MONSTERS BY LEVEL	284

MONSTERS A TO Z

WELCOME TO the *Monster Manual*. It joins the *Player's Handbook* and *Dungeon Master's Guide* to form the core rules for the **DUNGEONS & DRAGONS Roleplaying Game!**

The *Monster Manual* offers a rich collection of monsters designed to challenge player characters (PCs) of every level. This introduction explains how to read each monster's statistics. Refer to the glossary on pages 280–283 for definitions of common terms that are not spelled out in a monster's statistics block.

Lists of monsters by level and role appear on pages 284–287 to assist you in tailoring encounters to the level and abilities of the player characters.

A monster's statistics are presented in a format that makes them easy to use right off the page. Each statistics block is divided into sections, as shown in the example below.

MONSTER NAME

Every monster has a unique name. Related monsters can have similar names, such as the hobgoblin soldier and the hobgoblin archer.

LEVEL AND ROLE

The level of the monster and the role it fills are given in the top right-hand corner of the statistics block. The *Dungeon Master's Guide* explains more about monster level and role and how to build encounters using them.

LEVEL

A monster's **level** summarizes how tough it is in an encounter. It determines most of the monster's numerical statistics as well as the experience point (XP) award the PCs earn for defeating the monster.

ROLE

A monster's **role** describes its preferred combat tactics, much as a character class's role suggests tactics for PCs. Monster roles are: **artillery**, **brute**, **controller**, **lurker**, **skirmisher**, and **soldier**. These roles are discussed in the *Dungeon Master's Guide*.

A monster might have the **leader** keyword in parentheses, indicating that it grants some sort of boon to its allies in combat, such as a beneficial aura.

SIZE, ORIGIN, AND TYPE

Each monster has a **size**, **origin**, and **type**, listed in that order. Some monsters also have one or more keywords in parentheses.

SIZE

A monster's size determines the space it occupies, as well as its reach.

Monster Size	Space	Reach
Tiny	–	0
Small	1 × 1	1
Medium	1 × 1	1
Large	2 × 2	1 (long) or 2 (tall)
Huge	3 × 3	2 (long) or 3 (tall)
Gargantuan	4 × 4 or larger	3 (long) or 4 (tall)

Space: This is the number of squares the creature occupies on the battle grid. Tiny creatures have no Space entry because they work a little differently: Four Tiny creatures can fit in a single square.

Reach: Large, Huge, and Gargantuan creatures often have exceptional reach and can attack enemies that are not adjacent to them. A creature's reach depends in part on whether it has a "tall" form, standing upright, or a "long" form that is oriented lengthwise. Tall creatures often reach farther than long ones. A creature's reach is built into its melee powers.

A Tiny creature has 0 reach—it cannot attack outside its own space.

A creature with reach greater than 1 still can't make opportunity attacks against nonadjacent creatures unless it has *threatening reach* (see page 283).

ORIGIN

A monster's origin summarizes its place in the D&D cosmology. Origins are: **aberrant**, **elemental**, **fey**, **immortal**, **natural**, and **shadow**. These terms are defined in the glossary.

TYPE

A creature's type summarizes some basic things about its appearance and behavior. Types are: **animate**, **beast**, **humanoid**, and **magical beast**. These terms are defined in the glossary.

KEYWORDS

Some monsters have keywords that further define them. These keywords represent groups of monsters, such as **angel**, **demon**, **devil**, **dragon**, and **undead**. Others indicate that a creature is made up of or strongly linked to a certain type of elemental force: **air**, **cold**, **earth**, **fire**, or **water**. Monsters can have more than one keyword.

If the monster's name doesn't include its race, the race is added after the monster's type and keywords. For example, the snaketongue assassin is categorized as a "Medium natural humanoid (shapechanger), human."

EXPERIENCE POINTS (XP)

This entry gives the experience point award for defeating the monster.

SENSES

Every monster has a Perception check modifier. Some monsters also have special senses that allow them to detect enemies in unusual situations, such as darkvision or tremorsense; these are defined in the glossary.

INITIATIVE

The monster's initiative modifier appears here.

AURA

An aura is a passive ability that takes effect when another creature comes within a certain distance of the monster. Not all monsters have auras. For more information on auras, see the glossary.

HIT POINTS (HP)

Damage a monster takes is subtracted from its hit points.

HP: The monster's total hit points.

Bloodied: Half the monster's total hit points. If the monster's current hit points are equal to or less than this value, the monster is considered "bloodied."

DEFENSES

This line of the monster's statistics block lists the monster's Armor Class (AC) and its **Fortitude**, **Reflex**, and **Will** defenses.

IMMUNE/RESIST/ VULNERABLE

This line appears if certain attacks have reduced or increased effects against the monster.

SAVING THROWS

If the monster has a bonus to saving throws, that entry appears above its speed entry.

SPEED

This is the number of squares the monster can move with a single move action. Alternative movement modes, such as fly, climb, or swim, are listed as well.

ACTION POINTS

Elite and solo monsters have action points they can use to take extra actions, just as PCs do. If a monster has action points, it is noted here. Unlike PCs, a monster can spend more than one action point in a single encounter, but like PCs, they can't spend one in a surprise round.

ATTACK POWERS

Attack powers are presented so that basic attacks appear first, followed by the monster's other powers.

TYPE

Each power has an icon that indicates what type of attack it is: **melee** (♣), **ranged** (♣), **close** (↔), or **area** (✱).

Basic Attack: The first attack presented is always the monster's **basic attack** (usually a melee attack). Some monsters have several basic attacks. A basic attack has a circle around its icon: **melee basic attack** (♣) or **ranged basic attack** (♣).

Monsters use their basic attacks when making opportunity attacks or when using powers that allow a basic attack.

ACTION

This states the kind of action required to use the power: **standard**, **move**, **minor**, **immediate interrupt**, **immediate reaction**, or **free**. Most immediate actions trigger on a specific event, which is described following the action type.

Some powers, especially secondary effects that trigger when the main power hits, do not have an action type. They take place as part of the action required for the main attack, or they simply occur in response to a trigger.

Sustain: The monster can sustain the power's effect until the start of its next turn, usually as a standard or minor action. If the power requires an attack roll, the attack must succeed before the monster can sustain the power.

RECHARGE

Some powers can only be used once in a given encounter. Others recharge during the encounter, allowing the monster to use them again.

At-will: The monster can use an at-will power as often as it wants.

Encounter: The power can be used once per encounter and recharges after a short rest.

Daily: The power can be used only once per day and recharges after an extended rest.

Recharge (☐, ☐, ☐, ☐, ☐): The power has a random chance of recharging during each round of combat. At the start of the monster's turn, roll 1d6. If the roll is one of the die results shown, the power is recharged and the monster can use it again that turn. The power also recharges after a short rest.

Recharges when . . . : The power recharges under a specific circumstance, such as when the monster is first bloodied, when it bloodies a foe, and so forth. The power also recharges after a short rest.

KEYWORD(S)

Certain powers have one or more keywords. Monsters and characters might have a special immunity, resistance, or vulnerability to attacks with a particular keyword, such as fire or poison. Attack power keywords are described in the glossary.

REACH

If the monster has an unusual reach, its melee attack entries include a reach number.

RANGE, AREA, OR TARGETS

Ranged, close, and area attacks specify a range and area of effect in squares. Any kind of attack power might specify targets.

ATTACK BONUS

This is the modifier to the d20 die roll when the monster attacks. Some powers are automatic hits.

TARGET DEFENSE

An attack targets AC, Fortitude, Reflex, or Will. Powers that grant a benefit to allies do not attack a defense.

EFFECT

This section describes what happens if the attack hits.

The most common result of a hit is damage, which occurs instantaneously. Many powers also produce conditions or ongoing damage. These effects might end when the affected creature makes a successful saving throw ("save ends") or have a stated duration. Typical durations are until the end of the attacking creature's next turn or until the end of the encounter.

Some powers deal damage that combine two or more damage types. The target must have resistance or immunity to all of the specified damage types to reduce or ignore the damage.

MISS

Sometimes a power has a reduced effect on a miss; this is stated after the main effect.

SECONDARY ATTACK/AFTEREFFECT

Sometimes when a power hits, it triggers a secondary attack. A few powers have effects that grow worse each time a saving throw is failed, or that have lingering **aftereffects** even after a successful saving throw. Such effects work the same way as those produced by PCs' powers; see the Combat chapter of the *Player's Handbook* for more information.

ALIGNMENT

A monster's alignment is not rigid, and exceptions can exist to the general rule.

Any: The monster can be of any alignment.

Unaligned: The monster has no alignment.

SKILLS

This line shows only trained skills or skills in which the monster has a racial bonus. A monster's Perception score appears elsewhere in its statistics and isn't repeated here.

ABILITY SCORES

This section shows the monster's six ability scores, presented so that each vertical pair contributes to one of the three defenses (Fortitude, Reflex, and Will). Following each score in parentheses is the adjusted ability score modifier including one-half the monster's level, which is useful whenever the monster needs to make an untrained skill check or an ability check.

HEALING SURGES

Monsters, like PCs, have healing surges. However, few monsters have a power that lets them spend a healing surge. The number of healing surges a monster has is based on its level: 1-10, 1 healing surge; 11-20, 2 healing surges; 21 or higher, 3 healing surges.

Because they rarely come into play, healing surges are not included in a monster's stat block.

ABOLETH

ABOLETHS ARE HULKING AMPHIBIOUS CREATURES that hail from the Far Realm, a distant and unfathomable plane. They live in the Underdark, swimming through drowned crannies or creeping through lightless tunnels and leaving trails of slimy mucus in their wake. Malevolent and vile, aboleths bend humanoid creatures to their will, and more powerful aboleths can transform their minions into slimy horrors.

ABOLETH LASHER TACTICS

The aboleth lasher relies on its *mucus haze* to hinder its opponents' movement while simultaneously using it to gain combat advantage with its allies. Once it covers an enemy with slime, it uses its tentacles to flay the hapless creature to death.

Aboleth Slime Mage	Level 17 Artillery (Leader)
Large aberrant magical beast (aquatic)	XP 1,600

ABOLETH SLIME MAGE TACTICS

An aboleth slime mage prefers to have its underlings fight for it. When pressed into combat, it relies on its *mucus haze* to keep opponents away while it blasts them with ranged attacks. It uses *slime orb* and *slime burst* to slow its enemies' approach and tries to dominate one of them as soon as possible.

Aboleth Overseer	Level 18 Elite Controller (Leader)
Large aberrant magical beast (aquatic)	XP 4,000
Initiative +12 Senses Perception +16; darkvision	
Mucus Haze aura 5; enemies treat the area within the aura as difficult terrain.

Saving Throws +2	
Speed 5, swim 10

⚡ Dominate (standard; at-will) ♦ Charm	
Ranged 10; targets a dazed humanoid; +20 vs. Will; the target is dominated (save ends). An aboleth overseer can dominate only one creature at a time.	
⚡ Enslave (standard; at-will) ♦ Charm, Psychic	
Ranged 5; targets a dominated creature; +20 vs. Will; 6d8 + 8 psychic damage. A target reduced to 0 hit points or fewer by this attack doesn't die but becomes enslaved in preparation for the Aboleth Servitor ritual. Enslaved targets are dominated, and only the death of the overseer can end this domination. Once a creature is enslaved, an aboleth overseer is free to dominate other creatures.	
Invisibility (minor; encounter) ♦ Illusion	
The aboleth overseer and one ally within 10 squares of it turn invisible until the end of the aboleth overseer's next turn.	
Alignment Evil	Languages Deep Speech, telepathy 20
Skills Arcana +20, Dungeoneering +21, Insight +21	
Str 26 (+17)	Dex 16 (+12) Wis 25 (+16)
Con 22 (+15)	Int 23 (+15) Cha 22 (+15)

ABOLETH OVERSEER TACTICS

An aboleth overseer uses *psychic slime* to hinder its enemies and then selects a target to dominate, preferably one that is greatly injured so that it can use its *enslave* ability on the creature. The overseer then forces the enslaved creature to fight its former allies while it attempts to dominate others.

ABOLETH LORE

A character knows the following information with a successful Dungeoneering check.

DC 20: Aboleths lair in the deepest reaches of the Underdark, having slipped into the world from the Far Realm. However, lone aboleths can be found closer to the world's surface, haunting ruins, deep lakes, and old temples without hope or want of companionship. In many of these places, kuo-toas serve them.

DC 25: Aboleths communicate via telepathy. They can speak and understand Deep Speech.

An aboleth overseer and its aboleth servitors

DC 30: Sometimes aboleths live together as a brood or even in a collection of broods. Aboleth overseers also populate their lairs with humanoid that they've enslaved and transformed into slimy minions.

ABOLETH SERVITOR

A HUMANOID IS TRANSFORMED INTO AN ABOLETH SERVITOR by way of a ritual. When a creature transforms into an aboleth servitor, its skin becomes a clear, slimy membrane that allows it to swim and breathe in water.

Aboleth Servitor		Level 16 Minion
Medium aberrant humanoid (aquatic)		XP 350
Initiative +10	Senses Perception +8; darkvision	
HP 1; a missed attack never damages a minion.		
AC 30; Fortitude 28, Reflex 23, Will 21		
Speed 6, swim 6		
⊕ Slam (standard; at-will) +19 vs. AC; 7 damage.		
Aboleth Devotion		
An aboleth servitor gains a +2 bonus to attack rolls against enemies in an aboleth's <i>mucus haze</i> aura. If an aboleth servitor is ever more than 10 squares from its aboleth master, the servitor becomes dazed, weakened, and immobilized until its master moves within 10 squares of it.		
Alignment Unaligned	Languages Common	
Str 24 (+15)	Dex 15 (+10)	Wis 10 (+8)
Con 20 (+13)	Int 10 (+8)	Cha 10 (+8)

ABOLETH SERVITOR TACTICS

The servitor remains within 10 squares of its aboleth master and exists only to protect its master from harm.

ENCOUNTER GROUPS

Kuo-toas serve aboleths willingly, but powerful aboleths also fashion servitors from dominated and defeated foes.

Level 17 Encounter (XP 7,950)

- ◆ 1 aboleth slime mage (level 17 artillery)
- ◆ 2 aboleth lashers (level 17 brute)
- ◆ 9 kuo-toa guards (level 16 minion)

Level 18 Encounter (XP 10,200)

- ◆ 1 aboleth overseer (level 18 controller)
- ◆ 1 nabassu gargoyle (level 18 lurker)
- ◆ 1 savage minotaur (level 16 brute)
- ◆ 8 aboleth servitors (level 16 minion)

ABOMINATION

ABOMINATIONS ARE LIVING WEAPONS that were created during the ancient cosmic war between the gods and the primordials. Some of these creations were enormous, others small. Some were singular beings of terrific power, while others were legion. A few abominations stand apart as failed or incomplete divine experiments that have either been locked away or forgotten.

ASTRAL STALKER

DEVIOS AND BATTLE-HUNGRY HUNTERS, astral stalkers savor challenge and renown. Many of them serve as assassins and bounty hunters, and an astral stalker might pursue its quarry simply to test its mettle against a worthy foe.

Astral Stalker **Level 22 Elite Lurker**
Medium immortal humanoid XP 8,300

Initiative +23 **Senses Perception** +18; blindsight 10

HP 314; **Bloodied** 157

AC 38; **Fortitude** 32, **Reflex** 38, **Will** 32

Saving Throws +2

Speed 10, climb 6

Action Points 1

⬇️ **Claw** (standard; at-will)

+27 vs. AC; 2d6 + 8 damage, and the astral stalker can choose to designate the target as its quarry (see *stalker's quarry*).

ASTRAL STALKER TACTICS

An astral stalker relies on its *invisibility* and stealth to catch prey by surprise. It has poisonous bone darts in its throat that it can eject with deadly accuracy. It uses these darts to disorient and incapacitate enemies. Once one or more foes are slowed or immobilized, the stalker lunges into melee and uses its *quick claws* ability against its chosen quarry. If its quarry shakes off the darts' debilitating effects, the stalker retreats and turns invisible again, returning to ranged attacks and repeating the same strategy.

ASTRAL STALKER LORE

A character knows the following information with a successful Religion check.

DC 25: Although created as instruments of the gods in their war against the primordials, astral stalkers survive still. They're now a race unto themselves, inhabiting the Astral Sea. PHANES CAN MANIPULATE TIME, which they use to sow chaos among mortals. Occasionally they form pacts with powerful beings that share their destructive propensities.

TARRASQUE LORE

A character knows the following information with a successful Arcana check.

DC 25: The tarrasque is a living engine of destruction created by the primordials to obliterate the works of the gods. It sleeps within the world's core, stirring occasionally. When it wakes, it burrows up to the surface and begins a continent-wide rampage.

DC 30: The tarrasque is inexorably bound to the world, such that the most one can hope for is to lay the creature to rest, forcing it to sleep within the world's core for many years before it stirs again. ANGEL

MOST DEITIES HAVE ANGEL SERVANTS. Although their appearances can vary, all angels are vaguely humanoid in form, with masculine or feminine features and lower bodies that trail off into flowing energy.

Angels exist as expressions of the Astral Sea, sentient energy in humanoid form. They most often serve the gods, so some believe that the gods created them. In reality, angels are powerful astral beings who appeared during the first moments of the creation of the Astral Sea. Different types of angels have different callings; they are literally manifestations of celestial vocations. Perhaps it was the needs of the gods that caused the astral stuff to spew them forth, but it was not a conscious act of creation. During the great war between the gods and the primordials, angels offered themselves as warriors to the gods that best encompassed their callings, and today they continue to act as mercenary forces for anyone willing to meet their price—be it wealth, or power, or a cause worthy of their attention.

Angels are more involved in the world and other planes than deities and exarchs. They act both openly and secretly, often acting as emissaries, generals, and even assassins.

ANGEL OF BATTLE TACTICS

An angel of battle employs a combination of airborne and ground-based tactics. Against tough adversaries, the angel uses *chosen foe* and takes to the air, using its reach to stay out of melee attack range. The angel reserves *storm of blades* for the end of battle, when it believes it will no longer need to fly, either because death or victory is imminent.

ANGEL OF BATTLE LORE

A character knows the following information with a successful Religion check.

DC 20: As their name implies, angels of battle lead forces into combat. More powerful than angels of valor, angels of battle fulfill a similar function but are called upon to fight greater threats.

DC 25: When a god sends an angel of battle to tend to a situation, it's unlikely the god desires to deliver a message or negotiate. Angels of battle are harbingers for war.

When the angel is within 5 squares of its ward, the ward takes only half damage from melee and ranged attacks; the angel of protection takes the rest. While the angel is adjacent to its ward, the ward gains a +2 bonus to AC. A creature can be the ward of only one angel of protection at a time. ANGEL OF PROTECTION TACTICS

An angel of protection guards its chosen or appointed ward faithfully. Barring dire circumstances, the angel stays within 5 squares of its ward (preferably adjacent to it) and remains there until the ward dies (at which point the angel either designates another ward or, lacking another creature to protect, fights until slain).

ANGEL OF PROTECTION LORE

A character knows the following information with a successful Religion check.

DC 20: An angel of protection never steps outside the role of guardian and caretaker. Its ward is often chosen for it, either by its god or by the one who summons it. It is said that no angel of protection has ever left its ward except by being killed in that ward's defense.

DC 25: Normally, only a god or powerful servitor of a god can assign duties to an angel of protection. Sometimes, simple prayer is enough to gain such protection for a brief period. If such a prayer is ever answered, it is important that the recipient be careful not to use the angel's talents in a way that fails to serve its true master.

ENCOUNTER GROUPS

A typical encounter might include one angel of protection and its ward, or three or four angels of protection plus the creatures in their care.

DC 20: When a devout worshiper of a particular god does something to delight that god, such as showing valor in the god's name, an angel of valor might be dispatched to reward the worshiper. An appropriate reward might include a magic item or even the service of the angel of valor for 10 days.

ARCHON

ARCHONS ARE MILITARISTIC CREATURES native to the Elemental Chaos. Vaguely humanoid in form, they serve powerful primordial entities as well as various elemental lords and princelings.

Archons trace back to an ancient time when the world had hardly been formed, when primordial beings battled the gods for control of creation. In this cataclysmic conflict, the deities marshaled armies of angels and cadres of exarchs, and though the primordials could call forth titanic beasts and giants, they could not muster a true military to face their enemies until they found the means by which elemental creatures could be reshaped and hammered into soldiers. The warriors formed through this process were the first archons.

Two kinds of archons are presented here: fire archons and ice archons. These soldiers are bent on returning the world to the rule and whim of the primordials, and fire archons and ice archons have no issues working together to achieve their common goal.

EMBERGUARD LORE

A character knows the following information with a successful Arcana check.

DC 20: Emberguards protect temples, tombs, and other locations where fire is prevalent.

DC 25: A cloud of embers surrounds the emberguard, burning foes that get too close.

ABOUT ARCHONS

The archons presented here are but a small sampling of the archons that exist. In addition to a multitude of fire archons and ice archons, the Elemental Chaos is home to archons composed of (or combining) other elements as well. Air archons, earth archons, and water archons are commonplace, but one doesn't have to travel far in the Elemental Chaos to find crystal archons, slime archons, and storm archons.

Archons of different elements freely associate with one another, although bereft of strong leadership they are prone to infighting. A typical archon army is a jumble of many different kinds of archons, just as the Elemental Chaos is a jumble of many different elements and energy types.

When an archon dies, all that remains is its armor, and sometimes its weapons. Some archons, such as ice archons, wield weapons that melt away when the archon dies.

FIRE ARCHON BLAZESTEEL

ILL-TEMPERED AND EASILY PROVOKED, archon blazesteels serve as shock troopers in elemental armies. They are also employed as bodyguards by powerful efreet and fire titans.

A character knows the following information with a successful Arcana check.

DC 20: Blazesteels like to concentrate their attacks on singular foes, flanking whenever possible.

DC 25: When a fire archon blazesteel is bloodied, it unleashes a burst of searing flame. It also gains its fiery revenge by unleashing a similar burst when slain.

ICE ARCHON HAILSCOURGE TACTICS

The ice archon hailscourge unleashes its *hail storm* as often as it can, reducing the storm's radius as needed to avoid harming its allies. While it waits for this power to recharge, it hurls *ice shuriken* at its enemies.

HAILSCOURGE LORE

A character knows the following information with a successful Arcana check.

DC 20: A hailscourge prefers ranged combat over melee combat. Hailscourges serve as artillery in elemental armies.

DC 25: The ice archon hailscourge pummels its enemies with fist-sized chunks of ice that rain down from above. It can also conjure and hurl jagged shards of ice resembling shuriken.

ICE ARCHON RIMEHAMMER TACTICS

This archon uses its *icy ground* aura to hinder foes that are trying to flank it. It otherwise engages in melee, using its maul to slow enemies and the *icy ground* to hinder their movement even further.

RIMEHAMMER LORE

A character knows the following information with a successful Arcana check.

DC 20: The ice archon rimehammer takes its name from the icy maul it wields. The weapon is so numbingly cold that those it strikes are barely able to walk.

DC 25: These archons are usually found in the service of frost giants, ice archon frostshapers, and similar creatures. However, they have been known to serve other creatures with ties to the Elemental Chaos, including such unlikely masters as efreet and fire giants.

ICE ARCHON FROSTSHAPER TACTICS

The ice archon frostshaper relies on its *icy aura* to hinder enemies. It begins battle by closing to within 5 squares of foes so it can unleash an *icy burst* and make its enemies suffer the combined effects of slow and difficult terrain. The frostshaper follows up with basic attacks until one of these is successful, at which point it uses *icy burst* again.

FROSTSHAPER LORE

A character knows the following information with a successful Arcana check.

DC 20: Jagged shards of ice crystallize on the ground around the ice archon frostshaper, making it hard for enemies to reach it.

