## Yu-Men

Pick any modern human name. Using your own name is encouraged.

## Zebra

Most Zebra names consist of three elements, words or characters. The surname or family name comes first, then the generation name. This is given to all children in a family, brothers, sisters and cousins. Last comes the personal name, which is carefully chosen to make a lucky meaning when combined with the generation name. Single element names do occur when the generation name is not used. Elements or characters can be used for boys or girls - flower names are not necessarily **Female**, for instance.
