately uses an effect similar to *death knell* to kill the creature and drain its life force (Will save DC 15 negates). Its wielder gains the benefit of the *death knell* effect: 1d8 temporary hit points, +2 Strength, and +1 to effective caster level. These benefits last for 10 minutes per Hit Die of the slain creature. *Blackrazor* itself consumes the soul, however, making it impossible to restore life to the creature except through use of a *wish*, *miracle*, or *true resurrection* spell—but even these powerful spells have only a 50% chance of success.

For every three days the sword remains unfed, its Ego score increases by 1, until it can compel its bearer to kill something for it to eat. Upon feeding, its Ego returns to its normal value.

Blackrazor reacts poorly to contact with negative energy. If it is used to make a successful melee attack against an undead creature, it bestows one negative level upon its wielder and transfers some of this life energy to the undead creature in the form of 5 temporary hit points (which partially offsets the damage it deals). If it bestows as many negative levels upon its wielder as he has Hit Dice, it consumes its wielder's soul through its *death knell*-like effect. The saving throw DC to remove the negative levels is 17.

If the wielder uses *Blackrazor* while afflicted with negative levels from any source, every two living creatures killed with the sword remove one negative level from its wielder, instead of granting temporary hit points and Strength.

AL CN; SV Fort +7, Ref +7, Will +7; Str —, Dex —, Con —, Int 17, Wis 10, Cha 15, Ego 19.

Caster Level: 10th; Prerequisites: Craft Magic Arms and Armor, *death knell*, *haste*, *mind blank*; Market Price: 90,150 gp; Cost to Create: 45,250 gp + 3,592 XP.

Demoncleaver

This impressive name belongs to a rather uninspiring, though extremely self-confident, +1 *holy kukri*.

It has two moderately useful primary abilities:

Its wielder has free use of the Improved Initiative feat and can *detect evil* at will.

It is prone to singing defiant battle-songs about slaughtering demons, switching between Common and

Celestial apparently at random.

Though convinced it is a mighty weapon against evil foes, it puts

on a show of humility at times, begging to be allowed the chance to shatter on a

balor's hide or the like. Its loftiest dream is to be carried into battle by a noble halfling paladin again—the last time this happened, some five centuries ago, the paladin died a grisly death.

AL LG; SV Fort +9, Ref +9, Will +8; Str —, Dex —, Con —, Int 13, Wis 8, Cha 17, Ego 9.

Caster Level: 15th; Prerequisites: Craft Magic Arms and Armor, *detect evil*, *holy smite*, creator must be good; Market Price: 34,708 gp; Cost to Create: 17,508 gp + 1,376 XP.

The Falconblade

Also called the Sword of the Avenger, this weapon is a +1 *reptile bane short sword* with a pommel carved to resemble a falcon's head. Its bane property affects all reptiles, including creatures with the reptilian subtype, yuan-ti, mundane and magical snakes, nagas, and possibly other creatures at the DM's discretion (but not dragons). In addition to its magical bonuses in combat, it possesses the ability to communicate through empathy and a few special powers that reflect the deity Re-Horakhty's eternal opposition to his enemy Set and Set's serpentine minions. The sword can *neutralize poison* three times per day, though it is effective only against snake venom, not the poison of scorpions, spiders, or even other reptiles. It can neutralize the poison of yuan-ti, however,

and any other monster that is basically snakelike. In addition, the wielder of the sword gains a +2 bonus on saving throws against snake venom.

AL LG; SV Fort +9, Ref +9, Will +8; Str —, Dex —, Con —, Int 12, Wis 9, Cha 16, Ego 10.

Caster Level: 15th; *Prerequisites:* Craft Magic Arms and Armor, *neutralize poison, summon monster I*; *Market Price:* 38,030 gp; *Cost to Create:* 19,170 gp + 1,509 XP.

Mark of the Favored

This *ring of regeneration* was created by Wee Jas as a gift to one of her loyal champions. In addition to its regenerative properties, the ring can cast *cure light wounds* on its wearer once per day, and it grants its wearer uncanny dodge as a 5th-level barbarian. In addition, the wearer can *detect magic* at will. Also once per day, it can *heal* either its wearer or another servant of Wee Jas. The ring can communicate telepathically, and it also speaks and reads Common, Celestial, and Infernal.

Mark of the Favored has a special purpose: to defend the servants and interests of Wee Jas. As long as its wearer remains loyal to Wee Jas, the ring can cast *true resurrection* on the wearer, but it can use this ability only once.

AL LN; SV Fort +9, Ref +9, Will +12; Str —, Dex —, Con —, Int 15, Wis 16, Cha 7, Ego 20.

Caster Level: 15th; *Prerequisites:* Forge Ring, *cure light wounds, detect magic, heal, regenerate, true resurrection*, creator must have uncanny dodge class ability; *Market Price:* 150,010 gp.

Minion of the Serpent Lord

This *rod of the viper* insists on the use of its full name at all times, vociferously protesting every time a wielder attempts to give it a nickname. (Past nicknames have ranged from “Minion” to “Meazel,” and it has loathed every one.) Its wielder can *see invisibility* and *detect good* at will. *Minion of the Serpent Lord* speaks Common, Abyssal, Infernal, and Draconic.

AL NE; SV Fort +7, Ref +7, Will +9; Str —, Dex —, Con —, Int 17, Wis 15, Cha 17, Ego 13.

Caster Level: 10th; *Prerequisites:* Craft Rod, Craft Magic Arms and Armor, *detect good, poison, see invisibility*, creator must be evil and at least 15th level; *Market Price:* 37,000 gp.

Nimble Warder

This +1 *light fortification mithral shirt* is all about protection. It grants the benefits of the Mobility feat and the evasion ability to its wearer. It communicates only by semiempathic means, throbbing when its wearer gets into danger. It has a fear of bebilibths that far exceeds their capacity to damage it.

AL N; SV Fort +8, Ref +8, Will +7; Str —, Dex —, Con —, Int 10, Wis 9, Cha 11, Ego 4.

Caster Level: 13th; *Prerequisites:* Craft Magic Arms and Armor, *limited wish* or *miracle*, creator must have access to Mobility feat and evasion class ability; *Market Price:* 41,100 gp; *Cost to Create:* 21,100 gp + 1,600 XP.

The Pearl of Secrets

The *Pearl of Secrets* is a black *pearl of power* (8th-level spell) that claims to have been created by Vecna himself. The *Pearl* is highly intelligent, and it can both speak and read Common, Abyssal, Infernal, and Draconic. It can also communicate telepathically, however, and prefers this method of communication. In addition to the standard use of a *pearl of power*, the wielder of the *Pearl of Secrets* can use *true seeing* at will, *detect thoughts* three times per day, and *detect secret doors* at will.

The *Pearl of Secrets* is incredibly egotistical as well as cunning and wise. It generally insists on being in control, urging or (if possible) forcing its owner to seek after the *Eye and Hand of Vecna*, unearth dark secrets, and generally commit acts of despicable evil.

AL NE; SV Fort +10, Ref +10, Will +15; Str —, Dex —, Con —, Int 17, Wis 21, Cha 14, Ego 23. *Skills:* Sense Motive +15.

Caster Level: 17th; *Prerequisites:* Craft Wondrous Item, *detect secret doors, detect thoughts, true seeing*, creator must be able to cast 8th-level spells; *Market Price:* 165,280 gp; *Weight:* —.

Shard

Shard is a +1 *chaotic longsword* of unknown origin, though some say it could only have been forged in the Ever-Changing Chaos of Limbo. Though highly intelligent, it is borderline insane, and even its magical abilities are random in nature, to say nothing of its personality. Each encounter, it randomly determines which of the following feats to bestow on its wielder (roll before making initiative checks):

d6	Feat
1	Combat Reflexes
2	Blind-Fight
3	Improved Initiative
4	Mobility
5	Sunder
6	Expertise

Shard can also *detect law* at will, though what it chooses to do with the information it gains varies from day to day. Twice per day, *Shard* can use *feeblemind* on an opponent it strikes in melee (or on its wielder, if it desires). *Shard* speaks and reads Common, Celestial, and Abyssal, and can also communicate telepathically.

AL CN; SV Fort +5, Ref +5, Will +3; Str —, Dex —, Con —, Int 15, Wis 6, Cha 18, Ego 16.

Caster Level: 7th; **Prerequisites:** Craft Magic Arms and Armor, *chaos hammer*, *detect law*, *feeblemind*, creator must be chaotic and have access to all six feats mentioned above; **Market Price:** 76,910 gp; **Cost to Create:** 38,610 gp + 3,064 XP.

Stormblade

Stormblade is a +1 *shocking burst bastard sword* with lightning bolts engraved along the blade. Besides its shocking burst property, it grants its wielder the Combat Reflexes feat and allows the wielder to use *jump* for 20 minutes once per day. Finally, the sword can produce a *lightning bolt* (8th-level caster, 8d6 damage, Reflex half DC 17) once per day.

Though its powers suggest the terror and chaos of a storm, *Stormblade* is a noble and virtuous weapon. It fights with grim determination, regretting every lost life, but resigned to the necessity of violence in a world so full of evil. It speaks and reads Common, Celestial, Dwarf, Elf, and Giant.