DC 25: A frostshaper often retains the services of one or more ice archon rimehammers, using them as bodyguards and enforcers. A very powerful elemental being or primordial might have a frostshaper advisor or even frostshaper commanders leading their armies.

ARCHON ENCOUNTER GROUPS

Archons work with elemental creatures of all types, and they have no aversion to working with creatures not of their element. For example, it's not unheard of for an efreet to have a contingent of ice archon mercenaries among its other soldiers.

Although a few have escaped captivity since, most azers remain bound to their fire giant masters to this day.

The balhannoth is opportunistic and sometimes waits for hours in ambush or stalks prey across many miles. Once it decides to attack, the balhannoth uses *reality shift* to teleport adjacent to its prey and uses its *whipping tentacles* to pull some enemies closer while pushing others back. It continues to use *reality shift* in subsequent rounds, dazing enemies that get too close and teleporting to more advantageous locations.

BALHANNOTH LORE

A character knows the following information with a successful Dungeoneering check.

DC 20: In the deep earth, a balhannoth travels along ceilings and across rocky formations. It comes to the ground only to kill prey, doing so by teleporting to within striking distance of its quarry.

DC 25: Balhannoths rarely assemble in large groups. They have no society, but they can be found among other sentient species living in the Underdark.

DC 30: Balhannoths don't make sounds or otherwise verbally communicate. They locate prey through some form of extrasensory perception. A trained balhannoth responds to spoken commands, but balhannoths react most favorably to creatures that communicate using telepathy.

ENCOUNTER GROUPS

An indiscriminate predator, a balhannoth hunts alone or with another of its kind. No creature is safe in a balhannoth's hunting grounds.

Some Underdark races capture and train balhannoths. A wild balhannoth can only be subdued and tamed by a creature that has telepathy, such as an aboleth or a mind flayer. Otherwise, the creature must be raised from birth to accept a master. Kuo-toas commonly raise balhannoths in this way, while drow, grimlocks, and minotaur cabalists do so less often.

BANSHRAE WARRIOR TACTICS

This banshrae moves like a hunting insect, using its *skirmish* ability to deal extra damage. In close combat, the warrior uses *staggering palm* and then, if its enemy is stunned, withdraws to a safer position without risking an opportunity attack. The banshrae then employs *mantid dance* to limit attackers' success at ranged attacks while recharging *staggering palm* so it can repeat the strategy.

BANSHRAE LORE

A character knows the following information with a successful Arcana check.

DC 20: Banshraes are cold-hearted fey with insectoid features. They do not speak, only communicating via telepathy.

DC 25: All banshraes love singing and the sound of wind instruments—although they have no way to sing or play such instruments themselves. Stories speak of murderous banshraes turned aside by a song and impish banshraes calmed by a tune.

ENCOUNTER GROUPS

Banshraes work with any creature willing to tolerate their sinister and egotistical inclinations. Such creatures commonly include other fey, such as ignoble eladrin, satyrs, dryads, hags, and even unicorns.

BERBALANG

BERBALANGS CONSUME THE FLESH AND BONES of dead humanoids, acquiring the lost memories of those upon whom they feast. They also have the power to manifest psychic duplicates of themselves.

Berbalang Level 10 Solo Skirmisher

Medium immortal humanoid XP 2,500

Initiative +13 Senses Perception +6

AC 25; Fortitude 22, Reflex 25, Will 21; see also *psychic deflection*

HP 408; Bloodied 204

Saving Throws +5

Speed 6, fly 8

Action Points 2

⚔ **Claw** (standard; at-will)

+14 vs. AC; 1d8 + 6 damage.

Summon Duplicate (minor, not while bloodied; at-will)

◆ **Conjuration, Psychic**

The berbalang manifests an exact duplicate of itself in an unoccupied adjacent square. It can have no more than four duplicates at once, and duplicates cannot summon other duplicates. When a duplicate appears, it makes an initiative check and joins the battle on that initiative count. All damage a duplicate deals is treated as psychic damage.

A duplicate has the same statistics as the berbalang except for its hit points. When the berbalang manifests a duplicate, the berbalang loses one-quarter of its current hit points and the duplicate appears with that quantity of hit points. The berbalang's maximum number of hit points remains the same.

Duplicates last until the berbalang reaches 0 hit points, absorbs them, or uses *sacrifice*. A duplicate must stay within 10 squares of the berbalang at all times or it disappears.

Absorb Duplicate (standard, at-will) ◆ **Healing**

The berbalang absorbs a duplicate adjacent to it and regains 50 hit points.

Berbalang Sneak Attack

A berbalang or a duplicate that flanks an enemy with another duplicate deals an extra 1d8 damage on melee attacks against that enemy.

✱ **Sacrifice** (standard; at-will) ◆ **Psychic**

Area burst 1 centered on a duplicate; the berbalang can cause one of its duplicates to explode in a burst of psychic gore; +11 vs. Fortitude; 2d8 + 6 psychic damage, plus the target is dazed (save ends). *Miss*: No damage, but the target is dazed (save ends). *Hit or Miss*: The berbalang takes 25 damage.

Psychic Deflection (immediate reaction, when the berbalang is damaged by an attack; at-will) ◆ **Psychic**

The berbalang can deflect the damage it takes from an attack to one of its duplicates. Any effects or secondary attacks included in the attack are also deflected to the duplicate. The damage a duplicate takes in this way is considered psychic damage.

BERBALANG TACTICS

A surprised berbalang uses *summon duplicate* at the start of battle, and if faced with several opponents, it might spawn a third or a fourth duplicate using its initial standard and move actions as well. Conversely, if it hears enemies approaching, it spawns duplicates out of initiative, before the battle begins.

The duplicates try to maneuver around enemies to gain the benefit of their *berbalang sneak attack*.

When the berbalang is bloodied, it increasingly uses *absorb duplicate* and *sacrifice*. A berbalang fearing its death retreats and uses a duplicate to block pursuit.

BERBALANG LORE

A character knows the following information with a successful Religion check.

DC 20: Berbalangs consume the flesh of dead humanoids. They do not differentiate between those recently dead and those dead for centuries.

DC 25: Berbalangs absorb the memories of the corpses they eat and relive significant portions of those memories while asleep. This absorption of dead memories gives berbalangs the nutrition they require. There are some remote villages where the dead are not interred, but instead are given to a resident berbalang as part of a bargain made by the village elders. When too few deaths occur naturally, a sacrifice is determined by lot to satisfy the deal.

BONECLAW LORE

A character knows the following information with a successful skill check.

Religion DC 20: Boneclaws are intelligent undead constructs that enjoy hunting and slaying living creatures.

Arcana DC 25: One creates a boneclaw by means of a dark ritual that binds a powerful evil soul to a specially prepared amalgamation of undead flesh and bone. The exact ritual is a closely guarded secret known only to a handful of liches and necromancers. Cabals that wish to possess the knowledge of boneclaw creation have resorted to diplomacy, theft, and clandestine warfare to acquire the ritual.

Religion DC 30: Although rumor holds that the first boneclaws were created by a powerful lich in the service of Vecna, the truth is that a coven of hags led by a powerful night hag named Grigwartha created the first boneclaw over a century ago. They invented a ritual that combines the flesh and bones from ogres along with the trapped soul of an oni. Although the materials can vary, the ritual is the same among those who know it.

CHIMERA TACTICS

A chimera begins combat by charging the nearest foe and using its *ram's charge*. The chimera then maneuvers itself so that it can employ its *triple threat* or *dragon's breath* power. The first time it uses its *triple threat* power, it spends an action point to use it again on the same turn. The chimera unleashes its *dragon's breath* again when first bloodied, targeting the closest and largest group of foes.

CHIMERA LORE

A character knows the following information with a successful Nature check.

DC 20: Chimeras are belligerent carnivores that dwell in caves and plunder the countryside for food. Despite having three heads, they're not terribly smart.

DC 25: Despite their low intelligence, chimeras can be trained to serve as guards or mounts.

A chimera's dragon head resembles that of a red dragon, although other chromatic dragon heads are possible. The type of damage the chimera's breath weapon deals changes depending on the color of the dragon head (for example, acid damage for the black dragon head), and the chimera's resistance changes to that damage type as well.

CYCLOPS LORE

A character knows the following information with a successful Arcana check.

DC 20: Cyclopes are the willing subjects of fomorians, whom they view as the rightful lords of the Feywild. Indeed, cyclopes believe that fomorians are divine. Thus cyclopes are the fomorians' most valued subjects, serving as bodyguards, soldiers, and artisans—roles that fomorians consider beneath them, but which they don't trust to faithless subjects or slaves.

DC 25: Cyclopes are master craftspeople, and in the depths of the Feywild's Underdark, their most storied elders are hard at work forging implements of immense power for their fomorian masters. Magical rings, swords with blades of lightning, and shields that can turn a dragon's breath—these and more are gifts cyclopes lay at the feet of those they consider gods.

DC 30: Cyclopes sometimes wander the world at the behest of their masters. They do so to fulfill various purposes, but they often make war on elves and despoil eladrin holdings. On some occasions, cyclopes ally with drow. Whenever such an alliance occurs, rumors resurface of an ancient agreement between fomorians and drow referred to as the "Declaration of Eschatos." The exact nature of this agreement and the lore it keeps safe, if any, is unknown. Whatever the hidden specifics of the accords, it seems that cyclopes aid the drow in minor raids and other evil enterprises.

DC 35: Cyclopes formed on the Feywild as an unforeseen echo of ogres in the world. It is said that fomorians shaped and taught them, much as the ancient titans formed and influenced the world's giants.

ENCOUNTER GROUPS

Cyclopes are usually encountered with other cyclopes and fomorians. They readily work with other evil fey as directed by their dark lords.

DC 15: Dark ones live among shadar-kai, much the way as halflings find their place among populations of humans, dwarves, and elves. Dark ones prefer to dwell in homes that are at least partially underground.

DARK STALKER TACTICS

A dark stalker uses its *dark fog* power to block enemies' line of sight. It then uses *invisibility* and moves to gain combat advantage against a ripe target. If battle turns against the dark stalker, it uses *invisibility* again (provided the power has recharged) to retreat safely.

DEATH KNIGHT

DEATH KNIGHTS WERE POWERFUL WARRIORS who accepted eternal undeath rather than face the end of their mortal existence. With their souls bound to the weapons they wield, death knights command necrotic power in addition to their undiminished martial prowess.

A death knight's armor and weapons are the same items it used in life, but their appearance is often transformed into deadly echoes of their past forms. Its armor is fire-blackened, etched with blasphemous runes, and often adorned with bloodstained spikes. Its weapon—which contains the death knight's soul—is still brightly polished but crackles with dark necrotic energy.

"Death knight" is a monster template that can be applied to nonplayer characters. See the *Dungeon Master's Guide* for rules on creating new death knights using the template.

DEATH KNIGHT LORE

A character knows the following information with a successful Religion check.

DC 20: Death knights are skeletal warriors who retain the intelligence and combat skills they had in life. They often lead other undead soldiers in a war against the living.

DC 25: A death knight carries its soul in its weapon, which has the power to become ghostly and pass through armor as if it was not there. If you take a death knight's weapon, you daze and weaken it. A death knight's soul weapon dazes and weakens anyone else who wields it as long as the death knight has not been destroyed. If you break a death knight's weapon, the death knight can restore it with a touch.

DC 30: The ritual to become a death knight is said to have originated with Orcus, Demon Prince of the Undead. Many death knights gained access to the ritual by contacting Orcus or his servants directly, but some discovered the ritual through other means.

ENCOUNTER GROUPS

Death knights often lead other undead into battle against the living.

The soul weapon loses its soul weapon properties when the death knight is destroyed.

DRAGONBORN DEATH KNIGHT TACTICS

This death knight issues a *divine challenge* every round and stays adjacent to one or more of its allies to maximize the effectiveness of its *valiant strike* power. When swarmed by multiple melee combatants, it uses *terrifying smite* against the toughest-looking target or *unholy flames* against the lot of them. It spends its action point to use *second wind* once bloodied.

DEMON

IN THEIR MANY AND VARIED FORMS, demons are living engines of annihilation. They embody the destructive forces of chaos. All things tend to decay into entropy, but demons exist to hurry that process along.

Fear and mercy are utterly alien to demons' minds. Hate and savagery are their only masters, destruction their only pleasure. They care nothing for plans or structure, banding together only in rampaging hordes, not nations or legions. There is nothing subtle about them: They are not manipulators or schemers, nor are they tempters or bargain makers. While a demonic presence might turn mortals toward corruption through indirect influence, demons do not actively lure other creatures toward evil; they burn them alive or rip them to quivering shreds.

Sometimes powerful beings attempt to summon demons to do their will, hoping to harness demonic strength for their own purposes. But demons are not easily bent to their summoners' will; when a demon appears in the midst of combat, it is with the boundless fury and power of an elemental.

Personal power, wealth, prestige, and even survival are not important to demons—their only goal is to destroy as much as they can before they themselves are destroyed. And then, born anew in the depths of the Abyss, they rise again to continue the destruction.

BALOR

FEW DEMONS ARE MORE FORMIDABLE than the cruel balor. Weaker demons obey the balor's commands out of fear of being torn asunder.

THE BIRTH OF THE ABYSS

In the earliest days of creation, even before the gods and primordials began their terrible war, one god was not content with sharing power—he wanted absolute control over the nascent universe. This god, whose name is spoken only in panicked whispers, sought a source of power he could use to gain total dominion over the unfolding realms of creation. Somewhere in the infinite expanse of space, he found the weapon he sought in the form of a tiny shard of utter evil.

The touch of the shard drove this god to madness, corrupting him so completely that he was no longer recognizable as his former self. Nevertheless, he carried the crystalline fragment into the depths of the universe—into the lowest reaches of the primordial vastness that would one day become the Elemental Chaos—and planted it there.

Evil took root like a foul seed of corruption, burrowing deep into the unshaped matter of the Elemental Chaos and spreading unholy tendrils far and wide. A yawning chasm of infinite gloom and despair opened up at the lowest pit of creation, swallowing all matter and light, defiling anything that drew near.

The Abyss was born.

The evil of the Abyss corrupted even some of the mighty primordials—Demogorgon, Baphomet, Orcus—and reshaped them into the likeness of pure destructive evil. The mad god hoped to wield these demonic princes as weapons in his war of conquest, but they would not bend to his will or any but their own.

So he left the Abyss and marshaled other elemental forces in his bid for domination, but the other gods overcame him, chaining him forever in a secret place known only to them.

Now he is called the Chained God, or by his demented followers, the Elder Elemental Eye. His only desire is to escape his prison, and he rarely spares a thought for the realm he inadvertently created.

But the Abyss remains, a festering cyst beneath the Elemental Chaos. Within its lightless depths, demons erupt into birth, live out their short and violent lives, and are reabsorbed into the darkness. Demon princes rule their petty Abyssal domains, scheming to destroy the gods and all their works. The god Lolth hides in the Demonweb Pits, corrupted and perhaps driven mad by the same power that shattered the Chained God and made the first demon princes.

And somewhere far beneath all imagining, the crystalline Heart of the Abyss still beats its unceasing cadence of evil.

The balor uses its *flame whip* to pull enemies within reach of its sword. The first time it's able to attack with both weapons on its turn, it spends an action point to do it again. A balor rarely retreats from battle, fighting until destroyed.

BALOR LORE

A character knows the following information with a successful Arcana check.

DC 25: Balors answer directly to demon lords and other creatures of tremendous power. However, a few balors are mighty enough to hold their own as minor princelings of the Abyss, answering to no one.

DC 30: Some balors lurk in the deepest reaches of the natural world, bound against their will or preparing to rage against creation at the first opportunity.

ENCOUNTER GROUPS

Balors prefer the company of creatures that are near their own level but not above it. They sometimes work in pairs, but a natural sense of rivalry breaks up such alliances before long.

Level 26 Encounter (XP 54,000)

GLABREZU TACTICS

Unlike mortal spellcasters, glabrezus do not cower behind minions and armored comrades while they cast their foul magic; they wade into the thick of combat and shout out their magic with wild abandon.

A glabrezu moves close to its enemies and unleashes both a *blasphemous word* and a *word of chaos*. After this initial onslaught, it targets a weak-looking opponent with its pincer claws. If the glabrezu is bloodied, it teleports a safe distance and hurls *abysal bolts* (missiles of crackling purple energy), exchanging move actions and standard actions to do this up to three times in a round.

(Left to right)
goristro, immolith, hezrou

GLABREZU LORE

A character knows the following information with a successful Arcana check.

DC 25: Glabrezus use their high intelligence to sow discord. They also like to goad their allies into ever-greater acts of depravity and violence.

DC 30: When a demon as wicked as a glabrezu lingers too long in the world, its corruption spreads. Crops are stunted, animals die, people sicken, and the sky itself seems to darken. Only when the demon is driven off or slain is the natural order restored.

ENCOUNTER GROUPS

Though they often lead groups of other demons, glabrezus could hardly be termed generals—they lead by example, spearheading the devastation. More often, though, glabrezus are brought to the world by incredibly powerful and destructive villains.

Level 23 Encounter (XP 25,500)

GORISTRO TACTICS

The goristro makes a *goring charge* toward the nearest enemy. Once in battle, it makes slam attacks against those it perceives as the most physically challenging and uses *goristro stomp* on enemies that get too close. The goristro becomes much more dangerous when bloodied, using *raging frenzy* each time it's attacked by an adjacent enemy.

IMMOLITH TACTICS

The immolith issues a *deathfire curse* at the beginning of each round to slow an enemy. Then, with its standard action, it uses *fiery grab* to drag an enemy into its *flaming aura*. If an immolith doesn't need to move, it issues another *deathfire curse* with its remaining move action. It repeats these tactics round after round, using *vigor of the grave* whenever possible to heal itself and nearby undead allies.

DEVIL

MALEVOLENT AND CORRUPT, devils are the rebellious servants of the gods now living in the Nine Hells, one of the darkest dominions on the Astral Sea. Devils come in many varieties, from the sly imp to the mighty archdevils known as the Lords of the Nine, each a ruler of one of the Nine Hells. The greatest of these infernal lords is the god Asmodeus, prince of Nessus, the ninth hell. Long ago, Asmodeus was a powerful divine servant who chose to rebel against the god he served. At the head of an army of like-minded creatures, Asmodeus slew his divine master. For their betrayal, he and his followers were cursed with monstrous forms and imprisoned within the fuming ruin of the murdered god's dominion.

Devils can leave the Nine Hells, but it is very difficult for them to do so. They can be sent forth by mighty archdevils through costly infernal magic, or travel through rare and well-hidden magical portals (usually only a few at a time when conditions are right). However, most devils outside of the Nine Hells have been brought to the natural world by evil mortals employing dark rituals.

Devils lust for the souls of mortals; each mortal spirit devils enslave undermines the gods' sway over mortalkind and adds to the Nine Hells' power. Devils torment and consume captured souls to fuel the mightiest of their infernal works, including evil constructs and terrible invocations. Devils compete fiercely to gather souls in order to earn favor and status within the infernal order, but they all work together toward the common goal of gathering souls for the Nine Hells. Some devils seek to drive mortals into surrendering their souls through tyranny, despair, or terror; some seek to destroy the servants of good-aligned gods and tear down their works; and still others are tempters and deceivers who inflame mortal ambition, desire, greed, or pride.

Long ago, Asmodeus and his vassals forged dark pacts with various evil deities. Devils are therefore commonly found serving Bane, Gruumsh, Tiamat, Torog, and Vecna. Devils carefully honor their bargains—but they are extremely good at giving reckless mortals exactly what they ask for, and few of those who bargain with devils escape the final payment.

BEARDED DEVIL

FIERCE WARRIORS OF THE NINE HELLS, bearded devils are used as guards and assault troops by more powerful devils or evil mortals. They are violent, wrathful creatures that relish battle.

BONE DEVIL

BONE DEVILS ARE RUTHLESS TASKMASTERS, vigilantly watching over lesser creatures to ensure their obedience. In the Nine Hells, they fill a mid-ranking class of overseers and monitors who report on lesser devils, but they can sometimes be found in the service of powerful mortal tyrants, watching the ranks for the smallest signs of disloyalty or incompetence.

A PRIMER TO THE NINE HELLS

The Nine Hells form a single dominion on the Astral Sea. Black smoke surrounds them, and beyond this choking veil broods a great, volcanic world whose surface is a blasted plain of ash and jagged stone. This is Avernus, the first of the Nine Hells, where embers rain down from a sunless sky and iron fortresses rise up between rivers of magma. Astral vessels approaching too closely find themselves plummeting through the skies of Avernus rather than sailing in the Astral Sea, landing in the Nine Hells with a great fiery impact. A helmsman of great skill can sometimes negotiate the passage and alight on the ashen plain safely, but the only sure way to avoid fiery disaster is to find the astral influence of the River Styx and follow it down through the basalt cliffs. The Styx cuts a jagged course across Avernus and eventually plunges down into the lower Hells—each one a tremendous continent-sized cavern within the roiling world.

Avernus, the first Hell, forms the surface of this terrible dominion. It's a volcanic domain strewn with the blood and wreckage of a million battles. Fireballs plunge from the smoke-filled sky. The archdevil Bel, a military genius, protects and rules Avernus from a towering iron citadel.

A great iron gate in a mountainside of Avernus leads to Dis, the second Hell. Dis is an iron-walled city that lies within a vast cavern, sprawling unevenly amid the cavern's jagged, mountainous floor. Dispaten, the ruler of this Hell, is famous as the most cautious and calculating of the archdevils.

The cavern of Dis gradually descends and broadens into the great, low, brooding vault of Minauros, the Third Hell. A constant oily rain pelts down from the ceiling, and the black soil of Minauros is a vast series of mud flats, swamps, and mires, some heated into bubbling, stinking mud volcanoes by the heat rising from below. The serpentine and supremely boastful archdevil Mammon rules here.

Phlegethos, the fourth Hell, lies far below its predecessors. Dank steps cut into the stinking fumaroles of Minauros lead down several miles to a fiery cavern, where the air ripples with heat distortion and cascades of lava pour down from volcanic fissures in the ceiling miles overhead. The ambitious archdevil Fierna presides, with her grim father Belial as the true power behind the throne.

Stygia lies as deep as Phlegethos, but is many hundreds of miles away from its fiery neighbor—it underlies Dis, and dismal stairs of ice and iron link the two. The fifth Hell is cold and dark. Within Stygia's cavern lies a vast frozen sea dotted with towering icebergs. Faint auroras of green-blue frostfire dance far above the sea, casting long shadows. Imprisoned within one of these mighty bergs is the archdevil Levistus, trapped forever by Asmodeus for some great betrayal.

Asmodeus's daughter, the fiendishly beautiful Glasya, rules Malbolge, the sixth Hell. Long, icy canals lead hundreds of miles from frozen Stygia to this great cavern, illuminated by sinister yellow-green lamps suspended from the ceiling like tiny suns. Long ago Malbolge was a vast garden, the

delight of the deity who ruled this sphere before Asmodeus, but now its superficial beauty cannot hide a feculent underbelly: autumnal trees with grasping roots, beautiful white towers with corpses impaled on their battlements, shimmering ponds with poisoned waters, and the like.

Maladomini, the seventh Hell, is a tremendous maze of winding tunnels, each miles across. These passages reach several of the lower Hells, including Malbolge, Cania, and Nessus. Within these vast tunnels lie crumbling cities, sludge-filled rivers, and vast tracts of land mined to absolute depletion. Black ichor erupts from the earth, and swarms of flies harry all. Here rules the archdevil Baalzebul, a sluglike monstrosity bereft of compassion.

The icy layer of Stygia seems like a paradise compared to Cania, the eighth Hell. This vast gulf deep within the world is another cold domain, where mile-high glaciers grind across a forbidding landscape so cold that few creatures can bear it. The wickedly handsome archdevil Mephistopheles rules Cania from a palace of ice lit with crackling hellfire.