AL CG; SV Fort +7, Ref +7, Will +8; Str —, Dex —, Con —, Int 19, Wis 12, Cha 13, Ego 14.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, *jump*, *lightning bolt*, creator must have access to Combat Reflexes feat; **Market Price:** 49,575 gp; **Cost to Create:** 24,955 gp + 1,969 XP.

Wave

Wave is a +3 *trident* with an amazing array of special abilities and significant intelligence. In addition to its +3 enhancement bonus, it has the special abilities of both a *trident of fish command* and a *trident of warning*. A character holding *Wave* can breathe underwater (as if a *water breathing* spell had been cast upon her) and can see underwater five times farther than water and light conditions would normally allow (as if wearing a *helm of underwater action*). *Wave* can communicate telepathically, and it speaks Common, Aquan, Aboleth, Draconic, Kuo-Toan, and Sylvan. It can also read all languages and *read magic*.

Wave has a special purpose: to spread the worship of a sea deity (Poseidon in a campaign using the Olympian pantheon from *Deities and Demigods*, or some other deity as appropriate). It has no qualms about bringing death or disfigurement to any who refuse to honor its patron deity. When it scores a successful critical hit against such a creature, *Wave* affects that target (only) with a *horrid wilting* spell (10d8 damage; Fortitude half DC 22).

AL N; SV Fort +7, Ref +7, Will +8; Str —, Dex —, Con —, Int 19, Wis 12, Cha 15, Ego 26.

Caster Level: 10th; **Prerequisites:** Craft Magic Arms and Armor, Craft Wondrous Item, *detect magic*, *freedom of movement*, *horrid wilting*, *speak with animals*, *wall of force*, *water breathing*; **Market Price:** 166,115 gp; **Cost to Create:** 83,215 gp + 6,632 XP.

Whelm

Whelm is a +3 *warhammer* of dwarven manufacture. In the hands of a dwarf, its enhancement bonus increases to +5, and it can be thrown with a 30-foot range increment. It returns to its thrower on the round after it was thrown and is then ready to be wielded or thrown again. When hurled, it deals +1d8 points of bonus damage or +2d8 points of bonus damage against giants. *Whelm* has three primary powers: *detect secret doors* at will, *detect evil* at will, and *locate object* in a 120-foot radius at will. *Whelm* can communicate telepathically, and it speaks and reads Common, Dwarven, Giant, Gnome, and Goblin.

Whelm's special purpose is to destroy goblinoids and giants. Once per day, when struck upon the ground in pursuit of that goal, *Whelm* sends forth a shock wave that forces all creatures within 30 feet to make successful Fortitude saves (DC 18) or be stunned for 1d4 rounds.

Whelm bears a minor curse: One day after first using the weapon in battle, the wielder becomes agoraphobic, dreading open, outdoor spaces. The character takes a –2 penalty on attack rolls, saving throws, and

Shard vs.
Stormblade

skill checks in outdoor settings. For each consecutive 24-hour period during which the wielder fails to spend at least 8 hours indoors or underground, this penalty increases by -1 , to a maximum of -5 . This condition persists until the wielder disposes of *Whelm* permanently.

AL LN; SV Fort +10, Ref +10, Will +14; Str —, Dex —, Con —, Int 12, Wis 18, Cha 7, Ego 20.

Caster Level: 16th; *Prerequisites:* Craft Magic Arms and Armor, *detect evil*, *detect secret doors*, *locate object*, creator must be a dwarf of at least 16th level; *Market Price:* 122,412 gp; *Cost to Create:* 61,362 gp + 7,284 XP.

Whisper

Whisper is a +3 *ghost touch short sword* forged in a land where ghosts ran wild. In addition to its ghost touch property, it allows the wielder to *see invisibility* at will, and it can cast *shield* on its wielder three times per day. It communicates only by empathy, sharing its strong feelings of hatred toward ghosts with its wielder in order to encourage her to hunt what it considers undead abominations.

As might be expected, *Whisper* has a special purpose: to destroy ghosts. When its wielder is using it in combat against a ghost, it grants the character a +2 luck bonus on all saving throws, a +2 deflection bonus to her Armor Class, and SR 15.

AL NG; SV Fort +6, Ref +6, Will +7; Str —, Dex —, Con —, Int 15, Wis 13, Cha 16, Ego 17.

Caster Level: 9th; *Prerequisites:* Craft Magic Arms and Armor, *plane shift*, *see invisible*, *shield*; *Market Price:* 125,790 gp; *Cost to Create:* 63,050 gp + 5,019 XP.

CURSED MAGIC ITEMS

As described in the *DUNGEON MASTER'S Guide*, cursed items are magic items with some sort of potentially negative impact. This chapter expands that category with new common curses—ranging from an additional list of drawbacks to items possessed by evil creatures—as well as an assortment of new specific cursed items.

Table 6–5: Cursed Item Common Curses replaces the table of the same name in the *DUNGEON MASTER'S Guide* (Table 8–38).

Common Curse Descriptions

Several common curses are detailed in the *DUNGEON MASTER'S Guide*, as noted on Table 6–5. New curses are detailed here.

Awkward Use: This curse applies only to items with the spell trigger or command word activation methods. Activating the item requires awkward movements in addition to the normal actions, and provokes attacks of opportunity from threatening foes.

TABLE 6–5: CURSED ITEM COMMON CURSES

d%	Curse
01–08	Delusion (see <i>DMG</i>)
09–18	Opposite effect or target (see <i>DMG</i>)
19–23	Intermittent functioning (see <i>DMG</i>)
24–30	Requirement (see <i>DMG</i>)
31–40	Drawback (see below)
41–48	Awkward use ¹ (see below)
49–57	Divination resistant (see below)
58–65	Extra space (see below)
66–70	Fragile (see below)
71–73	Possessed (see below)
74–81	Short circuit ² (see below)
82–88	Won't resize ³ (see below)
89–95	Completely different effect (see <i>DMG</i>)
96–100	Substitute specific cursed item (see <i>DMG</i> and below)

¹ Applies only to spell trigger and command word items. Reroll if randomly generated for an item with a different activation method.

² Applies only to charged items. Reroll if randomly generated for a noncharged item.

³ Does not apply to weapons. Reroll if randomly generated for a weapon.

Divination Resistant: When subjected to a Divination spell, including *detect magic*, *identify*, and *analyze dweomer*, the item receives a Will saving throw to resist the effect. If its saving throw is successful, the spell reveals no information about the item. This curse usually comes into play only when the item is first discovered, and it might be overlooked as nonmagical treasure.

Drawback: The *DUNGEON MASTER'S Guide* lists a number of drawbacks often found on otherwise beneficial items. When randomly generating a cursed item, roll d%: 01–65, consult the table in the *DUNGEON MASTER'S Guide*; 66–100, consult the table below.

d%	Drawback
01–08	The character cannot be awakened when sleeping until she has slept a full 8 hours. This applies whether the character falls asleep normally or is subjected to a magical <i>sleep</i> effect. Loud noise, slapping, and even wounding do not wake the character from sleep. Elves and half-elves are immune to this drawback.
09–18	The character's hearing diminishes. The character takes a -4 penalty on Listen checks and has a 5% chance to miscast any spell with a verbal component.
19–26	The character takes a -2 penalty on saving throws to avoid becoming dazed or stunned. When dazed or stunned, he remains so for 1 round longer than the normal duration.
27–34	The character does not recover well from wounds. He regains only half the normal number of hit points from resting, and subtracts 1 point per die from the result of healing spells. The character has only a 5% chance per round of stabilizing when dying, and only a 5% chance per minute of waking up when unconscious.

d%	Drawback
35–42	Whenever the character would be shaken, she becomes frightened instead. Whenever she would be frightened, she becomes panicked instead.
43–51	The character becomes easily distracted, taking a –4 penalty on Concentration checks.
52–61	The character develops two random mental or physical quirks, rolled randomly on Table 5–5: One Hundred Traits in the <i>DUNGEON MASTER's Guide</i> .
62–69	The character develops a pathological fear of being grappled. He cannot initiate a grapple and automatically becomes shaken when successfully grappled by an enemy.
70–77	The character becomes sensitive to light. Abrupt exposure to bright light (such as sunlight or a <i>daylight</i> spell) blinds the character for 1 round. In addition, the character takes a –1 penalty on all attack rolls, saves, and checks while operating in bright light.
78–82	The character becomes especially vulnerable to fire, as if she had the cold subtype. She gains no extraordinary resistance to cold, however.
83–87	The character becomes especially vulnerable to cold, as if she had the Fire subtype. She gains no extraordinary resistance to fire, however.
88–90	The character becomes susceptible to loud noises and sonic attacks, taking a –2 penalty on all saves against sonic effects.
91–92	Every time the character takes damage from a slashing or piercing weapon, the wound bleeds for an additional 1 point of damage each round, as if the weapon had the wounding property. Multiple wounds result in cumulative bleeding. The bleeding can only be stopped by a successful Heal check (DC 15) or the application of any healing spell.
93–96	The character becomes susceptible to critical hits. For purposes of confirming a threat, the character takes a –4 penalty on effective Armor Class.
97	Any hit scored with a <i>blessed</i> crossbow bolt instantly kills the character.
98–99	The character experiences flashbacks to the lives of previous owners of the item. At the start of every encounter, there is a 5% chance that the character notices something about an opponent that causes her to recall a past owner's life. If this happens, the character takes no action for 1 round and thereafter takes a –2 penalty on all attacks directed at that opponent.
100	DM's choice: DM either picks one of the above (or one from the DMG) that's appropriate or creates a drawback specifically for that item.

Extra Space: The item uses up two magic item spaces on a character's body. A ring might use both a ring space and a bracer/bracelet space (perhaps it includes a bracelet linked by fine gold chain to the ring itself), a cloak might also use an amulet space

because it includes an elaborate brooch, or a helmet might prevent a character from using eye lenses or goggles.

Fragile: The item has both a lower hardness than its material would normally have (reduce hardness by 1) and fewer hit points than it normally would (reduce hit points by 2).

Possessed: The item's magical power comes not from the normal process of making a magic item, but from a malevolent spirit inhabiting it. The possessing creature may be a ghost, a devil, a demon, or some other evil creature, at the DM's discretion. The item does not radiate magic if detected for, but it might radiate an aura of evil. A character who makes a successful Search check (DC 25) while examining the possessed item can tell that there is "something strange" about it.

The spirit in the item is aware of what is going on around the object: It can see and hear up to 60 feet away as if using its normal senses (it does not gain blindsight). In any round in which it takes no other action (such as using a spell-like ability), it can extend its senses to twice its normal range (120 feet).

The possessing creature is vulnerable to spells that specifically affect creatures of its type or alignment (such as *holy word* and *holy smite*, as well as *chaos hammer* or *order's wrath*) and mind-affecting spells or effects, but it is unaffected by physical attacks or standard magical effects (such as a *fireball*). Harming the object does not harm the possessing creature, although if the object is destroyed the creature is forced into an ethereal form.

The possessing creature can use any ability it has that requires no physical action, such as using a spell-like ability or telepathy. It cannot cast spells (since it can neither speak nor move), attack physically, or perform any other physical action.

The creature possessing the object can attempt to hide its presence by making a special Hide check. This "mental" Hide check uses the creature's Intelligence modifier instead of its Dexterity modifier. A successful check allows the creature to avoid virtually anything that would betray its presence in the object: it can pass through a *magic circle against evil*, enter a temple warded by *forbiddance*, or escape detection via *detect evil*. The DC for this Hide check is the same as the saving throw DC for the spell the creature is trying to avoid. The creature gains a +4 circumstance bonus on this check if it is not controlling the possessed object at the time of the check. Making this check is not an action; the possessing creature can do it in response to another creature's action (such as casting *detect evil*).

The possessing creature has the ability to make the possessed item radiate a corrupt and befouling nature. Anyone touching the object in this state must make a Will save or fall under the effect of a

bestow curse spell. The affected creature does not know that the curse came from the item, and in fact might not know right away that he or she is affected by the curse.

Nothing about the object's appearance suggests that it is possessed. The curse lasts until it is removed, even if the creature vacates the object it possessed.

At the DM's discretion, the creature inhabiting the object may at some time attempt to possess a character who has been carrying or using the object. If this occurs, the target receives a -1 penalty on the saving throw to resist possession for each day the possessed item has been on his person or in his use, to a maximum of -10.

A possessed item's powers function at the command of the possessing spirit, not the item's owner. Most of the time, possessing creatures find it convenient to obey the commands of the owner, but occasionally a creature might refuse to activate the power when commanded, or activate it at an apparently random time. Possessed items may appear to have the simple curse of intermittent functioning, while the truth is much worse.

Short Circuit: This curse only applies to items with charges, including all staves and wands. Each time the item is activated, there is a 25% chance it burns one additional charge, with no additional effect. On a d% roll of 100, however, the effect is actually doubled, as if two charges of the item went off simultaneously.

Won't Resize: Most magic items resize to fit whatever character tries to wear them. These cursed items do not. If necessary, roll on the following table to determine what size creature the item was made for.

d%	Size
01	Tiny
02-26	Small
27-76	Medium-size (50% chance item is sized for a specific race or kind, such as elf or dwarf)
77-96	Large
97-98	Huge
99	Gargantuan
100	Colossal

Possessed Sword

While this certainly seems like a curse to a player character who wants an item but finds it to be the wrong size, creatures such as giants think of it as something of a blessing. They generally make no secret of the item's properties, hoping it will deter Medium-size thieves from coveting it. This curse does not apply to weapons, which normally do not resize.

Specific Cursed Items

As with the items detailed in the *DUNGEON MASTER'S Guide*, these new items have market prices to facilitate construction, should someone want to intentionally create them, but they cannot generally be sold.

Amulet of Sickness

This golden disk appears as an *amulet of health* +6 and functions as such until the wearer takes damage from an enemy with a Challenge Rating equal to or greater than his level. At that moment and thereafter, the amulet imposes a -6 penalty on the wearer's Constitution, including commensurate hit point loss. Once the curse is activated, an *amulet of sickness* can be removed only by means of a *remove curse* spell.

Caster Level: 16th; *Prerequisites:* Craft Wondrous Item, *endurance*, *bestow curse*; *Market Price:* 1,300 gp; *Weight:* —.

Armor of Vulnerability: Any type of magic armor can have this property. *Analyze dweomer* and similar divinations reveal that the armor protects the wearer from critical hits, like the fortification property. In fact, all critical rolls against the wearer are automatically successful (so every threat is a critical hit).

Caster Level: 16th; *Prerequisites:* Craft Magic Arms and Armor, *limited wish* or *miracle*; *Market Price:* +1 bonus.

Belt of Cat's Strength: This wide metal-studded leather belt is decorated with images of lions and appears to be a *belt of giant strength* +6. It functions as such until the wearer attacks an enemy with a Challenge Rating equal to or greater than his level. At that moment and thereafter, the belt imposes a -6 penalty on the wearer's Strength, and the lion images change to house cats. Once the curse is activated, a

belt of cat's strength can be removed only by means of a *remove curse* spell.

Caster Level: 16th; **Prerequisites:** Craft Wondrous Item, bull's strength, bestow curse; **Market Price:** 1,300 gp; **Weight:** 1 lb.

Cloak of Affront: This handsomely tailored cloak appears to be a *cloak of Charisma +6* and actually functions as such until the wearer attempts a Bluff or Diplomacy check. At that moment and thereafter, the cloak imposes a -6 penalty on the wearer's Charisma and makes his personality coarse and grating. Once the curse is activated, a *cloak of affront* can be removed only by means of a *remove curse* spell.

Caster Level: 16th; **Prerequisites:** Craft Wondrous Item, charm monster, bestow curse; **Market Price:** 1,300 gp; **Weight:** 1 lb.

Goggles of Nightblindness: While they appear exactly like *goggles of night*, the effect of these lenses is almost completely opposite. When first worn, they grant the wearer darkvision with a range of 60 feet. As soon as the wearer attacks a creature while using darkvision, however, she becomes completely unable to see except in conditions of bright light (such as sunlight or the *daylight* spell) thereafter. Once the curse is activated, the *goggles of nightblindness* can be removed only by means of a *remove curse* spell.

Caster Level: 16th; **Prerequisites:** Craft Wondrous Item, darkvision, bestow curse; **Market Price:** 1,000 gp; **Weight:** —.

Headband of Hostility: This simple circlet functions as a *headband of intellect +4*. However, whenever the wearer casts a *Conjuration (summoning)* or *Conjuration (calling)* spell, the conjured creature is hostile to the wearer and attacks her instead of her enemies. Once this function has activated, the headband can be removed only by means of a *remove curse* spell. A variation of this item that works as a *periapt of Wisdom +4* also exists.

Caster Level: 16th; **Prerequisites:** Craft Wondrous Item, charm monster, commune or legend lore, bestow curse; **Market Price:** 13,000 gp; **Weight:** —.

Headband of Simple-mindedness: This device appears to be a *headband of*

intellect +6 and functions as such until the wearer attempts a skill check based on Intelligence. At that moment and thereafter, the headband imposes a -6 penalty on the wearer's Intelligence. Once the curse is activated, a *headband of simple-mindedness* can be removed only by means of a *remove curse* spell.

Caster Level: 16th; **Prerequisites:** Craft Wondrous Item, commune or legend lore, bestow curse; **Market Price:** 1,300 gp; **Weight:** —.

Necklace of the Vampire: This elegant necklace is formed of bloodstones, and a large ruby hangs at its center. To all appearances, it is a beneficial and powerful item, granting several magical abilities to its wearer. It grants the wearer darkvision with a range of 60 feet and doubles her rate of natural healing. Three times per day, the wearer can use *vampiric touch*. Once per day, she can use *finger of death*.

The first time the wearer uses *finger of death*, the necklace adheres itself to the wearer. At this point it cannot be removed unless the wearer dies or a *remove curse* is cast. The evil magic of the necklace is such that it entices the wearer to use this power, causing the command word to spring to mind every time she becomes angry, for example. Each successive use of that power causes the necklace to become more and more a part of the wearer's body, gradually being covered over with skin until, after

ten uses of the power, the ruby of the necklace reaches the wearer's heart, killing her forever and turning her into a vampire.