The darkest of Cania's rifts plunge hundreds of miles further down to Nessus, the ninth and deepest of the Hells. This is home to the god-tyrant Asmodeus, father of all devils. Nessus is a vast, vertical maze of chasms so large and so deep they are rooted in the seething fires at the core of the cursed sphere. Great infernal cities and fiendish armies lie hidden within these fiery depths.

BONE DEVIL TACTICS

The bone devil targets enemies with its *fiendish focus* at the start of battle to make them more susceptible to attacks while overwhelming them with its *aura of fear*. It tries to use *double attack* whenever possible. As its allies become bloodied, the bone devil uses its *aura of obedience* to make them fight harder.

BONE DEVIL LORE

A character knows the following information with a successful Religion check.

DC 20: Bone devils (also known as osyluths) are clever and patient creatures, rarely caught off-guard. They ensure that lesser devils obey their superiors and engage foes with the proper degree of bloodthirstiness and zeal. Fanatically loyal to their superiors, bone devils are indeed severe taskmasters.

DC 25: Bone devils are universally reviled by lesser devils because of their harsh motivational techniques. They surround themselves in an aura of fear that makes enemies reluctant to attack them, and their poisoned stingers can further break down an enemy's resolve.

ENCOUNTER GROUPS

Bone devils serve more powerful devils as overseers, keeping watch on the activities of lesser fiends. Sometimes a small group of bone devils work together as roving inquisitors, driving the hesitant into battle.

SADISTIC TORMENTORS OF THE HAPLESS, chain devils savor their roles as the jailors and torturers of the Nine Hells. They seek to capture their victims alive so that a defeated foe's suffering can be drawn out for days.

CHAIN DEVIL TACTICS

A chain devil rakes enemies with its spiked chains, using *hellish chains* to restrain a particularly troublesome enemy. If it forgoes a move action, it can shift before and after making an attack. Outside of its turn, it uses *dance of defiance* to dodge attacks and *chains of vengeance* when it is first bloodied.

CHAIN DEVIL LORE

A character knows the following information with a successful Religion check.

DC 20: Chain devils (also known as kytons) use the spiked chains that shroud them to lash and restrain foes.

DC 25: Some chain devils learn rituals that allow them to animate chains that aren't attached to their bodies, causing them to writhe like serpents.

ENCOUNTER GROUPS

Chain devils work well with other devils and creatures that allow them to indulge their desire to inflict pain.

ICE DEVIL

ICE DEVILS HAIL FROM THE FRIGID WASTELANDS of Cania, the eighth layer of the Nine Hells. Infernal generals and evil mortals use them as bodyguards and champions, and ice devils often lead lesser devils in battle. They are poor commanders, though, because they despise weaker devils and consider them expendable.

ICE DEVIL TACTICS

An ice devil prefers to fight its own battles, using its powers to confound multiple enemies at once. It uses *chilling command* to immobilize frontline combatants while it attacks softer targets with the aid of its superior speed and reach. If the ice devil has a spare move action, it uses *chilling command* again during its turn. It uses the numbing cold of its longspear and *freezing breath* to slow enemies and keep them from escaping.

ICE DEVIL LORE

A character knows the following information with a successful Religion check.

DC 20: Although they are most comfortable in the frozen wastelands of Cania, ice devils are unaffected by warmer climates. Wherever they go, they take a little bit of Cania with them in the form of a cold aura that surrounds them.

DC 25: Ice devils respect power and have no tolerance for weakness or frailty, either in their allies or their enemies. When confronted by multiple enemies, an ice devil almost always attacks the weakest foe first.

ENCOUNTER GROUPS

Ice devils resent devils weaker than them and cooperate with them only grudgingly.

Level 19 Encounter (XP 13,600)

- ♦ 2 ice devils (level 20 soldier)
- ♦ 2 cambion hellfire magi (level 18 artillery)

IMP

IMPS ACT AS SPIES AND EMISSARIES for more powerful devils. Mortals often make bargains with imps, thinking that the weak devils are easy to control. Ultimately, most imps prove their loyalties lie with the Lords of the Nine and not any mortal master.

Imps are devious and deadly mischief-makers. They take pleasure in tricking mortals into harming one another.

IMP TACTICS

Imps are reluctant combatants. When forced to fight, an imp uses *vanish* to turn invisible and waits for an opponent to become distracted before attacking with its *tail sting*. If the battle turns against the imp or its allies, the imp doesn't hesitate to flee.

IMP LORE

A character knows the following information with a successful Religion check.

DC 15: Imps partner with mortals who seek magical power. By helping their "masters" attain new spells or locate magic items, imps foster a madness for power that leads their masters to perform evil acts.

DC 20: Imps possess impressive knowledge about magical subjects. They gain most of their information from other devils, from past experience, or from spying efforts of their own.

PIT FIEND

NOBLES OF THE NINE HELLS, pit fiends form an elite ruling class that oversees vast numbers of lesser devils. Only the archdevils known as the Lords of the Nine stand higher than the pit fiends.

Each pit fiend is lord of a large domain within one of the layers of the Nine Hells and is vassal to the archdevil who rules that layer. A pit fiend might govern a city, command a fortress,

lead a great legion, or serve as a seneschal or counselor for an archdevil. With the exception of Asmodeus, each Lord of the Nine commands no more than a dozen or so pit fiends.

As the lords, barons, viziers, and generals of the Nine Hells, pit fiends rarely confront adventurers in person. They are the progenitors of devilish schemes, and they step in only when important plans go awry or when great plots reach fruition. In the Nine Hells proper, pit fiends command vast numbers of lesser devils. Penetrating the defenses of a pit fiend's castle and destroying the mighty devil in its own demesne is a deed of truly epic proportions.

PIT FIEND TACTICS

A pit fiend fights close to its enemies, catching them in its *aura of fear* and *aura of fire*. On the first round of combat, it spends an action point to use *infernal summons*. It then uses *point of terror* against a tough-looking foe and *tactical teleport* to place two allies in flanking positions around that foe. With its remaining minor action, the pit fiend uses *irresistible command* on an ally within range.

A pit fiend alternates between *point of terror* and *irresistible command*, sometimes using both if it has a spare move action it can substitute with a minor action. Otherwise, the pit fiend uses *pit fiend frenzy*, teleporting as needed to gain a better position.

SUCCUBI TEMPT MORTALS into performing evil deeds, using their shapechanging abilities to appear as attractive men and women. Although seduction and betrayal are their forte, succubi are also practiced spies and assassins.

VISCERA DEVOURER

THIS DEVOURER WRAPS ITS DROOLING INTESTINES around nearby foes. The gnashing mouths that tip its viscera latch onto flesh, allowing the creature to drain the life from its captives. Once its victims are dead, the creature hungrily devours their innards.

When the creature is bloodied, it uses *devour viscera* to regain hit points.

SOULSPIKE DEVOURER

WHEN A SOULSPIKE DEVOURER SLAYS A CREATURE, the victim's body vanishes, and its apparition appears impaled on one of the devourer's spikes. The soulspike devourer feeds on these spirits, which howl in agony and disappear in a flash when finally consumed.

SOULSPIKED SURVIVORS

A soulspike devourer begins play with at least one spirit already impaled on its soulspikes. If this spirit escapes the devourer somehow, its body appears in a space adjacent to the creature. As the DM, you can use this soulspiked spirit as a story device: Perhaps the body belongs to an individual whom the PCs are searching for, or maybe it carries something of value. If healed or raised from the dead, this individual might stick around long enough to speak to the PCs, accompany them, or even betray them (as appropriate).

DRACOLICH

WHEN A POWERFUL DRAGON FORSAKES LIFE and undergoes an evil ritual to become undead, the result is a dracolich. Dracoliches are selfish, greedy, and interested only in amassing more power and treasure.

DRACOLICH LORE

A character knows the following information about dracoliches with a successful Religion check.

DC 20: Dracoliches are unnatural creatures created by an evil ritual that requires a still-living dragon to serve as the ritual's focus. When the ritual is complete, the dragon is transformed into a skeletal thing of pure malevolence. Some evil dragons willingly undergo this ritual.

DC 25: A handful of evil cults possess a ritual for turning a dragon into a dracolich against its will. These cults do what they must to keep knowledge of that ritual from others. When a dragon is transformed into a dracolich with such a ritual, a linkage between the cult and the dragon is formed, and the cult gains influence over the dragon's behavior.

DC 30: A cult that transforms a dragon into a dracolich maintains its control over the creature through possession of the dracolich's phylactery, a vessel that imprisons the creature's soul. Most dracoliches do not have phylacteries and are not associated with a cult. Those that have phylacteries seek to destroy them so the cult that created it loses its ability to command the dracolich forever.

DC 35: Once a dracolich's physical body is demolished, its phylactery is also shattered and the beast is gone for good.

DRAGON

OF ALL THE MONSTERS IN THE WORLD, dragons are the most feared. A fledgling group of adventurers might have what it takes to best a weak dragon, but the most powerful dragons are awesome, devastating creatures that rival even the gods.

Dragons are diverse creatures, appearing in at least twenty-five varieties within five major families. All dragons share certain characteristics—notably the legged and winged shape of their reptilian bodies—but within each family there are even stronger similarities.

Chromatic dragons are the dragons detailed here. They are generally evil, greedy, and predatory, and they're inclined to worship Tiamat, whom they regard as their progenitor and patron. This family includes red, blue, green, black, and white dragons. Each variety has its own breath weapon—a blast of elemental substance, from blazing fire to frigid cold—that it can expel from its mouth.

Catastrophic dragons are mighty embodiments of primordial forces. They are destructive, but not devoted to evil. The ground warps and explodes violently in their presence. Earthquake and typhoon dragons are two types of catastrophic dragons.

Metallic dragons are in some ways the opposite of the chromatic dragons. Many of them are devoted to Bahamut and share his ideals of nobility and virtue. Many others fail to live up to those lofty ideals and succumb to a selfishness and aggression that seems common among all of dragonkind. Metallic dragons, including gold, silver, copper, iron, and adamantite dragons, often guard valuable treasures or powerful magic items, even artifacts. They have breath weapons similar to those of chromatic dragons, but their effects are as much defensive as offensive.

Planar dragons are dragons infused with the nature of other planes of existence. Shadow dragons, Abyssal dragons, and fey dragons are all planar dragons.

Scourge dragons, sometimes called linnorms, embody the afflictions that plague living creatures, much as catastrophic dragons embody natural disasters. They are almost universally evil, even more so than the chromatics, and they revel in the raw physicality of melee combat. Because they lack wings and rear legs, some scholars insist that they're not true dragons, but more closely related to drakes.

CHROMATIC DRAGON LORE

Chromatic dragons figure prominently in tales told to children and romantic epics sung by lantern light, and much of what the legends say about them is false.

A character knows the following information with a successful Nature check.

DC 20: Chromatic dragons bask in the adulation of lesser creatures, but soon grow weary of praise and worship—unless it is accompanied by gifts of precious metals, gems, and magic items.

DC 25: Chromatic dragons prefer ancient ruins, deep dungeons, and remote wilderness areas for their lairs. Each dragon type tends to inhabit certain climates and terrains: reds like hot areas and volcanoes, whites like cold, blues prefer coastal regions, greens like forests, and blacks like swamps. That said, an individual dragon lives wherever it pleases, as long as its territory doesn't impinge on another dragon's. One well-known white dragon of legend made its lair in the heart of a volcano.

DC 30: Dragons occasionally deal with other creatures as equals. Red dragons have an ancient pact with githyanki, and powerful githyanki knights sometimes ride them into battle. Powerful empires of the past enlisted entire flights of dragons to lead their armies in war.

THE DRAGON GODS

One story that is told about the creation of the universe concerns the dragon-god Io. The dragons, this legend says, were his particular creation, lovingly crafted to represent the pinnacle of mortal form. Though they were creatures of the world, the power of the Elemental Chaos flowed in their veins and spewed forth from their mouths in gouts of flame or waves of paralyzing cold. But they also possessed the keen minds and lofty spirits of the other mortal races, linking them to Io and the other gods of the Astral Sea.

Io's arrogance was his downfall. While the other gods banded together to combat the primordials, Io spurned the help of other gods. He was so confident in his own might that he faced a terrible primordial called Erek-Hus, the King of Terror, alone. With a rough-hewn axe of adamantite, the

King of Terror split Io from head to tail, cleaving the dragon-god into two equal halves.

Erek-Hus did not have the chance to celebrate his victory, however. No sooner did Io's sundered corpse fall to the ground than each half rose up as a new god—Bahamut from the left and Tiamat from the right. Together the two gods fought and killed the King of Terror.

The legend continues to explain that Io's qualities were split between the two gods who rose from his death. His hubris, arrogance, and covetous nature were embodied in Tiamat, who is revered as a goddess of greed and envy. But Io's desire to protect creation and his sense of fairness took root in Bahamut, now worshiped as god of justice, honor, and protection.

The two dragon gods both shared one of Io's worse qualities, however—

his preference for working alone. After they defeated Erek-Hus, they locked in battle with each other, ignoring the pressing threat of the primordials. Only when Tiamat fled the battle did the two gods turn their attention back to the larger war, and each still preferred to work alone.

Of course, in these more enlightened days, any paladin of Bahamut will tell you that "the Platinum Dragon" is an honorific title, not a literal description, and that Bahamut is no more a dragon than Moradin is a dwarf. These are gods, not mere monsters.

Even so, many are the chromatic dragons that serve Tiamat, whose monstrous form is that of a colossal dragon with five heads—one head resembling each of the five main chromatic dragons.

CHROMATIC DRAGON ENCOUNTERS

Heirs of Io's hubris, chromatic dragons prefer to work and fight alone. All dragons are solo monsters, so they make fine encounters of their level all on their own. However, many dragons' lairs are surrounded by the dragon's minions, servants, or worshipers. A quest to slay a chromatic dragon can involve preliminary encounters with these servitors or allied creatures, possibly including dragonspawn or dragonborn as

well as creatures native to the dragon's environment.

If an adventuring party includes more than five characters, additional creatures of the party's level can help balance the encounter. These might be trusted allies who are allowed to enter the dragon's lair, or opportunistic lurkers trying to steal some bits of the dragon's food by picking off isolated characters. Sometimes a dragon emerges from its lair to help its minions defend its sanctum, so you could build an encounter that includes the dragon along with its servitors even before the characters reach the dragon's hoard.

BLACK DRAGON TACTICS

A black dragon attacks from hiding, either by submerging itself in water or clinging to the shadows. It uses *frightful presence* first and then spends an action point to use its *breath weapon* (or *vitriolic spray*, if elder or ancient). On its next turn, the dragon spends another action point to invoke its *cloud of darkness* power (or *acid gloom*, if ancient). It then makes a bite attack against a single foe or claw attacks against two different opponents within reach. The dragon prefers to remain in the area of its *cloud of darkness* power while making melee attacks, switching to its *breath weapon* as it recharges.

BLACK DRAGON LORE

A character knows the following information about black dragons with a successful Nature check.

DC 15: Black dragons like dismal forests and gloomy swamps, and are naturally drawn to places where the Shadowfell's influence is strong. A black dragon can surround

itself with gloomy darkness, with grants it total concealment (although darkvision penetrates the darkness normally).

DC 20: A black dragon's breath weapon is a blast of caustic green acid.

BLUE DRAGON

BLUE DRAGONS BREATHE BOLTS OF LIGHTNING. They can be found anywhere but prefer to lair in coastal caves, attacking and plundering ships that sail too close.

BLUE DRAGON LORE

A character knows the following information about blue dragons with a successful Nature check.

DC 15: Although highly adaptable, blue dragons often lair in coastal caves with entrances that aren't easily accessible by land.

DC 20: Blue dragons prefer to attack at range. A blue dragon's breath weapon is an arc of lightning that leaps from one target to another. It can also disgorge a ball of lightning that explodes on impact.

BLUE DRAGON TACTICS

A blue dragon takes to air immediately if it is not already flying. It spends an action point to use *frightful presence*, and then follows up with its *breath weapon*. Until it is forced to

land, a blue dragon is content to remain airborne and switch between *lightning burst* and *breath weapon* attacks. The dragon relies on its *draconic fury* to make enemies think twice about engaging it in melee.

An elder or ancient blue dragon spends an action point to use *thunderclap* against foes that get too close. An ancient blue dragon might also swoop down on a foe, use its *wingclap* power, unleash its *draconic fury*, and spend an action point to fly back out of range.

ENCOUNTER GROUPS

Blue dragons often forge uneasy alliances with sahuagin and storm giants, demanding treasure for the protection they provide. Dragonborn are often drawn to blue dragon mounts.

Level 15 Encounter (XP 6,400)

- ◆ 1 adult blue dragon (level 13 solo artillery)
- ◆ 3 dragonborn raiders (level 13 skirmisher)

Level 24 Encounter (XP 30,600)

- ◆ 2 thunderhawks (level 22 elite soldier)

THE AGES OF DRAGONS

Dragons have long natural lifespans, and they grow larger and more powerful as they age. Upon hatching, dragons are at least the size of an adult human, and they grow quickly to horse size and larger. The oldest dragons are among the most enormous creatures alive, stretching over a hundred feet long.

In game terms, dragons are grouped into four age categories: young,

adult, elder, and ancient. These are all mature dragons—few adventurers ever discover hatchlings in dragon nests, and those who do must face an angry adult parent before worrying about the relatively small and weak wyrmlings.

Young and adult dragons both fall in the Large size category, although they lie at opposite ends of that range.

Young dragons are about the size of a draft horse. Adult dragons are roughly the size of a storm giant, pushing the upper limits of Large.

Elder dragons are Huge, about the size of elephants or titans. Ancient dragons are Gargantuan, almost without compare among other living creatures. There is said to be no upper limit to the size of an ancient dragon.

GREEN DRAGON

MASTERS OF NEGOTIATION AND DECEIT, green dragons primarily live in forests or other places with strong ties to the Feywild. They breathe clouds of poisonous gas.

GREEN DRAGON TACTICS

A green dragon uses *flyby attack* and its *breath weapon* to wear down enemies before landing and engaging in melee. Once per round, it uses *luring glare* to either move a target into the area of its breath weapon or put the target within reach of its melee attacks.

An adult, elder, and ancient green dragon uses its *lashing tail* to confound opponents that try to engage it in melee. The ancient green dragon uses *mind poison* as often as it can, attacking enemy defenders first.

GREEN DRAGON LORE

A character knows the following information about green dragons with a successful Nature check.

DC 15: Green dragons live primarily in forests and are often drawn to locations connected to the Feywild.

RED DRAGON

RED DRAGONS BREATHE FIRE and make their lairs inside mountains and volcanoes. They are the mightiest of the chromatic dragons, and the oldest of them rival demon princes and demigods in power.

RED DRAGON LORE

A character knows the following information about red dragons with a successful Nature check.

DC 15: A red dragon's breath weapon is a blast of raw elemental fire that sears flesh and heats metal. The breath of an ancient dragon can strip even magical resistance to fire away from a creature caught in its blast, so even efreets fear these mightiest of dragons.

DC 20: Though red dragons prefer to lair deep underground, they often have high perches aboveground where they survey their territory, watching for intruders.

RED DRAGON TACTICS

A red dragon flies up to its enemies and unleashes its fiery breath at the start of battle, then spends an action point to make a *double attack*. On the following round, the dragon spends another action point to use *frightful presence* before resuming its *double attack*. Elder and ancient red dragons use *immolate foe* against troublesome ranged targets.

WHITE DRAGON

WHITE DRAGONS ARE SAVAGE, HEARTLESS BEASTS driven by hunger and greed. What they lack in intelligence, they make up for in ferocity. They breathe terrifying blasts of ice and primarily dwell in cold climates.

WHITE DRAGON TACTICS

White dragons like to swoop down on their enemies from above or spring up from a hiding place beneath snow or ice. A white dragon uses its *frightful presence* first and spends an action point to unleash its *breath weapon*. Thereafter, the dragon uses *dragon's fury* until its *breath weapon* recharges (spending its second action point so that it can use its *breath weapon* while also making claw attacks).

An elder or ancient dragon alternates between using *icy tomb* and its *breath weapon* but otherwise fights as described above.

White dragons usually fight until slain.

WHITE DRAGON LORE

A character knows the following information about white dragons with a successful Nature check.

DC 15: White dragons are highly adaptable but prefer to dwell in cold places such as glacial rifts, cold mountain peaks, and icy caves linked to the Elemental Chaos. A white dragon's *breath weapon* is a bone-numbing blast of elemental frost.

DC 20: White dragons are easy to bribe with gifts of gems, especially diamonds, but they are even more responsive if the proffered gift also includes meat.

DRAGONSPAWN

DRAGON CULTS LOYAL TO TIAMAT created the first dragonspawn using eldritch rituals. They corrupted dragon eggs by infusing them with the blood of nondraconic creatures, giving rise to new monsters with dragonlike traits. Entire armies of dragonspawn were created to wage war on the forces of Bahamut, but not all dragonspawn exist for this purpose alone.

Dragonspawn were created to breed more of their own kind. Over time, each dragonspawn became a new race with a temperament much like that of the dragon it resembles. The rituals that created the first dragonspawn have found their way into many tomes, allowing for the creation of new varieties. Although chromatic dragon eggs lend themselves well to such rituals, so too do the eggs of other families of dragons.

DROW

ARROGANT AND PERVERSE, the drow conspire to subjugate all who don't revere their Spider Queen, the god Lolth.

Like their kin, the elves, drow were once creatures of the Feywild. However, they followed Lolth down a sinister path and now reside in the Underdark of the world. There they gather in settlements of macabre splendor, lit by luminescent flora and magic, and crawling with spiders.

DROW LORE

EFREET LORE

A character knows the following information about efreets with a successful Arcana check.

DC 20: Efrees are the self-proclaimed fiery princes of the Elemental Chaos, the strongest force of order on that tumultuous plane. Though few in number, they rule over vast armies and households of elemental slaves. The City of Brass is their greatest achievement—a permanent city-fortress in the roiling chaos, unchanging and eternal.

DC 25: There is no such thing as an “efreet commoner.” Every efreet is a member of a noble house. These houses plot and scheme against each other (much as drow houses do in the Underdark), and from time to time they muster enormous

armies against each other. An efreet house might only contain a small number of related efreet, but through power and intimidation they lord it over vast hosts of other elementals. Their control is by no means limited to fire creatures, and smart efrees have creatures formed of various elements serving them. On rare occasions they bind demons to servitude, although they place little trust in them and keep them at arm's length at all times.

DC 30: Efrees have no power to grant wishes, despite stories to that effect. As princes of the Elemental Chaos, however, they have power, influence, and widespread connections, and they are not averse to bargaining with weaker mortals. Thus it might be that an efreet released from servitude will grant its liberator a “wish,” within reason.

As creatures of nobility and great self-importance, all efrees fear and loathe servitude to others. Sometimes when two efreet houses clash, the losing side is forced to give up a junior member of the house into a specified period of servitude to the victor. This is far more humiliating and punishing than any cost in goods or slaves. When an efreet is magically bound to serve a mortal, it considers that service the worst possible form of humiliation, and burns with resentment against its erstwhile master.

DC 35: An efreet house will sometimes sponsor a noble hunt where a few nobles of the house venture out of the Elemental Chaos into the world, the Feywild, the Shadowfell, and even into the Astral Sea, hunting particularly dangerous creatures (such as dragons) merely for the sport of doing so, as well as for a fantastic trophy to grace their house mansion.

EIDOLON LORE

A character knows the following information about eidolons with a successful Nature check.

DC 20: An eidolon is created by means of a divine ritual, the key component of which is a crystal shard containing a tiny spark of divinity. The shard is embedded deep in the eidolon and is lost when the eidolon is destroyed.

ELEMENTAL

BEYOND THE WORLD LIES A CHURNING MAELSTROM known as the Elemental Chaos, where air, earth, fire, water, and energy crash together in an unending cycle of creation and destruction. Creatures of all descriptions live within this primordial realm, but none typify the nature of the plane as much as elementals.

ELEMENTAL LORE

A character knows the following information about elementals with a successful Arcana check.

DC 20: Elementals are among the most common denizens of the Elemental Chaos. They come in many forms and sizes. Some elementals embody a single element, while others are combinations of two or more elements or energy types.

DC 25: Elemental creatures don't necessarily band together by element type. The most powerful denizens of the Elemental Chaos, including primordials, titans, and efreet, often assemble hosts of elemental creatures (sometimes of dissimilar element type) to march at their command. Small bands of elementals, though, are more likely to group with others of their element.

(Left to right) earthwind ravager, thunderblast cyclone, firelasher, and rockfire dreadnought

EARTHWIND RAVAGER TACTICS

An earthwind ravager disguises itself to resemble a pile of rocks, hoping to catch enemies by surprise. When it rises, it gathers all of the rocks up into its swirling form, puts some distance between it and its prey, and uses *wind devil* repeatedly until it immobilizes an enemy. Once it succeeds, it sustains the effect with a minor action every round. It uses *buffeting blast* to stun the immobilized creature and other nearby enemies. The ravager then closes in and makes slam attacks against its immobilized prey or uses *whirlwind* to push away other enemies.

FOMORIAN

FOMORIANS ARE AN ANCIENT AND WICKED RACE native to the Underdark of the Feywild. They live in eerily beautiful caves of incredible size. Glowing crystals and bioluminescent fungi light these places, where fomorians rule as monarchs over courts of sinister fey.

A fomorian is an ugly, deformed giant with purple-gray skin. Its deformities include a humpback and crooked limbs. Hairlessness is common, even among fomorian females. One of a fomorian's two eyes is larger and viler than the other. Unlike its counterpart, this "evil eye" has a catlike iris and unnatural coloration that varies from individual to individual.

Despite their repulsive appearance, fomorians use ornate tools and weapons. Their clothing, consisting of kilts and loose tabards, is also of superior quality.

FOMORIAN LORE

A character knows the following information about fomorians with a successful Arcana check.

DC 20: Cyclopes carve castlelike structures from the flowstone accumulations in the Underdark of the Feywild. Within these great structures dwell their fomorian masters. Fomorians are lazy creatures, so cyclopes produce much of the craftwork that fomorians possess.

DC 25: Fomorians enjoy unchallenged power in their subterranean realms. Their power sometimes extends to the surface, where they make war on eladrin courts.

DC 30: Emerging in the Feywild as perverse reflections of the mighty titans, fomorians consider themselves to be the most important beings in the universe. It's whispered that their *evil eye* powers are somehow connected to Gruumsh—perhaps a "blessing bestowed on them by the one-eyed god so fomorians could bring pain to Corellon's children. However, fomorians hold esteem for no god.

GALEB DUHR LORE

A character knows the following information with a successful Arcana check.

DC 15: Long ago, all dwarves were slaves to the giants and titans. More than one variety of dwarf failed to escape during the initial revolution, including the galeb duhrs. However, unlike the azers that continue to serve their masters in the Elemental Chaos, many galeb duhrs have slipped away from their brutish masters into the world. On the other hand, some still serve their hill giant and earth titan overlords, both in the Elemental Chaos and in the natural world.

GHOUL LORE

A character knows the following information about ghouls with a successful Religion check.

DC 15: Humanoids that indulge in or resort to cannibalism become ghouls when they die. Ghouls are also created through rituals. When a creature transforms into a ghoul, all the cares, concerns, and goals of its former life are washed away in an undead pulse of ravenous longing.

DC 20: Most ghouls revere Doesain, the King of Ghouls (and an exarch of Orcus). Doesain has a domain in the Abyss known as the White Kingdom, which is inhabited by ghouls and other flesh-eating undead. It is called the White Kingdom because every building is made of bones, and walking through its bone-dust streets kicks up clouds of white dust that create a fog throughout the city and coat things in white.

DC 25: Sometimes ghouls are graced by Doesain with power greater than their fellows. These so-called abyssal ghouls are the Ghoul King's favorites and make up a goodly portion of the king's Court of Teeth. The Court of Teeth includes over a thousand ghouls who reside with Doesain in a palace hollowed from the petrified but living form of a fallen primordial. Abyssal ghouls are also found in the world and on other planes, secretly aiding demons, undead, and evil lords who've sworn fealty to Doesain.

GIANT

GIANTS ARE HULKING HUMANOID CREATURES with fundamental ties to the world, be that bedrock, uncontrollable fires, raging storms, or inevitable death. The first giants were massive titans of fire and frost, storm and stone. These giants labored under primordial lords to shape the newly forming world.

In the eons since the first days, giants have multiplied and moved on, finding places to call their own in planes beyond the Elemental Chaos, including the Shadowfell and the Feywild, and even in the realm of their masters' deific foes, the Astral Sea. However, giants prefer the world their labor helped create, and giants of every variety can be found upon it. Indeed, when the primordials retreated from the world, one of the first empires of that dawn era was one created by giants,

and their slaves were the children of Moradin. But those heady days are long vanished.

Giants and titans tend to lair in extreme environments, including scrublands, mountain peaks, volcanic calderas, and searing deserts. These brutal landscapes remind giants of the Elemental Chaos where their ancestors first drew breath.

Giants as a whole answer to no particular overlord or higher power, nor are they known to cooperate among themselves. Indeed, giant clans often make war each other, though no one except giants know why they fight. However, should ever an imprisoned or lost primordial return to the world, giants of the lineage once loyal to it would obey that ancient one's command. Giants have marshaled just so in past primordial awakenings. Giants have long memories and longer oral histories, and most clans await the day they can renew their claim on the world in service to an unstoppable primordial entity.

DEATH GIANT

A DEATH GIANT HARVESTS SOULS, trapping those it slays in a shroud of moaning spirits from which it draws power and sustenance.

Death giants (and their larger cousins, the death titans) were elemental beings that relocated to the Shadowfell, where they evolved into the soul-eating horrors they are today. They have few remaining ties to the Elemental Chaos and seldom associate with other kinds of giants.

A death giant often surrounds itself with weak allies that it can kill easily, either with its greataxe or with its *soulfire burst*, thereby gaining soul shards (using its *soulcatcher* aura).

DEATH GIANT TACTICS

A death giant wades into combat with its greataxe, focusing its attacks on a single foe. The giant uses *soulfire burst* when surrounded by multiple enemies and uses *consume soul shard* up to three times in a single round to heal when bloodied.

DEATH TITAN TACTICS

A death titan employs the same tactics as a death giant except that it uses *soul devourer* at the beginning of battle and makes *double attacks* as often as possible.

DEATH GIANT LORE

A character knows the following information about death giants with a successful Arcana check.

DC 25: Death giants hunt living creatures in their native Shadowfell. In the natural world, they prefer to den in hollows below mass graveyards, in empty mausoleums and necropoli, and other places where the veil between the world and the Shadowfell is particularly thin.

DC 30: Death giants sustain themselves by stealing and devouring living souls. Death giants do not need to do this often; however, they often make a dark sport of hunting the living.

Death giants ally with powerful undead, death cults that perform sacrificial rituals, and other creatures of the Shadowfell.

GIBBERING BEAST

DC 20: For the most part, gibbering beasts speak nonsense. Occasionally, a gibbering beast speaks an intelligible word or phrase, usually mingled with its mad gibbering. The word or phrase could be a clue or warning, or it could just be something of no importance whatsoever.

DC 25: Gibbering orbs are denizens of the Far Realm that wander the planes and the places between, consuming living creatures. Although they appear insane, gibbering orbs are perversely rational, and they pursue secret objectives all their own.

ENCOUNTER GROUPS

Lesser gibbering beasts live among other aberrant creatures. They are clever enough to associate with nonaberrant creatures when it's to their advantage. The gibbering orb travels alone, though strange events and creatures might serve as omens to its coming.

GITHYANKI

BORN OUT OF SLAVERY, THE GITHYANKI are fierce psychic warriors that ply the Astral Sea and fight with silver swords.

The githyanki and the githzerai were once a single race—the gith—enslaved by mind flayers, but they split into two races after winning their freedom. Whereas the githzerai fled to the Elemental Chaos and became introspective and monastic, the githyanki fled to the Astral Sea and became xenophobic and militaristic. They built citadels and armies, and from there they set out to conquer everything in their path.

GITHYANKI GISH TACTICS

A githyanki gish uses ranged attacks (*force bolt* and *storm of stars*) to soften up foes before engaging in melee combat, using *astral stride* to gain a flanking position when possible and making a *double attack* at every opportunity. If the battle turns against the gish and its allies, it uses *astral stride* to escape.

GITHYANKI LORE

A character knows the following information about githyanki with a successful Nature check.

DC 20: The ancient gith escaped from their mind flayer overlords long ago, only to fall prey to internecine strife that created the rival githyanki and githzerai races. In time, the githyanki established a tyranny almost as bloodthirsty as the illithids that once enslaved them. Githyanki attack mind flayers on sight, and they are equally cruel toward their githzerai kin.

Githyanki speak Common. They also learned Deep Speech from their mind flayer overlords.

DC 25: Githyanki cities and citadels in the Astral Sea are built upon nameless and forgotten dead entities. The githyanki sail the Astral Sea in astral ships, looking for debris of dead gods and shattered realms to add to their own fortresses and hoards. Occasionally they set their sights on other worlds, intent on plundering them as well.

DC 30: Githyanki don't have families; from birth they belong to military training groups called cadres. A githyanki views her cadre as singularly important and typically does not know the name of her parents or siblings. Even more important than a githyanki's cadre is her weapon. A githyanki lavishes more care on her weapon than her fellows.

DC 35: Tu'narath is the largest githyanki city. It is built atop the body of a dead god adrift in the Astral Sea and ruled by Vlaakith, the githyanki lich queen, who has ruled supreme for over a thousand years. The githyanki revere the lich-queen as the stepmother of their race. To them, her word is truth. She has the reputation for slaying any who challenge her policy or power, devouring their life essences.

Githyanki have a pact with red dragons, which sometimes agree to allow githyanki to ride upon them.

ENCOUNTER GROUPS

Githyanki rarely associate with other races, but they have a forged pact with red dragons and occasionally take beasts as pets.

GITHZERAI

GITHZERAI ARE SECRETIVE BEINGS with an ascetic and disciplined culture. They congregate in hidden monastic settlements across the Elemental Chaos and in remote corners of the world.

The githzerai and githyanki were once a single race enslaved by the mind flayers until they won their freedom, at which point a schism formed and the free gith turned on each other. After much bloodshed, the githyanki retreated to the Astral Sea and the githzerai withdrew to the Elemental Chaos.

Deep within the Elemental Chaos, the githzerai study chaos, disciplining their minds and bodies to better counter it. They are formidable psychic warriors when provoked and maintain a deep-seeded hatred for mind flayers and their evil githyanki kin.

GITHZERAI LORE

A character knows the following information about githyanki with a successful Nature check.

(Left to right) githzerai mindmage, githzerai cenobite, and githzerai zerth

DC 20: Slaves in a long lost illithid empire, the githzerai were once one people with the githyanki. Philosophical differences split the freed people. The githzerai chose an introspective path, building monasteries in which they learn to harness the power of the mind and soul. Many of these monasteries are sequestered in the Elemental Chaos, although some githzerai sects maintain hidden refuges in the natural world.

DC 25: Most githzerai have martial arts training, enabling them to better protect their settlements. A few mix more arcane teachings with martial prowess, becoming multitalented githzerai called zerths.

DC 30: Githzerai warriors form parties to hunt the enemies of their people, particularly mind flayers. Githzerai are also encouraged to pursue their individual goals, some benign and others less so. Githzerai are as capable of evil-doing as any sentient race, although particularly wicked githzerai tend to live outside of githzerai society.

DC 35: Zerthadlun, an austere walled settlement with many open fields and markets, is the greatest and most widely known githzerai city—an oasis of calm in the otherwise tumultuous Elemental Chaos. There, the githzerai contemplate order, destiny, entropy, and destruction. They perfect their bodies and minds, testing themselves against the dangers of the Elemental Chaos.

GNOLL LORE

A character knows the following information with a successful Nature check.

DC 15: Gnolls are nomadic and rarely stay in one place for long. When gnolls attack and pillage a settlement, they leave nothing behind except razed buildings and gnawed corpses. Gnolls often decorate their armor and encampments with the bones of their victims. Impatient and unskilled artisans, they wear patchwork armor and wield weapons stolen from their victims.

DC 20: Gnolls don't bargain or parley, and they can't be bribed or reasoned with. Gnolls are often encountered with hyenas, which they keep as pets and hunting animals. They also work with demons.

DC 25: Gnolls detest physical labor and often use slaves to perform menial chores. The life of a slave in a gnoll camp is brutal and short. That said, slaves who show strength and savagery might be indoctrinated into the gnoll vanguard. Such creatures are usually broken in mind and spirit, having become as cruel and ruthless as their captors.

DC 30: As the mortal instruments of the demon lord Yeenoghu, who is called the Beast of Butchery and Ruler of Ruin, gnolls constantly perform atrocities. When not scouring the land in Yeenoghu's name, gnolls fight among themselves and participate in rituals that involve acts of depravity and self-mutilation.

ENCOUNTER GROUPS

Gnolls raid and war in rapacious packs, their numbers supplemented by demons (especially evistros and barlguras), raving slaves, and beasts driven to madness and cruelty.

Powerful humanoids sometimes manage to take gnolls as slaves or even to raise gnoll pups as servants. Such gnolls serve their masters as fierce warriors.

GNOME ARCANIST TACTICS

This gnome hides within its *aura of illusion* until it's ready to attack. It uses *scintillating bolt* and *startling glamor* each round, dazing enemies and sliding them into positions where they can be flanked by the gnome arcanist's allies. When enemies get within 5 squares, it uses *illusory terrain* to further hinder them.

GNOME LORE

A character knows the following information about gnomes with a successful Arcana check.

DC 15: Gnomes dwell in homes burrowed under the roots of trees. Their homes are easily overlooked by untrained eyes.

DC 20: When they feel threatened, gnomes use illusions to steer foes away from their homes or lure them into traps or ambushes.

ENCOUNTER GROUPS

Gnomes are commonly encountered with other fey. In the natural world, they often travel with elves, eladrin, or dwarves.

Level 3 Encounter (XP 750)

- ♦ 2 gnome arcanists (level 3 controller)
- ♦ 2 iron defenders (level 3 soldier)

GOBLIN

IN COMMON PARLANCE, “GOBLIN” refers to a specific sort of small, ill-tempered humanoid, but the word also refers to related beings of various sizes, such as bugbears and hobgoblins. Goblins are as prolific as humankind, but as a people, they’re less creative and more prone to warlike behavior.

Most goblins live in the wild places of the world, often underground, but they stay close enough to other humanoid settlements to prey on trade caravans and unwary travelers. Goblins form tribes, each ruled by a chieftain. The chieftain is usually the strongest member of the tribe, though some chieftains rely on guile more than martial strength.

Hobgoblins rule the most civilized goblin tribes, sometimes building small settlements and fortresses that rival those of human construction. Goblins and bugbears, left to their own devices, are more barbaric and less industrious than hobgoblins. Bugbears are dominant in a few mixed tribes, but hobgoblins tend to rise above their more brutish cousins unless severely outnumbered.

A member of the goblin species has skin of yellow, orange, or red, often shading to brown. Its eyes have the same color variance; its hair is always dark. Big, pointed ears stick out from the sides of the head, and prominent sharp teeth sometimes jut from the mouth. Males have coarse body hair and might grow facial hair.

LORE

The following information about goblins can be obtained with a successful Nature check.

DC 15: Goblins’ bellicose nature can be traced, in part, to their reverence for the god Bane, whom they see as the mightiest hobgoblin warchief in the cosmos. Some of Bane’s exarchs are goblins. Maglubiyet, the Battle Lord, and Hruggek, the Master of Ambush, are most prominent among these.

DC 20: Hobgoblins once had an empire in which bugbears and goblins were their servants. This empire fell to internal strife and interference from otherworldly forces—perhaps the fey, whom many goblins hate.

DC 25: Hobgoblins developed mundane and magical methods for taming and breeding beasts as guards, laborers, and soldiers. They have a knack for working with wolves and worgs, and some drake breeds owe their existence directly to hobgoblin meddling. All goblins carry on this tradition of domesticating beasts.

DC 30: Given their brutal magical traditions, hobgoblins might have created their cousins in ancient times: Bugbears served as elite warriors, and goblins worked as scouts and infiltrators. The disintegration of hobgoblin power led to widespread and diverse sorts of goblin tribes.

THE GOBLIN FAMILY

There are goblins, and then there are *goblins*. The word “goblin” refers to both the goblin creature as well as to a family of creatures that include bugbears, hobgoblins, and regular goblins.

GOBLIN

BUGBEAR

BIG, TOUGH GOBLINS THAT LOVE TO FIGHT, bugbears are the champions, picked guards, and muscle for more clever goblins.

Bugbears take whatever they want and bully others into doing their work. They hunt for food, eating any creature they can kill—including other goblins.

BUGBEAR STRANGLER TACTICS

A bugbear strangler uses tactics similar to the bugbear warrior but likes to stay hidden for a round or two at the beginning of a fight. Only after most of its enemies are busy does the strangler attack, singling out a target that doesn't have much help nearby.

BUGBEAR LORE

A character knows the following information with a successful Nature check.

DC 15: A bugbear has little tolerance for talk and resorts to conversation only if the advantage of doing so is apparent. The most common situation is when foes are too strong to challenge openly.

DC 20: Bugbears often decapitate their foes to honor their greatest hero, Hruggek, who is known to decapitate his enemies.

GOBLIN

GOBLINS ARE WICKED, TREACHEROUS CREATURES that love plunder and cruelty. They're not very big or strong, but they're dangerous when they gang up.

Goblins breed quickly and can live most anywhere, from caves to ruins to a city's sewers. They survive by raiding and robbery, taking every usable item they can carry from their victims.

GOBLIN CUTTER TACTICS

Goblin cutters—like all goblins—don't fight fair. They gang up on a single enemy and quickly take advantage of *goblin tactics* to achieve flanking positions. If it dawns on them that they're losing the battle, they flee, hoping to live to fight another day.

GOBLIN BLACKBLADE TACTICS

Goblin blackblades have more stomach for melee than most goblins, preferring to flank a single enemy to gain combat advantage. When bloodied, they use their *sneaky* power to trade places with fresher goblins.

GOBLIN WARRIOR TACTICS

Goblin warriors would rather fight at range, using *great position* to deal more damage with their javelins. In melee combat, they use *goblin tactics* to maneuver into flanking positions. Once bloodied (or once they've seen several of their comrades cut down), warriors tend to flee and leave allies to fend for themselves.

GOBLIN HEXER TACTICS

The goblin hexer uses *lead from the rear* to turn nearby allies into meat shields while it casts *vexing cloud* around itself and its closest allies and enemies. It then targets an enemy defender with *stinging hex* and uses its *blinding hex* on foes making ranged attacks. When another goblin within 10 squares uses *goblin tactics*, the goblin hexer uses *incite bravery* to allow that goblin to make a free attack.

GOBLIN SKULLCLEAVER TACTICS

Uncharacteristically brave, goblin skullcleavers charge boldly (perhaps foolishly) into melee and use *goblin tactics* to move into flanking positions. When bloodied, they fly into a savage rage, attacking without concern for their own wellbeing.

GOBLIN LORE

A character knows the following information with a successful Nature check.

DC 15: Goblins are cowardly and tend to retreat or surrender when outmatched. They are fond of taking slaves and often become slaves themselves.

DC 20: Goblins sleep, eat, and spend leisure time in shared living areas. Only a leader has private chambers. A goblin lair is stinking and soiled, though easily defensible and often riddled with simple traps designed to snare or kill intruders.

HOBGOBLIN

HOBGOBLINS LIVE FOR WAR AND BLOODSHED, killing or enslaving creatures weaker than themselves. More aggressive and organized than their goblin and bugbear cousins, they see all other creatures as lesser beings to be subjugated, and they reserve a special loathing for all fey, especially elves and eladrin.

Hobgoblins prize their possessions and make their own weapons and armor. Compared to their more brutish kin, they wear decent clothing and armor, and they maintain their personal armaments with care. Hobgoblins prefer bold colors, especially crimson and black.

HOBGOBLIN HAND OF BANE TACTICS

This fanatical hobgoblin fights for the glory of Bane, the god of war. It attracts as many enemies as possible and strikes them down with its flail.

HOBGOBLIN LORE

A character knows the following information with a successful Nature check.

DC 15: Hobgoblins live to make war. A typical tribe includes a mixture of hobgoblins, goblins, and bugbears, with the mightiest hobgoblin holding the title of warchief.

DC 20: A hobgoblin tribe is intensely protective of its reputation and military status. Meetings between groups from different tribes might turn violent if members aren't restrained. However, a common cause can make hobgoblin tribes set aside their differences for the glory of a great war led by a mighty leader.

DC 25: Like their martial traditions, hobgoblin magical traditions severely test the limits of practitioners. Hobgoblin casters are expected to work well with hobgoblin soldiers.

ENCOUNTER GROUPS

Goblins sometimes ally with or even rule over other like-minded creatures. They also take mercenary work; hobgoblins are the most reliable. Goblins can also end up as slaves.

GRELLS ARE FLYING, TENTACLED PREDATORS that haunt the tunnels of the Underdark, preying on unwary passersby.

Most grells are feral, solitary hunters that rarely interact with others of their kind. Sometimes, though, they gather in large colonies consisting of dozens of individuals. Although they are sightless, grells possess the psychic ability to sense their surroundings.

DC 15: A grick attacks viciously when its nest is threatened or when it is hungry—and it is always hungry. Accustomed to hunting in packs, gricks are much more dangerous when they flank prey.

DC 20: If prey becomes too scarce in its preferred terrain, a grick hunts aboveground at night, always returning to shelter before the bright light of the day burns its tiny eyes.

GRIFFON

GRIFFONS ARE FIERCE, MAJESTIC HUNTERS of the air. They make their nests in remote corners of the world and sometimes stray into the Feywild. There are many kinds of griffons, all of which have feathered wings, a sharp beak, taloned foreclaws, and the hindquarters of some nonflying beast.

Griffon eggs are highly prized, for young griffons can be trained as mounts.

GRIFFON LORE

A character knows the following information with a successful Nature check.

DC 15: Griffons are difficult to tame, but stories tell of elves and eladrin who magically control griffons and ride them into battle. Hippogriffs, on the other hand, are easily ridden, even in combat. For that reason, they are the most common flying mount among the civilized races of the world.

Hippogriffs breed true. Breeding a hippogriff with a horse produces either another hippogriff or a temperamental horse. Hippogriffs are expensive mounts, so the theft and smuggling of young hippogriffs is a lucrative criminal industry.

DC 20: A griffon's nest typically contains only one or two eggs. Griffon and hippogriff eggs are worth up to 1,000 gp apiece to prospective buyers, who include eccentrics wishing to display the creature in captivity, villains who want a vicious guard, or spellcasters who believe they can train a young griffon using magic.

DC 25: Rimefire griffons are native to the Elemental Chaos. Ice archons ally with them, and efreet sometimes capture them and force them into service.

RIMEFIRE GRIFFON TACTICS

HAG

WISE IN THE WAYS OF DARK MAGIC AND CURSES, hags sometimes choose to serve more powerful evil beings as advisors and soothsayers. Cruel and dangerous fey, hags haunt the Feywild and the lonely places of the world. Most hags are petty tyrants who prefer to bully weaker monsters and foment wicked schemes against mortals unfortunate enough to live close by.

HAG LORE

A character knows the following information about hags with a successful Arcana check.