Caster Level: 20th; **Prerequisites:** Craft Wondrous Item, create greater undead, finger of death, vampiric touch; **Market Price:** 90,000 gp; **Weight:** —.

Periapt of Oblivion: A black pearl on a light silver chain, this amulet appears to be a *periapt of Wisdom +6* and functions as such until the wearer attempts a Spot or Listen check. At that moment and thereafter, the periapt imposes a -6 penalty on the wearer's Wisdom. Once the curse is activated, a *periapt of oblivion* can be removed only by means of a *remove curse* spell.

Headband of Hostility

Caster Level: 16th; *Prerequisites:* Craft Wondrous Item, *commune* or *legend lore*, *bestow curse*; *Market Price:* 1,300 gp; *Weight:* —.

ARTIFACTS

This section describes eighteen major artifacts, similar in majesty and power to those in the *DUNGEON MASTER'S Guide* and the *Epic Level Handbook*. Like those others, the artifacts presented in this chapter are items of tremendous power and inestimable worth. However, that doesn't mean they should never appear in a campaign! Quite the contrary—D&D is about heroic adventure, and a quest to find, use, or destroy an artifact can be more heroic than anything else player characters will ever accomplish. Three of these artifacts (the *Blade of Fiery Might*, *Dragonhammer*, and *Helltongue*) originally appeared in the high-level D&D adventures *Lord of the Iron Fortress* and *Bastion of Broken Souls*. Those adventures are useful models of how to incorporate artifacts into high-level campaigns. *Lord of the Iron Fortress* is an adventure about an artifact: An evil warlord sought to reforge the *Blade of Fiery Might*. In *Bastion of Broken Souls*, however, the two artifacts that appear are mostly tangential to the story of the adventure: one (*Dragonhammer*) is found on a body and can be used by the PCs to help them accomplish their goal, while the other (*Helltongue*) is wielded against the PCs in the climactic battle.

Even lower-level games can feature major artifacts. The *Jacinth of Inestimable Beauty* and *Johydee's Mask* are not so powerful that they must be restricted to the hands of high- or even epic-level characters. PCs might be called upon to thwart a thief who wears *Johydee's Mask*, or they might receive the *Jacinth of Inestimable Beauty* as a reward for some service performed for a gold dragon. The *Rod of Seven Parts* could provide the impetus for a campaign that begins at lower levels with the PCs finding one piece of the shattered rod and reaches its climax just as the characters enter epic-level territory.

In short, artifacts appear in D&D products to be used, not simply for your reading pleasure. They should be used carefully, but their proper use all but ensures a campaign grand in scope that will not soon be forgotten.

The Blade of Fiery Might

Mighty efreeti wizards working on the Elemental Plane of Fire created this scimitar. The Grand Sultan of the efreeti wielded it in a legendary battle with their enemies, the djinn. However, a cunning janni rogue working with adventurers from the Material Plane managed to steal the blade from the sultan's throne room and, with the help of

great powers, shattered the blade and scattered its shards across the multiverse. It was only recently reforged by a warlord, the mighty son of a duergar prince and a red dragon, who gathered the spirits of the greatest forgemasters of history in his fortress on the Infernal Battlefield of Acheron to recreate the blade.

Intact, the *Blade of Fiery Might* is a Large (damage 1d10) +5 *unholy keen flaming burst falchion*. When drawn, the blade sheathes its wielder in a constant warm *fire shield* effect and grants a constant triple-strength (360-foot range) arcane *true seeing* on its wielder. The sword's great heat also deals 1d6 points of fire damage to anyone holding it each round. Finally, the wielder can rebuke or command fire creatures (as a 20th-level cleric) up to ten times each day. The blade is also intelligent (Int 11, Wis 19, Cha 22, Ego 28) and lawful evil. It speaks only Ignan, and prefers to communicate telepathically.

The Crystal of the Ebon Flame

The origin of this artifact is unknown. It is a beautifully formed, diamond-hard mineral the size of a human's hand. When a living creature touches the *Crystal*, it sends forth rays of light while a black flame seems to leap and dance in the heart of the jewel. The character touching the *Crystal* must attempt a Will saving throw (DC 20). If this save is successful, she remains unaffected by the *Crystal's* powers, and all other creatures within 30 feet of the *Crystal* must make successful Will saves (also DC 20) or be affected as by a *symbol of persuasion* cast by the character. If the character fails the initial saving throw, she is affected as by a *symbol of insanity*, and all other creatures within 30 feet must make Will saving throws or be likewise affected, regardless of their hit points.

If the character touching the *Crystal* successfully saves against its initial effects, she can control the other powers of the *Crystal* by gazing into its depths at the dancing black flame. The character can use *discern location*, *greater scrying*, and *vision* each once per day. The *Crystal* grants its user a +10 circumstance bonus on Scry checks made when using its *greater scrying* ability. In addition, the character can use either *mind blank* or *protection from spells* once per day, on herself only. If the *Crystal* is called upon to perform its maximum number of powers in a single day (*discern location*, *greater scrying*, *vision*, and either *mind blank* or *protection from spells*), the character using the last power becomes the target of a *trap the soul* effect as soon as the last power is complete. If the character fails the saving throw against this effect, her soul becomes part of the flickering black flame within the *Crystal*, and is utterly lost until the *Crystal* is destroyed. The caster level for all of the *Crystal's* powers is 20th; save DCs, where applicable, are all 25.

Daoud's Wondrous Lantern

This artifact is wrought from the finest yellow gold. Its beautifully crafted framework is set with huge, colorful gems and clear crystal lenses. An unwavering pure flame burns within. The faces are normally fitted with the crystal lenses, but the colorful gems are actually additional lenses, fashioned to fit the four faces of the lantern. The lantern's magical powers change depending upon which of the lenses are fitted to it.

The flame of *Daoud's Wondrous Lantern* cannot be extinguished by any known means, other than by exhausting its supply of fuel. If this occurs, however, the lantern's possessor is instantly slain. The lamp is fueled by crushed transparent gems, contained in a small compartment at its base. The lantern can be refueled with 10,000 gp worth of crushed transparent gems, such as diamonds, rubies, and sapphires. No gemstone worth less than 500 gp can be used as fuel. This load of fuel provides the lantern with 100 charges. If used as a normal lantern, it expends 1 charge per year of burning. The use of magical powers requires additional charges, and thus burns fuel at a faster rate.

The four faces of the lantern can be shuttered so that no light shines through. If all four openings of the lantern are fitted with the crystal lenses, anyone exposed to the lantern's glow for 4 consecutive hours does not need food, drink, or sleep for the next 12 hours. A full day of exposure to this salubrious radiance acts as a *cure light wounds* spell (healing 1d8+5 points of damage) and temporarily halts the effects of disease and poison. Seven consecutive days of exposure removes all disease and neutralizes poison in those creatures who bask in the light.

In addition to the four clear crystal lenses, seven colored lenses were originally made for the lantern, each with its own effect: ruby (red), jacinth (orange), topaz (yellow), emerald (green), diamond (blue), sapphire (indigo), and amethyst (violet). When three openings of the lantern are shuttered and a colored lens is placed in the remaining opening, a beam of colored light shines forth as a ray. This light in itself has no magical power until the proper command word is spoken and the ray is aimed at a single target. If the target is within 10 feet of the lantern and the lantern's wielder makes a successful ranged

touch attack, the target does not receive a saving throw against the effect, and spell resistance does not apply. If the target is farther than 10 feet away (but within the lantern's 30-foot range), normal saving throws and SR apply even with a successful ranged touch attack. The colored rays have the following effects, each of which uses 5 charges:

Type and Color	Effect
Ruby (red)	<i>Hold monster</i> (Will negates DC 17)
Jacinth (orange)	<i>Flame strike</i> (15d6 damage [half fire, half sacred], Reflex half DC 16)
Topaz (yellow)	<i>Lightning bolt</i> (10d6 electricity damage, Reflex half DC 14)
Emerald (green)	<i>Haste</i>
Diamond (blue)	<i>Color spray</i> (Will negates DC 11)
Sapphire (indigo)	<i>Fear</i> (Will negates DC 16)
Amethyst (violet)	<i>Emotion (rage)</i> (Will negates DC 16)

If a character places a colored gem lens in each opening of the lantern and rapidly spins it around, all creatures within 30 feet of the lantern (except its wielder) must make a successful Will save (DC 16) or be affected by *confusion*. Creatures within 10 feet of the lantern do not receive saving throws or SR. Any combination of four colored lenses produces this effect. This ability uses 10 charges.

If a character possesses all seven colored lenses and places them all, in any order, in a single opening of the lantern, the lantern produces a *prismatic spray* (save DC 20) on command. This uses 50 charges and has a 10% chance of shattering 1d4 lenses, chosen at random.

If all seven lenses are arranged so that the diamond lens is alone in one opening, the ruby and jacinth lenses are in the next, the topaz and emerald lenses in the third, and the sapphire and amethyst lenses in the fourth, the lantern produces a *prismatic sphere* (save DC 23) on command. This uses 50 charges.

Opening or closing one or two shutters on the lantern is a move-equivalent action that does not provoke attacks of opportunity. Placing or removing a lens in an opening is a full-round action that does provoke attacks of opportunity from threatening foes. All powers of the lantern are at a caster level of 20th.

If a lens shatters, a spellcaster with the Craft Wondrous Item feat can make a new one. The lens requires an enormous gemstone of the appropriate variety, worth at least 10,000 gp, and it must be cut by an expert gemcutter (Craft [gemcutting] check DC 30) who has access to one of the other lenses to

Daoud's
Wondrous
Lantern

use as a guide. In addition to the Craft Wondrous Item feat, the character making the lens must have access to the spell power that lens duplicates (*hold monster*, *flame strike*, *lightning bolt*, *haste*, *color spray*, *fear*, or *emotion*), and must spend 5,000 gp and 10 days in the crafting process.

A character who owns *Daoud's Wondrous Lantern* gradually becomes highly possessive of the item, suspicious of those who look at it, and increasingly secretive about it. This increases to paranoid intensity by the time the owner has held the lantern for one year.

Dragonhammer

Dragonhammer is a +5 *holy dragon bane greatsword* when used against evil dragons. Its bane property does not function against good dragons. Against attacks by dragons, the wielder of the sword enjoys acid, electricity, fire, and cold resistance 20 and a +7 luck bonus to AC.

Helltongue

Helltongue is a +5 *mighty whip* (+4 Strength bonus) that deals base damage as if it were a Colossal whip (2d6). It has three strands. On any successful hit, roll an additional 1d6: on a 1–2 one strand hits, on a 3–4 two strands hit, and on a 5–6 all three strands hit the target.

One Strand: A portion of the target's soul is transferred to the wielder. The target gains two negative levels and the wielder gains 20 temporary hit points per negative level bestowed. Temporary hit points gained from the whip last for 24 hours.

Two Strands: As one strand, except the whip bestows four negative levels.

Three Strands: The target must make a successful Fortitude save (DC 10 + 1/2 the wielder's character level + the wielder's Wisdom modifier) or immediately gain a number of negative levels equal to the target's effective character level (normal character level minus any negative levels already conferred). The wielder gains 20 temporary hit points per negative level bestowed, and they last for 24 hours.

The Iron Flask of Tuerny the Merciless

Tuerny the Merciless was a powerful spellcaster who killed the royal family of an ancient land to gain control of the kingdom. He enslaved the considerable army of the land with magic and forced them to war with neighboring lands. Tuerny then began to summon demons, but he lacked the ability to control them. The fiends ravaged the countryside and threatened his kingdom, so Tuerny fashioned a device that would imprison them and bind them to his will. This worked, and with the device Tuerny's might grew even further, until one

day the demons within his *Iron Flask* broke free and claimed his soul.

The *Iron Flask* is very small and plain, although the stopper is engraved and embossed with runes of power. It holds 1d4 demons within it when first found. Roll d% for each demon: 01–40 glabrezu, 41–80 nalfeshnees, 81–95 mariliths, 96–00 balors. When the owner unstoppers it, he can command one of the demons to come out for up to 8 hours or until slain (at which point the demon goes back into the flask), and can control the demon's every action during that time. No demon can be called forth more than once per week.

More demons can be added to the *Iron Flask*. The target demon must be within 30 feet, and the owner of the flask must use a standard action and a command word to attempt to imprison it. The user makes a spell resistance check (if needed), using the *Iron Flask's* caster level of 20, and if that is successful, the demon must make a Will save (DC 20) to avoid imprisonment. The flask can hold up to 100 demons. At the time that a demon is imprisoned, 1d4 other demons attempt to get free from the flask. For each attempted escape, the possessor must make a Will saving throw (DC 20 plus 1 per demon in the flask). If a demon frees itself, it turns on the possessor and attempts to slay him.

Each time a demon is called from the *Iron Flask*, the owner must make a successful Will saving throw (DC 20 plus 1 for each previous save plus 1 per demon in the flask) or become chaotic evil. Further, each time he must also make a level check (DC 10 plus 1 for each previous save plus 1 per demon in the flask) or the demon called is freed and turns on him.

If the possessor is ever slain by one of the demons from the *Iron Flask*, the demon is able to immediately steal his soul and carry it off to the Abyss.

The Jacinth of Inestimable Beauty

This reddish gemstone is indescribably beautiful and exquisitely cut in dozens of facets that reflect the smallest light into a splendid display of radiant beams. When openly displayed in the presence of any light source, the stone doubles the effective radius of illumination. When held, the *Jacinth of Inestimable Beauty* grants its possessor blinding beauty like that of a nymph. This ability affects all creatures within 60 feet of the possessor and of the same creature type (humanoid, outsider, and so on). Those who look directly at the possessor must succeed on a Fortitude save (DC 15) or be permanently blinded. The possessor cannot suppress this ability while holding the gem, only by putting it away. Once per day on command, the *Jacinth* can wrap its possessor in unearthly beauty, again like a nymph's special ability. Creatures of any type within 30 feet

*The Jacinth
of Inestimable
Beauty*

who look directly at the item's owner must succeed on a Will save (DC 17) or die.

Johydee's Mask

When not worn, *Johydee's Mask* appears as a simple white porcelain mask with very plain features. When put on by any creature, however, it immediately transforms into an exact replica of that creature's face, appearing as though the creature had no mask on at all. The wearer is immune to gaze attacks and mind-affecting spells and effects. In addition, the wearer can command the mask to disguise her as another creature; this works like the *alter self* spell.

The Regalia of Evil

These three separate artifacts possess great power—and even greater power when used together. In eons long past, before humanity was born, perhaps before the world was forged, a gathering of the gods of darkness and corruption worked together to outfit a champion to pit against the gods of light and the lords of balance. Since this time, the *Regalia of Evil* have been used by a champion of evil whenever a dispute needed to be settled against the similarly equipped champion of good or neutrality (each side having its

own regalia, as described below). It may be that today these contests of champions no longer occur, and that the individual items of the regalia have fallen into mortal hands. Still, the gods of evil occasionally check on the devices that they created so long ago. It has been millennia since all three items of the *Regalia of Evil* have been used by a single being.

The Crown of Evil: This iron crown is crude and rough, but fashioned to look like black flames wreathing the head of the wearer. When an evil creature puts on the crown, its head is indeed wreathed in actual reddish-black fire. These flames conceal the wearer's face. The wearer gains immunity to fire, a +4 enhancement bonus to Strength, a +4 deflection bonus to Armor Class, and SR 20. He can use an unnerving gaze at will, making his face resemble a loved one or bitter enemy of one opponent within 75 feet, and causing that opponent to take a –1 morale penalty on all attack rolls for 20 rounds (Will save negates DC 15; SR applies). Three times per day each, he can use *create undead* and *wall of fire* and can also create a burst of hellfire in a 5-foot-radius spread, dealing 3d6 points of damage (no saving throw, but SR applies). These special diabolic flames are not actual fire, and resistance to fire offers no protection from them. All spells and similar abilities are cast at 20th level. The wearer can speak only lies while wearing the crown (and most wearers choose never to speak at all).

The Scepter of Evil: This rod is made of iron, draped in chains. A dark red flame is always lit at one end, but it gives no heat. While in an evil character's possession, it confers a +4 enhancement bonus to Charisma. The wielder can use the following spells three times per day each: *fear* (DC 19), a special corrupt *fireball* that deals half fire and half unholy damage (DC 18), *contagion* (DC 18), and *enervation* (DC 19). All spells are cast at 20th level. The owner of this device slowly becomes more and more egotistical.

The Orb of Evil: This 6-inch orb is made of pitted and scarred iron. Red sparks fly from it at the slightest touch. An evil wielder can rebuke or command undead as a 15th-level cleric. While in an evil character's possession, it confers a +4 enhancement bonus to Wisdom. Further, the orb can be used to absorb spells like a *rod of absorption*. The owner slowly grows more greedy over time.

The *Regalia of Evil* possess greater powers, called resonating effects, if the same creature owns more than one of them.

Resonating Effect (Two Items): While a single creature possesses two items of the *Regalia of Evil*, he gains a +2

The Regalia of Might

circumstance bonus on all Diplomacy and Intimidate checks made against evil creatures, as they automatically recognize the creature as a powerful minion of evil. Mindless undead view the character as an undead creature, and the character's affinity for the undead grants him a +1 circumstance bonus on saving throws against mind-influencing effects, poison, sleep, paralysis, stunning, and disease. Similarly, vermin hold the character in high regard; a successful Charisma check (DC 20) prevents a vermin from attacking the character for 24 hours. Finally, all evil spells cast by the creature (including those from an item of the *Regalia*) have +2 added to the saving throw DC.

Resonating Effect (Three Items): While a single creature possesses all three items of the *Regalia of Evil*, he gains a +4 enhancement bonus to Constitution, Dexterity, and Intelligence. All weapon damage dealt by the wielder is infused with the essence of evil, and can only be healed by magic cast within the area of a *consecrate* or *hallow* spell.

Nonevil Characters: A nonevil character attempting to use any of these items immediately takes 5d6 points of damage. Further, a good-aligned character attempting to use the items must succeed on a Will saving throw (DC 18) or lose 2,000 XP.