DC 15: Hags often know dark rituals that allow them to scry distant places, see into the future, manipulate the weather, or place curses on those who anger them. They gather in small groups called covens, thereby combining their ritual knowledge.

DC 20: Hags are living manifestations of nature's ugliness, much as eladrin and elves embody nature's beauty. Miserable and conniving, they seek to destroy those who are content in life. They like to collect treasure and will often impart knowledge or free captives in exchange for valuable items.

HARPY LORE

A character knows the following information with a successful Arcana check.

DC 15: Harpies can be either male or female. A male harpy and female harpy will share a nest just long enough to propagate, but once the eggs have been laid, the male abandons the nest and leaves the female to rear the hatchlings. For this reason, harpies are seldom encountered in mixed-gender groups.

DC 20: According to legend, harpies are descended from an evil elf witch-queen who often took the form of a golden eagle to spy on her subjects. A mighty hero drove her into exile long ago, breaking the magic tiara that allowed her to change shape. The elf-queen and her unscrupulous children were cursed with half-bird forms for the rest of their days. The alluring song of the harpy is a legacy of the sinister enchantments wielded by the long-lost elf-queen against her people.

HELMED HORROR

HELMED HORROR TACTICS

A helmed horror hovers toward enemies but lands to fight. It opens with *blade sweep* if it can, but it might also use that power to punish foes who dare flank it. After making an opportunity attack, it uses *tactical step* to maneuver around its foes to reach a soft target.

HELMED HORROR LORE

A character knows the following information with a successful Arcana check.

DC 20: Helmed horrors are created by means of an ancient ritual. A helmed horror has truesight and regeneration, and it can channel different kinds of energy through its greatsword.

ENCOUNTER GROUPS

A helmed horror can be found with any creature capable of creating it. Many serve as guardians.

Level 14 Encounter (XP 5,000)

- ♦ 2 helmed horrors (level 13 soldier)
- ♦ 1 mummy lord (level 13 elite controller)

HOMUNCULUS

HOMUNCULI ARE MINOR CONSTRUCTS created to guard specific places, objects, or beings. They require no food or sleep, and they can maintain their watch indefinitely.

Homunculi can understand fairly complex orders, and they follow instructions with no thought of self-preservation (unless, of course, they are ordered to avoid taking damage).

GUARD

A homunculus can be attuned to a specific area, creature, or object, guarding it with its life. Attuning the homunculus to the desired area, creature, or object takes 1 minute and can be done only by the homunculus's creator or its new owner (as designated by its creator). The homunculus gains certain powers and benefits in this guard role (as noted in its statistics).

Guarded Area: A specific area up to 5 squares on a side.

Guarded Creature: A specific creature, typically (but not always) the homunculus's creator.

Guarded Object: A specific item of any size weighing up to 50 pounds.

CLAY SCOUT TACTICS

HOOK HORROR

HOOK HORRORS DRAG VICTIMS TO THEIR DEATHS using their powerful hooked arms. These pack omnivores scour the Underdark in search of live prey, foraging when necessary.

Hook horrors communicate with one another using a complex series of clicking noises they make with their mouths and carapace. The eerie clicks echo in the Underdark, warning prey that death is near.

HOOK HORROR LORE

A character knows the following information with a successful Nature check.

DC 20: Hook horrors live in total darkness. They can see in lit environments, but in the dark of the deep earth they navigate using echolocation. They also make clicking noises to communicate with one another. An Underdark explorer might become aware of nearby hook horrors by these noises.

DC 25: Although they hunt in small packs, hook horrors also gather in larger groups called clans. A particular clan, ruled by its strongest egg-laying female, ranges over a wide area in the Underdark. Its members defend clan territory fiercely from any intruder, including unrelated hook horrors.

DC 30: Hook horrors are omnivorous but prefer meat to plants. Rumor has it that they prefer the flesh of drow over any other. Not surprisingly, drow slay wild hook horrors and take young and eggs to raise as slaves.

ENCOUNTER GROUPS

Humanoids sometimes capture and train hook horrors as guardian beasts and shock troops.

HOOK HORROR TACTICS

Hook horrors are so good at climbing and jumping that they often attack from an unexpected direction. A hook horror prefers to get close enough to use *rending hooks*, followed by a *bite*. It uses its melee basic attack to drag prey closer.

A hook horror sometimes flings a tasty victim at the feet of its packmates, but it more typically uses its *fling* power to toss aside prey that has proven too difficult to kill.

HORSE

HORSES ARE WIDELY USED AS RIDING MOUNTS and beasts of burden. Wild horses are also common sights in the valleys and plains of the world, as well as the Feywild.

Celestial chargers are a special breed infused with divine energy and bred to serve the noblest warriors. They are much smarter than normal horses. Although it does not speak, a celestial charger dimly understands its rider's language.

HYDRA LORE

A character knows the following information with a successful skill check.

Nature DC 20: Legends that speak of hydras that can regenerate severed heads have so far proven false.

Nature DC 25: Although hydras spend much of their time in water, they are not amphibious—they must surface to breathe.

Arcana DC 30: The first hydras sprang from the spilled blood of Bryakus, a terrible primordial who battled the gods in ancient times. Although the gods defeated Bryakus long ago, his monstrous progeny still thrive in the Elemental Chaos and elsewhere. Particularly powerful hydras have the ability to spit acid and other forms of energy, such as fire or lightning.

KRUTHIK HIVE LORD TACTICS

The hive lord uses its *acid blast* to weaken enemies at the start of battle. It then makes claw attacks, staying within 2 squares of as many other kruthiks as possible so that they benefit from its *hive frenzy* aura.

KRUTHIK LORE

A character knows the following information about kruthiks with a successful Nature check.

DC 15: Kruthiks are chitinous reptilian hunters that form small hives underground. They use their superior numbers to overwhelm and devour all other nearby creatures.

Kruthiks hunt methodically, stripping one area of prey before expanding their territory. They butcher their kills and carry treasure back to their nesting warrens. Mauled carcasses and strange tracks that look as if they were made by spikes are sure signs of a kruthik horde.

DC 20: Kruthiks communicate with one another through a complex series of insectlike chitters and reptilian hisses. These sounds can often be heard in advance of a kruthik attack.

Kruthiks hatch from eggs and undergo several metamorphoses during their life cycle. Hatchlings grow into young, but young and adults enter a hard cocoon to change into the next larger breed of kruthik.

DC 25: Kruthiks take the scent of their own dead as a warning, and they avoid areas where many other kruthiks have died. Slaying enough kruthiks in one area might drive the remaining hive elsewhere.

DC 30: The origin of the kruthik lies in the cruel history of the tiefling empire of Bael Turath. Tiefling mages infused worldly reptiles with fiendish blood, creating the kruthiks as infiltrators to weaken enemy holdings from within. Perhaps the tieflings had a way to control the kruthiks at that time, but if so, that technique was lost with the fall of the tiefling empire.

ENCOUNTER GROUPS

Kruthiks build lairs underground, slowly digging through earth and rock to form warrens. They're attracted to sites that already have open underground chambers and supernatural energies. Although kruthiks can feed on carrion, they prefer live prey, so undead are safe from kruthik predation and can even live unmolested in proximity to a kruthik hive. It is entirely possible that a sentient creature could uncover the means to control kruthiks, bringing them to bear as living weapons. The most likely candidates for such an accomplishment are tieflings, devils, and evil creatures willing to deal with devils.

KUO-TOA LORE

A character knows the following information about kuo-toa with a successful Nature check.

DC 20: Kuo-toas live in the Underdark, where they worship dark gods and work toward sinister ends, seeing themselves as superior to all other humanoids. They are at home in water and on land, so they can be encountered in dry caverns as well as subterranean bodies of water.

On the edge of underground lakes or seas, kuo-toas build settlements around their shrines. Within these places, priests called whips make up the top caste of kuo-toa society. Kuo-toa monitors are the whips' agents as well as an elite warrior force that keeps lower ranking kuo-toas in line.

DC 25: Madness taints kuo-toa civilization, and it can spread through a kuo-toa settlement like a disease. The mental disciplines practiced by whips and monitors often protect them from lunacy, but kuo-toa leaders must carefully control and watch the common populace. This madness has caused some kuo-toa communities to disintegrate, leaving behind ruins populated by mad kuo-toas and wandering monsters.

ENCOUNTER GROUPS

Kuo-toas range from their settlements to acquire slaves for themselves and sacrifices for their aboleth "gods." Some kuo-toas escape their depraved society to become slaves, mercenaries, or even leaders among other Underdark races.

LAMIA

LAMIAS LURE VICTIMS TO THEIR DEATHS by assuming a pleasing humanoid guise. Some lamias, driven by the need to consume other sentient creatures, simply stalk humanoids wherever they can find them. Others possess a twisted thirst for knowledge, seeking to acquire arcane lore and magical power at any cost.

In its true form, a lamia is a swarm of black scarab beetles assembled into a coherent mass around the flesh-stripped bones of a powerful fey creature. This swarm shares a single intelligence and can mask itself in the guise of an attractive humanoid. It sometimes appears to be a human, elf, eladrin, or drow partly comprised of scores of beetles.

LAMIA LORE

A character knows the following information with a successful Arcana check.

DC 20: A lamia is a bizarre fey comprised of hundreds of black scarab beetles. It lures wayfarers to their deaths by assuming a pleasing humanoid guise.

DC 25: When a lamia slays a humanoid creature, it adds another beetle to its evergrowing swarm. When a lamia's swarm grows too large, it reproduces by first slaying a worthy fey creature such as a powerful eladrin. Rather than consuming the body, the lamia divides itself, filling the corpse with hundreds of its beetles. Over time, these beetles devour the corpse and arise as a new lamia. This newborn lamia gains much of the victim's memories and knowledge in the process.

LICH

A LICH IS AN UNDEAD SPELLCASTER created by means of an ancient ritual. Wizards and other arcane spellcasters who choose this path to immortality escape death by becoming undead, but prolonged existence in this state often drives them mad.

Liches are cold, scheming creatures that hunger for ever greater power, long-forgotten knowledge, and the most terrible of arcane secrets.

LICH LORE

A character knows the following information about liches with a successful Religion check.

DC 20: A mortal becomes a lich by performing a dark and terrible ritual. In this ritual the mortal dies, but rises again as an undead creature. Most liches are wizards or warlocks, but a few multiclassed clerics follow this dark path.

LICH TRANSFORMATION

You call upon *Orcus, Demon Prince of the Undead*, to transform your body into a skeletal thing, undead and immortal, and bind your life force within a specially prepared receptacle called a *phylactery*.

Level: 14 (caster must be humanoid)

Category: Creation

Time: 1 hour; see text

Duration: Permanent; see text

Component Cost: 100,000 gp

Market Price: 250,000 gp

Key Skill: Arcana or Religion

At the conclusion of this ritual, you die, transform into a lich, and gain the lich template (*Dungeon Master's Guide* 179).

An integral part of becoming a lich is creating a phylactery, a magical receptacle containing your life force. When you are reduced to 0 hit points or fewer, you and your possessions crumble to dust. Unless your phylactery is located and destroyed, your reappear in a space adjacent to the phylactery after 1d10 days.

You must construct your phylactery before the ritual can be performed. The phylactery, which takes 10 days to create, usually takes the form of a sealed metal box containing strips of parchment on which magical phrases have been transcribed in your blood. The box measures 6 inches on a side and has 40 hit points and resist 20 to all damage. Other kinds of phylacteries include rings and amulets, which are just as durable.

If your phylactery is destroyed, you can build a new one; the process takes 10 days and costs 50,000 gp.

DC 25: A lich's life force is bound up in a magic phylactery, which typically takes the form of a fist-sized metal box containing strips of parchment on which magical phrases have been written. If you destroy a lich, its spirit returns to its phylactery. Its body reforms in 1d10 days at the location of the phylactery unless you also destroy the phylactery. Most liches hide their phylacteries in secret (and well-guarded) vaults, sometimes on other planes.

Destroying a lich and its phylactery does not guarantee that the lich is gone forever. Powerful beings associated with undeath, including Orcus and Vecna, can reform a destroyed lich, turning it into a lich vestige.

DC 30: Some of the most fearsome villains in the long history of the world have been liches, including Acererak—master of the Tomb of Horrors—and the god Vecna himself. All liches pay homage to Orcus, and it is said that Orcus can instantly destroy the phylactery of any lich that displeases him.

ENCOUNTER GROUPS

Liches often command armies of lesser undead or have demons or devils serving them.

LIZARDFOLK

LIZARDFOLK INHABIT SWAMPS AND MARSHES, feeding on local wildlife and driving off or killing trespassers entering their territory. Some especially cruel and savage lizardfolk capture and eat other humanoid creatures, boldly launching raids against the lands of nearby humanoids to capture victims for their feasts.

Lizardfolk excel at swimming and often take to the water to stalk prey and evade pursuit. They can hold their breath for up to ten minutes without trouble.

Lizardfolk come in many varieties, including greenscale lizardfolk (the most common breed) and blackscals. Blackscals are dumb, hulking brutes that often inhabit the same swamps and marshes as their smaller kin. A blackscale tribe might be an enemy to a lizardfolk tribe, but more often the two work together or even intermingle in the same village. Blackscals rarely become leaders of mixed tribes since they are simply too dull-witted for the job, but they frequently accompany raiding parties or serve as bodyguards to the tribal chieftain or marsh mystic.

LIZARDFOLK LORE

A character knows the following information with a successful Nature check.

DC 15: Lizardfolk favor humid climates. They dwell in warm or temperate marshes, swamps, and jungles, or more rarely in flooded cavern systems.

Lizardfolk occasionally trade with humanoids they trust (usually halflings), bartering for finished goods. However, tribes that prey on other humanoids generally don't engage in any kind of trade.

DC 20: Lizardfolk hatch from eggs and grow quickly to adulthood; by 2 years of age, they are fully grown. A tribe maintains a communal incubator in which all the tribe's eggs are sealed together. Young lizardfolk are raised together by the whole tribe. Parental relationships do not exist among lizardfolk.

Lizardfolk have a patriarchal society in which the most powerful member rules the others as chieftain. Shamans and mystics commonly advise the chieftain.

DC 25: Lizardfolk do not worship gods, but large tribes often elevate one of their own to the status of a living deity. This figure becomes the tribe's lizard king. A lizard king usually possesses unusual strength, ferocity, and cleverness and might be tainted by primordial or demonic influences. Powerful reptilian creatures such as dragons sometimes usurp this role and command a tribe's loyalty.

ENCOUNTER GROUPS

Insular and fierce, lizardfolk rarely combine forces with other humanoids. However, they frequently tame reptilian creatures such as behemoths, crocodiles, or drakes, or serve more powerful monsters such as dragons.

LYCANTHROPE

A **LYCANTHROPE** IS A BESTIAL SHAPECHANGER that preys on other living creatures. It often assumes animal form in the wild, hunting in packs with similar animals or others of its kind. When infiltrating civilized humanoid settlements, it assumes a benign humanoid form, blending in with the local populace.

Lycanthropes gather in clannish communities hidden in remote places, or they live secretly among other races. Although they hunt when they please, lycanthropes are most active on nights of the full moon.

A lycanthrope superficially resembles a human or other humanoid creature. It stands erect but has the head of a ravenous animal, such as a rat or wolf.

A lycanthrope can assume the form of a specific humanoid, usually a human with subtle physical traits that betray the creature's true heritage (long hair, long fingernails, or pointed teeth, for instance). A lycanthrope only assumes humanoid form when it needs to disguise itself as something nonthreatening.

In animal form, a lycanthrope resembles a powerful version of the normal animal, although its eyes betray a spark of unnatural intelligence. A lycanthrope typically assumes animal form when it hunts, and sometimes when it needs to flee.

LYCANTHROPE LORE

A character knows the following information about lycanthropes with a successful Nature check.

DC 15: Lycanthropy is hereditary, and lycanthropes mate with those of a similar species to produce lycanthrope offspring. Some lycanthropes can also mate with similarly sized humanoids, sometimes producing lycanthrope children. However, the blood is diluted in this way, and many such children never change or instead become shifters.

ENCOUNTER GROUPS

Lycanthropes mix with other humanoids. They also form bands that include likeminded lycanthropes. Fey and lycanthropes often get along, as do shifters and lycanthropes.

MAGMA BEAST

MAGMA BEASTS ARE FIERY ELEMENTALS from the depths of the Elemental Chaos. They sometimes find their way to the world through planar rifts or elemental vortices in places of intense volcanic activity.

Magma beasts can survive on various ores and clays or minor elemental creatures, but they prefer to hunt organic creatures, savoring the taste of burned flesh.

MAGMA BEAST LORE

A character knows the following information with a successful Arcana check.

DC 15: Magma beasts are elemental beings that originate in the Elemental Chaos. Many now live in the natural world, having crossed over into volcanic regions of the surface and the Underdark.

DC 20: Magma brutes and magma hurlers are smarter than most magma beasts and can sometimes be bribed with regular gifts of food. They serve anyone who can promise them interesting meals, and they occasionally bully lesser magma beasts into fighting alongside them.

DC 25: Humanoids slain by magma beasts are usually devoured in their entirety—including their equipment. Magma beasts consume even the steel of armor and weapons, given time.

MAGMA CLAW

THIS CREATURE POSES AS A HUNK OF VOLCANIC ROCK until it's ready to strike. It then rushes toward its prey and immobilizes it by disgorging sticky lava through its claws around the victim's legs. It then burns and bludgeons the trapped victim to death.

If faced with a dangerous foe on the ground, a manticore usually takes to the air again and harries its foe with repeated *spike volleys* as quickly as they recharge.

MANTICORE LORE

A character knows the following information with a successful Nature check.

DC 15: Manticores are wicked predators that delight in devouring intelligent creatures, especially dwarves and humans. They fling iron spikes from their tails with deadly precision.

DC 20: Manticores have three rows of teeth, which constantly grow throughout their lives. They often leave old teeth and iron spikes in the bodies of their mauled victims as sure signs of manticore attack.

Although dimwitted, manticores understand Common and can speak a few Common words and phrases. They are exceedingly impatient and tend to attack those who attempt to parley with them.

ENCOUNTER GROUPS

Manticores hunt in small prides of two or three individuals, or sometimes singly. They are brutish, violent creatures than can be brought under control only by masters too strong to be eaten. Goblins or other intelligent monsters often entice manticores to help them for a time with gifts of food or treasure. However, manticores are greedy and disloyal and rarely stay bribed for long.

MEDUSA

A MEDUSA IS A SCALY MONSTER WITH A HORRIFYING GAZE. Females of the species use their gaze to turn other creatures to stone, and their lairs are filled with lifelike statues. The medusa shroud of Zehir uses *fangs of death* to weave through the battlefield. It follows its sword attacks with a *snaky hair* attack. It uses *petrifying gaze* or makes melee basic attacks while waiting for *fangs of death* to recharge.

MEDUSA LORE

A character knows the following information with a successful Nature check.

DC 15: Medusas are known and feared for their gaze attacks. It is possible to close one's eyes while fighting a medusa, but fighting the creature blindly is rarely a good choice.

DC 20: Medusas are accomplished archers and shoot arrows poisoned with their own saliva.

Medusas prefer to live alone or in small groups, but they desire wealth and, most important, power and influence in the societies of other humanoids. A brood of medusas might rule over a terrified populace as a royal family, or a single medusa might act as the secret boss of an assassins' guild.

DC 25: Male medusas don't have the snaky hair of their female counterparts, but their blood is even more poisonous. The gaze of a female medusa turns creatures to stone, while the gaze of a male medusa ravages the mind and body, leaving its victims dazed, weak, and ripe for killing.

DC 30: The blood of a medusa can reverse petrification. One must apply a few drops of the creature's blood to the lips or mouth of a petrified creature and succeed on a DC 20 Heal check. The medusa must have been killed within the past 24 hours for the blood to work.

ENCOUNTER GROUPS

A medusa often allies with creatures that are immune to its gaze, such as grimlocks and gargoyles.

Medusas also enjoy gathering humanoids to serve as servants, soldiers, thieves, spies, and assassins. Even though the medusa must purposefully use her gaze to petrify foes, the threat of such is usually enough to keep humanoid servants in line.

Medusas readily consort with creatures of equivalent or greater might. They work with yuan-ti and hold them in high regard.

MIND FLAYER

MIND FLAYERS USE THEIR FORMIDABLE PSYCHIC POWERS to shatter the minds of their foes. Once their enemies are knocked senseless, the mind flayers crack open the victims' skulls and devour their brains. Not all creatures that cross a mind flayer's path end up as food; some are enslaved, while others are transformed into obedient thralls.

Mind flayers, also known as illithids, came to the natural world from the Far Realm long ago. They are usually encountered in the Underdark, only venturing to the surface on special missions.

MIND FLAYER MASTERMIND TACTICS

Throughout combat, the mastermind remains adjacent to at least one of its thralls, using it as a meat shield to block attacks while it targets enemies with its *mind blast*, *mind warp*, and *enslave* powers. If an opportunity presents itself, the mastermind rushes up to a stunned foe and attacks it with its tentacles, spending its action point to use *bore into brain* on the

same round. It only devours a brain in combat if it needs the healing; otherwise, it creates a new thrall. If multiple enemies try to gang up on it, the illithid uses *cradle of the elder brain* to teleport to a safer location.

MIND FLAYER LORE

A character knows the following information with a successful Dungeoneering check.

DC 20: Mind flayers (or illithids, as they call themselves) bend others to their will and wield powers that shatter the minds of their foes. Mind flayers subsist on the devoured brains of intelligent creatures. They are coldly self-serving and think nothing of sacrificing companions or thralls to save themselves.

DC 25: Mind flayers communicate via telepathy, although they also understand Dark Speech. A mind flayer's thralls are completely loyal and obedient. They obey the illithid's telepathic commands in a dark, hopeless, dreamlike state, following the spirit of their instructions and not just the letter.

DC 30: Mind flayers are often solitary masterminds who manipulate hosts of weak-willed thralls to do their bidding, but sometimes they gather in small cabals of like-minded individuals. Horrible cities and kingdoms of mind flayers, organized around mighty disembodied intellects known as elder brains, lurk in the deepest portions of the Underdark.

DC 35: A mind flayer begins life as a small, tentacled, tadpolelike parasite that invades the skull of a helpless humanoid victim, devours its brain, and then subverts the body to its own use. Within a matter of days, it transforms the body it steals into an adult illithid, and all traces of the creature's former being are permanently extinguished.

Illithids are usually encountered with other illithids and with thralls. Lone mind flayers can also be found in Underdark settlements ruled by the drow and other evil races.

MINOTAUR

MINOTAURS ARE FIERCE, BULL-HEADED MONSTERS that worship demons and enslave and plunder weaker creatures. All minotaurs have a liking for mazes and often seek out buried labyrinths or sprawling dungeons as lairs.

Most adult minotaurs are warriors. Minotaurs of the warrior caste are fiercely loyal once they have given their allegiance. In evil minotaur lands, they serve minotaur cabalists as bodyguards, slave-drivers, and raiders. While they are not particularly clever, they possess a certain bestial cunning and have uncannily sharp senses.

The most intelligent and strong-willed of the evil minotaurs are cabalists—the leaders of the cults of Baphomet, a demon lord often referred to as the Horned King. They form a priestly caste that plots the subjugation of neighboring peoples. Like the warriors, the minotaur cabalists are strong and fierce enemies, but they also command several mystical powers that make them even more dangerous in battle.

Savage minotaurs are hulking, dimwitted, temperamental brutes infused with demonic blood. Bloodthirsty predators and rapacious robbers, they haunt lonely and wild places, killing and eating any who cross their paths.

Savage Minotaur Tactics

A savage minotaur enters battle with a *goring charge*, and then swings its greataxe at any foe within reach. If there's something dangerous in the environment nearby, such as a pit or roaring fire, it uses *thrashing horns* to throw enemies in when it gets the chance.

Minotaur Lore

A character knows the following information with a successful Nature check.