The Regalia of Good

The three mighty artifacts that comprise the *Regalia of Good* were forged at the same time as the *Regalia of Evil* and for the same purpose: for the use of a divine champion to oppose the similarly-equipped champions of the evil and neutral deities. For long centuries, the deities of good held the items of the regalia together in one god's care, but they were stolen, separated, and are now lost.

The Crown of Good: This thin coronet of twisted mithral is elegant and slender, fashioned to look like rays of light surrounding the head of the wearer. When a good creature puts on the crown, its head is indeed surrounded in a brilliant halo of light. The wearer gains immunity to electricity, a +4 enhancement bonus to Wisdom, a +4 deflection bonus to Armor Class, and SR 20. He can use the *guidance* spell at will. He can use the following spells three times per day each: *heroes' feast*, *sending*, and *status*. Once per day, he can surround himself with a *globe of invulnerability*. All spells are cast at 20th level. The wearer can not speak any lies while wearing the crown.

The Scepter of Good: This slender rod is made of mithral, wreathed in a pattern of intertwining leaves. One end constantly glows with a soft white light equivalent to a torch, but heatless. While in a good character's possession, it confers a +4 enhancement bonus to

Charisma and grants immunity to mind-affecting spells and effects. The wielder can command obedience as if it were a *rod of rulership* with no use limit, and can use *holy smite* (DC 19) and *searing light* (DC 18) three times per day each. All spells are cast at 20th level. The wielder of the scepter becomes increasingly unable to refuse pleas for help, no matter how desperate the cause.

The Orb of Good: This 6-inch sphere is made of purest crystal, encased in a filigree cage of polished mithral laurel leaves. A good wielder can turn or destroy undead as a 15th-level cleric. While in a good character's possession, it confers a +4 enhancement bonus to Intelligence. Further, the orb can be used to scry like a *crystal ball* with the added ability to *detect thoughts*. Once per day, the orb can be used to cast *heal* (as a 20th-level cleric) by touch.

Resonating Effect (Two Items): While a single creature possesses two items of the *Regalia of Good*, he gains a +2 circumstance bonus on all Diplomacy checks made against good creatures, as they automatically recognize the character as a powerful servant of good. As the character's nature alters to reflect the celestial energies that surround the regalia, he gains a +1 circumstance bonus on saving throws against electricity, petrification, cold, acid, fire, and poison. The character gains low-light vision and darkvision with a range of 60 feet. If the wielder casts a *planar ally* spell (including the lesser and greater versions) to call a celestial, the creature will serve for half the price it would normally charge, in goods or services (at the DM's discretion). Finally, all good spells cast by the creature (including those from an item of the *Regalia*) have +2 added to the saving throw DC.

Resonating Effect (Three Items): While a single creature possesses all three items of the *Regalia of Good*, he gains a +4 enhancement bonus to Strength, Dexterity, and Constitution. Any weapon wielded by the creature becomes a holy weapon, dealing an extra +1d6 points of damage to evil creatures. In addition, the wielder radiates an aura of courage, granting all his allies within 30 feet a +4 morale bonus on their saving throws to resist fear effects.

Nongood Characters: A nongood character attempting to use any of these items immediately takes 5d6 points of damage. Further, an evil-aligned character attempting to use the items must succeed on a Will saving throw (DC 18) or lose 2,000 XP.

The Regalia of Neutrality

It is not clear whether the deities of neutrality created the items of the *Regalia of Neutrality* to take an active part in the contests of divine champions that prompted the creation of the similar items of good and evil, or whether they appointed a champion to help resolve those contests. Whatever the case, these items are equally ancient and equally powerful. The current location of the items is unknown—it is possible that

one neutral deity still holds them for safekeeping, or that the neutral deities, as they once did, still take turns keeping guard over the items. It is equally possible that they too were lost or stolen.

The Crown of Neutrality: This gold crown is traditional in appearance compared to its related items of Good and Evil, being a wide circle of metal surmounted by nine peaks, each peak holding a gemstone of a different color. The wearer gains immunity to acid and cold, a +4 enhancement bonus to Intelligence, a +4 deflection bonus to Armor Class, and SR 20. She can automatically distinguish between truth, half-truth, and lies she hears or reads. She can use the following spells three times per day each: *geas/quest*, *detect thoughts* (DC 17), and *Otiluke's resilient sphere* (DC 19). All spells are cast at 20th level. In the interest of maintaining impartiality, the wearer of the crown is compelled to reveal all falsehoods she discerns, including those she herself speaks.

The Scepter of Neutrality: This ornate gold scepter, like the crown, looks like many mundane royal scepters: a heavy rod topped with a large globe and studded with gemstones. While in a neutral character's possession, it confers a +4 enhancement bonus to Constitution. The wielder gains fast healing 2, healing 2 hit points every round until she is slain or no longer holds the scepter. The wielder can use the following spells three times per day each: *tongues* (DC 20), *shout* (DC 19), and *greater command* (DC 20). All spells are cast at 20th level. The wielder of the scepter becomes increasingly driven to seek resolution to disputes (though not necessarily a peaceful solution to, for example, being ambushed by monsters).

The Orb of Neutrality: This 6-inch orb is made of gold and topped by a gem-studded knob. While in a neutral character's possession, it confers a +4 enhancement bonus to Charisma. Further, the orb allows the wielder to see in all directions at once, as if wearing a *robe of eyes*, but with no visible change to her person. She gains darkvision to 120 feet and can see invisible or ethereal things within 120 feet. She also gains a +15 circumstance bonus on Search and Spot checks. She retains her Dexterity bonus to AC even when flat-footed and can't be flanked. Unlike a *robe of eyes*, the Orb does allow its wielder to avert or close her eyes from a creature with a gaze attack, and it cannot be blinded by magical light.

Resonating Effect (Two Items): While a single creature possesses two items of the *Regalia of Neutrality*, she gains a +2 circumstance bonus on all Diplomacy checks made against neutral (neither good nor evil) creatures, as they automatically recognize the character as a powerful servant of neutrality. The character slowly becomes more like the inevitables, construct inhabitants of the Clockwork Nirvana of Mechanus, gaining a +1 circumstance bonus on saving throws against mind-influencing effects, poison, sleep, paralysis, stunning,

disease, death effects, and necromantic effects. Animals (including dire animals but not beasts) hold the character in high regard; a successful Charisma check (DC 20) prevents an animal from attacking the character for 24 hours. All lawful or chaotic spells cast by the creature (including those from an item of the *Regalia*) have +2 added to the saving throw DC.

Resonating Effect (Three Items): While a single creature possesses all three items of the *Regalia of Neutrality*, she gains a +4 enhancement bonus to Strength, Dexterity, and Wisdom. Any weapon she wields is treated as a speed weapon, granting her an extra attack each round at her highest bonus.

Good and Evil Characters: A good or evil character attempting to use any of these items immediately takes 5d6 points of damage and must succeed on a Will saving throw (DC 18) or lose 2,000 XP.

The Rod of Seven Parts

Forged eons ago by the Wind Dukes of Aaqa, powerful creatures of law, for use in their war against the Queen of Chaos, the *Rod of Seven Parts* was sundered in the cataclysmic battle of Pesh. Its seven fragments scattered themselves across worlds and planes, but each fragment retains at least a fragment of the mighty magic that once coursed through the complete *Rod*.

The *Rod of Seven Parts*, when intact, was 5 feet long and tapered from 2 inches across at the bottom to a half-inch at the tip. As portions of an artifact of law, the segments do not appear broken. Each break is an intricate pattern of crystalline facets, including both protrusions and depressions. The individual segments are 4, 5, 6, 8, 10, 12, and 15 inches long.

Each segment of the *Rod* has a minor spell-like power activated by a command word. The caster level for each power is 20th; saving throw DCs, where applicable, are 17 + spell level. The 4-inch tip can *cure light wounds* five times per day. The 5-inch segment can create a *slow* effect once per day.

The 6-inch segment

The Rod of Seven Parts

can cast *haste* once per day. The 8-inch segment can create a *gust of wind* five times per day. The 10-inch segment provides *true seeing* once per day. The 12-inch segment can *hold monster* once per day. The 15-inch segment can *heal* once per day.

A nonlawful character who possesses a single segment of the *Rod of Seven Parts* must make a Will save each week (DC 17) to avoid becoming lawful. A lawful character who holds a segment of the *Rod* and thinks of it as part of a larger item can determine in what direction the next-larger segment lies by making a successful Concentration check (DC 20); this works like *locate object*, but there is no range or duration limit and it is not blocked by lead. This power cannot be used to find smaller segments than the one possessed.

The segments of the *Rod* can be joined together to produce an increasingly powerful artifact—the more pieces joined, the mightier the item. Two segments joined together allow the wielder to *fly* at will, using a command word to activate the power. Three segments grant the wielder spell resistance 15, and can be used as a +1 *light mace*. Four segments can *control winds* twice per day (command-word activated) and function as a +2 *heavy mace*. Five segments allow the wielder to *shapechange* once per day, and function as a +3/+3 *quarterstaff*. Six segments allow the user to *wind walk* once per day, and function as a +4/+4 *quarterstaff*. A character wielding six or seven assembled segments as a weapon gains the benefit of the Ambidexterity and Two-Weapon Fighting feats, facilitating the *Rod's* use as a double weapon. The character does not gain the benefit of these feats when fighting with any weapon other than the *Rod*.