DC 15: The archetypical minotaur is a savage, dungeon-dwelling brute that kills for pleasure. However, many minotaurs are civilized and cultured. These minotaurs are smaller than their savage kin, and they gather in settlements of all sizes.

DC 20: The cult of Baphomet, the demon lord also known as the Horned King, is a widespread substrate within minotaur society dedicated to embracing the beast within.

Some minotaur city-states or temple strongholds are entirely populated with devotees of the demon prince and ruled by cabalists in a malevolent theocracy. In other minotaur societies, Baphomet's cult is a hidden, subversive force of evil.

Minotaur realms are hidden in the most remote and forbidding places of the world, in secret mountain citadels, snow-covered temple-states, and buried fortresses. Evil minotaurs are slave takers and plunderers that seek to weaken their targets before launching surprise attacks that leave no foe behind. Their more benign kin are contemplative warriors who remain mostly secluded, shrouding themselves and their society in secrecy.

Good or evil, minotaurs are guided by their religious leaders. Cabalists devoted to Baphomet lead both evil temple-states and hidden cults in other cities. In settlements where the Horned King's cult has not seized control, priests of Bahamut, Erathis, Moradin, or Pelor hold sway.

DC 25: Minotaurs like mazes. They employ twisting designs on their clothing, armor, and weapons, and lay out simple or exceedingly complex labyrinths in their temples and gardens. Among benign minotaurs, these labyrinths are places of quiet contemplation. Evil minotaurs throw prisoners in labyrinths and allow their savage kin or summoned demons to hunt the hapless captives through the twisting corridors.

Encounter Groups

Minotaurs prefer the company of their own kind, but they employ a wide variety of other creatures when necessary. Minotaur devotees of Baphomet are often accompanied by gnoll or demon allies.

MUMMY

MUMMIES DEFEND TOMBS AND OTHER SACRED PLACES against intrusion, striking down foes with a deadly rotting disease.

Soulless beings animated by necromantic magic, mummy guardians are not very intelligent and retain none of the powers or knowledge they had in life. More powerful mummies known as mummy lords retain much of their power and intelligence, attacking the living out of sheer hate.

“Mummy lord” is a monster template that can be applied to nonplayer characters. See the *Dungeon Master's Guide* for rules on creating new mummies using the template.

MUMMY LORD TACTICS

A mummy lord uses *plague of doom* against a foe before entering melee combat. It stays close to an ally while making *shielding mace* attacks, focusing on enemies that target it with fire or radiant attacks. It uses *awe strike* to immobilize a slippery foe and *unholy aid* to remove a particularly debilitating condition (such as blinded or stunned). Once bloodied, the mummy lord spends its action point to use *second wind*.

The giant mummy pounds enemies to death with its fists, focusing its rage on those making fire or radiant attacks.

MUMMY LORE

A character knows the following information with a successful Religion check.

DC 15: Mummy guardians are created to protect important tombs against robbers. A mummy guardian either wanders its tomb, attacking all who enter, or it lies in its sarcophagus, rising to attack when the sarcophagus is opened.

DC 20: A mummy lord is usually created from the remains of an important evil cleric or priest. A mummy lord might guard an important tomb or lead a cult. Yuan-ti often create mummy lords to guard temples of Zehir.

ENCOUNTER GROUPS

A tomb is the mummy guardian's natural habitat, and it's most often found in the company of other creatures that haunt such places.

Mummy lords are often found in the company of undead servitors or living devotees.

NAGA

SERPENTINE CREATURES WITH HUMANLIKE FACES, nagas are guardians of secret places or magical lore. Some nagas choose to subjugate nearby creatures and rule over them. Others ruthlessly destroy trespassers with powerful enchantments and deadly poison.

Nagas often work closely with yuan-ti, guarding their vaults and temples. A lone naga sometimes rules a primitive tribe of kobolds, lizardfolk, or troglodytes who regard it as a god.

Nagas can survive without food or water indefinitely. They are fond of treasure, however, and fill their lairs with trinkets seized from interlopers.

NAGA LORE

A character knows the following information with a successful skill check.

Religion DC 20: Nagas are immortal guardians that protect knowledge, rituals, magic items, and magical locations. Neither starvation nor old age will ever claim a naga, but it can be destroyed. Some nagas abandon their roles as guardians to achieve personal power, setting themselves up as the rulers of primitive tribes of reptilian humanoids.

DC 25: Different nagas guard different types of knowledge.

Religion: Guardian nagas usually guard arcane secrets, rituals, and powerful items. They also watch over portals to the Astral Sea.

Religion: Bone nagas guard necromantic secrets or the places of the dead—particularly tombs, sepulchers, and catacombs where the remains of powerful evil creatures reside. They also guard portals to the Shadowfell.

Religion: Dark nagas guard prophecies and oracles, along with relics and rituals related to the same. They also protect magical locations in the Underdark.

Arcana: Primordial nagas guard the secrets of powerful primordial beings and portals to the Elemental Chaos.

NIGHTMARE TACTICS

A nightmare uses *hooves of hell* to cut off its victims' escape, and then batters and burns enemies to death with its hooves. It makes good use of its high speed and teleport ability, preferring hit-and-run attacks and choosing victims who are far from the help of their companions.

NIGHTMARE LORE

A character knows the following information with a successful Arcana check.

DC 20: Steeds of the night, nightmares are named for the terrifying dreams mortals suffer who live through an attack by one or more of these hungry predators.

A nightmare is a terrifying creature of the Shadowfell. Although it superficially resembles a black horse, it delights in spreading fear before it closes in for the kill. In particular, the nightmare enjoys allowing its victims to think they've escaped before surprising them with one last deadly attack.

Nightmares sometimes gather in small herds that behave like pack of wolves, complete with a taste for human flesh. They hunt both the Shadowfell and lonely roads of the world by night, devouring any traveler they come across.

DC 25: A nightmare will submit to being the mount for a more powerful evil creature, but that creature must defeat the nightmare in combat, and through might alone, make clear that service is the only alternative to death.

A nightmare extends its resistance to fire damage to its rider. According to legend, particularly powerful nightmares can also carry their riders to and from the Shadowfell.

If killed, the nightmare's flames gutter out, leaving a mane and tail of ash that quickly disperses.

ENCOUNTER GROUPS

Nightmares gather in small herds and individually ally with—or are pressed into service by—more intelligent monsters.

NIGHTWALKER LORE

A character knows the following information with a successful Religion check.

DC 20: Nightwalkers are the shades of extremely strong-willed and evil mortals who died and refused to pass from the Shadowfell to their eternal reward. Only the ancient, unyielding will and malice of the long-dead spirit holds a nightwalker in its corporeal shape.

DC 25: A nightwalker exudes a deathly cold aura that harms living creatures and can channel the cold, dark energies of the Shadowfell through its attacks. A nightwalker understands Common, but it uses telepathy to communicate.

DC 30: A nightwalker can turn a humanoid it has killed into a bodak using an arcane ritual that only works when cast in the Shadowfell, and only when cast by a nightwalker. Nightwalkers alone can warp the void energies of the Shadowfell to create such horrors.

OGRE

AGGRESSIVE, STRONG, AND DULL-WITTED, ogres are the quintessential big, dumb brutes. Many creatures (particularly orcs) take advantage of ogres and convince the monsters to work for them.

The stupidity of ogres is legendary. Few ogres can count to ten or build even the simplest tool or shelter, so they generally lair in caves or ruins and fight with clubs made from tree trunks. Some ogres know a few words of Common, such as “gold,” “kill,” and “mine!”

Ogres are cruel, bloodthirsty, greedy, and gluttonous; they can be easily bribed with gifts of food and treasure, as long as their would-be allies or masters can promise them plenty of opportunities for mayhem and destruction.

OGRE LORE

A character knows the following information about ogres with a successful Nature check.

DC 15: Ogres often make their lairs in thinly settled borderlands—places where they can find homesteads to pillage and travelers to waylay, but wild enough to discourage pursuit. They favor desolate hills and dark forests.

Left to their own devices, ogres live in small hunter-gatherer bands that separate or move on when they use up the easily available food sources of an area. They prefer pillage and theft to actual hunting or gathering.

DC 20: Ogres are lazy and surly creatures, but powerful masters sometimes put them to work as menial laborers. The brightest ogres sometimes seek out work as mercenaries, and might accumulate arms and armor far better than those of the typical ogre. They like big weapons that make good use of their size and strength—greataxes, morningstars, or heavy flails.

ENCOUNTER GROUPS

Ogres work well with lots of creatures. Because they can often be bribed, tricked, or browbeaten into serving smarter monsters, ogres can be found as dimwitted thugs in almost any setting or adventure. Ogres might appear in the employ of a thieves' guild or evil overlord, as champions among orc or goblin tribes, or as minions of giants or dragons.

LEGENDS TELL OF WICKED, OGRELIKE CREATURES with formidable magical powers. Cruel and domineering, they often enslave weaker creatures and devour the innocent. These monsters are called oni, and they figure prominently in many children's tales . . . and nightmares.

ONI LORE

A character knows the following information about oni with a successful Nature check.

DC 15: Oni build cleverly hidden strongholds or underground lairs, and surround themselves with creature comforts and useful servants. Despite their appearance, oni are not related to ogres.

DC 20: Status among oni is measured by wealth, and by the number and quality of slaves each commands. Oni often compete with each other to amass the best slaves or the most riches.

Oni use their powers of illusion to disguise themselves as humanoid of different races. In these guises, they infiltrate society and mislead their enemies. Many oni also have the power to assume gaseous form or turn invisible.

DC 25: Oni view themselves as powerful lords deserving of lesser creatures' respect. Oni who feel that they have been treated with disrespect are often driven to arrange elaborate schemes of vengeance and humiliation.

ONI NIGHT HAUNTER

NIGHT HAUNTERS ARE MURDEROUS ONI that slip into small villages and towns to devour sleeping victims. They prize the flesh of intelligent humanoids above all else. Between meals, night hunter oni dwell in simple huts in isolated areas at the edge of civilization, relying on their magic to appear as hermits and thus conceal their murderous activities.

ONI NIGHT HAUNTER TACTICS

An oni night hunter uses *deceptive veil* to appear as an elderly humanoid, or it sneaks up on prey in gaseous form. In either case, its goal is to get close enough to use *hypnotic breath*. If it succeeds in putting one or more creatures to sleep, it uses *devour soul* to feed.

A night hunter flees if death is imminent. If it hasn't already assumed *gaseous form* during the encounter, it can use the power to aid in its escape.

ONI MAGE

CLEVER AND RAPACIOUS, THE ONI MAGE (sometimes mistakenly referred to as an ogre mage) likes to bully weaker humanoid creatures into serving it.

An oni mage often hides itself among those it leads. What seems to be an orc shaman, an ogre chief, or an azer forgelord might, in fact, be an oni mage in disguise.

ORC

ORCS WORSHIP GRUUMSH, THE ONE-EYED GOD OF SLAUGHTER, and are savage, bloodthirsty marauders. They plague the civilized races of the world and also fight among themselves for scraps of food and treasure. They love close combat and plunge furiously into the thick of battle, giving no thought to retreat or surrender.

Within what passes for orc society, there are orcs that fill special roles. Eyes of Gruumsh are orcs with a special connection to their fierce god. They offer sacrifices, read omens, and advise the tribe's chieftain of Gruumsh's will. Orc bloodragers are tribal champions feared for their strength and ferocity, and they also make excellent subchiefs or bodyguards.

Orcs often fight alongside ogres, and they can be coerced or bullied into serving any dark overlord or wicked monster powerful enough to command their obedience.

ORC LORE

A character knows the following information about orcs with a successful Nature check.

DC 15: Orcs favor hills and mountains, places pocked by caverns easily turned into defensible lairs. Bloodthirsty marauders and cannibals, orcs venerate Gruumsh and thereby delight in slaughter and destruction.

Orcs don't build settlements of their own, instead improving existing shelters with crude fortifications. They prefer to settle in natural caves or structures abandoned by other, more skillful races. Orcs can manage simple ironwork and stonework, but they are lazy and grasping, preferring to take by force the tools, weapons, and goods other folk make.

DC 20: Orcs band together into loose tribal associations. The strongest individual in a tribe leads as a despotic chieftain. Individual bands within a tribe might wander far from their native lands, but they still recognize orcs from the same tribe as kin.

DC 25: Orcs often demonstrate their faith in Gruumsh by gouging out one of their eyes and offering it as a sacrifice to their one-eyed god.

According to myth, Corellon shot out Gruumsh's eye with an arrow. For this reason, orcs hold a special hatred for elves and eladrin.

ORCUS

ORCUS, DEMON PRINCE OF THE UNDEAD, is one of the most powerful demons in the Abyss—powerful enough to threaten gods. He commands legions of followers, living and dead, and cults dedicated to him are terrifyingly widespread in the natural world.

Orcus finds amusement in the suffering and anguish of the living and satisfaction only when he drinks their blood. Most living things enrage him by their mere presence, and Orcus permits only undead to be near him; even his demon servitors are undead. He has destroyed hundreds of mighty heroes and laid waste to countless kingdoms.

Orcus is a foul and corpulent humanoid creature who has powerful goat legs and a desiccated head similar to that of a ram. His great black wings stir up a reeking cloud of diseased air. He seems somewhere between life and undeath—his sore-ridden body suggests diseased life, but his head and glowing red eyes suggest undeath. His thick, spiny tail is in constant motion.

Orcus carries a heavy mace tipped with an enormous skull. Known as the *Wand of Orcus*, this weapon transforms those it slays into undead horrors. Its haft is smooth obsidian studded with blood rubies.

Dead creatures respond to the presence of Orcus, even without his command. Skeletal arms claw up from the ground where he walks and grab at the feet of his foes. Spirits fill the air with a ghostly chorus of piteous moans, tugging at his foes and hindering their movement.

ORCUS LORE

A character knows the following information about Orcus with a successful Arcana check.

DC 15: Orcus is known as the Demon Lord of Undeath, the Demon Prince of the Undead, and the Blood Lord. He is worshiped by undead and living creatures that do not fear undeath.

DC 20: Orcus desires destruction like all demons, but he has set his sights higher, aiming at the gods themselves. In particular, Orcus hungers for the death of the Raven Queen and to usurp her control over death and the souls of the dead.

DC 25: Orcus rules one of the many layers of the Abyss. His realm, Thanatos, is a dark landscape of death shrouded by gray clouds and often obscured by fog. Light filters weakly through the clouds and mists, illuminating the realm like a moonlit night. Dead forests filled with twisted black trees and barren moors dominate. Bleak mountains rise feebly into the black sky, and cities and villages in ruins crouch in hidden places as though fearful. Strewn all over the realm are tombs, mausoleums, gravestones, and sarcophagi. They stand on rooftops and building eaves like gargoyles, they litter forests like boulders left by a glacier, and they jut from moors like the masts of sinking ships. Undead abound within the realm, and no living thing survives long there.

DC 30: At the heart of Thanatos stands a vast obsidian palace with embedded bones barely visible through the semitransparent black stone. This palace, Everlost, straddles a yawning chasm whose sheer slopes hold hundreds of tombs and burial sites, creating a tiered necropolis below the palace.

DC 35: Orcus wields an artifact called the *Wand of Orcus*. Legends say that the skull atop the wand once belonged to a god of virtue and chivalry who dared challenge Orcus in battle. Other legends identify it as the skull of a human hero, but if that is true, it has been magically enlarged to its current size. In any event, the powerful good that once resided in the skull is warped and perverted into the most monstrous evil.

ORCUS' TACTICS

Those unfortunate enough to meet Orcus rarely survive the experience. The demon lord surrounds himself with undead guards and minions, and eagerly meets any challenge to battle. He likes to crush foes with the *Wand of Orcus* and uses *master of undeath* to make dread wraiths out of those he slays. Against a particularly troublesome foe, he uses *touch of death*. When an enemy moves into an adjacent square, the demon lord strikes with his spined tail. When surrounded by numerous foes, he spends an action point to use *necrotic burst*.

ASPECT OF ORCUS

AN ASPECT OF ORCUS IS CONJURED BY MEANS OF A RITUAL known only to Orcus's most devout deathpriests. It is, in essence, a weaker version of the demon lord that heeds the commands of its summoner.

Orcus has no link to his aspect. He can't see through its eyes, speak through the aspect, command it remotely, or even sense when it's been destroyed. However, it thinks and behaves very much like the demon lord and usually disappears once its assigned task is completed.

ASPECT OF ORCUS TACTICS

Aspects of Orcus are usually called to fight, and do so effectively. An aspect prefers to focus on one foe at a time rather than spreading out its attacks. It doesn't wait to spend its action point, doing so at the start of combat to make an additional attack.

ASPECT OF ORCUS LORE

A character knows the following information with a successful Arcana check.

DC 25: Powerful deathpriests of Orcus can summon an aspect of the demon lord by means of a ritual.

DC 30: An aspect is sentient, though its mind is no more privy to the secret thoughts of the demon lord than his worshippers' minds are. An aspect is capable of independent thought, but it obeys the commands of its creator unless they clearly contradict Orcus's ethos or goals.

DORESAIN, EXARCH OF ORCUS

THE MIGHTIEST OF ORCUS'S SERVANTS are his exarchs, undead demons imbued with shards of his semidivine power. Doresain, the Ghoul King, is foremost among these servitors.

Doresain appears as a ghoul, though he stands upright rather than adopting the hunched posture of his subjects. His eyes blaze with a sickly green light. He wears an elegant coat of supple human flesh and a suit of pale leather armor studded with skulls. A crown of bones rests on his bald head, and he wields a staff called *Toothlust*, formed of the rigid spinal column of some past victim. The staff is topped by a skull, in homage to his lord, Orcus.

DORESAIN LORE

A character knows the following information with a successful Religion check.

DC 25: Doresain, the Ghoul King, serves Orcus as an exarch of cannibalism and murder. Doresain's strength flows from his insatiable hunger. He is never seen without his bone staff and his undead cloak made of stitched flesh and biting mouths.

DC 30: Doresain has a domain in Thanatos known as the White Kingdom, primarily inhabited by ghouls and other flesheating undead. Its name comes from the bones that make up every building—walking through its streets kicks up clouds of bone-white dust to create a fog that coats the city in white.

DEATHPRIEST HIEROPHANT

CULTISTS OF ORCUS ARE DEMENTED INDIVIDUALS, and this deathpriest has risen to their highest ranks. He is not a cleric, since Orcus lives in the Abyss and cannot grant divine magic to his priests. DEATHPRIEST HIEROPHANT TACTICS

The deathpriest hierophant uses *vision of death* to keep a foe off-balance while confronting other enemies. Most of his attacks are basic attacks with his mace, but he invokes *word of Orcus* as often as he can.

DEATHPRIEST HIEROPHANT LORE

A character knows the following information with a successful Nature check.

DC 25: Deathpriest hierophants are among Orcus's most powerful worshipers. A few of them know the ritual to summon an aspect of Orcus.

DC 30: A deathpriest hierophant usually leads a cult of several hundred members, spread out over a large area. He appoints lesser deathpriests to lead smaller groups within the cult, and each group is usually tasked with a specific goal, such as desecrating a temple, stealing bones from a king's tomb, or poisoning a village's water supply.

CULTS OF ORCUS

CULTS DEDICATED TO THE BLOOD LORD operate in secret except among the most corrupt of barbarian hordes and undead legions. Orcus's cultists gather in hidden spots associated with death: graveyards, mausoleums, tombs, and ancient necropoli.

The cults of Orcus have no symbol in common; each cult invents its own iconography to remind them of Orcus's awful power. These symbols typically incorporate skulls and bones, ram's horns, or blasphemous runes. Black and blood red are favored colors among his devotees.

Orcus enjoys the suffering of the living, and disease is an excellent way to spread suffering. His followers foul wells with corpses, block sewers, and commit all manner of criminal acts to ensure that disease is an ever-present threat.

Orcus's worshipers do not see undead as holy, but rather as a means to accomplish their goals and Orcus's ambition to extinguish life. They therefore create as many terrible undead as they can. Powerful cultists might treat a vampire or a mummy as an equal and a participant in the cult, whereas a zombie or a skeleton is nothing more than an expendable servant. Ultimately, every worshiper hopes to throw off the shackles of mortality and become a powerful, intelligent undead creature such as a lich, a death knight, a mummy, or a vampire, and thereby gain control over lesser undead. In practice, very few accomplish this goal, but Orcus's worshipers consider undeath a great service to Orcus and a means of escaping punishment in the afterlife, so they welcome even transformation into a zombie or a skeleton.

The point of a sacrifice to Orcus is not simply the death of the victim but also the collection and distribution of the victim's blood. Religious leaders fill a skull with blood and drink it, then fill it again for Orcus and pour it out over his idol. This rite takes place once a month, and if the worshipers can find no sentient creature for sacrifice, they must fill the cup with blood from one of their own, a consequence that cults desperately seek to avoid. His cultists see the drinking of blood as a sign of true dedication to Orcus, and they say that Orcus tastes the blood his worshipers drink.

OTYUGH

THIS TENTACLED SCAVENGER FEEDS ON CARRION and lurks under mounds of filth and refuse. Careless creatures that blunder within reach of its tentacles are dragged toward its maw and quickly dispatched. The otyugh then buries the carcasses under heaps of offal and waits for them to rot before devouring them.

OTYUGH LORE

A character knows the following information with a successful Nature check.

DC 15: Some intelligent monsters capture otyughs and use them as guardians, but otyughs are best used as living garbage disposals. Otyughs often infest the sewer systems of large cities, lurking in the darkest and most stagnant portions.

Groups of otyughs do not cooperate in any way, and an unfortunate adventurer caught between several otyughs is likely to be dragged from one to the other several times as the monsters fight for their prize.

ENCOUNTER GROUPS

Otyughs rarely appear with allied creatures. However, clever monsters might seek to trap adventurers between themselves and otyughs, or build pits leading to otyugh lairs. Also, carrion crawlers might naturally be encountered near otyugh lairs because they feed opportunistically and steal the otyughs' kills.

FRED HOOPER

QUICKLING

QUICKLINGS ARE SWIFT, WICKED FEY that kill other creatures for food, treasure, or sport. They like to set ambushes and outwit enemies, and they frequently ally with other creatures that share their desires. If their escapades enrage an adversary too strong to overcome, quicklings have no problem fleeing in a chorus of nervegrating laughter, leaving their so-called allies to fend for themselves.

Although quicklings are native to the Feywild, they also stray into the natural world to keep an eye out for interesting events and exploitable situations.

QUICKLING LORE

A character knows the following information with a successful Arcana check.

DC 15: Quicklings rely on their speed and wits to overcome their prey and elude their enemies. Devious and cruel, they delight in trapping, tormenting, and killing other creatures. They generally focus their attacks on weaker-looking creatures while dodging tougher adversaries.

RAKSHASA

DESPITE THEIR BESTIAL FEATURES, rakshasas are clever, malicious, and sophisticated. Although rakshasas come in many varieties, they all share some common traits, namely their feline heads, backward claws, and taste for luxury.

Rakshasas often conceal their true appearance, using illusion magic to adopt whatever disguises serve them best. They typically masquerade as nobles or wealthy merchants, lying and manipulating other creatures into doing their bidding. Rakshasas prefer to mislead would-be adversaries instead of fighting them, but if combat becomes necessary, rakshasas are fierce and ruthless.

A rakshasa has the head of a feline predator, usually a tiger, as well as a luxurious coat of fur and clawed hands. It is clothed in fine attire and expensive jewelry. A closer look at a rakshasa reveals that the palms of its hands are where the backs of the hands would be on a human—a subtle feature that adds to the creature's unsettling appearance.

RAKSHASA LORE

A character knows the following information with a successful Nature check.

DC 20: Rakshasas are malevolent, deceptive humanoid with a taste for luxury. They use powerful illusion magic to hide their true forms as they pose as nobles, merchant princes, crime lords, and other wealthy, influential individuals.