If a character attempts to join two pieces of the *Rod* together incorrectly (trying to attach the 6-inch segment to the 10-inch segment, for example), the larger segment *teleports* away, traveling 1d10 × 100 miles in a random direction. Because the dimensions of the *Rod* are so precise, it is easy to tell which pieces belong together and which do not.

If all seven segments of the *Rod of Seven Parts* are joined together, it gains several additional powers. The wielder of the assembled *Rod* can use *control weather*, *whirlwind*, and *greater restoration*, each once per day. The *Rod* functions as a +5/+5 *quarterstaff* with the chaotic outsider bane and lawful properties on both ends.

Finally, the wielder of the *Rod of Seven Parts* can use it to cast *true resurrection*, but using this power causes the *Rod* to shatter, its pieces scattering once more across the worlds and planes.

APPENDIX: TREASURE TABLES

On the following pages are tables containing most of the items described in the *Arms and Equipment Guide*. If you roll for treasure (see Table 7–4 in the *DUNGEON MASTER'S Guide*) and get one or more items as a result, you can use the tables below to incorporate the items in this book into your campaign.

For each item in the treasure hoard, roll on Table A–1 below and use the tables in this chapter to determine the specific item if the d% result is sufficiently high.

TABLE A–1: TREASURE SOURCE

d%	
01–85	Use Table 7–7 in the <i>DUNGEON MASTER'S Guide</i> if the treasure is a mundane item, or Table 8–2 in the <i>DUNGEON MASTER'S Guide</i> if the treasure is a magic item.
86–100	Use Table A–2 (below) if the treasure is a mundane item or Table A–3 if the treasure is a magic item.

If your campaign uses treasure from *Magic of Faerûn* in addition to the *DUNGEON MASTER'S Guide*, roll on this version of Table A–1 instead:

TABLE A–1: TREASURE SOURCE

d%	
01–80	Use Table 7–7 in the <i>DUNGEON MASTER'S Guide</i> if the treasure is a mundane item, or Table 8–2 in the <i>DUNGEON MASTER'S Guide</i> if the treasure is a magic item.
81–90	Use Table 7–7 in the <i>DUNGEON MASTER'S Guide</i> if the treasure is a mundane item, or the appropriate tables in Chapter 6 of <i>Magic of Faerûn</i> if the treasure is a magic item.
91–100	Use Table A–2 (below) if the treasure is a mundane item or Table A–3 (below) if the treasure is a magic item.

TABLE A–2: MUNDANE AND ALCHEMICAL ITEMS

d%	Item	Cost
01–02	Bark armor	5 gp
03–04	Ring armor	75 gp
05	Shell armor	25 gp
06–08	Coral armor	225 gp
09	Stone armor, dwarven	1,750 gp
10	Shield, stiletto	30 gp
11	Bondleaf wrap	1,000 gp
12–13	Wicker armor	1 gp
14	Moon-ivy armor, standard	16,000 gp
15	Moon-ivy armor, explosive spore	16,500 gp
16	Moon-ivy armor, poison ivy	16,500 gp
17	Moon-ivy armor, pheromones	16,500 gp
18	Bone armor	20 gp
19	Cord armor	15 gp
20	Wood armor	15 gp
21	Leather scale armor	35 gp
22	Brigandine armor	30 gp
23–25	Lamellar armor	150 gp
26	Dastana	25 gp
27	Dendritic armor	2,000 gp
28	Animal call	20 gp
29	Armor maintenance kit	1 gp

d%	Item	Cost
30	Ascender/slider	20 gp
31	Bolt cutters	6 gp
32	Brewmaker, dwarven	40 gp
33	Candle, insectbane, 1d10	1 sp ea.
34–35	Darkvision powder	10 gp
36	Finger blades	20 gp
37	Glass cutter	2 gp
38	Grappling hook, collapsible	3 gp
39	Hacksaw, common	5 gp
40	Housebreaker harness	20 gp
41–42	Ice axe	10 gp
43	Lantern, fog-cutter	20 gp
44–45	Marbles, bag	2 sp
46	Percolator	1 gp
47	Periscope	20 gp
48	Quiver scabbard	10 gp
49	Rope, elven (20 ft.)	50 gp
50	Saw, folding	2 gp
51	Shoes, silent	10 gp
52–53	Sparker	2 gp
54–55	Spider poles	35 gp
56	Springwall	60 gp
57	Thieving helmet	10 gp
58–59	Twine, roll (50 ft.)	1 sp
60–61	Water, Lawful	25 gp
62–63	Water, Chaotic	25 gp
64–65	Boots, smuggler's	10 gp
66	Bullet, acid, 1d4	10 gp ea.
67	Bullet, flame, 1d4	20 gp ea.
68	Hawk's ointment (1d4 vials)	50 gp ea.
69	Vicious bleeder (1d4 flasks)	50 gp ea.
70–72	Candle, focusing, 1d10	100 gp ea.
73–75	Candle, restful, 1d10	100 gp ea.
76	Clearbreath (1d4 vials)	50 gp ea.
77	Defoliator (1d4 flasks)	20 gp ea.
78	Dehydrated food (2d10 days)	2 gp/day
79	Dwarfblind, 1d4 stones	50 gp ea.
80	Farflame oil (flask)	2 gp
81	Motelight (flask)	20 gp
82	Fleetfoot (1d4 vials)	50 gp ea.
83	Gravebane (1d4 flasks)	50 gp ea.
84	Instant rope (1 flask)	25 gp
85	Longbreath (1d4 vials)	50 gp ea.
86	Nature's draught (1d4 vials)	50 gp ea.
87	Ghostoil (1d4 flasks)	50 gp ea.
88–89	Bullet, priest's	25 gp
91	Signal torch, 2d6	1 gp ea.
92–94	Sparkstone, 2d6	50 gp ea.
95	Stonebreaker acid (1d4 flasks)	20 gp ea.
96	Bladefire (1d4 flasks)	20 gp ea.
97	Verminbane (1d4 flasks)	20 gp ea.
98–100	Masterwork uncommon weapon (roll on Table A–14, below)	

TABLE A–3: RANDOM MAGIC ITEM GENERATION

Minor	Medium	Major	Item
01–04	01–10	01–10	Armor or shield (Table A–4)
05–09	11–20	11–20	Weapons (Table A–12)
10–44	21–30	21–25	Potions (Table A–18)
45–46	31–40	26–35	Rings (Table A–19)
—	41–50	36–45	Rods (Table A–20)
47–81	51–65	46–55	Scrolls (Tables 8–21, 8–22, and 8–23 in the <i>DUNGEON MASTER'S Guide</i>)
—	66–68	56–75	Staves (Table A–21)

APPENDIX: TREASURE TABLES

Minor	Medium	Major	Item
82-91	69-83	76-80	Wands (Table 8-27 in the <i>DUNGEON MASTER'S Guide</i>)
92-100	84-100	81-100	Wondrous items (Tables A-22, A-23, and A-24)

TABLE A-4: ARMOR AND SHIELDS

Minor	Medium	Major	Item
01-50	01-30	01-50	Random armor material ¹
51-87	31-57	51-87	Random shield material ¹
—	58-60	88-100	Specific armor (Table A-8)
—	61-63	—	Specific shield (Table A-9)
—	64-82	—	Armor special ability ²
88-100	83-100	—	Shield special ability ²

¹ Roll on Table A-5, below, to determine if the armor or shield has an enhancement bonus. Then roll on Table A-6 (for armor) or Table A-7 (for shields) to determine the nature of the material.

² Any armor or shield with a special ability must have an enhancement bonus of at least +1. Roll on Table A-5, below, until an appropriate result is obtained. Next, roll again on Table A-4; if this result indicates that the armor or shield is made of an unusual material, roll on Table A-6 (for armor) or Table A-7 (for shields) to determine the nature of the material. Then roll on Table A-10 (for armor) or Table A-11 (for shields) to determine the item's special ability.

TABLE A-5: ARMOR OR SHIELD ENHANCEMENT BONUS

Minor	Medium	Major	Item
01-90	01-50	01-10	No enhancement bonus
91-97	51-70	—	+1
98-100	71-85	—	+2
	86-95	11-35	+3
	96-100	36-80	+4
		81-100	+5

TABLE A-6: RANDOM ARMOR MATERIAL

d%	Armor	Cost ¹
	Blended quartz	
01-08	Light	+2,000 gp
09-16	Medium	+5,000 gp
17-24	Heavy	+10,000 gp
	Bronzewood	
25-32	Light	+1,000 gp
33-40	Medium	+4,000 gp
41-48	Heavy	+9,000 gp
49-55	Urdrugar	+500 gp/lb
51-62	Chitin	+10,000 gp
	Elukian clay	
63-70	Light	+1,000 gp
71-78	Medium	+2,000 gp
79-86	Heavy	+4,000 gp
87-93	Darkleaf (elven)	+750 gp
94-100	Leafweave (elven)	+750 gp

¹ Add to armor cost from Table 8-4: Random Armor Type in the *DUNGEON MASTER'S Guide* to determine total market price.

If you roll for a random armor material on Table A-6, you must determine the type of armor by rolling on Table 8-4: Random Armor Type in Chapter 8 of the *DUNGEON MASTER'S Guide*.

TABLE A-7: RANDOM SHIELD MATERIAL

d%	Shield	Cost ¹
01-20	Blended quartz	+2,000 gp/lb.
21-40	Bronzewood	+500 gp/lb.
41-60	Urdrugar	+500 gp/lb.
61-80	Chitin	+2,000 gp/lb.
81-100	Elukian clay	+200 gp/lb.

¹ Add to shield cost from Table 8-5: Random Shield Type in the *DUNGEON MASTER'S Guide* to determine total market price.

If you roll for a random shield material on Table A-7, you must determine the type of shield by rolling on Table 8-5: Random Shield Type in Chapter 8 of the *DUNGEON MASTER'S Guide*.

TABLE A-8: SPECIFIC ARMORS

Medium	Major	Specific Armor	Market Price (gp)
01-10	—	Electric eel elixir	2,050
11-22	—	Porcupine elixir	2,300
23-34	—	Skin paint	5,000
35-46	—	Beetle elixir	8,300
47-58	01-10	Disarmor	10,875
59-70	11-20	Plantbane	11,240
71-82	21-30	Tesselated armor	11,560
83-94	31-40	Rhino elixir	17,500
95-100	41-51	Stonecunning	32,130
—	52-63	Bale eye	37,360
—	94-75	Armor of weapon creation	42,305
—	76-87	Gazebane	74,050
—	88-100	Vampire hunter	100,000

TABLE A-9: SPECIFIC SHIELDS

Medium	Specific Shield	Market Price (gp)
01-10	Swarm shield	6,160
11-33	Variable shield	6,560
34-63	Beetle buckler	6,600
64-93	Useful buckler	10,265
94-100	Spider shield	40,800

TABLE A-10: ARMOR SPECIAL ABILITIES

Medium	Special Ability	Market Price Modifier ¹
01-09	Aquatic	+2
10-18	Command	+2
19-28	Daylight	+2
29-38	Fearsome	+2
39-48	Feathered	+2
49-58	Sacred	+2
59-63	Buffering	+3
64-69	Aquatic (w/water breathing)	+3
70-75	Bane blind	+3
76-80	Distracting	+3
81-100	Acidic	+4

¹ Add to enhancement bonus from Table 8-3: Armor and Shields in the *DUNGEON MASTER'S Guide*, and to armor cost from Table 8-4: Random Armor Type in the *DUNGEON MASTER'S Guide*, to determine total market price.

If you roll for an armor special ability on Table A-10, you must determine the type of armor by rolling on Table 8-4: Random Armor Type in Chapter 8 of the *DUNGEON MASTER'S Guide*, and you must determine the armor's enhancement bonus by rolling on Table 8-3: Armor and Shields in the *DUNGEON MASTER'S Guide*.

(rerolling any result that does not yield armor with a bonus of +1 to +5).

TABLE A-11: SHIELD SPECIAL ABILITIES

Minor	Medium	Special Ability	Market Price Modifier ¹
01-43	01-09	Wrapping	+1
44-87	10-19	Arrow-catching	+1
88-93	20-59	Dancing	+3
94-100	60-100	Distracting	+3

¹ Add to enhancement bonus from Table 8-3: Armor and Shields in the *DUNGEON MASTER'S Guide*, and to shield cost from Table 8-5: Random Shield Type in the *DUNGEON MASTER'S Guide*, to determine total market price.

If you roll for a shield special ability on Table A-11, you must determine the type of armor by rolling on Table 8-5: Random Shield Type in Chapter 8 of the *DUNGEON MASTER'S Guide*, and you must determine the armor's enhancement bonus by rolling on Table 8-3: Armor and Shields in the *DUNGEON MASTER'S Guide* (rerolling any result that does not yield a shield with a bonus of +1 to +5).

TABLE A-12: WEAPONS

Minor	Medium	Major	Weapon Bonus	Base Price ¹
01-55	01-10	—	+1	2,000 gp
56-70	11-20	—	+2	8,000 gp
—	21-58	01-20	+3	18,000 gp
—	59-62	21-38	+4	32,000 gp
—	—	39-49	+5	50,000 gp
—	—	—	+6 ²	72,000 gp
—	—	—	+7 ²	98,000 gp
—	—	—	+8 ²	128,000 gp
—	—	—	+9 ²	162,000 gp
—	—	—	+10 ²	200,000 gp
71-85	63-68	50-100	Specific weapon ³	—
86-100	69-100	—	Special ability and roll again ⁴	—

¹ This price is for 50 arrows, crossbow bolts, or sling bullets.

² A weapon can't actually have a bonus higher than +5. Use these lines to determine price when special abilities are added in. Example: A +3 *dagger* that also has the energy aura special ability (+3 modifier; see Table A-15: Melee Weapon Special Abilities) is treated as a +6 *dagger* for pricing purposes and is priced at 72,000 gp.

³ See Table A-17: Specific Weapons.

⁴ See Table A-15: Melee Weapon Special Abilities for melee weapons or Table A-16: Ranged Weapon Special Abilities for ranged weapons.

After rolling on Table A-12, refer to Table A-13 (below) if necessary to determine the weapon's type (melee, ranged, or uncommon).

TABLE A-13: WEAPON TYPE DETERMINATION

d%	Weapon Type
01-70	Common melee weapon (see Table 8-12 in the <i>DUNGEON MASTER'S Guide</i>)
71-80	Uncommon weapon (see Table A-14, below)
81-100	Common ranged weapon (see Table 8-14 in the <i>DUNGEON MASTER'S Guide</i>)

TABLE A-14: UNCOMMON WEAPONS

d%	Weapon	Cost
01-02	Gnome calculus	50 gp
03	Double bow, elven	1,000 gp
04-05	Ward cestus	10 gp
06-07	Triple dagger	10 gp
08-10	Stump knife	8 gp
11	Panther claw	75 gp
12-13	Claw bracer	30 gp
14-16	Tiger claw, 2	5 gp ea.
17-19	Battlepick, gnome	10 gp
21-21	Bladed gauntlet	30 gp
22-23	War fan	30 gp
24-26	Sword, butterfly, 2	10 gp ea.
27-30	Sai, 2	1 gp ea.
31-33	Tonfa, 2	2 gp ea.
34-36	Chain-and-dagger	4 gp
37	Longsword, mercurial	400 gp
38	Greatsword, mercurial	600 gp
39-40	Duom	20 gp
41	Fullblade	100 gp
42	Gyrspike	90 gp
43-44	Manti	15 gp
45-47	Three-section staff	4 gp
48	Scimitar, double	125 gp
49-50	Maul	15 gp
51-52	Lucerne hammer	12 gp
53	Sapara	15 gp
54	Khopesh	20 gp
55-56	Fukimi-bari, 2d20	1 gp ea.
57-62	Skiprock, halfling	3 gp
63-65	Bolas, two-ball	5 gp
66-67	Chakram	15 gp
68-69	Javelin, spinning, 2d6	2 gp ea.
70	Gauntlet, spring-loaded	200 gp
71	Crossbow, great	100 gp
72-73	Harpoon	15 gp
74-75	Shotput, orc	10 gp
76	Whip, mighty ¹	Varies
77-78	Whip-dagger	25 gp
79	Whip-dagger, mighty ¹	Varies
80	Arrow, alchemist's	75 gp
81-85	Arrow, blunt, 2d6	5 sp ea.
86-89	Arrow, flight, 2d6	8 sp ea.
90-93	Arrow, signal, 2d6	5 sp ea.
94-95	Arrow, thundering, 2d6	2 gp ea.
96	Tumbling bolt, 2d6	5 gp ea.
97	Mace, double	125 gp
98-100	Throwing iron, 1d4	8 gp ea.

¹ Roll 1d4 to determine maximum Strength bonus.

TABLE A-15: MELEE WEAPON SPECIAL ABILITIES

Minor	Medium	Special Ability	Market Price Modifier
01-05	—	Binding	+1
06-10	—	Fortunate	+1
16-21	—	Crazed	+1
22-27	01	Harmony	+1
28-33	02	Shrinking	+1
34-39	03	Ki focus	+1
40-45	04	Merciful	+1
46-51	05	Sure striking	+1
52-57	06	Vicious	+1

ARMS AND EQUIPMENT GUIDE

Get Ready for Whatever the Adventurer's Life Throws at You

Heroes need to be prepared for anything, which means having the right weapons and gear on hand at all times. The well-stocked pages of this book hold an impressive inventory of merchandise to get you into and out of all manner of trouble, including:

- A caravanload of equipment, trade goods, alchemical items, poisons, mounts, and vehicles
- Over 230 magic weapons and armors, such as the *flameshroud axe*, *lance of the unending charge*, and *vampire hunter armor*
- Over 125 magic items, including new artifacts, such as *elixir armor*, *rings of the hive mind*, the *ghost rod*, and the *bag of endless caltrops*
- Rules for vehicle combat on land, sea, and air

Within these pages, players and Dungeon Masters will find what they need to outfit their characters for nearly every contingency.

To use this accessory, a Dungeon Master also needs the *Player's Handbook* and the *DUNGEON MASTER'S Guide*. A player needs only the *Player's Handbook*.