DC 25: Regardless of type, rakshasas all share one very peculiar trait. Their clawed hands are backwards from other humanoids, so that when a rakshasa stands with its arms at its side, its palms face outward instead of inward. This oddity does not detract from their manual dexterity or ability to wield weapons.

Rakshasa warrior

DC 30: According to some legends, rakshasas were spawned by demons that fled the Abyss and came to the natural world long ago. Many rakshasas discount these legends, proudly asserting that their species could never have such degenerate origins, yet their cruelty often suggests a demonic heritage.

RAKSHASA NOBLE TACTICS

A rakshasa noble disdains melee combat and prefers to use its *mind twist* power at range. It uses *frightful phantom* against an enemy who gets too close for comfort or *phantom lure* to lead the target into dangerous or entangling terrain. If forced into melee combat, it uses *phantom image* as often as it can to distort its true location while making claw attacks. If it successfully blinds a target with a claw attack, it tries to move away to a location where it can continue making ranged attacks.

RAKSHASA REINCARNATION

As fiendish spirits veiled in flesh, rakshasas are bound to the world. When they are killed, they reincarnate at some random spot elsewhere in the world after days, months, or sometimes years of tormented wandering as bodiless spirits. A reincarnated rakshasa awakens in full health, with complete possession of its memories and abilities. It often seeks vengeance later against those who killed it in its previous incarnation, but the world is wide and mortal lifetimes are short. It's said that rakshasas can only be truly slain by a specially blessed weapon that pierces its heart.

ROC

ROCS ARE ENORMOUS BIRDS OF PREY with strong ties to the Elemental Chaos. Giants and titans value them as pets and allies.

The term “roc” refers to a number of related avians, each with their own unique traits and habitats.

COMMON ROC

COMMON ROCS LIVE IN SECLUDED MOUNTAIN AERIES beyond the reach of most nonflying creatures. They prefer to hunt horses and cattle, competing for food with other flying carnivores such as chimeras and manticores. A hungry roc attacks humanoids when easier game is scarce.

ROC TACTICS

A flying roc likes to swoop down and use *claw snatch* to carry away a random adversary. It drops its victim somewhere a short distance away, and then lands to finish off the hapless soul with bite attacks. A bloodied roc usually flees unless it’s particularly hungry.

ROC LORE

A character knows the following information with a successful Nature check.

DC 20: Rocs are enormous birds that live in mountainous nests, hunting large prey such as cattle and horses. Although they are natural beasts, rocs are closely related to elemental creatures such as thunderhawks and phoenixes. Like their more exotic kin, they are frequently found in the company of giants.

DC 25: Roc hatchlings can be trained to serve as guardians and mounts. A typical roc nest holds 1d4 eggs, each weighing close to 100 pounds. A roc egg is worth 10,000 gp on the open market, but few hunters consider the price worth the risk and trouble.

PHOENIX

THIS MIGHTY ELEMENTAL IS VIEWED AS A SYMBOL OF RESURRECTION AND IMMORTALITY because of its ability to recover from near death.

PHOENIX TACTICS

A phoenix usually begins a battle by dropping into the midst of its enemies like a blazing meteor and using *radiant burst*. It then makes bite attacks against groundbound foes from the air (taking advantage of its reach) until *radiant burst* recharges.

PHOENIX LORE

A character knows the following information with a successful Arcana check.

DC 20: Phoenixes have a fierce and inexplicable hatred of the undead. They attack undead foes in preference to any other, unless another enemy presents a drastically greater threat.

DC 25: When a phoenix is bloodied, it explodes in a ball of searing flame, only to be reborn at full strength moments thereafter.

DC 30: Although its body is composed of flame and not flesh, a single scarlet feather sometimes appears in the ashes left when a phoenix is finally slain. When used as a component in the Raise Dead ritual, the feather allows the ritual caster to raise a creature that has been dead for up to 1 year or grant 1 year of life to a creature that has died of old age (see *Player’s Handbook* 311 for the description of the Raise Dead ritual).

THUNDERHAWK

THUNDERHAWKS ARE CREATURES OF STORM and favored pets of storm giants. Left to their own devices, they prefer to make their lairs on stormy mountaintops or remote coastal cliffsides.

On subsequent rounds, the thunderhawk hovers in the air as it continues to buffet foes with *windrush* and make bite attacks (taking advantage of its reach). Once bloodied, it flies off, only to return with another charge attack.

THUNDERHAWK LORE

A character knows the following information with a successful Arcana check.

DC 25: Thunderhawks are the frequent companions of storm giants. Storm giants like to send their thunderhawks into melee, where the great birds can pin down opponents and render them vulnerable to the giants' ranged attacks.

ROPER

THIS SUBTERRANEAN CREATURE GRABS VICTIMS WITH ITS TENTACLES and drags them within reach of its monstrous, toothy maw.

A roper feeds on almost anything that blunders into its grasp. Its stony body makes it difficult to spot in natural caverns. It can move about at a slow creep and seek out good hunting spots. When it finds a suitable cave or passage, the roper blends in with the surrounding stalagmites and stalactites, waiting for fleshy prey to arrive.

⚔ **Bite** (standard; at-will)

+19 vs. AC; 2d10 + 10 damage.

Stony Body

A roper that does not move, retracts its tentacles, and keeps its eye and mouth closed resembles a jagged rock formation, stalagmite, or stalactite. In this form, the roper can be recognized with a successful DC 30 Perception check.

Tentacle Grab

The roper can attack and grab with up to two tentacles at a time. While grabbing an enemy, it can act normally, but it can't use that tentacle for another attack. Enemies can attack the tentacle to make the roper let go of a grabbed creature; the tentacle's defenses are the same as the roper's. An attack that hits the tentacle does not harm the roper but causes it to let go and retract the tentacle.

ROPER TACTICS

A roper has an excellent chance to surprise enemies using its *stony body* ability. When it attacks, it uses *double attack* to lash out with two of its tentacles, which secrete weakness-inducing venom. Sometimes it doubles up on the same target, but usually it tries to grab two meals at the same time. The roper then uses *reel* to drag grabbed prey within reach of its toothy maw. (Since *reel* is a minor action, a roper can use the power twice in the same round it uses *double attack*, but only once against each grabbed target.)

ROPER LORE

A character knows the following information with a successful Arcana check.

DC 20: Ropers are all too common in the vast caverns and tunnels of the Underdark. They are clever enough to strike bargains with other intelligent subterranean creatures, guarding tunnels and caves in exchange for food or treasure.

DC 25: Ropers swallow treasure they find, storing it in a spare gizzard. When a roper dies, the gizzard can be cut open to reveal what, if anything, the roper has collected over the years.

ENCOUNTER GROUPS

Ropers occasionally strike bargains with other Underdark dwellers, such as drow, troglodytes, and mind flayers, guarding chambers or passageways as long as their allies agree to provide regular meals—preferably live and screaming. Other Underdark predators such as balhannoths, grells, and umber hulks sometimes lurk near a roper's lair and fall upon hapless parties busy tangling with the roper.

ROT HARBINGER LORE

A character knows the following information with a successful Religion check.

DC 20: Rot harbingers superficially resemble angels, but there's nothing angelic about them. Their touch causes living flesh to rot.

DC 25: Long ago, the gods tried to slay the demon lord Orcus while he was traveling outside of the Abyss. They sent a host of angels to slay the demon lord, but Orcus ultimately prevailed, killing every last one of them. When he returned to the Abyss, the demon lord of undeath created the first rot harbingers and rot slingers as mockeries of those he'd slain and sent them to the natural world to wreak havoc on the gods' creation.

DC 30: While many rot harbingers serve Orcus and Orcus's servitors, several more have escaped the demon lord's control. All that keeps them animate is their lust for agony and death.

SAHUAGIN BARON TACTICS

A sahuagin baron relies on *baron's fury*, making good use of his extra limbs. The first time it bloodies a foe, it spends its action point to use *baron's fury* again.

SAHUAGIN LORE

A character knows the following information with a successful Nature check.

DC 15: Sahuagin are often called sea devils because they are irredeemably evil. They hunt marine life and raid shoreline communities at night. Sahuagin harbor a murderous bloodlust and, like sharks, fly into a frenzy when they sense their prey is bloodied. The preferred sahuagin weapon is the trident.

DC 20: Sahuagin dwell along coastal waters in communities of varying sizes that are hewn from stone and other natural materials.

Sahuagin society is patriarchal and features a strict hierarchy, such that every sahuagin knows its place within the society. A sahuagin village is ruled by a baron, while a prince rules approximately twenty villages. Sahuagin kings rule much larger territories and dwell within cities that hold as many as six thousand inhabitants. A sahuagin kingdom can stretch along an entire seacoast, with villages and towns at least 100 miles apart.

Sahuagin sometimes trade for goods, but they are more inclined to take what they want by pillaging coastal communities and merchant ships.

DC 25: Sahuagin are deeply religious. Their patron is Sekolah, a great demonic shark who is one of the exarchs of Melora, goddess of nature, the sea, trade, and wrath. Sahuagin priestesses make regular sacrifices to Sekolah to appease his hunger.

ENCOUNTER GROUPS

Sahuagin are usually encountered with other sahuagin, although short-term alliances with other evil creatures do happen. Sahuagin often associate with vampires which, given their common bloodlust, is not altogether surprising.

SATYR

SATYRS ARE SELF-CENTERED, GREEDY, AND DECADENT CREATURES that enjoy food, drink, and other pleasures. They use sly trickery to take what they desire from others as it pleases them.

Satyrs usually seek to “befriend” travelers they meet. This often means plying them with drink, bemusing them with song, or inveigling them with sorrowful tales in order to rob them later. Satyrs in a murderous mood attack without warning, and they fight to kill.

SHADAR-KAI

SHADAR-KAI CLING TO DARKNESS AND SHADOWS. They are a bleak and sinister humanlike people that inhabit the Shadowfell and serve the Raven Queen. Following the dark auguries of their witches, shadar-kai move secretly to accomplish ruinous ends, destroying any heroes or kingdoms that stand in their way.

A shadar-kai resembles a human but has gray skin and eyes that are lustrous black orbs, like a raven's. The shadows around it seem to deepen as it moves.

A shadar-kai prefers loose dark garments, often with complex but subtle designs. Hair is worn long, sometimes loose, other times elaborately shaved, styled, and/or braided. A shadar-kai's skin always has patterns of tattoos and scarifications, as well as many piercings. Shadar-kai prefer light, exotically shaped weapons.

Shadar-kai fight without concern for their own wellbeing, believing that death is foretold at birth and cannot be avoided.

SHADAR-KAI LORE

A character knows the following information with a successful Arcana check.

DC 15: Shadar-kai settlements can be found throughout the Shadowfell. Shadar-kai villages, towns, and cities are grim places populated by coldhearted, pitiless people who crave power and do not fear death. In fact, most shadar-kai embrace death, trusting that the Raven Queen will keep their souls safe long after they've passed on.

DC 20: Shadar-kai society is meritocratic. Personal achievement and glory defines a shadar-kai more than family, wealth, or holdings. A shadar-kai can gain a lot of power and prestige by murdering rivals, slaying powerful beasts in the name of the Raven Queen, or wreaking havoc and reaping souls in the natural world.

DC 25: All shadar-kai have the ability to teleport a short distance and reappear in a dark, wraithlike form.

ENCOUNTER GROUPS

Shadar-kai can be encountered with other denizens of the Shadowfell, particularly dark ones whom they allow to live among them. They also tame various shadow beasts. In the natural world, shadar-kai often forge alliances with like-minded humanoids to accomplish foul deeds that will earn them the glory they seek.

SKULL LORD TACTICS

A skull lord is almost always found with several lesser undead close by, especially skeleton and/or zombie minions. It avoids melee combat, preferring to use all three of its skulls in a given round.

SKULL LORD LORE

A character knows the following information with a successful Religion check.

DC 15: A skull lord is a formidable undead being with three skulls. Each skull has a different power, and a skull lord on the verge of destruction will sacrifice one of its skulls to keep the rest of its form intact. Once two of its skulls are destroyed, the creature loses the power to heal itself in this fashion.

DC 20: The first skull lords arose from the ashes of the Black Tower of Vumerion. None can say whether they were created intentionally by the legendary human necromancer Vumerion or came forth spontaneously from the foul energies of his fallen sanctum. The ritual for creating new skull lords also survived Vumerion's fall, eventually finding its way into the hands of Vumerion's rivals and various powerful undead creatures.

SLAAD

AS CREATURES OF PURE ENTROPY, slaads exist to create disorder. Their hold on reality is tenuous at best. Their thoughts are clouded with maddening images, they seem aware of things beyond other creatures' perceptions, and they attack without provocation.

Slaads propagate by planting embryos in their victims. As each embryo grows, the host creature succumbs to madness. Left untreated, the embryo transforms into a slaad tadpole that burrows out of its host's skull, killing the host in the process. For this reason, most other intelligent creatures loathe and fear slaads.

A slaad tadpole matures into a full-sized adult slaad (of a random type) in 1d4 + 3 days. Until then, it feeds on whatever small prey it finds.

SLAAD LORE

A character knows the following information with a successful Arcana check.

DC 20: Slaads use their claws to plant embryos in living creatures—an infestation known as chaos phage. These embryos quickly grow into slaad tadpoles that kill their hosts and give rise to new slaads. Afflicted creatures typically succumb to madness before they die.

DC 25: Slaads worship no gods and believe they were the first creatures in the cosmos. Dull-witted slaads spread chaos instinctively, while intelligent slaads do so with intent.

DC 30: When a slaad becomes suffused with the entropic energies of the Abyss, its corporeal form is consumed and it transforms into a black slaad. Black slaads (also called void slaads) lose the ability to spread chaos phage, but they wield horrific entropic power.

SLAAD TADPOLE TACTICS

A slaad tadpole avoids combat with creatures larger than itself. When cornered, it makes bite attacks. These attacks cause the creature to momentarily destabilize and become insubstantial. Both this and its *chaos shift* power are defense mechanisms that protect it against enemy attacks.

SNAKE LORE

A character knows the following information with a successful skill check.

Nature DC 15: Deathrattle vipers are poisonous snakes that are most common in forests, jungles, and caves. Its bony rattle strikes fear in the hearts of its prey. That, combined with its deadly poison, has earned the snake its name.

Nature DC 15: Crushgrip constrictors are commonly encountered in forests, marshes, jungles, and underground regions. They kill by crushing prey in their coils.

Arcana DC 15: Flame snakes spit deadly blobs of liquid fire at their prey. Simple rituals can summon them from the Elemental Chaos to serve as guards or allies.

Arcana DC 20: Shadow snakes were supposedly created by Zehir, the god of night and poison. Yuan-ti revere shadow snakes as manifestations of Zehir that embody all of that god's qualities, including a cunning greater than that of most beasts.

SHADOWRAVEN SWARM TACTICS

Shadowravens without a sorrowsworn to command them behave much like normal crows. They only gather in swarms when commanded to do so by their sorrowsworn masters, attacking their masters' foes without mercy. Once bloodied, a shadowraven swarm uses *murder's wrath* to cut a swath through its enemies.

SORROWSWORN LORE

A character knows the following information with a successful Arcana check.

DC 25: Although they resemble undead demons, sorrowsworn are neither undead nor demonic. They are fragments of death incarnate, often drawn to locations where others have died in great numbers, such as battlefields.

DC 30: Many sorrowsworn serve the Raven Queen and are tasked with slaying powerful mortals who have cheated death. A few serve other entities with power over mortality.

Sorrowsworn reside in bleak lairs such as thorny pits and dank caves. Within a sorrowsworn's abode are many shallow cavities that contain grisly trophies and remains of past victims. Each set of remains tells a more depressing story than the last. Watching over these lairs are scores of shadowravens, which coalesce into ravenous swarms when provoked. These birds also follow their sorrowsworn masters to recent battlefields and other places of carnage to pick at the flesh of the recently slain.

DC 35: The sorrowsworn are the Raven Queen's protection against the inscrutable plots of independent nightwalkers. Sorrowsworn also oppose death giants—once invaders from the Elemental Chaos, now connected to the Shadowfell—who act against the Raven Queen's wishes.

DC 40: Heroes among the shadar-kai, and others who serve the Raven Queen without fail, can ascend to the ranks of the sorrowsworn. Doing so is one way mighty shadar-kai can acquire the immortality their kind craves.

ENCOUNTER GROUPS

Sorrowsworn work with one another, forming squads to accomplish their tasks. A sorrowsworn might partner with any other creature if doing so helps it complete a mission, as long as the alliance won't cost the sorrowsworn too much in the end. Sorrowsworn reapers and soulrippers sometimes ride fell wyverns, especially when accompanying a deathlord.

SPHINX TACTICS

A sphinx greets intruders with its *sphinx's challenge* before combat begins. If the intruders attack without provocation, or if they refuse or fail the challenge, the sphinx attacks them.

A sphinx's challenge usually requires intruders to answer a riddle, prove their ancestry, unravel a philosophical or theological puzzle, or simply cite an ancient password or holy

CHALLENGE OF THE SPHINX

Before placing a sphinx in your adventure, consider devising a suitable challenge for the sphinx to offer adventurers. Simple challenges are passwords or holy verses—the adventurers know them, or they don't. Riddles are the classic test, of course; you can create a riddle or use a classic if you like (try looking for riddles online). Theological or philosophical arguments work well as interaction encounters using Arcana, History, or Religion as the key skills.

verse. If intruders pass the sphinx's challenge, the sphinx is bound to let them pass unharmed—at least for the moment. Intruders who damage or rob the guarded site (or otherwise prove their unworthiness) lose the protection of the ancient ritual binding the sphinx, and the monster is obligated to attack them.

Once combat begins, a sphinx uses its *frightful roar*, targeting as many intruders as possible. It then fights a mobile battle, flying and pouncing as opportunity allows. It uses its *second wind* when bloodied.

SPIDER LORE

A character knows the following information with a successful Arcana or Nature check.

DC 15: Spiders are sacred to the evil goddess Lolth. Long ago, before she became the Demon Queen of Spiders, Lolth was a deity of fate who wove the strands of mortal destiny; it's said she created the art of weaving after watching spiders make their webs.

DC 20: Since spiders are Lolth's holy creatures, the drow revere spiders. Drow refuse to crush or sweep away common spiders, believing that even the tiniest of such creatures might be serving Lolth's purposes. Drow priests frequently tame or befriend monstrous spiders by magic.

TROGLODYTE LORE

A character knows the following information with a successful Nature or Dungeoneering check.

DC 15: Troglodytes are stocky, foul-tempered reptilian humanoids known for their powerful stench. Various powerful Underdark races such as drow and mind flayers often enslave troglodytes, using them as fodder in their armies.

Troglodytes dwell in subterranean warrens, gathering in tribes of no more than thirty adults. When opposing troglodyte tribes meet, a territorial fight usually ensues. Such battles end either with the annihilation of one tribe or the merging of two battered tribes into one under a single leader. Both genders partake equally in scavenging, raids, and attacks on weaker troglodyte tribes.

DC 20: Troglodytes lay their eggs in dank caverns. Of the hundreds of eggs laid, only a few dozen hatch and survive to adulthood. A hatchling reaches adulthood in two years.

Troglodytes have minimal culture and technology. They do not take slaves, and any captives that fall into their clutches are quickly devoured or sacrificed.

DC 25: Troglodytes worship a variety of loathsome deities, particularly Torog, “the King That Crawls.” They strive to earn divine favor by torturing creatures in terrible rites lasting for hours. Troglodytes especially like to sacrifice intelligent creatures and brave enemies. They sometimes raid surface settlements for sacrificial victims.

ENCOUNTER GROUPS

Troglodyte raiding parties often include one or more drakes, and it's not unusual for a tribe of troglodytes to serve a dragon, naga, drow priestess, or other powerful creature.

TROLL

A TROLL EATS ANYTHING THAT MOVES, from grubs to humans, and is rightly feared for its ravenous appetite, feral cunning, and remarkable regenerative power.

Trolls can be trained to serve in military units. Highly adaptable and resilient, they are found just about anywhere and in any climate.

TROLL LORE

A character knows the following information with a successful Nature check.

DC 15: Trolls hunt most other living creatures and are unconcerned about the size or numbers of their prey. They regenerate quickly, even after they are “slain.” Their regeneration is so powerful, in fact, that trolls can regrow severed body parts. Only fire or acid can kill a troll, and trolls have a healthy fear of fire and acid for these reasons.

DC 20: Trolls travel in packs and without any migration pattern. They move until they discover an environment rich with prey, at which time they create a lair. Trolls then pillage the area for food until they’ve exhausted the resource. When trolls lair near an outpost or settlement, the result is the same: The trolls hunt until every living creature is devoured.

War trolls are more intelligent than the common troll, having been bred to wield weapons, wear armor, and employ tactics. War trolls typically travel from battle to battle in mercenary bands, selling their services to the highest bidder. War trolls are often fickle in their services, turning on a patron if the other side tempts them with a greater payment.

DC 25: Fell trolls are voracious carnivores that delight in gorging on humanoid prey. One or two such creatures can easily wipe out an entire village and devour all of its inhabitants in a single night.

VAMPIRE

SUSTAINED BY A TERRIBLE CURSE AND A THIRST FOR MORTAL BLOOD, vampires dream of a world in which they live in decadence and luxury, ruling over kingdoms of mortals who exist only to sate their darkest appetites.

VAMPIRE LORE

A character knows the following information with a successful Religion check.

DC 15: Contrary to popular folklore, vampires are not hampered by running water or repelled by garlic, and they don't need invitations to enter homes. Wooden stakes hurt them, but no more so than any other sharp weapon. A vampire does not cast a shadow or produce a reflection in a mirror.

DC 20: A vampire lord can make others of its kind by performing a dark ritual (see the Dark Gift of the Undying sidebar). Performing the ritual leaves the caster weakened, so a vampire lord does not perform the ritual often.

A lone vampire lord might lead a retinue of vampire spawn and other undead creatures.

VAMPIRE LORD

GIFTED AND CURSED WITH UNDEAD IMMORTALITY, vampire lords trade many of the abilities they had in life for dark powers, including the power to create broods of vampire spawn.

Vampire lord is a monster template that can be applied to nonplayer characters. See the *Dungeon Master's Guide* for rules on creating new vampire lords using the template.

THE VAMPIRE'S COFFIN

Each vampire lord and vampire spawn is bound to a personal coffin, crypt, or gravesite. It must rest there at least 6 hours per day, at least 4 hours of which must be during daylight hours. (A vampire that did not receive a formal burial or did not have a coffin must instead lie under a foot or so of loose grave dirt or within a dark cave.) A vampire that doesn't rest in its personal coffin or gravesite is reduced to half normal hit points and is weakened until it does.

A vampire can change its personal coffin or gravesite by resting three consecutive times in the new one.

Vampires in coffins are light sleepers; they can make Perception checks (at a -5 penalty) to hear enemies approaching.

VAMPIRE SPAWN TACTICS

Vampire spawn prefer to tear enemies apart with their claws rather than resort to using weapons.

CREATING VAMPIRE SPAWN

A living humanoid slain by a vampire lord's *blood drain* power rises as a vampire spawn of its level at sunset on the following day. This rise can be prevented by burning the body or severing its head.

A living humanoid reduced to 0 hit points or fewer—but not killed—by a vampire lord can't be healed and remains in a deep, deathlike coma. He or she dies at sunset of the next day, rising as a vampire spawn. A *Remove Affliction* ritual cast before the afflicted creature dies prevents death and makes normal healing possible.

VAMPIRE

DARK GIFT OF THE UNDYING

In the unholy name of Orcus, the Blood Lord, you transform another being into a vampiric creature of the night.

Level: 11 (caster must be a vampire lord)

Category: Creation

Time: 6 hours; see text

Duration: Permanent

Component Cost: 5,000 gp per level of the subject

Market Price: 75,000 gp

Key Skill: Religion

This ritual can be performed only between sunset and sunrise. As part of the ritual, you and the ritual's subject must drink a small amount of each other's blood, after which the subject dies and is ritually buried in unhallowed ground. After the interment, you invoke a prayer to Orcus and ask him to bestow the Dark Gift upon the subject. At the conclusion of the ritual, the subject remains buried, rising up out of its shallow grave as a vampire lord at sunset on the following day. (See the *Dungeon Master's Guide*, page 181, for rules on creating new vampire lords.) This ritual is ruined if a *Raise Dead* ritual is cast on the subject or if the subject is beheaded before rising as a vampire lord.

Performing the ritual leaves you weakened for 1d10 days (no save).

VINE HORROR LORE

A character knows the following information with a successful Nature check.

DC 15: Vine horrors are created naturally through an unusual sequence of events. When an evil humanoid dies in a wilderness location touched by the Shadowfell, its blood sometimes saturates the earth and infuses the local plant life. These plants twist and writhe into the form of one or more vine horrors.

DC 20: A vine horror often takes on aspects of the humanoid whose blood gave it life. For example, if the individual was a wizard, the vine horror might gain abilities similar to spells. The vine horror spellfiend is such a creature.

ENCOUNTER GROUPS

Vine horrors share the same hunting grounds as shambling mounds and have been known to hunt alongside them. They also serve hags, greenscale marsh mystics, and other intelligent swamp dwellers.

WRAITH

THIS RESTLESS APPARITION LURKS IN THE SHADOWS, thirsting for souls. Those it slays become free-willed wraiths as hateful as their creator.

WRAITH LORE

A character knows the following information with a successful Religion check.

DC 15: Infused with the necromantic essence of the Shadowfell, a wraith is a spirit bereft of soul and body—a hollow vessel containing minimal personality and knowledge, if any. It usually remains near where its physical form fell or was buried.

The touch of a wraith usually causes weakness. A mad wraith weakens the mind instead of the body, and its touch can even drive a creature to attack its allies.

DC 20: When a wraith slays a humanoid, that creature's spirit rises as a free-willed wraith of the same kind. With the aid of magic or ritual, and with the proper components, a necromancer can summon or even create a wraith. Other wraiths are born on the Shadowfell, and many remain there or enter the natural world through planar rifts and gates.

DC 25: When many people die abruptly, a dread wraith can coalesce from their collected spirits. Common wraiths can also evolve into larger, more malevolent wraiths over time.

YUAN-TI ARE CRUEL SERPENTINE TYRANTS descended from a powerful prehistoric race of snake people. Their ancient sprawling empires were corrupted and fell to ruin eons ago. Today, these empires are mostly forgotten.

Yuan-ti inhabit the jungles of the natural world, hiding amid crumbling ruins, building secret temples to Zehir (the god of poison and serpents), taking slaves, making sacrifices, and plotting to retake the world.

MALISONS REPRESENT THE BULK OF YUAN-TI SOCIETY. They are highly intelligent and manipulative, and they create powerful auras to aid their minions and allies. They regard their various bodyguards, cultists, and pets as their primary weapons, using them with care and precision.

Malisons have serpentine heads. Roughly half of them are born with legs, and the other half are born with snakelike lower torsos.

YUAN-TI LORE

A character knows the following information about yuan-ti with a successful Nature check.

DC 20: Yuan-ti malisons represent the bulk of yuan-ti society, accounting for 90 percent or more of a yuan-ti settlement's population (excluding nonyuan-ti slaves and worshipers). Some malisons are born with humanoid lower bodies while retaining an ophidian head. Whether they possess legs or a long serpent tail, malisons make superb intermediaries between races. They often work with human cultists who revere the snake god Zehir.

DC 25: Yuan-ti abominations are the elite troops and champions of yuan-ti society, overcoming threats that yuan-ti malisons, human cultists, and slaves are unable to defeat.

DC 30: Both the yuan-ti and their enemies fear yuan-ti anathemas. Anathemas were regarded as kings among their lesser kindred. However, they went mad and turned upon their own kind, savagely butchering their followers until they were overthrown. Anathemas are kept in subterranean prisons. Other yuan-ti regard them as holy creatures but fear that the anathemas would swarm, slay, and eat everything if released. Living sacrifices are dropped from high temple ziggurats down into anathema dens to placate them, lest they grow restless.

SNAKETONGUE CULTISTS

SNAKETONGUE CULTISTS ARE HUMAN WORSHIPERS OF ZEHIR who believe that the yuan-ti are Zehir's blessed emissaries in the natural world. Zehir and the yuan-ti reward the cultists' devotion with ritual transformations, bestowing upon the cultists minor reptilian traits.

Snaketongue cultists are fanatics, eager to die in Zehir's name. They take great risks to protect their yuan-ti allies from harm.

RACIAL TRAITS

Several of the monsters in the *Monster Manual* have racial traits and powers, not unlike the races presented in the *Player's Handbook*. In general, these traits and powers are provided to help Dungeon Masters create nonplayer characters (NPCs). This information can also be used as guidelines for creating player character (PC) versions of these creatures, within reason. Note that these traits and powers are more in line with monster powers than with player character powers.

A player should only use one of the following races to create a character with the permission of the Dungeon Master. The DM should carefully consider which monster races, if any, to allow as PCs in his or her campaign.

GLOSSARY

This chapter provides definitions and descriptions of monster characteristics that aren't spelled out in their stat blocks.

Aberrant [Origin]: Aberrant creatures are native to or strongly corrupted by the distant alien plane known as the Far Realm. Many aberrant creatures have tentacles, eyestalks, or other strange physical characteristics.

Acid [Keyword]: A type of damage.

Aftereffect: Some monster powers have aftereffects. An aftereffect happens automatically when a power's initial effect ends. A creature is only subjected to an aftereffect if it was hit by the power. An aftereffect doesn't trigger on a missed attack unless otherwise noted.

Air [Keyword]: Elemental creatures made of air (such as earthwind ravagers) have this keyword.

All-Around Vision: A monster with all-around vision can see in all directions, and flanking enemies don't gain combat advantage against it.

Angel [Keyword]: Angels are immortal creatures with vaguely humanoid forms and lower bodies that trail off into astral mist. Most angels have wings. Since they don't have mouths and cannot speak, angels communicate via telepathy. They do not breathe, eat, or sleep. However, this does not render the creature immune to any effect.

Animate [Type]: Animates are objects magically given life or intelligence. Animate creatures do not need to breathe, eat, or sleep, regardless of their origin.

Aquatic [Keyword]: An aquatic creature can breathe normally in water and ignores rough water while swimming. It never needs to make Athletics checks to swim.

Aura: An aura is a continuous effect that affects all squares within the listed range of the originating creature's space. An aura does not affect the originating creature unless the text specifies otherwise, and effects imposed by an aura last until the end of the affected creatures' next turn unless otherwise stated.

A creature can drop its aura or reactivate it as a minor action.

A creature usually suffers the effects of an aura at the start of its turn, upon entering the aura, or both, as noted in the aura's description.

Similar aura effects do not stack unless otherwise noted. For example, a creature that starts its turn in two auras, one that deals 5 cold damage and another that deals 10 cold damage, takes 10 cold damage.

An aura does not affect a creature that cannot be targeted by attacks that require line of effect. For example, a creature encased by the wizard's *ice tomb* power is immune to aura effects.

Beast [Type]: Beasts look and act like animals, although they sometimes have a bizarre or monstrous appearance. Natural beasts fill the same role as animals. Beasts with other origins behave in the similar instinctive ways, though they are unfamiliar to ordinary people.

Blind [Keyword]: A blind creature cannot detect creatures and objects by sight. It relies on special senses, such as blindsight or tremorsense, to detect things within a certain range. A blind creature cannot make Perception checks to notice things beyond the range of its special senses. A blind creature cannot be blinded.

Blind creatures are immune to gaze attacks and other effects that rely on sight.

Blindsight: A monster with blindsight can perceive creatures and objects within the stated number of squares, making Perception checks as normal. The creature automatically fails Perception checks to notice things outside of the range of its blindsight.

A monster with blindsight suffers no ill effects while blinded.

Burrow [Movement Mode]: A monster with a burrow speed can move through loose earth at the stated speed and move through solid stone at one-half its burrow speed. A monster can't shift or charge while burrowing.

A monster can't be seen while it's burrowing, but it can be heard with a successful Perception check (opposed by the monster's Stealth check).

Tunneling: This monster leaves tunnels behind it as it burrows. The monster, as well as creatures of smaller size categories, can move through these tunnels without any reduction in speed. Other creatures of the monster's size must squeeze through these tunnels, and larger creatures cannot navigate them at all. See the *Player's Handbook* for squeezing rules.

Change Shape (Polymorph): The creature can alter its physical form to take on the appearance of another creature. The type and size of the new form is specified in the creature's entry.

The creature retains its statistics in its new form, and its clothing, armor, and possessions do not change and are not absorbed into the new form. The new form lasts until the creature changes it or until it dies.

If the creature is capable of assuming the form of a unique individual, other creatures can attempt an Insight check (opposed by the monster's Bluff check) to pierce the disguise. The creature must have seen the individual it is imitating and gains a +20 bonus to its Bluff check.

Changing shape requires a minor action unless otherwise specified.

Charm [Keyword]: Powers and effects that control the subject's actions sometimes have this keyword.

Climb [Movement Mode]: A monster with a climb speed can move on vertical surfaces at the listed speed without making an Athletics check. However, it can't shift or charge while climbing.

Spider Climb: The monster can climb across overhanging or horizontal surfaces (such as ceilings) at the stated speed without making a check.

Cold [Keyword]: A type of damage. Creatures made of ice (such as ice archons) also have the cold keyword.

Combat Advantage: In addition to the normal +2 bonus to attack rolls, the monster gains the stated benefit when it has combat advantage against its target and hits with an attack. Typically this entry lists a damage bonus, but some creatures can impose effects against the target as well.

This entry does not describe a power that requires combat advantage to use; such powers indicate this restriction in their text.

Conjuration [Keyword]: An effect that creates a creature or object out of nothing. A conjuration effect can be dispelled using the *dispel magic* spell.

Construct [Keyword]: Constructs are not living creatures; spells and effects that specifically target living creatures do not work against them.

Most constructs have resistance or immunity to disease and poison. Constructs do not need to breathe, eat, or sleep.

Darkvision: A monster with darkvision can see in dim light and darkness without penalty.

Deceptive Veil (Illusion): The monster can alter its appearance through illusion. The entry specifies the type and size of the form it can take. The monster's statistics remain unchanged. A successful Insight check (opposed by the monster's Bluff check) allows an observer to notice that the monster is disguised by an illusion.

Changing appearance requires a minor action unless otherwise specified.

Demon [Keyword]: Demons are evil elemental creatures native to the Abyss. They breathe and eat, but do not sleep. They are not immune to sleep effects, however.

Devil [Keyword]: Devils are evil immortal creatures native to the Nine Hells. They breathe and eat, but do not sleep. They are not immune to sleep effects, however.

Disease [Keyword]: Some monsters, such as slaads and lycanthropes, inflict disease on creatures they hit. A creature that contracts a disease makes a saving throw at the end of the encounter. If the saving throw succeeds, the creature shakes off the disease and suffers no ill effects. If the saving throw fails, the creature is infected and suffers the initial effect of the disease.

An infected creature makes an Endurance check after each extended rest to see if it improves, worsens, or maintains its current condition. The disease specifies two target Endurance DCs. If the creature's check result beats both DCs, the creature moves one step up the disease track as its condition improves. If the creature's check result beats the lower DC but not the higher DC, its condition remains the same. If the creature's check result doesn't beat either DC, the creature's condition worsens, and it moves one step down the disease track.

When a creature reaches the far left of the disease track, it is cured. When a creature reaches the far right of the disease track, it suffers the final effect of the disease. Once a creature suffers the final effect, it no longer moves up the disease track and can only be cured by the Cure Disease ritual (unless otherwise noted).

Dragon [Keyword]: Dragons are reptilelike creatures. Most dragons have wings as well as some kind of breath weapon.

Earth [Keyword]: Elemental creatures made of earth (such as galeb duhrs) have this keyword. Earth creatures are immune to petrification.

Earth Walk: See Terrain Walk.

Elemental [Origin]: Elemental creatures are native to the Elemental Chaos or the Abyss. They are strongly tied to elemental energies or substances.

Elite: An elite monster counts as two monsters of its level for encounter building and rewards.

Fear [Keyword]: Powers and effects that impose penalties through fright or cause the affected creature to flee carry this keyword.

Fey [Origin]: Fey creatures are native to the Feywild.

Fire [Keyword]: A type of damage. Elemental creatures made of fire (such as fire archons) also have this keyword.

Fly [Movement Mode]: A monster with a fly speed can move over creatures and objects at the stated speed. It must spend a move action to move at least 2 squares each round, or else it crashes. It can't shift while flying, and it provokes opportunity attacks as normal.

A flying creature ignores terrain effects.

Altitude Limit: The monster can't fly higher than the indicated number of squares off the ground. If it flies higher than this limit, it crashes at the end of its turn even if it drops back below the limit.

Clumsy Flying: A clumsy flier takes a -4 penalty to attack rolls and defenses while flying. This creature is ill-suited to flying in the air.

Clumsy Grounded: A creature that is clumsy while grounded (such as a bat) takes a -4 penalty to attack rolls and defenses when on the ground, not flying.

Hover: A monster that can hover can shift and make opportunity attacks while flying. It remains flying even if it does not move the minimum distance normally needed to remain aloft. It even stays in the air even if it takes no move actions to fly.

Overland Flight: Overland flight is meant to be used outside of combat. A creature loses its minor, immediate, and standard actions while flying at its overland flight speed, and can use its move action only to fly. It flies the specified number of squares with a single move action. If it takes actions to do anything else, it crashes.

Force [Keyword]: A type of damage.

Forest Walk: See Terrain Walk.

Gaseous Form: The monster's body is similar to a cloud of gas, or the monster can take this form. (All of the monster's gear is absorbed into its gaseous form.) While gaseous, the monster is insubstantial and gains a fly speed equal to its land speed, as well as the ability to hover.

A monster cannot make attacks while in gaseous form unless otherwise noted, but it can move unhindered through porous obstacles that would otherwise prevent movement (such as under a door or through a cracked window).

Gaze [Keyword]: A type of attack. Blind creatures are immune to gaze attacks, and a creature cannot make a gaze attack while blinded.

Giant [Keyword]: A giant is a humanoid creature of at least Large size.

Healing [Keyword]: Powers and effects that restore hit points have this keyword.

Homunculus [Keyword]: A homunculus is an animate construct tasked with guarding a specific creature, area, or object.

Humanoid [Type]: Humanoid monsters are usually bipedal, but some have monstrous or animalistic characteristics, such as the squidlike head of a mind flayer or the serpentine body of a yuan-ti abomination.

Ice Walk: See Terrain Walk.

Illusion [Keyword]: Powers and effects that deceive the senses or the mind use this keyword.

Immortal [Origin]: Immortal creatures are native to the Astral Sea. They include angels, devils, and other creatures with strong ties to the gods. They do not age or die of natural causes.

Immune: The monster has immunity to the stated kind of damage or effect. For example, a monster with “immune poison” never takes poison damage and can’t suffer any other ill effect from a poison attack.

Insubstantial: The monster lacks a body that has physical substance and vital areas. It takes half damage from all sources.

If a monster is insubstantial, this is noted in the Resist entry of its statistics block.

Lightning [Keyword]: A type of damage.

Living Construct [Keyword]: A living construct is considered a living creature that does not need to eat, drink, or breathe. However, this does not render the creature immune to any effect. A living construct needs only 4 hours to benefit from extended rest, and it gains a +2 bonus to saving throws against ongoing damage. When a living construct rolls a death save, it takes the better of its die roll or 10 as the result.

Low-Light Vision: A monster with low-light vision can see in dim light as though it were bright light.

Magical Beast [Type]: A magical beast looks like a beast but acts like a person. Magical beasts often superficially resemble animals, sometimes with a human face or head, but are more intelligent (Intelligence 3 or higher).

Minion: Minions are designed to serve as shock troops and cannon fodder for other monsters (standard, elite, or solo). Four minions are considered to be about the same as a standard monster of their level. Minions are designed to help fill out an encounter, but they go down quickly.

A minion is destroyed when it takes any amount of damage. Damage from an attack or from a source that doesn’t require an attack roll (such as the paladin’s *divine challenge* or the fighter’s *cleave*) also destroys a minion. However, if a minion is missed by an attack that normally deals damage on a miss, it takes no damage.

Mount [Keyword]: Not all monsters that can be ridden as mounts have the mount keyword. This keyword is applied only to creatures with special mount rules, such as an ability gained when ridden or an ability granted to the rider. These rules and benefits only apply if the rider has the Mounted Combat feat.

For mount rules, see the *Dungeon Master’s Guide*.

Natural [Origin]: Natural creatures are native to the natural world—the world of humans, dwarves, elves, halflings, and dragons. Most natural creatures breathe, eat, and sleep. Natural creatures with the construct or undead keyword are exceptions.

Necrotic [Keyword]: A type of damage.

Ongoing Damage: A creature suffering from ongoing damage takes the damage at the start of its turn, before it takes any actions.

Ooze [Keyword]: Oozes are amorphous creatures that rely on blindsight, tremorsense, or both to discern their surroundings. They don’t suffer penalties to attack rolls or penalties to their speed while squeezing. See the *Player’s Handbook* for squeezing rules.

Phasing: A phasing creature ignores difficult terrain and can move through obstacles and other creatures, but it must end its movement in an unoccupied space.

Poison [Keyword]: A type of damage.

Polymorph [Keyword]: Powers and effects that alter a creature’s physical form have this keyword.

Plant [Keyword]: Plants are creatures composed of vegetable matter. They breathe and eat, but do not sleep. They are not immune to sleep effects, however.

Psychic [Keyword]: A type of damage. Some nondamaging effects that target the mind also have the psychic keyword.

Pull: Some monsters have powers that let them pull other creatures toward them. A pulled target moves closer to the monster, up to the stated number of squares or to the specified location—in either case, the target ends up closer to the monster.

A pulled creature doesn’t provoke opportunity attacks, and it ignores difficult terrain. See the *Player’s Handbook* for more information about forced movement.

Push: Some monsters have powers that let them push other creatures away from them. A pushed target moves farther away from the monster, up to the stated number of squares.

A pushed creature doesn’t provoke opportunity attacks, and it ignores difficult terrain. See the *Player’s Handbook* for more information about forced movement.

Radiant [Keyword]: A type of damage.

Regeneration: Each round at the start of its turn, the monster regains hit points equal to the stated amount. This ability functions until the creature is reduced to 0 hit points.

Some types of regeneration can be suppressed by certain types of damage or by specific circumstances, and some monsters can use regeneration only under specific circumstances (for example, only while bloodied).

Reptile [Keyword]: Reptiles are cold-blooded creatures that lay eggs. Examples include crocodiles, drakes, lizardfolk, snakes, troglodytes, and yuan-ti.

Resist: The monster takes less damage from the specified damage type. For example, a monster with resist 10 fire takes 10 less damage from fire attacks.

Sometimes a monster’s resist entry includes an ability that reduces damage in general, such as insubstantial.

Variable Resistance: As a free action, the monster chooses a type of damage from the following list: acid, cold, fire, lightning, or thunder. The monster gains the specified amount of resistance to the chosen damage type for the rest of the encounter, and this replaces any resistance the monster already had against that damage type. This is an encounter power unless otherwise noted. If a monster can use this ability more than once per encounter, it can resist only one type of damage from this ability at any one time.

A monster can’t use this ability to resist a damage type to which it has vulnerability.

Shadow [Origin]: Shadow creatures are native to the Shadowfell.

Shapechanger [Keyword]: This monster has the innate ability to alter its form, whether freely or into specific shapes. Examples of shapechangers include doppelgangers and lycanthropes.

Sleep [Keyword]: Powers and effects that render a creature unconscious have this keyword.

Slide: Some monsters have powers that let them forcibly move other creatures around the battlefield. The monster moves the target in any direction parallel to the ground, up to the stated number of squares.

Slide movement doesn't provoke opportunity attacks, and it ignores difficult terrain. See the *Player's Handbook* for more information about forced movement.

Solo: A solo monster is worth the same amount of XP as five monsters of its level, and it should provide about the same challenge.

Spider [Keyword]: Spider monsters include arachnids as well as creatures with spiderlike features: eight legs, web spinning, and the like. Examples include driders and ettercaps.

Sustain: The monster can sustain the power's effect until the start of its next turn, usually as a standard or minor action. If the power requires an attack roll, the attack must succeed before the monster can sustain the power.

Swamp Walk: See Terrain Walk.

Swarm [Keyword]: A swarm is considered a single monster even though it is composed of several Tiny creatures. Most single swarms are Medium, but some can be larger.

A swarm takes half damage from melee and ranged attacks. It is vulnerable to close and area attacks, as indicated in the monster's stat block.

A swarm is immune to forced movement (pull, push, and slide) effects from melee and ranged attacks. Close or area attacks that impose forced movement affect the swarm normally.

A swarm can enter or move through an enemy's space; this movement does not provoke opportunity attacks. An enemy can enter a space occupied by a swarm, but the space occupied by the swarm is considered difficult terrain, and doing so provokes an opportunity attack.

A swarm can squeeze through any opening large enough to accommodate even one of its constituent creatures. For example, a swarm of bats can squeeze through any opening large enough for one of the bats to squeeze through. See the *Player's Handbook* for squeezing rules.

Telepathy: A creature with telepathy can speak telepathically with any other intelligent creature that has a language. The range of the telepathy is measured in squares and is specified in the monster's entry. The telepathy allows for two-way communication.

Teleportation [Keyword]: Powers and effects that transport a creature instantaneously from one location to another use this keyword.

A creature that teleports is removed from play at the origin square and placed in the destination square. Teleporting does not provoke opportunity attacks, and the creature does not move through the intervening squares.

Unless stated otherwise, a creature must have line of sight to the destination to teleport there.

Terrain Walk: The monster ignores difficult terrain in encounter areas where the stated environment predominates.

Earth Walk: The creature ignores difficult terrain if that terrain is the result of rubble, uneven stone, or earth.

Forest Walk: The creature ignores difficult terrain if that terrain is the result of trees, underbrush, plants, or natural growth.

Ice Walk: The creature ignores difficult terrain if that terrain is the result of ice or snow.

Swamp Walk: The creature ignores difficult terrain if that terrain is the result of bog, mud, or shallow water.

Threatening Reach: This creature can make opportunity attacks against any opponents within its reach.

Thunder [Keyword]: A type of damage.

Tremorsense: The monster can perceive creatures and objects within range and in contact with the ground or another shared surface (such as a web or water) as if it has line of sight, without needing to make a Perception check.

Truesight: The monster automatically sees through illusions within the specified range (in squares) and within its line of sight.

Undead [Keyword]: Undead are not living creatures; spells and effects that specifically target living creatures do not work against them. Most undead have resistance to necrotic damage, are immune to poison, and are vulnerable to radiant damage. Undead do not need to breathe or sleep.

Vulnerable: When an attack deals damage of the specified type, this monster takes the indicated amount of extra damage of the same type. For example, a monster with vulnerable 10 radiant takes 10 extra radiant damage from radiant attacks that deal damage.

Water [Keyword]: Elemental creatures made of water (such as thunderblast cyclones) have this keyword.

Weapons: Characters can pick up and use a monster's weapons unless otherwise noted. If the weapon is listed in the *Player's Handbook* or it is a larger version of a PH weapon, use the rules for it found there. Otherwise, the characters lack proficiency with it, and the weapon deals its listed damage but gains none of the other effects that a monster gains from it.

Zone [Keyword]: Zones are persistent area effects that can be dispelled using the *dispel magic* spell.
